Mr. GOFF. Are we to be deterred from enacting legislation, then, upon the mere idea that some dissatisfied citizen of the country will take it into court? Are we not to determine what the court will do after the litigant has submitted the matter to the consideration of the court? And, if it be reasonable in our view, are we to be prevented from acting because some dissatisfied citizen of the country will ask the courts to decide the

Mr. CUMMINS. Oh, no; Mr. President. It is embarrassing to be interrupted by such a question, although I am not at all reproaching the Senator from West Virginia. I spent two hours last night trying to show that this requirement was unreasonable, unjust, unfair; and now that I am pursuing that argument with a suggestion of the legal principles that would be applied if my view be correct that the requirement is unjust and unreasonable and unfair and unnecessary, I am asked what a court would do if the case were presented to it. Of course my legal argument is all based upon a postulate which I fear the Senator did not observe.

Mr. GOFF. I beg the Senator's pardon. I was not in the Senate Chamber last evening, and probably should not be here to-day if I were to consult my own health. The Senator has withheld his remarks from the RECORD or I should have read

Mr. CUMMINS. I hope the Senator from West Virginia will not think I am impatient. I am only impatient about one thing, and that is about getting through, for I have already occupied

vastly more time than I should.

I refer also to the case of Covington & Lexington Turnpike Road Co. v. Sandford (164 U. S., 578), just for a word. There the court again held—and this opinion was delivered by Mr. Justice Harlan—that the charter of the railway company was subject to alteration and repeal; but it said:

It is now settled that corporations are persons within the meaning of the constitutional provisions forbidding the deprivation of property without due process of law, as well as a denial of the equal protection of the laws.

Citing cases. And-

\* there is a remedy in the courts for relief-

Now, mark-

against legislation establishing a tariff of rates which is so unreasonable as to practically destroy the value of the property of companies engaged in the carrying business, and that especially may the courts of the United States treat such a question as a judicial one, and hold such acts of legislation to be in conflict with the Constitution of the United States, as depriving the companies of their property without due process of law.

Mr. President, in what are known as the Sinking Fund cases the Supreme Court probably went further than in any other judicial utterance with respect to this very matter. Judicial litterance with respect to this very matter. As senators will remember, the Sinking Fund cases related to the Union Pacific Railroad Co. When that company was organized, the law required that it should deposit or reserve 5 per cent of its net earnings as a sinking fund in order to meet its funded obligations, and that one-half of the sum that might become due from the United States to the Union Pacific Railroad Co. should be also reserved in order to meet eventually the debt to the United States. In 1878 Congress passed a law which required the Union Pacific Railway Co. to deposit with the Secretary of the Treasury 25 per cent of its net earnings in order to create a sinking fund which would ultimately pay the funded debt upon maturity, and it also provided that all of the sums that might become due from the Government to the Union Pacific Railway Co. for the transfer of troops and other things of that sort should be likewise withheld.

That act was challenged upon the same ground that I am challenging the bill before us. I have not time to read the decision. It is too long. It is very interesting. The opinion of the majority, rendered by Chief Justice Fuller, is one of the notable examples of cogent reasoning. The dissenting opinionconcurred in, as I remember, by three of the judges—is another brilliant example of legal literature. We had just as great power over the Union Pacific Co. as we have over these banks, and the act was passed for the alleged benefit of the Union Pacific Co. and its creditors. The act was sustained solely because it was said that the deposit of the net earnings did not change the title to the property; that the United States became the trustee to hold these net earnings for the benefit of bond-holders, and that the fund in the hands of the Government was

property belonging to the railway company.

No one can read that opinion without feeling sure that if Congress had attempted to take from the Union Pacific Railway Co. 25 per cent of its net earnings and to transfer the title to them to any person whomsoever, the act would have been regarded as a clear violation of the fifth amendment to the Con-I can not but believe that an examination of the stitution. opinion in that case will be conclusive upon the point I am now

considering.

I promised the Senator from Colorado to refer to the Oklahoma bank-guaranty case. I must not do it. I said, in response to his question, all I care to say about it, unless the matter shall arise again in the course of this debate. The Supreme Court sustained the Constitution of the State of Oklahoma on the ground that the assessment laid upon the banks in order to create a guaranty fund was an exercise of the police power or the taxing power of the State, and therefore that it was constitutional, and it was not taking private property for public use without just compensation, nor depriving the banks of their property without due process of law. There is a very clear, palpable distinction between what Oklahoma did respecting its banks and what we are trying here to do in regard to the national banks. I should be glad, indeed, to read the opinion, but I shall not do it at this time. If the view I have taken of the subject shall come into question hereafter, I may then embrace the opportunity to comment further upon it.

I conclude by saying that no law which offends the moral sense, no law which contravenes our natural conception of justice, no law which violates the civilized instincts of humanity, can long endure nor be successfully put into operation. I feel like appealing to my Democratic friends, who are the autocrats of this measure, who will determine its form, who will determine its scope, not to depart from the purpose they have in view, for it is a purpose in which we all concur; but I appeal to them not to invite the uncertainty, the doubt, the disaster that may ensue from the exercise of this power, which I believe to be unwarranted under the Constitution of the United States.

Mr. ROOT obtained the floor.

Mr. GALLINGER. Mr. President, will the Senator yield for a moment?

Mr. ROOT. Certainly.

Mr. GALLINGER. There is a very small attendance of Senators, and I suggest the absence of a quorum. The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Gallinger Goff Hitchcock Hollis Hughes James Ashurst Shively Smith, Ga. Smith, Md. Smith, S. C. Stephenson Sterling Norris O'Gorman Oliver Owen Page Perkins Bacon Bankhead Borah Bradley Brady Brandegee Bristow James
Kenyon
Kern
Lane
Lawis
Lippitt
McCumber
McLean
Martin, Va.
Martine, N. J.
Myers Pittman Poindexter Pomerene Ransdell Stone Thompson Tillman Bryan Chilton Clapp Clark, Wyo, Clarke, Ark. Townsend Vardaman Reed Robinson Root Shafroth Walsh Colt Weeks Crawford Cummins Sheppard

The VICE PRESIDENT. Sixty-three Senators have answered to the roll call. There is a quorum present.

Mr. ROOT. Mr. President, I ask that the Secretary read the amendment to section 16 of the pending currency bill which I presented a few days ago and which now lies upon the table.

The VICE PRESIDENT. The Secretary will read the amend-

The Secretary. In section 16 (Owen print of December 1) strike out lines 24 and 25, on page 37, and lines 1 to 9, inclusive, on page 38, and insert in lieu thereof the following:

The Federal reserve banks may from time to time, with the consent and approval of the Federal reserve board, issue notes to meet business requirements.

The said notes shall be obligations of the Federal reserve bank issuing the same and shall be receivable for all taxes, customs, and other

Ing the same and shall be receivable for all taxes, customs, and other public dues.

They shall be redeemable in gold on demand at the Treasury Department of the United States in the city of Washington, D. C., or in gold or lawful money at the bank of issue.

All note issues of the Federal reserve banks shall at all times be covered by legal reserves to the extent required by this section and by notes or bills of exchange arising out of commercial transactions, or obligations of the United States.

All demand liabilities, including deposits and note issues, of the Federal reserve banks shall be covered to the extent of 50 per cent by a reserve of gold or other money of the United States which the national banks are now authorized to hold as a part of their legal reserve: Provided, That whenever and so long as such reserve shall fall and remain below 50 per cent the Federal reserve bank shall pay a special tax upon the deficiency of reserve at a rate increasing in proportion to such deficiency, as follows: For each 2½ per cent or fraction thereof that the reserve falls below 50 per cent a tax shall be levied of 1½ per cent: Provided further, That no additional circulating notes shall be issued whenever and so long as the amount of reserve held by any Federal reserve bank falls below 33½ per cent of its outstanding notes.

Any notes of the Federal reserve banks in circulation at any time in the state of the federal reserve banks in circulation at any time in the state of the federal reserve banks in circulation at any time in the federal reserve banks in circulation at any time in the federal reserve banks in circulation at any time in the federal reserve banks in circulation at any time in the federal reserve banks in circulation at any time in the federal reserve banks in circulation at any time in the federal reserve banks in circulation at any time in the federal reserve banks in circulation at any time in the federal reserve banks in circulation at any time in the federal reserve banks in circulation at any

shall be issued whenever and so by any Federal reserve banks in circulation at any time in notes.

Any notes of the Federal reserve banks in circulation at any time in excess of an aggregate of \$900,000,000 for all of said banks, which are not covered by an equal amount of lawful money, gold buildon, or foreign gold coir, held by said banks shall pay a special tax at the rate of 15 per cent per annum, and any notes in excess of an aggregate of \$1,200,000,000 for all said banks, not so covered, shall pay a special tax at the rate of 5 per cent per annum: Provided, That in computing said amounts of \$900,000,000 and of \$1,200,000,000 the aggregate amount of any national-bank notes then outstanding shall be included. The notes issued by the respective Federal reserve banks shall constitute a first lien upon all the assets of the bank issuing the same. It shall be the duty of the Federal reserve board to require the Federal reserve banks to maintain at all times the parity of value of the notes issued by said banks with the standard established by the first section of the act of March 14, 1900, entitled "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes."

Mr. ROOT. Mr. President, before proceeding to point out the specific effect of the proposed amendment which has just been read, I wish to repeat an acknowledgment which I have already made in the Senate of grateful appreciation for the devoted and sincere labors of the members of the Senate Committee on Banking and Currency. This acknowledgment applies to all the members of that committee, however their conclusions differ, as represented by the different forms of the bill which are before us. I wish also to say that I think this bill has in it many very excellent and useful features which will be beneficial to the commerce of our country, and which ought to be

I regret that the circumstances under which the measure comes before the Senate are not more favorable to real discussion. I am not one of those who denounce caucuses and attempts to secure united party action. Under my own conception of a government by political parties, membership in a party involves certain obligations to attempt agreement upon that united party action which is necessary to discharge party responsibilities. I do not think that the declaration of affiliation with a political party should be regarded as merely a means of obtaining office, to be forgotten after office is obtained. I think that when by declaring himself a member of a political party a man has secured an election to office by his fellow citizens, he has assumed toward them an obligation to seek to do his part toward discharging the responsibility of his party in putting into effect the policies which it declares.

So, sir, I do not regard with the animosity and great disfavor which have been expressed with great sincerity by some of my colleagues the attempt of the Democratic Party to secure effective action along the line of their party declarations and principles.

But, sir, I think it is very unfortunate that the Democrats of the Senate have taken their caucus action in advance of dis-cussion on this bill in the Senate rather than after discussion. I think it would have been much better if the bill had been reported to the Senate so that we all could have discussed it, so that differing opinions from different points of view could have been expressed, and then after the benefit of that discussion the dominant party had assembled and determined its course of action. There would then have been more zest and life and sense of opportunity on the part of the members of the minority in discussing the bill.

Certainly, sir, one of the chief advantages in our system of representative government is that it does give to those who hold the power by virtue of being in the majority the benefit of the differing points of view of the minority. Discussion is most valuable when it involves an expression of those who differ, and not when it is a mere presentation of the views of those who As it is, all of us on this side of the Chamber labor under the great discouragement of feeling that whatever we may say the fate of the bill and of every part of the bill is already determined.

Mr. OWEN. Mr. President—
The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Oklahoma?

Mr. ROOT. Certainly. Mr. OWEN. I do not wish to interrupt the Senator, but I think it only proper to remind him that the conference which was held upon this measure was held in the light of the suggestions made after a prolonged examination by the Republican members of the committee and the Democrats together, and finally the draft of a proposed amendment by the Republican members, that that was taken under consideration, and that the conference is not at all precluded by any action it has taken from further conference in case anything transpires on

Account of which it is thought necessary to have that done.

Mr. VARDAMAN. That was understood.

Mr. OWEN. I think I may fairly say it was understood that the conference should consider any further matter that

might arise which seemed to make it necessary.

Mr. WILLIAMS. If the Senator from New York will pardon me, this course was taken substantially with regard to the tariff bill, and yet several suggestions made upon the floor— I remember one by the Senator from Connecticut [Mr. Brande-GEE]-coming from the minority were subsequently adopted by the Democratic caucus and put into the bill.

Mr. ROOT. I am glad, Mr. President, to have this ray of hope. Of course, we all have great confidence in the minority members of the Committee on Banking and Currency, but they are a very small part of the Members of the Senate, and the expression of their views in committee can not be deemed to be a complete substitute for an expression of the views of Senators representing their constituents. In that committee, for example, there was no respresentative of the great State of Pennsylvania, with its vital interests in the complicated system which is to be affected by this currency bill.

As to the effect of the Democratic caucus or conference, while there is a little hope, it is rather slight, because, as the Senator from Iowa [Mr. CUMMINS] pointed out yesterday, the burden is not to produce an effect upon individual members of the majority, but it is to convince a majority of the majority that they ought to reverse the conclusions which have already been reached—a very difficult thing to do. I am grateful to my friends upon the other side for permitting me to address myself to a task which is not, at least theoretically, impossible, however practically improbable its accomplishment may be.

The point toward which the amendment just read is directed is the sixteenth section of the currency bill. I have used and read from the print of December 1, 1913, entitled "Amendment intended to be proposed by Mr. Owen to the bill H. R. 7837." I think there has been another print with some slight modifications, but I think no modifications which affect the matters as to which I shall speak. I therefore continue to use the paper which I used in preparing my own mind for what I have to say.

Let me read the provision which I ask to have striken out, under the head of "Note issues":

SEC. 16. Federal reserve notes, to be issued at the discretion of the Federal reserve board for the purpose of making advances to Federal reserve banks through the Federal reserve agents as hereinafter set forth and for no other purpose, are hereby authorized. The said notes shall be obligations of the United States and shall be receivable for all

taxes, customs, and other public dues. They shall be redeemed in gold on demand at the Treasury Department of the United States, in the city of Washington, D. C., or in gold or lawful money at any Federal

You will perceive that that provision contains in its terms no Hmit whatever upon the quantity of notes that may be issued:

Federal reserve notes, to be issued at the discretion of the Federal serve board for the purpose of making advances to Federal reserve

banks. The said notes shall be obligations of the United States.

That, sir, is to my view a plain, simple enlargement of the national currency of the United States. It is authority for the increase, practically, of what we call greenbacks. The notes will be obligations of the Government of the United States pure and simple. They are not credits of anybody else; they are credits of the Government of the United States. While technically they are not proposed by nically they are not money but are promises of the United States to pay, I shall speak of them as money, just as we speak of our greenbacks as money, because in the ordinary colloquial use of words that description is best understood.

Let me state now, before going on to consider further incidents to this issue of Government currency, the present position of our currency, because that is a necessary background to a consideration of the effect and propriety and usefulness of

issuing more Government paper.

According to the report of the Comptroller of the Currency for 1913, the total stock of money in the United States on the 30th of June, 1913, was as follows:

In the entire United States there were \$3,720,000,000. that there were in the Treasury of the United States, held as assets against currency, \$356,300,000, leaving in circulation \$3,363,700,000.

Of that there were in the banks of the United States, of that there were in the banks of the United States, including national banks, State banks, and trust companies, \$1,552,300,000, leaving out of the banks and in circulation among the people—that is, in real circulation—\$1,811,400,000.

On the basis of this currency and by the use of credits representing currency there were at the same time individual description in the banks of the United States of all the discrete.

posits in the banks of the United States of all the classes that I have enumerated, \$17,024,000,000, the deposits being approximately nine to ten times the amount of actual money in circulation, and from ten to eleven times the amount of the actual money in the banks, this great excess of deposits being brought about by the deposit of credits, the same amount of money serving for numerous successive credits.

This money appears by the report of the Secretary of the Treasury for 1913 to have been of the kinds I shall state. Let me say that the figures of the comptroller were for the 30th of June, 1913, while the figures of the Secretary of the Treasury are for the 1st of November, 1913. They will not tally exactly, but there are only the ordinary variations from day to day, and the differences are so slight that it is of no consequence for our purposes.

This money was of the following description: Of gold coin, \$614,478,201; of standard sliver dollars, \$74,012,152; of subsidiary silver, \$160,486,188; of gold certificates, \$1,021,451,879; silver certificates, \$480,079,731; of Treasury notes of 1890, \$2,583,874; of United States notes, that is, greenbacks, \$341,-401,413; and of national-bank notes, \$722,615,240; footing up on the 1st of November, 1913, \$3,417,109,678.

In this enumeration of the kinds of money the Government appears as having issued, not including gold certificates, which really represent gold deposits—which are a trust fund against the certificates—the Government appears as having issued its paper, practically its promises to pay, of greenbacks, \$341,401,413; of Treasury notes of 1890, \$2.583,874; and of silver certificates against the silver on deposit, \$480,079,731, making a total of \$824,064,118 of Government obligations. Against that the Government had of gold reserves \$150,000,000 and of silver deposited, upon which it had issued certificates, which the Gov-ernment is under obligation to keep on a parity with gold, and which is, speaking roughly, worth about one-half of gold, \$480.079,739. I treat one-half of that silver as being security or reserve against the silver certificates; a little more or less is of no consequence. So that, as against this \$824,064,118 of its demand obligations, the Government has in reserve in gold and silver value \$301,331,000. It is now proposed to increase that amount of \$824,064,118 of demand obligations of the Government by the issue of further Government obligations under the provisions of section 16, which I have read. The section proceeds to provide that the Government, in issuing these notes and advancing them to the reserve banks, shall take security from banks, and that the banks shall hold in their vaults as applicable to making good to the Government the notes which have been issued to them a reserve. The reserve is to be 35 per be retained for reserve purposes. Of course it makes no dif-

cent; and it is required that at least 33% per cent of that amount of notes issued to the banks shall be based on gold.

The bank is also to furnish to the Government, through a Federal reserve agent representing the Government, commercial paper to the amount of the notes. Those two kinds of security are provided for; a security which, if the Government were loaning money to you or to me in a specific transaction, I should say should be deemed adequate security, and manifestly the members of the committee have regarded the provision as furnishing adequate security to the Government in respect of the particular transaction considered by itself. It is not, however, consideration of the transaction by itself as a simple matter of the loan of money or of credits upon securities to which I wish to invite your attention. I think that the relation of the series of transactions, of the possibilities of the powers vested in this central reserve board, and the effect of the exercise of that power as a whole from time to time, day after day, month after month, and year after year, upon our financial system, upon the commerce of the country, is the true subject for our consideration rather than the narrow question whether in a particular transaction the security which the Government gets for its loan is adequate.

Mr. President, it is desirable to get some idea as to what limitations upon this power to issue Government obligations, that by its own terms has no limit, may be created by the requirement that the bank shall retain security in the way of reserves, because that will give some idea of the extent to which the

power may be exercised.

In the first place, the obligation that the bank shall hold a reserve will tend to operate to some extent as a limitation, because, if the banks do not hold a reserve, the Federal reserve board would not be justified in advancing further notes to them, and would be bound perhaps, then, to reduce the number they

already had. Here is the provision of the bill:

already had. Here is the provision of the bill:

Every Federal reserve bank shall maintain reserves in gold or lawful money of not less than 35 per cent against its deposits and its Federal reserve notes in actual circulation, but the amount of gold in the Federal reserve bank, together with the amount deposited by it with the Treasury, shall be at least equal to 33½ per cent of the Federal reserve notes issued to said bank and in actual circulation and not offset by gold or lawful money deposited with the Federal reserve gent. The Federal reserve board may notify any Federal reserve lank whose lawful reserves shall be below the amount required to be maintained to make good such reserve; and if such bank shall fail for 30 days thereafter so to make good its lawful reserve, the Federal reserve board may suspend and take possession of such reserve bank and administer the same during the period of suspension.

Assuming that that reserve is to be retained, the Senator from

Assuming that that reserve is to be retained, the Senator from Virginia [Mr. Swanson] gave us some figures which I shall From my knowledge of the Senator's accuracy, I presume they are correct, but I have not undertaken to verify them by my own calculations, because minor differences are of no particular consequence. The figures, as the Senator stated them, are that under the mandatory provisions of the bill the regional reserve banks would have total resources of about \$636,000,000. Those include capital, Government deposits, and the reserve deposits of member banks. That is under the mandatory provision; and, as I think the Senator remarked in his speech, that is liable to be increased by voluntary accessions of State banks which may come in under permission of the statute, but the minimum may be taken to be \$636,000,000. The Senator stated the quantity of Government notes which might be issued without any violation of authority or duty because of the reserve requirement, to the banks having that amount of assets of \$636,000,000, to be \$1,817,000,000; which I think to be substantially correct.

Mr. SWANSON. Mr. President, will the Senator from New York permit me to interrupt him? The VICE PRESIDENT. Does the Senator from New York

yield to the Senator from Virginia?

Mr. ROOT. Certainly. Mr. SWANSON. That is, figuring that the reserves, capital, and deposits of these banks, mandatory, as the Senator suggested, were entirely utilized for the issuance of currency and that none was loaned for rediscount.

Mr. ROOT. Precisely.

Mr. SWANSON. As I understand, if the reserves and all the resources amount to \$636,000,000, as has been estimated by some experts who have figured on this bill, the maximum limit of

their resources would be \$1.817,000,000 of reserve notes issued.

Mr. ROOT. Mr. President, we are quite in agreement. I take
these figures upon the basis that the Senator from Virginia has stated them.

Mr. SWANSON. As a maximum.
Mr. ROOT. Yes; that is the limit to which the issue of the notes may go on the basis of the assets of the Federal reserve banks under the mandatory provisions, assuming those assets to

ference whether you hold the assets you have for reserve purposes or whether you lend those assets and take as part of the proceeds the notes that have been issued to you for reserve Of course this amount of \$1,870,000,000 may be purposes, greatly increased in case the 18,000 State banks and trust companies, or any considerable number of them, not included under the national system come in under the permission of this bill to get the advantage of the system. So that we have here, so far as the requirement for reserves is concerned, the possibility under the power conferred on the Federal reserve board of increasing the demand obligations of the United States to the extent of \$1,870,000,000 or more,

Mr. REED. Mr. President-

The PRESIDING OFFICER (Mr. THOMAS in the chair). Does the Senator from New York yield to the Senator from

Mr. REED. If it will not interrupt the Senator, I do not think there is any safety in following that kind of limitation,

Mr. ROOT. I will ask the Senator not to interpose an argu-

ment now

Mr. REED. I do not intend to. I was going to say to the Senator that, while there can be an increase of the amount, it seems to me that the only limit is found in the ability of the bank to get 33\(\grace\) per cent of gold, and that beyond that there is no limit except the discretion of the reserve board.

Mr. ROOT. I am obliged to the Senator from Missouri for contributing to the particular subject to which I was addressing myself his conclusion from his long and faithful study of this subject as a member of the Committee on Banking and

Currency.

Now, sir, let us turn to the requirement that there shall be commercial paper furnished as security. We have found that upon this general authority, this unlimited authority, there is no restriction placed by the reserve provisions, except the power of the bank to get gold for the 33½ per cent of its reserve. If it can get that, the amount to be issued may run from \$1,800,000,000 up. The terms of the bill regarding the security to the Government I will read, as follows:

Any Federal reserve bank may make application to the local Federal reserve agent for such amount of the Federal reserve notes hereinbefore provided for as it may require. Such application shall be accompanied with a tender to the local Federal reserve agent of collateral in amount equal to the sum of the Federal reserve notes thus applied for and issued pursuant to such application. The collateral security thus offered shall be notes and bills accepted for rediscount under the provisions of section 13 of this act.

If we turn to section 13 of the act, we find a description of the bills and notes which may be tendered as collateral security. The description is important, because, while I do not quarrel with it as a proper description of the kind of commercial paper which may properly enter into banking transactions as a basis for banking credits, we ought to observe that the scope of the paper described is such that there is practically no business enterprise possible in our country that can not be financed by the use of such paper. I refer to that because I am now trying to ascertain what limitations upon the general power to enlarge the demand obligations of the United States can be found in the character of the paper that must be offered as security. Here is the description:

security. Here is the description:

Any Federal reserve bank may discount notes, drafts, and bills of exchange arising out of actual commercial transactions; that is, notes, drafts, and bills of exchange issued or drawn for agricultural, industrial, or commercial purposes, or the proceeds of which have been used, or are to be used, for such purposes, the Federal reserve board to have the right to determine or define the character of the paper thus eligible for discount, within the meaning of this act. Nothing in this act contained shall be construed to prohibit such notes, drafts, and bills of exchange, secured by staple agricultural products, or other goods, wares, or merchandise from being eligible for such discount; but such definition shall not include notes, drafts, or bills covering merely investments or issued or drawn for the purpose of carrying or trading in stocks, bonds, or other investment securities, except bonds and notes of the Government of the United States. Notes, drafts, and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than 90 days.

There is in this description of the notes and bills-the paper which may constitute the security to be offered for the loan of the Government notes-no limitation whatever by a reference, either to the capital of the bank discounting or to the deposits of the bank discounting or to any other fixed standard. There is no limit that I can find in the bill to the quantity of paper of the kind described that any bank may take, except the bank's ability to get the money to pay for the paper. I have looked carefully for it, and I have asked a number of my friends if they could find it anywhere, and they have said they could not.

Mr. O'GORMAN. Mr. President—
The PRESIDING OFFICER. Does the Senator from New

York yield to his colleague?

Mr. ROOT. Certainly.

Mr. O'GORMAN. I do not know whether my colleague's attention has been called to the paragraph toward the close of section 16, which provides:

The board-

Speaking of the Federal reserve board-

The board shall have the right, acting through the Federal reserve agent, to grant in whole or in part or to reject entirely the application of any Federal reserve bank for Federal reserve notes.

Mr. ROOT. Mr. President, I have not overlooked that, and I shall address myself presently, in the regular course of my remarks as I have mapped them out in my mind, to that subject.

Mr. O'GORMAN. I thought it pertinent, in view of the Senator's observation that he knew of no restraint in the bill

with respect to the quantity of paper that would be received. Of course it would be idle for a regional bank to receive paper if the Federal reserve board would refuse to give permission to have a note issue on that or any other collateral.

Mr. ROOT. Mr. President, my proposition now is that there is no limitation in this bill. We as the lawmaking power impose no limitations. We do confer upon the Federal reserve board a power and discretion, and as to the efficacy of that au-thority on their part I shall speak in due course. The section thority on their part I shall speak in due course.

proceeds:

Any Federal reserve bank may discount acceptances which are based on the importation or exportation or domestic shipment of goods and which have a maturity at time of discount of not more than three months, and indorsed by at least one member bank. The amount of acceptances so discounted shall at no time exceed one-half the pald-up capital stock and surplus of the bank for which the rediscounts are made.

We put into the bill a limitation upon that kind of paper, but we put in no limitation upon paper of the general description I have already read.

Then there is another limitation:

The aggregate of such notes and bills bearing the signature or indorsement of any one person-

That is, of the notes or bills which have just been describedthe signature or indorsement of any one person, company, firm, or corporation rediscounted for any one bank shall at no time exceed 10 per cent of the unimpaired capital and surplus of said bank—

That is, we put a very proper limitation upon favors to single individuals or corporations-

but this restriction shall not apply to the discount of bills of exchange drawn in good faith against actually existing values.

From which it is to be inferred that the discount of notes and bills of the kind described is expected, though they be not drawn in good faith against actually existing values; and against those which are not drawn against actually existing values the limitation of 10 per cent to one person applies.

Mr. President, one of the causes of complaint of our present financial system has been that during the dull season, when money is not needed for crop moving or other great business movements, it tends to flow to the city of New York, where it goes first into the reserve deposits of the country banks at 2 per cent interest, and next goes into deposits outside of the reserves and is loaned on call upon collateral security and is used in speculation in the stock market and used for the promotion of new enterprises. That has long been one of the great sources of trouble in the autumn, when we come to the point where money is needed in the country to move the crops, that the money that has flowed to New York when it was not needed in the country has been taken by the New York banks at 2 per cent interest, and the banks, having to make something from it in order to pay that interest, have been driven to taking security which was not of the highest quality; that is, they have been driven to putting the money out upon collateral consisting of securities of new enterprises the value of which depended upon their being completed and successful. The real trouble about getting in that money in the autumn for use in the country has been, not the trouble of getting in money that was loaned out on good securities of established concerns, established corporations, railroads, and industrials, but the difficulty of getting in money that had been loaned on the securities of new enterprises all over the country that depended for their means of payment upon the success of the enterprises.

I undertake to say that there is no new enterprise conceivable in this country, that no one of us has known in the past decade a new enterprise, which could not be financed by bills and notes coming within the description of the bill I have read. It is as easy to turn from a collateral note, such as is used now in absorbing the great mass of money that flows to New York every year and is loaned out, and turn to bills and notes coming within this description as it is to buy a blank from a stationer. Observe, sir, that the same rule of action, the same principle, which gives us seventeen billions of deposits in the banks of the country with less than three and a half billions of money

in and out of the banks, with only one billion and a half of money in the banks, the same principle which gives us deposits more than ten times the amount of money that is in the banks, will be applicable in the making of the bills and notes that can be brought in as security for these Government notes; that is to say, merchandise in its passage from the point of production to the point of consumption may be drawn against by successive holders in good faith, and each transfer may be made the basis of a bill upon which discount may be obtained, upon which a Government note can be issued.

So, sir, I think we find no recourse by way of limitation here in anything that we impose by our bill against as vast an enlargement of the demand obligations of the United States as the reserves of the banks will permit. When we consider the more than twenty billions of internal trade; when we consider the more than three and a half billions of foreign trade; when we consider the immense opportunities for enterprise afforded by the great and not half opened or exploited regions of the South and West; when we consider the energy and optimism and sanguine spirit of our people, we must face the probability, the certainty, that this offer of practically unlimited funds from Uncle Sam to all his people will result in an activity of enterprise that will absorb the maximum which the required reserves permit and require the extreme exercise of the authority of the reserve board to issue these obligations.

Now let me return to the fundamental propositions of this bill, or the fundamental propositions upon which we began to address ourselves to the subject, and call attention to the fact that one of those propositions was that we should have an

elastic currency.

What is an elastic currency? We all agree that it is a currency which expands when more money is needed and contracts when less money is needed. It is important not merely that the currency shall expand when money is needed, but that it shall contract when money is not needed, for to an industrial and commercial country a redundant currency is the source of manifold evils, some of which I shall presently point out.

At present I observe that this is in no sense a provision for an elastic currency. It does not provide an elastic currency. It provides an expansive currency, but not an elastic one. It provides a currency which may be increased, always increased, but not a currency for which the bill contains any provision

compelling reduction. \( \) I am not now speaking about what the reserve board may do. I am not now speaking about what the reserve board may do. I am speaking about what we do; about how we perform our duty. The universal experience, sir, is that the tendency of mankind is to keep on increasing the issue of currency. Unless there is some very positive and distinct influence tending toward the process of reduction, that tendency always has, in all the great commercial nations of the world, produced its natural results, and we may expect it to produce its natural result here, of continual, progressive increase.

The psychology of inflation is interesting and it is well un-

derstood. No phenomenon exhibited by human nature has been the subject of more thorough, careful, and earnest study than that presented by the great multitude of individuals making up the business world in any country in the process of gradual inflation. It is as constant as the fundamental qualities of humanity, and it differs in different countries only in degree, according to the hopefulness and optimism or the natural con-

servatism and caution of the people.

If the people of the United States have not wholly changed their nature from the nature which has been exhibited in all the financial history of England, from which many of us came; in all the financial history of France, from which many of us came; in all the financial history of Germany, from which many of us came; of Austria, of Italy; unless our human nature has been changed, we may confidently expect that under this proffer of easy money from a paternal Government, available for each one of us, available to send the lifeblood into the enterprise of every quarter of our vast country, available to enable all the young and hopeful and energetic Americans, east and west and north and south, to embark in business ventures which will lift them up from the hard conditions of daily toil, we may confidently expect that the same process will occur that has occurred time and time and time again in older

That process is this: Little by little the merchant, the manufacturer, the young man starting out for himself and with a good character, enough to give him a little credit; the man with visions of great fortunes to be won; the man with ideals to be realized; the inventor, the organizer, the producer; little can people by little, with easy money, they get capital to begin business and to enlarge business. As the business enlarges sales increase, and prosperity leads to the desire for growth. They all

have before them spectacles of great fortunes made by the men who have grown from small beginnings to wonderful success the Wanamakers, the Marshall Fields, the great manufacturers, the Fords. I could enumerate a thousand whose example, whose phenomenal success to-day inspires young Americans with boundless hope. Little by little business is enlarged with easy money. With the exhaustless reservoir of the Government of the United States furnishing easy money, the sales increase, the businesses enlarge, more new enterprises are starfed, the spirit of optimism pervades the community. Bankers are not free from it. They are human. The mem-

bers of the Federal reserve board will not be free from it. They are human. Regional bankers will not be free from it. They are human. All the world moves along upon a growing tide of optimism. Everyone is making money. Everyone is growing rich. It goes up and up, the margin between cost and sales continually growing smaller as a result of the operation of inevitable laws, until finally some one whose judgment was bad, some one whose capacity for business was small, breaks; and as he falls he hits the next brick in the row, and then another, and then another, and down comes the whole structure.
That, sir, is no dream. That is the history of every movement

of inflation since the world's business began, and it is the history of many a period in our own country. That is what happened to greater or less degree before the panic of 1837, of 1857, of 1873, of 1893, and of 1907. The precise formula which the students of economic movements have evolved to describe the reason for the crash following this universal process is that when credit exceeds the legitimate demands of the country the currency becomes suspected and gold leaves the country.

So, sir, I can see in this bill itself, in the discharge of our duty, no influence interposed by us against the occurrence of one of those periods of false and delusive prosperity which inevitably end in ruin and suffering. For, Mr. President, the most direful results of the awakening of the people from such a dream are not to be found in the banking houses-no; not even in the business houses. They are to be found among the millions who have lost the means of earning their daily bread. They are to be found in the dislocation and paralyzing of the great machinery which gives the value to the product of the toller by transporting it from the place where it is produced, and is worthless because there is no one to use it, to a place where it can be used and by finding some one to use it who will pay for it.

Mr. President, this question for all my friends in the West, the farmers of the West, is not a question of country banks. It is a question that goes far deeper than that. When the farmer has put his toil and his savings into his crop of corn or wheat or cotton, for the reward of his industry and its con-tinuance in future years and the support of his family, he depends upon what? Why, sir, upon the continued and effective depends upon what? Why, sir, upon the continued and effective working of this vast machinery of transportation, distribution, and payment; and if that machinery is dislocated, if a necessary part refuses to work, it is like striking with a sledge hammer the machinery of the automobile; the car stops. effect of such a period of inflation, of false prosperity, and of inevitable catastrophe is to deprive every producer upon the farm, in the mine, in the factory of the reward of his labors.

President, I am going presently to deal more specifically with just what will necessarily happen in the event of this process, but before doing that I want to call attention to the way in which pretty much all the wisdom that has not been put into this bill has dealt with the problem in times past, and has concluded that it ought to be dealt with now. The method universally adopted in the great world of business for preventing such a proceeding is to have what we started out to try to get, an elastic currency. It is to provide for a currency that will come down by the operation of natural forces as well as go up. It is to put a limit, a limit first of self-interest, upon the increase, and then, beyond a certain danger point, an absolute prohibition.

It is manifest that when banks issue currency there is a certain limitation involved in the nature of things, because their credit is not unlimited, and they can go only about so far without their issues being affected. When you have a bank currency as they have in England and in France and in Germany and in Canada, the banks can not in the nature of things go more than a little ways beyond the legitimate requirement of the business of that country.

But we are proposing to furnish everybody who can draw and sign a bill currency that has behind it the credit of the American people—the Government of the United States. What limit is there to that credit now? What limit up to this time? There may be a limit owing to the working of this bill, but there is

Furthermore, it has been the custom to impose specific limitations even upon the amounts the banks can issue. The Bank of England is limited to the gold actually in possession, except as to a certain small quantity, fifteen to eighteen million pounds sterling-something less than \$90,000,000-which it can issue as against Government securities, an amount which it is supposed will necessarily remain out in the pockets and the stockings and chimney pieces of the people. The Bank of France is limited in amount: the German Bank in amount and by a progressive tax; the Canadian banks to the amount of their capital, with a certain moderate excess specifically stated by statute for particular emergencies.

Now, we have had a commission, a Monetary Commission, which has made a very careful and thorough study of this subject for the purpose of furnishing a basis upon which Congress might act. I think that commission included as good a representation of the ability and faithful devotion to service of the two Houses as it was possible to find. It was not partisan. Republicans and Democrats alike united, and they united in a

I am aware, sir, that upon some features of that report there is a violent opposition to the conclusions of the commission. Upon the question of a central bank, which they recommended, the platform of the Democratic Party is supposed to have pronounced an adverse verdict. I am not going to discuss those questions; but certainly the conclusions reached by that commission, composed of men of both parties uniting upon the practical expedients by which an elasticity of currency may be secured and undue inflation may be prevented, is not a party question; it is not a partisan question; it is not a local question, but is a question to which we can all address ourselves with a common desire to reach a conclusion that is for the best interests of our country.

The methods recommended by that commission to secure that result are, in substance, those which I have included in the amendment I have had the honor to present. The commission would make the notes issued not notes of the United States, to be loaned by the Government, but notes of the banks, with such limitation upon their issue, in the first place, as comes from the limit of credit of a creature as compared with the creator, and, next, with the specific limitation upon them that they shall be covered by a 50 per cent gold reserve, and that whenever that reserve falls below 50 per cent the reserve bank shall pay a special tax upon the deficiency of the reserve at a rate increasing in proportion to the deficiency, as follows: For each 21 per cent, or fraction thereof, that the reserve falls below 50 per cent a tax of 11 per cent; so that if the reserve got down to 45 per cent there would be a 3 per cent tax; if it got to 40 per cent there would be a 6 per cent tax; it it got down to 35 per cent there would be a 9 per cent tax; if it got down to 331 per cent it would stop absolutely.

Of course, the natural effect of that is that it becomes un-

profitable for the bank to issue more money than the country requires, and you tell what the country requires by the ability to get the gold and by watching, as every banker who knows his business does watch, the course of business of each cus-

tomer who is dealing with the bank.

Then there is another line of limitation. The line which I have just described is to bring down the quantity of notes put It is to make the elasticity downward, which is wholly omitted from the bill as it stands now, and it is to bring it down not by a command, not by vesting authority in somebody else to command it or require it, but by imposing a tax which wil' automatically make it for the self-interest of every banker to bring it down when the time comes at which it ought to come down. Then here is the other line, which is designed to put a rubber band on the expansion of this currency, so that the higher it goes the harder the band will pull and keep it back, and finally fixing a point where it must stop anyway.

Any notes of the Federal reserve banks in circulation at any time I am now reading from the amendment which follows the rec-

ommendation of the Monetary Commission.

Any notes of the Federal reserve banks in circulation at any time in excess of an aggregate of \$900,000,000 for all of said banks, which are not covered by an equal amount of lawful money, gold buillon, or forsign gold coin, held by said banks shall pay a special tax at the rate of 1½ per cent per annum and any notes in excess of an aggregate of \$1.200,000 000 for all said banks, not so covered, shall pay a special tax at the rate of 5 per cent per annum: Provided, That in computing said amounts of \$900,000,000 and of \$1,200,000,000 the aggregate amount of any national-bank notes then outstanding shall be included.

That will make it for the solf-interest of the bankers not to

That will make it for the self-interest of the bankers not to push up their notes unduly, even though they have the reserves. Right at this point I wish to call attention to the fact that we are already by other means inflating our currency. Of course, this bill very properly provides for retaining the present seven hundred and forty-odd million dollars of national-

bank currency. Either in their present form or in the converted form the amount is to remain out. This provision of the amendment with its two figures of \$900,000,000 and \$1,200,-000,000 would allow the increase of the currency without a repressive tax of about \$160,000,000. That is bringing our seven hundred and forty-odd million dollars of present national-bank currency up to \$900,000,000.

It would allow under the repression of a tax the currency to go up \$300,600,000 more. It is not made impossible when business really requires it to have \$300,000,000 more. So it varies between \$160,000,000 and \$460,000,000 increase. After reaching \$460,000,000 the 5 per cent tax comes down and makes it prac-

tically impossible or wholly unprofitable to increase.

I said we are inflating otherwise than by this proposed issue of Government notes. We have been quite progressive in our treatment of Government money. For a long time no Government moneys were deposited in banks except internal-revenue receipts. Then, a few years ago, we broadened out, and we allowed the Secretary of the Treasury to deposit customs re-ceipts upon certain securities. The Post Office business is a business conducted by itself. The practice under that permission has progressed. At first it was considered suitable for the Secretary of the Treasury to demand security for the deposit of customs receipts of very much the same character as the security for the issue of currency, and he issued a list of the kind of bonds which he would take. Now-and I do not quarrel with it-the Secretary of the Treasury is making deposits on commercial paper. I say I do not quarrel with it, but it is a progressive increase of the available currency of the country instead of having large amounts locked up in the Independent Treasury.

Then, in this bill we are enlarging our currency. I will not call it inflating, because the word has a bad sense, and when I use it I mean it in a bad sense. We are enlarging our currency by the reduction of the reserves. Take, for instance, the central reserve banks. I will take, for example, the Bank of Commerce in New York, because I happen to be somewhat familiar with The Bank of Commerce has something over \$100,000,000 of deposits—call it \$100,000,000. Under the present law it has to keep 25 per cent of reserves—that is, \$25,000,000, locked up in the vault. It can not use them. If it does, the comptroller comes after the bank. Under this bill the reserve is reduced to \$18,000,000. That releases \$7,000,000. That one bank adds \$7,000,000 to the available currency of the country. But that is not all. Of the remaining \$18,000,000 of reserve that it has to keep, it only has to keep six-eighteenths in its vaults, and it has to put fiveeighteenths into the regional bank. I think that is it. difference between six-eighteenths in the vault and five-eighteenths it has to put in the regional bank it can either keep in the bank or put in the vault. It is fair enough to assume that approximately one-half will go into the vaults and one-half into the bank, because that is permitted and that would be natural; but that half-that is to say, 9 per cent-that \$9,000,000 which will go into the regional bank will not be locked up, but 65 per cent of it can be loaned by the regional bank. So you find that between twelve and thirteen millions of the money which that one bank has had to keep locked up in its vaults is going to be set free by the operation of this bill and added to the available live currency of the country.

A have not taken the trouble to figure it out, because it is not important, but extended to all the national banks, applying to all of them, the same process which sets free between twelve and thirteen millions of the money of the Bank of Commerce, you find a very handsome enlargement of the free and independent currency of our realm. So we are all moving in the same direction, in a direction which, unless brakes are put on somewhere, is going to land us in inflation. I conceive it to be our duty to put the brakes on and not leave it for anybody else to do it or not to do it, as he sees fit.

Now, let me turn more directly to the consequences of the inflation which seems to me to be inevitable if we pass this bill as it is. I have said that a crash inevitably comes from the kind of process which easy money produces. President, long before that crash comes the rest of this world of commerce that we have so recently really entered upon will have seen the signals of the approaching storm. My memory, sir, goes back to the time when really there was no international banking in the United States, when our banks were all local institutions. I have seen the process go on step by step as we have grown in wealth and have extended our enterprise up to a point where we are engaged in a mighty commerce and where we feel every impulse given in the Old World; for the movements of trade are felt across the ocean as quickly as the diaphragm at one end of the telephone responds to the voice at the other, and every impulse that we

give is felt in every civilized country of the world. We have entered into that companionship and we can never retire from it, for the vast and varied industries of our people are dependent upon the continuance of the processes which involve conjoint and correlative action by our own and every other

civilized country.

The rate of interest can not go up 2 per cent in the city of New York but that the rate of exchange upon London falls. The rate of interest can not go down but the rate of exchange The business men of Europe follow the upon London rises. course of business in the United States with a degree of solicitude and of careful attention and accurate information that no man in this Chamber has ever equaled. They know the course of trade. They know the currents of opinion. know the dangers that lie before us. They know what steps are being taken to avoid them. The confidence or distrust of American finance responds to the trained judgment of a multitude of men who are familiar with the business of the world following carefully and with accurate information every movement of American finance and American commerce.

Now, I say that long before the crash as the result of inflation the men who are following our affairs in Europe will have seen the signals of the approaching storm. Why should they not, when we are carrying on a trade with Europe which involved during the year ended June 30, 1913, exports from this country to other countries of \$2,428,506,358 in value, and imports from other countries in the same year of \$1,812,978,234? Why should they not, when there are held in Europe of American securities, the stocks and bonds of our railroads and industrials and mines and manufactories, amounts variously

estimated at from four to seven billion dollars?

I have tried to see if I could get something more definite upon that, but it is pretty difficult to be very accurate; necessarily there must be some element of estimate. . I have an estimate by Babson's Statistical Organization, a concern whose figures are well considered and are regarded as trustworthy. They say Europe holds over \$7,000,000,000 of American securi-My impression, gathered from my attempts to get information from other sources, is that that is rather a large estimate, but it is somewhere between \$4,000,000,000 and \$7,000,000,000. So there is reason why we should be carefully watched abroad. You must remember that those people who are engaged in business abroad have been through a hard experience. I doubt if the French will ever forget the results of their attempt to issue Government money, the French assignat, which disappeared with the credit of the country. Great Britain has had her hard experience. The distress, suffering, and ruin that followed an inflation of her currency prior to the year 1811 led to the appointment of a special commission of the House of Commons to consider the whole subject and report upon it. In 1811 that commission brought into the House of Commons what is known by the bullion report, which is one of the great landmarks in the history of finance. That report was rejected by the House of Commons when it came in. It was treated by the House of Commons when it came in just as the report of our Monetary Commission is being treated by our Congress now; but in 1819, eight years after, the British Parliament came to see that the commission had been right and they had been wrong, and they adopted those sound principles recommended by that commission on which the currency and finances of Great Britain have been regulated ever since, the same principles which underlie and are expressed in the report of our Monetary Commission.

Mr. President, it is upon the sound basis of those principles embodied in the bullion report of 1811, once rejected and subsequently accepted by the British Parliament, that Great Britain has come to be the greatest financial, commercial, and industrial power that the civilized world has ever known. not be unwilling to learn something from the experience of a people who, through hard experience, have come to an understanding that has made them so great and so successful.

Sir, with this past of their own and with this active interest in our affairs resulting from their intimate connection with them, I say again long before the crash comes the people of finance and commerce in Europe will have seen its approach. The universal law under such circumstances is that the existence of an inflated currency and doubt of the soundness of financial policy immediately result in gold leaving the country. I say that is the universal law; that is the universal human We can no more change it than we can make the light turn back on its course from the sun. I say the gold will leave the country; and I beg my fellow Senators to consider for a moment the elements of danger that will lie before us and that we ought to contemplate.

We set great store by the fact that the balance of trade is in our favor. For a number of years our exports have exceeded our imports by approximately \$500,000,000, and for the last year \$600,000,000; but that is only the visible trade, that is only the trade that finds its record in the customhouses. an invisible balance that we must not forget.

Before passing to that, let me suggest that we ought to remember that this balance of trade is not a constant quantity. It is certain to be affected by some circumstances of recent origin. To what extent no man can tell, but it is certain to be affected to some degree. One is the lower tariff. Of course that is expected to result in increased importations; that is the universal experience, and about that I suppose there will be no controversy. With the lower tariff that has just been adopted the tendency will be to increase importations and pro tanto to cut down the balance of trade in our favor.

On the other hand, we all know that we are approaching the limit of our exportation of foodstuffs, that great basis of our exports of former years. We are importing beef from Argen-

tina, and I suppose wheat from Canada, are we not?

Mr. NELSON. Yes.
Mr. ROOT. We are importing wheat from Canada.
Mr. SMOOT. And also cattle.

Mr. ROOT. And cattle also from Canada. Year by year our exports of foodstuffs have been going down, and we must hereafter chiefly depend for our exports upon manufactured products and cotton. Those are subject to vicissitudes—cotton to good and bad crops and manufactures to good and bad No one can tell what the effect is going to be upon our manufactures because of the causes already enumerated. This, however, is quite certain, that in many quarters there is going on a substantial reduction. I suppose the people who are reducing do not say much about it, because they are afraid of being hanged [laughter], but it is going on. I hope it will not continue; I hope it is but temporary; but we must consider the possibility of a reduction of our exports on that account, through the absorption of our feed products by our own people and the increase of imports because of the lowering of the tariff.

I pass on to circumstances which, as I have said, produce an invisible trade balance that must not be left out of account. In the first place, there are the interest and the dividends which have to be paid upon the immense amount of our securities held abroad. If you take a very moderate mean between the two estimates of four thousand million dollars and seven thousand million dollars and assume it to be between \$4,000,000,000 and \$5,000,000,000 at a moderate estimate of interest, you will have to allow at least \$250,000,000 going abroad annually to meet the interest and dividends paid every year to foreign holders

of our securities.

The next item in that category is the expenditure of tourists abroad. Many years ago it used to be estimated that tourists spend annually a hundred million dollars abroad. The number of Americans who are fortunate enough to be able to go to Europe has enormously increased, and the best estimate that I have been able to get puts a minimum of the expenditures of

American tourists abroad at \$250,000,000 a year.

Then, as our merchant marine has practically disappeared, we pay the freight and the insurance-certainly practically all the freight one way-on the goods exported or goods imported, however the custom of the particular trade may be, and that freight is paid to the foreign steamship owners. A minimum estimate of that would be \$50,000,000 a year. Then, there is the enormous amount of money that is sent abroad in small sums by our comparatively recent arrivals. Several years ago I know that an inquiry developed that over \$70,000,000 of postal orders alone were sent abroad. Whole districts in southeastern Europe are being supported largely in that way. One hundred million dollars is a very moderate estimate for that. Of course, there is, besides, a very great amount sent through private bankers; it is not confined to postal orders.

There we have, sir, \$650,000,000, all of which has to be paid in gold and all of which goes abroad. With our exports at their height, with the apparent visible balance of trade in our favor at the highest point it has ever reached, without any diminution or set-off or setback, this invisible outflow of gold, for the causes which I have mentioned, completely offsets the balance of trade, so that we stand without protection there.

There is another circumstance that we ought to consider, and which it is our duty to consider when we are forecasting what may happen in the future in the working of the system which we are proposing, and that is that for several years our railroads—and I suppose to some extent our industrial con-cerns—have found it difficult to renew bonded indebtedness by long-term bonds. They have been living from hand to mouth by

putting out short-term securities or notes having less than a year or but little over a year to run. Of course those notes, taking them in the aggregate, constitute an element of danger, because they come pretty near being demand obligations, and if before they come due doubt is created, if before they become due an unfavorable judgment about the financial policy of the United States is created abroad, then look out. They will have to be paid. If they are not paid, what will happen? The destruction of credit, not alone of the railroads issuing them, not alone of the banks holding them, but of the multitude of people who are carrying on their business and securing capital upon the securities, the stocks and bonds, of the corporations which have issued the short-term notes.

Let me not forget before I finish this to speak about the The Journal of Commerce of November 10 of this year contained an article which gives the result of an investigation made by that very trustworthy journal into the subject. They state that the amount of short-time securities coming due within three years is about one thousand million dollars. have another estimate, taken from a pamphlet issued by the Guaranty Trust Co. of New York, a trustworthy institution and one which certainly has no object in not giving correct figuresthey have every interest to give correct figures-and I do not doubt that this is the result of careful inquiry. They give the amount of short-term securities due in 1914, omitting everything but the millions, as \$468,000,000; in 1915, \$320,000,000; in 1916, \$90,000,000; in 1917, \$88,000,000; and in 1918, \$111,000,000. That would make in the next three years \$879,000,000, and in five years \$1,079,000,000. So here are, in round numbers, \$1,000,000,000 in short-term securities about to become due, and from four to seven thousand millions of securities held in

Here, considering always the question as to whether we are in danger from the consequence of a loss of confidence in our financial policy in Europe, we must not forget another tendency of recent years that has been very disquieting. It has been to restrict the railroad transportation companies, to restrict their rates, and to enlarge their obligations-that is, their dutiesin a manner very disquieting to the holders of railroad securities; and the tendency in recent years has been, in legislation, in litigation, and in public expression, to promote treatment of industrial corporations in a manner very disquieting to the holders of their securities. I am not now expressing any opinion regarding either of these tendencies. It would lead me into a discussion quite apart from my present object. I am merely stating the fact that the railroads, rightly or wrongly, complain that their rates are being held down by the Interstate Commerce Commission and that their expenses are being pushed up by the demands of labor and by the increased cost of all materials, so that the margin between expenditures and income is gradually decreasing, and they are saying that the process can not go on without cutting off all dividends. I am not going to argue about that, but it is undeniable, and it is supported by the fact that some railroad corporations have been compelled to adopt that policy. The Chicago, Milwaukee & St. Paul Railroad has reduced its dividends, the New Haven Railroad has passed its dividend, and other railroads have reduced their divi-All this will necessarily have a certain disquieting effect and tend toward distrust on the part of the holders of the thousands of millions of dollars of our securities abroad.

The threats against the industrial corporations have had very much the same effect, and we may rely upon it that the holders of this great mass of American securities abroad are going to be in a condition of sensitive alertness regarding our credit and the soundness of our financial policy. In that condition it requires very little to produce immediate results. kind of an outcry that started a run on the bank in Omaha, which the Senator from Nebraska told us about yesterday, would start a run on us. It would take very little, not merely to stop foreign investment in our enterprises, but to bring tumbling back upon us the thousands of millions of securities now held abroad; and when they come, they must be bought; they will be bought; and they will all have to be paid for in gold, and the gold will leave our country; it will go abroad to pay for the securities which come here.

Very little things start a process like that. Mr. President, in March, 1907, there were over \$200,000,000 of American securities sent back from Europe merely on the judgment of people there that our affairs were not going quite right. So, long before October, the wise ones there had an idea that things were not going quite right here; they had dimly foreseen what would happen in the panic of 1907; and over \$200,000,000 of securities came over here and had to be bought, and the gold went to Europe. That is one of the things that helped to accentuate the conditions that produced the panic.

Mr. LIPPITT. It was one of the very important things.

Mr. ROOT. The Senator from Rhode Island [Mr. LIPPITT] observes very justly that it was one of the very important Last September over \$200,000,000 came over here on some judgment of some people that it would be wise to reduce the risk of our finances here. A very little loss of confidence would bring this whole mass tumbling down on us; and, as I have said, when they come they will be bought, and the gold will go to Europe to buy them and pay for them.

The way it works out, Mr. President, is this: If somebody in London sells something here, it has to be paid for in gold, of course. The debtor here goes out into the market to buy London exchange; if he can buy it for less than it costs to ship the gold, he buys it and he pays his debt with it-that is, he pays his debt to the man in London by a bill drawn on London, which the man in London can turn into money there.

The cost of shipping gold is along in the neighborhood of 2 per cent, and therefore the American banker will buy bills if he can get them within 2 per cent of the cost of shipping gold, but if it costs more than it costs to ship gold he ships the gold. and the gold goes out. Of course, the greater the amount that must be paid the higher the cost of exchange, and therefore the more gold goes physically from this shore to the other in order to make the payment. When exchange is high, gold goes out; when exchange is low, gold stays or comes this way.

To go one step further in the process, the people who have to pay this gold abroad have a perfectly simple process through which to get it. They go to their bank, and, unless the transaction is carried on entirely through credit, if they do not get the gold in that way by check, they always are at liberty to draw greenbacks, and with the greenbacks they take the gold out of the Treasury; or, if under this bill they get reserve notes, Government notes, the notes are always to be redeemable in gold at the Treasury or gold or lawful money at the banks, and with the notes they can get the gold, or they can get green-backs with which they can get the gold. When the amount of money to be paid in a foreign country exceeds the amount that is coming from the foreign country you can not keep gold in any reserve except by failure-suspension of payment. is a continual draft that can not be prevented.

I said that these securities, when they come here, will be ought. They must be bought. If they are not, if nobody buys them, they go down and down and down, and the credit of all the great industrial and transportation organizations of this country is ruined, and none of them can raise any more money anywhere in any way on any terms. What is more than that, the banks that hold the securities are ruined, and the men who have put the securities behind their obligations to the banks in

order to conduct their business are ruined.

Mr. President, I am quite in favor of doing away with the speculative use of money in the city of New York; but that is by no means doing away with the use of the great body of the securities of the country as a basis of credit. That speculative use is but a trifle compared with the vast employment of ownership certificates, bonds or stocks, in the great enterprises of the country, by private individuals, as a basis for the credit on which they get the means to conduct their business. If you let the prices of these securities, when they come back here, go down out of sight the business of the country goes down with them to ruin. There is no use discussing whether they must be bought. They will be bought. The human nature of private, individual persons will lead them to buy, and the payment will go abroad.

There is another thing you must remember. Europe is an armed camp. For many, many years peace has been kept by the most delicate adjustments and by the most strenuous exertions of many men in many countries, who have been alert and solicitous to stop controversy as near its origin as possible, and to prevent the frightful effect of general war; but war is The fear of it is always present. If a war always possible. comes, immediately our securities come back to us. Immediately, in every country where they are held, the desire to strengthen up, to increase the amount of gold, will operate to lead to a general conversion of the American securities they

hold into immediately available gold.

It is not necessary that we should wait for a war actually to take place. The fear of it leads to the result. The fear of the Balkan war, far off on the edge of civilized Europe, as it was, because of the apprehensions of possible implication of the great commercial nations in a war consequent upon the Balkan war, sent hundreds of millions of securities back to this country, which had to be bought.

So, sir, if we enter upon this career of inflation we shall do it in the face of clearly discernible danger-danger which, if realized, will result in dreadful catastrophe.

I have been giving the reasons why the results I describe would happen; but it ought not to be necessary to give them or to argue about them, for the experience of mankind has been reduced to the expression of economic laws which are universally admitted. There is no better known economic law than the one which passes by the name of Gresham's law. We all know it. It is that inexorable law under which, if there are two kinds of currency in a country, and one is better than the other, the better one leaves the country and the poorer one remains

That has come to be an axiom, and I ought not to have to argue about it. The inevitable result of the inflation of our Government currency will be the application of that unques-

tioned law.

It is stated in another form in this way: That gold always leaves a country in which the amount of currency exceeds the demands of legitimate business. That is another way of stating the same law. It is just as absolute, just as certain, just as irrefutable, just as universally accepted, as the other form of stating it, and it describes exactly what is going to happen

Another form of stating it, one that our old friend Prof. Sumner has stated as the result of his study of the history of American currency, is that gold always tends to move away from the country of high prices to the country of low prices, because in the country of low prices it avails more; it buys more; it is of higher value in proportion to commodities than in the country of high prices. It is inevitable; and of course the effect of inflation is to work prices up, up, up, and the gold goes out, and you can not stop it.

You can not control the operation of these laws. You could kill the people who are engaged in business; you could take them out of their business and shut them up in jail, and perhaps you could stop the operation of the law then by stopping the

business; but there is no other way.

Mr. President, as against the working of that law your raising the rate of interest, or your attempting to sell Government securities, will be just as ineffective as Mrs. Partington's mop against the Atlantic Ocean, because you do not bring into operation your forces until the damage is done. When confidence is lost, you can raise the rate of interest to the roof, but you do not bring the money until you restore confidence. In proportion as confidence decreases, you have to add to your rate of interest insurance against loss; and long before we wake up from our dream of prosperity upon inflated currency the sources from which the gold will have to come to keep us from catastrophe will have lost their confidence, so that no rate of interest will bring the money but a rate so high as to ruin American business.

So as to the sale of Government securities. Ah, yes; now, belfind the system under which we are working, and under which we have grown so great and strong, stands always the Government of the United States, with its credit unimpaired, with its solvency undoubted, always ready to come to the rescue by the sale of its securities to bring gold. This bill proposes, however, to put in pawn the credit of the United States; and when your time of need comes it is the United States that is discredited by the inflation of its demand obligations which

it can not pay.

O Mr. President, I ought not to be obliged to argue about inflation. The country has rendered its judgment upon it. The American people closed the case for and against inflation when, with unanimous voice, or by the vast preponderance of their approval, they sustained the veto of the inflation bill by President Grant in 1874. The American people decided the case when they sustained the courage and patriotism of Grover Cleveland in putting at stake all his future upon compelling the repeal of the silver-purchase act in 1893. The American people decided the case when, in 1896, they elected Mr. McKinley as against the protagonist of the very fundamental ideas contained in the sixteenth section of this bill; and again in 1900, when they reelected McKinley against the same opponent.

Now, Mr. President, a Democratic majority has been elected by the people, not upon this issue, but in a campaign which proceeded upon subjects, questions and matters of interest far removed from the old, old question of sound money or inflated currency. Coming into power, the Democratic Party, without any mandate from the people of the United States, without any authority from the people of the United States, undertakes to reverse the oft-repeated judgment of the people of the United States upon this question. In probably a vain appeal from the judgment of the Democratic caucus and their violation of the duty imposed upon them by the repeated decisions of the people of the country, I protest against the employment of power thus obtained for such a purpose as this.

Mr. President, my colleague has observed that power is given to the central reserve board to regulate the issue of cur-That is true: but I observed at the time that we have our duty to perform, and that we can not discharge it by transferring it to anybody else. Always up to this time the American Congress has attempted to perform its own duty in regard to the vital matter of currency. Always the American Congress, when it did not want inflation, has undertaken so to frame its, legislation that its injunctions and requirements would prevent inflation. Now it is proposed that we shall make it possible that an appointive officer, or a body of appointive officers, shall bring upon the country the result of inflation; and we are to appearse our own consciences by assuming that that board will perform the duties that we ought to perform.

Mr. President, I do not purpose to question the probable honesty, good faith, or public spirit of the men who may be appointed members of the central reserve board under this bill. But, sir, this bill in the provision which I have been discussing, and in another provision to which I shall presently allude for a brief moment, exhibits an expression of the opinion of a very great leader of the Democratic Party, for whom I have a strong personal regard, whom I respect and admire, and in whose sincerity of purpose and good faith I firmly believe. Yet, Mr. President, I am convinced that his economic theories are false, and, if put into effect, would be most injurious to our country.

Those theories have been twice expressly repudiated by the people of the country. Twice those specific theories, the same theories of finance, make their appearance in this bill; and, as a matter of course, we ought to assume that any central reserve board appointed to carry out the terms of the bill will be appointed under the same dominant, commanding, and irresistible influence

Mr. President, a central reserve board appointed under the influence of the same power that put into this bill the present sixteenth section will be bound, if they are honest and true and faithful, to proceed in accordance with the theories that our people rejected in 1896 and 1900. They must. The authors of the bill are bound in good faith to appoint men who are in sympathy with them to carry it out; and the men in sympathy with them will have in good faith to carry out this bill under the belief that it is best for the people of the country that the Government of the United States shall furnish unlimited money to the people of the United States.

I say that this bill presents the financial heresy twice repudiated by the people of the United States. I say that the central reserve board appointed under this bill will have to represent that very heresy. If this bill passes as it stands, America stands to lose all we saved when Grant vetoed the inflation bill, all we saved when Grover Cleveland abolished the silver purchase, all we saved when we elected McKinley, all the Republicans, all the gold Democrats saved when they helped in the repudiation of the vital principle which has been put into this bill.

The country has become so deadened by the assaults of sound, so wearied of discussion, so confused and dazed by complicated figures, that this vital and fateful reversal of the American policy is proceeding with but little attention. But unless all our history of human experience and all the previous judgments, the real judgments, of the American people upon this subject have been wrong, we stand to learn by hard experience what has really been done by the sixteenth section of this currency bill.

Mr. President, there is one other subject I want to say a few words upon, and that is the subject of another amendment that is intimately associated with the subject upon which I have been speaking. I will ask that the Secretary read the second amendment I proposed, the amendment to section 7.

The VICE PRESIDENT. The Secretary will read the

amendment.

The Secretary. In section 7-Owen print of December 1 strike out from and including the words "and of," in line 20, page 19, to and including the word "Treasury," in line 3, page 20, and insert in lieu thereof the following words: "The remainder of the net earnings shall be paid to the United States."

Mr. ROOT. Mr. President, that strikes the bank-deposit guaranty clause out of the bill. I am not going to argue it at length. I am merely going to express my opinion about it. Mr. HITCHCOCK. Mr. President—

The VICE PRESIDENT. Does the Senator from New York

Mr. ROOT. I wish the Senator would let me finish, and then

will be very glad to yield to him. Mr. HITCHCOCK. Very well.

Mr. ROOT. It is of no consequence practically whether you take a part of the profit made by regional reserve banks and stop them from going into the Treasury of the United States

and make a fund to pay the deposit or whether you levy a tax upon the banks or upon the people or in any other way that the United States can raise the money for the purpose of pay-The question whether that is a wise and permissible thing can not be determined merely by contemplating a run on a bank by good but misguided people. It is very desirable to have some means to prevent people from being frightened and drawing their money out of a bank. But that is only one small division of the subject.

The serious side of it is that this is giving the credit of the United States to every speculator, every promoter, every black-guard, who is able to scrape together \$25,000 and take out a national-bank charter. It makes no difference under such a provision whether the men who manage the bank have been known from their youth up in the community as men of honor and probity or whether they are the shifty driftwood of accident. Depositors may intrust their money to the speculator with the same confidence with which they intrust their money to the sound and conservative banker, because if the bank that has used its deposits in promoting all sorts of wildcat enterprises fails, the Government of the United States is going to take the money out of the pocket of the conservative banker and pay the debt. It is a premium on indifference to honesty and soundness in business. It is a premium on speculation and disregard of all rules of business soundness and morality. It is an invitation to every adventurer in the world to come into the national-bank system and get the indorsement of the United States upon all the moneys he comes to owe for his

In the panic of 1907 there was a chain of banks in the city of New York, a chain, five of them linked together, that had been promoting enterprises out of which the managers of the banks looked for great profit. If they had kept on they would have become millionaires. There were ice companies, steam-ship companies, and all sorts of speculative enterprises. If they succeeded, the managers of the banks would have made enormous fortunes. They failed. The men who had trusted them suffered the natural consequences which in this world follow folly and a failure to regard the laws of probity and good sense.

If this law had been enacted, behind those speculators would have stood the Government of the United States with its funds to pay their debts. If we enact this law now we give absolution in advance; we give a letter of marque and reprisal to the managers of all Heinze banks of the future to go out and, on the credit of the United States, gather in funds at high rates of interest and speculate for their own advantage, secure in having the credit of the country to take the place of the discredit of their own records.

Now, Mr. President, I do not think we ought to do that; and I am brought to the final observation which I shall make regarding both these provisions. The provision under which the Government of the United States proposes to furnish every-body with easy money and the provision under which the Government of the United States proposes to pay everybody who has trusted his money to a scoundrel illustrate one evil tendency our times, and it is a tendency against which I know the lifelong convictions of many of my friends upon both sides of this Chamber revolt.

It is the tendency, sir, to substitute the support of a paternal government for that individual self-dependence which settled, which built, which developed, which made our country. It was not in reliance upon any government that our fathers braved the dangers of the American forest. It was not in reliance upon any government that the stream of immigrants passed over the Alleghenies and along the southern borders of the Lakes and peopled the Central West and along across the plains and mountains to the Pacific

We have a mighty commerce, indicated by the figures, the stupendous figures, that I have read. We have amazing material possessions, and the still more admirable and spiritual attainment of a hundred million people; foremost through the world in works of charity, of benevolence, of humanity; foremost in the world in its insistence upon opportunity for education to every child of every laborer, however humble; foremost in the world in its insistance upon the rights of individual liberty and the independence of individual manhood. This people has done these things, not by law, not by wrought-out systems of policy, but the working of each man's individual conduct of life has presented to the world the opportunity for better conditions, so that from all over the world millions have followed millions to our shores to seek a share in our blessings of prosperity and liberty. This people has never done its work in reliance upon the protecting and aiding hand of government. This greatest work ever achieved in the history of civilization has been done because it has insisted upon legislating at this time for the pur-

by men of individual independence of character, by men who relied upon themselves, and who built up a government the central thought of which was the thought of your patron saint, my friends on the Democratic side, the fundamental principle of Thomas Jefferson, that government governs best which governs least.

Ah, Mr. President, we are turning our faces away from the fundamental principle upon which we have come to our high estate. We are turning them weakly toward practices which history shows have invariably led to decadence, to degradation, and the downfall of nations. We are setting our steps now in the pathway which through the protection of a paternal government brought the mighty power of Rome to its fall; and we are doing it here without a mandate from the people of the United States. Ah, more than that, we are doing it in violation of the express verdict of the people of the United States.

Mr. POMERENE. Mr. President, I esteem it a great privilege to have been permitted to serve as a member of the Committee on Banking and Currency. It has been a great labor and it has been in a good cause. Whatever differences of opinion may have existed in that committee, I am sure they were honestly formed and entertained, and I take pleasure in saying that I have never served upon a committee in which every member of the committee worked harder or longer or was more intent for the common good.

Two questions confronted us. One was, What is the trouble with our financial system? The other, What shall be the remedy? I think the committee were a unit in the belief that the difficulty has been that under our present system we can not properly concentrate and mobilize our reserves; and, again, our currency system is so inelastic that it can not be adjusted satisfactorily to the varying needs of business, and, as a corollary to the latter proposition, we are wanting in proper opportunities for rediscounting.

As to the first question, I take it every student of finance will agree that our reserve system as it has existed for years in this country has been a failure. We look to the records, and we find that nominally we have a vast amount of reserves in the banks of this country. In the banks commonly denominated country banks there is a reserve of 15 per cent, of which 6 per cent is required to be in the bank vaults and 9 per cent in the reserve banks. In the reserve city banks, with a nominal reserve of 25 per cent, one-half is held in their vaults and onehalf in the central reserve bank. In the central reserve banks the required reserve of 25 per cent is all held in their vaults. Evidently it was the belief of Congress that this plan would furnish a sufficient reserve against all reasonable contingencies, but under the plan prevailing it was largely fictitious. We find, for instance, as to the country banks, that for every \$100 of deposit \$6 are in the bank vaults and \$9 are supposed to be in the reserve banks; but when we stop to analyze the situation we discover that three-fourths of this \$9 is loaned out, and of the other fourth one-half remains in cash in the reserve banks and one-half is deposited with the central reserve banks. So, as a matter of fact, instead of having the \$9 in cash as a reserve against demands, we have in the reserve banks \$6.75. represented by loans or credits, and \$2.25 in cash, one-half of which is retained in its vaults and one-half in the vaults of the central reserve banks; and of this amount placed in the central reserve banks three-fourths is loaned out, and one-fourth only is kept in the vaults of the central reserve banks. A final computation therefore shows we have loans and credits of \$7.593 and only \$1.40\$ in cash, where we thought the country bank had the \$9 in cash.

When it comes to the reserve banks, instead of having 25 per cent in cash they have 121 per cent in their own vaults and 121 per cent in the central reserve banks, and three-quarters of that is loaned out and is represented by credits. Is it any wonder, then, when a great demand is made upon the reserves the system breaks down and fails? Who can forget the great panics of 1873, 1893, and 1907, and the want and destruction which followed in their trail? It will shed little light on the pending legislation to attempt to fix the responsibility for any one or all of these panics upon any man or set of men. It is sufficient to know they could and did occur, and the entire country suffered in consequence. The bankers in the large financial centers distrusted one another and began to husband, if not to hoard, their cash reserves, so that the country banks were often not able to set the cash they had on deposit with their correspondents. The country banks began to pursue the same course, and the depositors in turn withdrew their deposits and began to hoard. Hence the panics and the crash and the present necessity for legislative relief.

pose of correcting our banking and currency system. I regret that our Republican friends do not agree with us upon everything; but that would be entirely too much to expect. If they did agree with us upon everything, we should have to take them into our camp.

Mr. President, with this situation confronting us, I have no fault to find with the administration in urging that something should be done to relieve the situation; in fact, I think the people would find fault—and rightly, too—if it did not insist that there should be action upon this particular subject. It is my judgment that, with a proper reserve system, we will be able to largely relieve the conditions which have heretofore con-

I was much impressed by the statement which was made before the Banking and Currency Committee by Mr. Alexander Gilbert, president of one of the large New York banks, who, in discussing the different panics that had occurred in the country, told us that he had been in the banking business through the panics of 1873, 1893, and 1907, and added:

I have been officially connected with the New York Clearing House for 50 years. I have passed through every panic since the Civil War, and I think I can say conscientiously that I never have seen a panic that, in its incipiency, could not have been arrested and held in check if we had had one bank of reserve, a Federal bank of reserve, a central bank of reserve, or a Government bank of reserve—if we had had one bank of reserve to which the banks of the central reserve cities could have taken their short-time commercial paper and had it converted into cash in order to have held their reserves together.

What is the situation which has been confronting us during the past few months? Everyone has felt that there was a gradual tightening of the money market. It is not necessary for us to attribute it to any particular fact; it is enough for us to know that the condition existed.

I have, Mr. President, in my hand a letter that I received from the treasurer of one of the very large manufacturing concerns in Ohio, in which he quotes from a letter received from a bill broker, giving the situation as he understood it, and this is what he says:

The large banks in the large cities have not been buying any paper since March and have advised their country correspondents to make themselves just as liquid as possible, and to stay so, in order to meet the provisions of the bill. In consequence we are absolutely at a standstill.

Mr. President, with this situation before us, I am sure that everyone is willing to join in granting relief, and the only remaining question is the method of the relief. The banking question has been discussed for many years. We have heard from bankers, great and small; we have heard from students of the subject everywhere, and we have benefited much by the hearings that we have had. The objections which have been raised by the bankers, and which have not been acceded to by the committee, are largely directed to perhaps three different features of the bill. One has reference to the number of regional banks, another to the control of those banks, and the third to the ownership of their stock.

I can understand why men might seriously differ as to the wisdom of having one central bank or a regional system of banks, but having conceded the regional system to be the only plan that can be worked out at the present time which will meet the approval of the public, it seems to me that we ought to be able to reconcile our differences as to the number of regional One branch of the committee has suggested 4 banks, with the privilege, after two years of experience, of increasing the number to 12; the other branch has suggested not less than 8 nor more than 12 banks.

Many Senators who have discussed this problem insist upon the central bank as the ideal plan, and much can be urged in its We are cited to the central-bank systems of the countries of the Old World, but we must not forget that their civilization is not our civilization, that their central-bank plan is not our independent banking plan, that their countries are small as compared with ours, and that the virtue to be found in any bank of reserves is principally the accessibility of the bank with its reserves in times of distress; and no man knows "when the hour cometh."

If we are to look at this matter from the standpoint of the central-bank advocate himself, it seems to me that he can not very well complain of the system which has been adopted in the Owen substitute bill. We provide for not less than 8 nor more than 12 banks, but they are not absolutely independent of each other. It is true that each bank has its separate board of directors to administer the banking features of the system, a board of directors that can be in a particular locality and can have a much more intimate knowledge of business conditions, of credit conditions, and of property conditions than the officers of one central bank could have.

Mr. President, with the power vested in the Federal board of

right of discount by one bank for the benefit of another, with the control of the reserves themselves, and with the right to fix the rates of discount, it seems to me that we have all the advantages that could be expected from the central-bank plan, and in conjunction with them we give to the country under the regional system all the benefits of a fully equipped bank of reserves, managed by a board of directors and officers who are more familiar with the financial and credit conditions of the country to be served and to a greater extent than would be possible by one central board which would be dependent upon subordinates.

The branch of the committee, of which the Senator from Nebraska is the head, insists that not more than 4 banks are required, predicts their success, and prophesies disaster if more than 4 are organized. It does seem to me that the difference between 4 banks and 8 banks is so slight that it must be a brave man who is willing to risk his gift of prophecy by saying, "For the one system we shall have assured success and for the other assured failure."

I wish to call the attention of the Senate to the powers which are given to the board of directors of the Federal reserve bank, as well as to the powers which are given to the board of con-The powers of the Federal reserve bank relate particularly to the administration features of the bank. Generally speaking, the proposed bill gives to the reserve banks powers to act as a bank for bankers. They hold the funds derived from the sale of the stock in the reserve banks; the reserves which are required to be deposited by the member banks in their vaults and the Government funds.

For the purpose of carrying out these powers the reserve banks are specifically authorized to adopt and use a corporate seal; to have succession for a period of 20 years; to make contracts; to sue and be sued, complain and defend; to appoint and dismiss officers not otherwise provided for; to adopt bylaws regulating its business; to exercise all powers which are specifically granted and such as are incidentally necessary to carry on the business of banking; and upon deposit with the Treasurer of the United States of any bonds of the United States in the manner provided by existing law relating to national banks to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited, and to issue such notes under the same conditions and provisions of law as relate to the issue of circulating notes of national banks secured by bonds of the United

The directors of these banks are required to administer its

Fairly and impartially and without discrimination in favor of or against any member bank or banks and shall, subject to the provisions of law and the orders of the Federal reserve board, extend to each member bank such discounts, advancements, and accommodations as may be safely and reasonably made with due regard for the claims and demands of other banks.

All of these regional banks are under the control of the Federal reserve board. It is empowered among other things: First. To examine each Federal reserve bank and each member bank.

Second. To permit or require Federal reserve banks to rediscount the discounted paper of other Federal reserve banks at rates of interest to be fixed each week, or oftener, by the Federal reserve board.

Third. To suspend and renew suspension of reserve requirements for limited periods.

Fourth. To supervise and regulate the issue and retirement of Federal reserve notes.

Fifth. To add to or to reclassify or terminate existing reserve and central reserve cities under existing law.

Sixth. To suspend or remove any officer or director of any Federal reserve bank.

Seventh. To require the writing off of doubtful or worthless assets upon the books and balance sheets of Federal reserve

Eighth. To suspend the operations of any Federal reserve bank for violation of any of the provisions of the act.

Ninth. To require bonds of Federal reserve agents; to provide for the safeguarding of all collateral, bonds, Federal reserve notes, money, or property of such agents; to perform the duties, functions, or services specified; and to make all necessary rules and regulations to enable the board effectively to accomplish

these purposes.

Tenth. To exercise supervisory power over all of the Federal reserve banks.

Eleventh. To authorize member banks to use, as reserves, Fedcontrol over all of these banks, with the power to compel the eral reserve notes or bank notes based on United States bonds, Twelfth, To grant by special permit to national banks the right to act as trustee, executor, administrator, or registrar of stocks and bonds,

Under this power it seems to me we have all the virtues of the central plan and at the same time all of the benefits which are to be derived from the regional reserve board plan by placing the banks and their operations in closer contact with the business interests of the country.

OWNERSHIP OF STOCKS.

One of the principal differences between the two sections of the committee was as to the ownership of stock. While much has been said both for and against private ownership of the capital, it seems to me that a careful analysis of the plan must suggest the wisdom of having the banks own the stock.

It must be borne in mind that the Government is going to have about \$200,000,000 in these banks. No security is required except that which will come from the stock itself and the stock liability. If the stock were owned by individuals, would it be salable if there were a double stock liability? If it were owned by private individuals, could we be assured of their solvency, even if there were a double stock liability? But when the stock is subscribed for and owned by the banks of the country there can be no question of their solvency or their ability to respond at any time if, unfortunately, we should be required to resort to the stock to recover the Government funds.

SHALL BANKS BE COMPELLED TO SUBSCRIBE?

There has been a good deal of discussion as to whether or not it would be wise to compel the banks of this country to subscribe for the stock.

Mr. HITCHCOCK. Mr. President-

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Nebraska?

Mr. POMERENE, I do.

Mr. HITCHCOCK. Before the Senator passes to that topic of his discussion I wish to call his attention to the fact that in every great country in the world the Government deposits its funds in the central banks, the reserve banks, which are owned by the public just as we propose to have these reserve banks owned by the public, and that, so far as I know, there never has been a case in which the Government has suffered any loss. I ask him why he thinks there would be any danger in the United States if the same example were followed?

Mr. POMERENE. Why, Mr. President, the distinguished Senator from Nebraska has called attention to the fact that probably a number of these banks would be failures if there were eight or more. That of itself would indicate a danger; and if there is danger with eight, we would not be without

danger if there were four.

Mr. HITCHCOCK. I presume the Senator has misunderstood my statement. In stating that there would be failures, or might be failures, I did not mean in the sense of bankruptcy. I meant they would be incompetent to perform the functions with which they were charged. They would not be strong enough. I did not mean that their paper, so far as it went, would be inadequate to meet the demands upon it, but that by reason of their small size they would be utterly inadequate to meet the demands that would be made upon regional banks.

Mr. POMERENE. Mr. President, I quite well understood the Senator's position; but if they are going to be failures to the extent that they may not be able to pay their dividend or respond to the demands of the public when required, it must follow, as a matter of course, that there would be some danger to the Government which had its deposits with banks of that

kind.

Mr. HITCHCOCK. Again the Senator has misunderstood me. I did not say they would fail to respond to the demands of their depositors. I said they would not be large enough and strong enough to meet the demands of business for additional funds in discounts.

Mr. POMERENE. Mr. President, to that extent the Senator

answers his own objections to the eight-bank system.

I was about to take up the question whether we ought to compel the banks to join this system. We must bear in mind that these banks are the creatures of the Government. They are corporate entitles which owe their very existence to the Government. We have provided in the past a certain reserve system. It has broken down in time of need. We are now addressing ourselves to the task of adopting another system of reserves which is a modification of the system which has prevailed here for years. In view of the fact that the present system has been a failure, can it be said that we are going a step too far when we say to these banks: "You shall invest a part of the demand lia of stock, which will insure the availability of the reserves when

needed and the efficiency of the system"? If we had the right under the old law to have reserves kept in certain reserve and central reserve banks, shall we not have the power now to compel the banks which could not meet the requirements of trade during panic seasons to transfer these reserves to an organization devised for that particular purpose?

Primarily this legislation is to enable the banks to perform their functions for the benefit of the people. Secondarily, it is for the benefit of depositors in the bank. If we now have the right to compel them to transfer a part of their reserves from one place to another, who shall say that we have not the right to say to them, "You shall set aside a certain portion of these funds in order that you may create a corporation—a house, if you please—in which you shall thereafter keep the reserves.

properly so called "?

More than that, let me suggest this thought: Those who are opposed to the bank ownership of this stock say that we are confiscating the property of the banks. With all due deference to the suggestion they make, permit me to say that it is the people's money that is in these banks; and if the Government does not have the right to say what shall be done with that money, or any part of it, in order to conserve the interests of the public, tell me, for what is government created?

Let us look at the matter, however, from the standpoint of dollars and cents, so far as the banks themselves are concerned, and we shall find that even they have no cause to complain.

On September 4, 1912, the net deposits in the national banks were \$7,093,336,535.06. The net profits of the banks for the year ending July 1, 1912, were \$149,056,603.23. In other words, the net earnings upon these deposits amounted to 2.1 per cent. Under the House plan the stock is to earn 5 per cent cumulative dividends, and after applying a portion of the balance of the earnings to the creation of a surplus the Government is to receive 60 per cent of the remainder and the banks 40 per cent. Under the Hitchcock plan the stock is to earn 5 per cent cumulative dividends. Under the Owen plan it is to earn 6 per cent cumulative dividends. In other words, the earnings of the portion of the people's money which is to be invested in the stock of the regional banks are almost three times the present net earnings on the deposits in their banks, and, in addition to that, the 6 per cent is not taxed. Under the Hitchcock plan the net earnings of the stock are two and one-half times the present net earnings on the deposits of national banks, and they are not taxed. So, pray tell me, how are we confiscating the property of the banks when we are giving them an investment from which they can earn more than they in the past have earned on the average on their deposits? If that be confiscation, make the most of it.

Mr. President, a number of the bankers who were before the committee suggested that they might be willing to go into the system, but they objected to their brother bankers being drafted into it. In other words, a soldier who is willing to devote his services to his country objects to the service or the plan because the Government has seen fit to draft some other men to serve their country for its proper protection.

CONSTITUTIONALITY OF COMPULSORY SUBSCRIPTION.

Mr. President, this leads me to a consideration for a few minutes of the argument made by the distinguished Senator from Iowa [Mr. Cumins] when he spoke of the unconstitutionality of the provision which would require these banks to subscribe for this stock. Inadvertently, I think, he spoke of it as diverting a part of their stock which was already invested in other securities. At the same time he concedes the power of the Congress to repeal, to modify, or to amend the national banking act. By the terms of this act we have provided for certain reserves. If we had the right in the first instance to provide for reserves, it is clear to my mind at least that we have the right to increase that amount of reserves or to decrease it. If we have a right to compel the deposit of these reserves in one system of banks, it must follow, as a matter of course, that we have the right to compel their deposits in another bank.

It does seem to me when the distinguished Senator admits the right to repeal the act or, in other words, to take away their entire franchise, certainly we have a right to modify it. If we can destroy it altogether, we can somewhat change it. If we can take away its life, we can amputate its limbs.

Is this a diversion of funds? Is it a taking of funds from a State, as the distinguished Senator from Iowa says, and placing them outside of a State? The reserves for the country banks, and most of the banks in the State of Iowa are country banks, are now 15 per cent. Under this bill they are 12 per cent of the demand liabilities and 5 per cent of the time deposits, and by the proposed plan we are releasing 3 per cent of the demand liabilities and we are releasing 10 per cent of the time deposits.

Where are these reserves now? I take it in reserve cities, largely, I assume, in the city of Chicago. I do not know where the reserve city may be to which the reserves of the State of Iowa may go, but if this reserve money is now in the city of Chicago what complaint can be made on account of this transfer from the central reserve city of Chicago to a regional bank nearer home?

Again, is it going to cripple the banks to require money to be taken out of their vaults—the money which does not belong to them, but belongs to the public? Under our system the stock must be subscribed by the banks; under the Hitchcock system, by the public; but whichever system is adopted can only be carried to a conclusion by taking the people's money to pay for the stock. And it is the people's money which is now in the banks.

We now compel these banks to take a part of their money and put it in a reserve bank. Where lies the line of distinction between compelling them under the present system to compel them to place it in one bank and under the proposed system compelling them to place these reserves in another bank? We may draw fine haired distinctions between that part of the money which shall be invested in capital in the regional reserve bank and that part of it which shall be deposited in the vaults as reserve, properly so called, but they are the same kind of dollars owned and controlled by the same banks. When the banks now loan out their money they are not trying to say that this dollar is out of our capital stock and that dollar is out of the public deposits.

## STRENGTH OF RESERVE BANKS.

Mr. President, we have heard much of the weakness of this banking system. If we should provide for the eight or more regional banks \$100,000,000, the average would be twelve and one-half million dollars. The minimum provided for in the Owen bill is \$3,000,000. One-half of this is to be paid as follows: One-third in cash, one-third in three months, one-third of it in six months, and the balance is to be paid upon call. At the end of six months we would have a bank with one and a half million dollars capital. We have, in addition, the reserve required to be in these banks and we have a due portion of the Government deposits. Is that going to make a weak bank?

It is said that many of the banks in the large centers of population will have capital stock and deposits largely in excess of the regional reserve banks. Let us admit it for the sake of argument; but it must be borne in mind that the banks which we are organizing are banks of reserve pure and simple, not banks in which there shall be deposits or to which individuals shall go for the purpose of discounts, and they are not competing for

## CONTROL OF BANKS.

Another matter which has been largely discussed is the question of the Government control of these banks. Under the pro-visions of this bill the directors of the Federal reserve board are Government appointees. They have supervisory power. They can control the situation if there is any dereliction of duty on the part of the board of directors or officers of the regional What is the situation with reference to the regional banks under the plan we have proposed? There are three classes of directors—A, B, and C. The three directors of class A are to be men selected by the bank, and they may all be bank-The three directors of class B are also elected by the They must be identified with the business, the agricultural, and the commercial interests of the country. The other three are to be appointees of the Government, Government officers, sitting on this very board, and one of them governor of the board and the Federal reserve agent.

Is it possible that anything radically wrong can be done by this board against the public interests when the Government has at least three representatives on the board who can keep, and will keep, the Federal reserve board fully advised as to what is going on, and when it has at the same time the power to remove arbitrarily upon its own motion, when the circumstances are such, in its opinion, to justify it, every member of that board?

Mr. REED. Mr. President-

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Missouri? Mr. POMERENE. I do.

Mr. REED. I call the attention of the Senator to the further fact that there is a power given the Federal reserve board under this proposed law to exercise general supervision over the Federal reserve banks, which, if I interpret it rightly, gives them the right at any minute to interfere with the bank and direct the course of its business.

Mr. POMERENE. That was exactly what I had in mind, and think the Senator has correctly quoted the language of the bill.

Mr. SHAFROTH. The interpretation of the Senator from Missouri should be given very high standing, because of the fact that it was his provision that was incorporated in the bill. Mr. POMERENE. That is correct. I am glad to give him the credit for it. Mr. CLAPP. Mr. President-

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Minnesota?

Mr. POMERENE. I do.

Mr. CLAPP. If the Senator will pardon me, if there is as much force in that as is sought to be given it, it strikes me that it eliminates the argument against the complete governmental control that has been based upon the theory that this being the money of the banks, the banks should control it. seems to me that one horn or the other has to be taken in the last analysis.

Mr. POMERENE. Mr. President, there is much in what the Senator says, but it must be borne in mind that we are seeking to get these banks to come into this system. We do not propose to unduly cripple them. We recognize that they have their rights. We recognize that the business success of the country requires the success of these banks. I recognize the fact the banks have been guilty in the past of many derelictions of duty, yet at the same time they have rights which should be observed and protected and which must be observed and protected if the country is to prosper.

Mr. President, it has seemed to the branch of the committee to which I belong that by providing that the member banks should be permitted to select the six directors they would be able to get men who understood completely the banking system and the needs of their localities. And, on the other hand, since the Federal reserve board is empowered to remove at will the directors of the reserve banks the interests of the public are fully protected.

Mr. CLAPP. Mr. President-

The VICE PRESIDENT. Does the Senator from Ohio yield further to the Senator from Minnesota?

Mr. POMERENE. I do.

Mr. CLAPP. It must be conceded that there is a great deal of force in the position of the Senator that as an inducement to get the banks to come into the system it may be advisable to give them this participation in the creation of the board. can see the force of that, but we have been told here time and again that the reason why this supervision was given was because we were taking their money, and consequently we must leave them in control of it.

I was very much impressed with the remarks of the Senator in regard to the reserves. To-day the banks are compelled, or at least allowed, to put their reserves where they have no control whatever, and in the course of business, in the securing

of interest, they are practically in control.

Now, I should like to ask the Senator this question for an answer: Aside from the lack of double liability in what we call the Hitchcock bill, and which is carried into the Owen bill, what objection has the Senator to offer, or, in other words, what argument has he to make, why the banks should subscribe instead of allowing the public in the first instance to subscribe: that is aside, now, from the question of liability?

Mr. POMERENE. Mr. President, the Senator recognizes the one reason. There is another reason which was urged upon the committee in the hearings, and that was that the very moment you gave the public the right to subscribe for this stock and to hold it and to receive deposits they would at once insist upon the right of deposit and the right to discount bills directly with the banks. It may be that that would be a proper thing to do if we were starting out in fact to organize a people's bank, but that was not the purpose the framers of this bill had in mind. They had regard for the independent banking system of the country. I believe I am correctly stating the views of every member of the committee when I say that they felt there should be nothing done to destroy the independent character of our present banks, and the very minute the reserve banks would be permitted to take deposits from individuals and they would be allowed to draw checks upon these banks you would be organizing a bank which would be thrown in competition with the present banks of the country.

Mr. CLAPP. Mr. President, there is some force in that, except if any group in the two Houses were strong enough in the unity of purpose to bring in a bill of any form, and I assume that under the conditions here the Owen bill, so-called, will pass, it seems to me they were strong enough to have allowed

the public to subscribe and still retain the discount system that is provided for in these two bills. It does seem to me that while there is a loss in the matter of liability, yet the bringing into the banks of the country the additional banking capital without trenching upon the resources of the banks that exist would more than compensate for the double liability carried into this new system by taking as the basis for that the resources of those who are subject to this double liability.

I am satisfied the Senator will pardon me for these interrup-

tions, because

Mr. POMERENE. I am very glad to have the Senator's views upon this subject. But let me suggest, with all due respect to his argument, that by opening up the subscription books here to the public we are thereby increasing the capital stock of the country perhaps nominally but really very little, if any. This stock, when it is subscribed for, must be paid, and it will largely be paid, in my judgment, if it is subscribed for by the public, by drawing funds out of the banks and thereby reducing the available funds in a particular banking locality. It seems to me that when we look at it from the standpoint of the public there will be very little more money under the popular subscription plan than under the plan proposed by the Owen bill.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Kansas?

Mr. POMERENE. I yield.

Mr. BRISTOW. Let me make an inquiry of the Senator. Suppose a bank located in a community had \$100,000 capital and a million dollars of deposits; and suppose \$100,000 of those deposits were invested in the capital stock of the bank, so that it would have \$200,000 capital and \$900,000 deposits; would not that bank be a very much stronger bank from every point of view with a deposit liability of four and one-half times than with a deposit liability of ten times as much as it had before it increased its capital?

Mr. POMERENE. Mr. President, it might be a greater protection so far as the depositors are concerned, and if the money which is invested in the stock could all be loaned out it would not be subject to reserves. Otherwise, as I see it, there would

be no difference.

Mr. BRISTOW. Well, is not that a very important difference? In the first instance, if the Senator will pardon me, we will say that under the present law that bank has to keep \$150,000 reserves against \$1,000,000 of deposits; its \$100,000 of capital is all loaned; and there is no reserve at all against When \$100,000 of the deposits are transferred from dethat. When \$100,000 of the deposits are transferred from de-posits to capital, then it would not have to keep that large reserve of \$135,000 as against \$150,000; and it would have \$100,000 to loan, against which there would have to be no reserve; so that the loaning power of the bank in that community would be greatly increased and it would be more useful to the community, would it not?

Mr. POMERENE. Possibly, in that immediate community. You would have the same amount of money and there would be a less reserve required if a larger portion is invested in capital,

but I see no other advantage.

Mr. BRISTOW. That is, there would be more money to be used by that community than there otherwise would be in the promotion of its business enterprises.

Mr. POMERENE. Assuming that the money which is invested in stock was taken out of the deposits.

Mr. SHAFROTH. Mr. President, let me answer the Senator from Kansas, if the Senator from Ohio will permit.

In the illustration which the Senator from Karsas has given he supposes a bank of \$100,000 capital and surplus and \$1,000,000 of deposits. What is the operation of this proposed What are the losses to that bank? First, it has to subscribe 6 per cent of the capital stock and surplus, which is \$6,000. Then it gets the benefit of the reduction of reserves from 15 per cent to 12 per cent, not upon its capital and surplus, but upon its deposits. Three per cent of the deposits amount to \$30,000. So there remains in that community \$30,000 which otherwise they would not have. That five times offsets the amount of the capital that it has got to put up for the Federal reserve bank.

Mr. BRISTOW. Of course, the Senator figures that there are \$30,000 of those deposits which are to be loaned out in the community; that is, the reserve is reduced \$30,000. That is true, but when you get into the question of deposits and are considering the revenues of the bank you must take into consideration the fact that on these reserves, now, that bank has the opportunity of charging interest.

I am not advocating that policy; I do not believe in it. I am not controverting the question of the system of reserves provided-the details of the bill which have brought it

about I do not agree with, so far as the Owen bill is concerned-but the principle that is involved in the Owen bill and in the Hitchcock bill, so far as the reserves are concerned, is the same, but when you consider the amount of money that will actually be loaned in a community I think the Senator's idea, while it has some merit, will not be fully realized.

Mr. SHAFROTH. Mr. President, I wish merely to answer the suggestion that the member bank can get 2 per cent interest by loaning its money in New York. How much money is the country bank forced to put into the bank in New York? Nine per cent. Nine per cent of what? Of the deposits. Nine per cent of the deposits amount to \$90,000. Two per cent of \$90,000 is \$1,800 a year. That is the cost to the bank. What benefit does it get by having this \$30,000, which it is now compelled to put up, but can lend out in the community? It lends it on an average of 6 per cent. Consequently 6 per cent will yield as much on \$30,000 as will 2 per cent on \$90,000.

Mr. BRISTOW. I beg pardon of the Senator from Ohio, but I could not let the statement go by without presenting, in my opinion, its fallacy; and that is, that the bank in business in the country will have to keep more than 12 per cent in reserves, or away from home. The reduction in reserve required, from 15 to 12 per cent, does not permit the average bank to loan, as a rule, a dollar more in the community, because, to satisfy its

exchange business, it has got to keep that money in New York.

Mr. POMERENE. Mr. President, if that be so, then there is
no cause of complaint in having these funds deposited in the proper reserve bank, viewed from the standpoint of dollars and

cents, of investing the amount in its stock.

Mr. BRISTOW. Except that the bank is now enjoying interest on it, and otherwise it would not be. That is the only thing.

It depletes the revenues of the bank to that amount.

Mr. POMERENE. Mr. President, there is much in what the Senator from Colorado [Mr. Shafroth] has said. proposed plan we reduce the reserves from 15 to 12 per cent; 3 per cent is released. Under the proposed law 5 per cent is required to be held in a regional reserve bank. Under the present law 9 per cent is kept in a reserve bank, upon which they have been drawing 2 per cent interest. The 3 per cent which is released by the proposed bill is invested at bank rates in the community where the bank is doing business, and the banks will receive greater earnings from it than they do from the 9 per cent deposited in the reserve banks under the present law, on which they get 2 per cent interest.

More than that, it will be borne in mind that under the provisions of this bill each of the banks has the right to go to the Federal reserve bank for the purposes of rediscount; and assuming that they would avail themselves of the privilege in proportion to its stock and reserves, each one of the member banks would have the right to take out of the regional bank by rediscounting paper the amount invested by it in the capital-65 per cent of the reserves which it had deposited there and 65 per cent of the Government deposits-and it would be able to invest this money at a profit, represented by the difference between the interest which it received from its customers and the amount of discount which it would have to pay to the Federal reserve bank. So that it seems to me that under the proposed system more of this money will be available for use in the community than under the present system.

Mr. WEEKS. Mr. President—

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Massachusetts?

Mr. POMERENE. I do.

Mr. WEEKS. I do not wish unreasonably to interrupt the Senator from Ohio, but I wish to call to his attention this difference in the character of the subscriptions to the stock in the reserve bank: If the stock is subscribed by the banks it must necessarily come out of the capital of the banks

Mr. POMERENE. No.

Mr. WEEKS. And reduce the capital of the banks by \$100,000,000 or whatever the total capital of the reserve banks is to be

Mr. POMERENE. If the Senator will pardon me, I must differ from him upon that statement. We are not investing under the Owen plan a part of the capital stock of the member banks in the stock of the regional banks, but we are investing money which is the equivalent of 6 per cent of the capital stock and the surplus. That money must come out of the vaults of the bank; it must come out of the deposits.

Mr. WEEKS. If I may have the attention of the Senator, may I ask who is going to subscribe for this stock? Are not the member banks going to do it?

Mr. POMERENE. Certainly. Mr. WEEKS. Where are the member banks going to get the money with which to pay for this stock? It does not make any

difference whether it is out of one bag or out of another bag, they are subscribing their own funds. Now, what funds have banks, except their own capital and surplus?

Mr. POMERENE. All of the deposits of the bank and the investment in this stock are just as much assets of the bank as

are the bills receivable in the vaults of the bank.

Mr. WEEKS. Yes, Mr. President; but when they subscribe to this stock, amounting to fifty million or one hundred million dollars, whatever the sum may be, what are they going to charge it to? They are certainly not going to charge it to deposits in the bank; they are certainly not going to charge it to any other account than to their own capital or their own surplus or their own undivided profits. It is coming out of the

bank's own assets and can not come from any other source.

Mr. POMERENE. It would be with their bills receivable. They would not pay for it out of the one bag or out of the other bag. If I had any credit at the bank in which the Senator from Massachusetts is largely interested, and he loaned me money, he would not say the money which he loaned me was out of the capital stock or out of the deposits; it would be out

of the funds of the bank.

Mr. WEEKS. Well, Mr. President, the Senator from Ohio does not understand my proposition or I myself have been singularly unfortunate in the understanding I have of this question. I should like to ask the Senator once more, as a bookkeeping proposition, to what he is going to charge the subscriptions which the bank makes to the stock in the regional bank on the

Mr. POMERENE. Mr. President, I am not a bookkeeper, and I do not pretend to know to what account I would charge it under those circumstances; but I do know, as a matter of fact, that the stock will be paid for out of the funds of the bank,

whatever the character of the funds may be.

Mr. WEEKS. Now, one more question, Mr. President. Suppose all of the deposits were withdrawn from that bank, then to what fund would it be necessary to charge the stock subscriptions?

Mr. POMERENE. Mr. President, in the first place, the illustration which the Senator gives is a very exceptional one; but take it that if the deposits were withdrawn, any assets which the bank had would be reduced to cash, and the depositors would be paid out of that cash.

Mr. WEEKS. Mr. President, one more question. If the Senator were making up a bank statement and he had subscribed 6 per cent of his capital to a fund of this sort, to what would he

Mr. POMERENE. Mr. President, I must insist that my good friend from Massachusetts is again not stating the proposition correctly. The bank is not subscribing a portion of its capital; it is only giving its obligation for a given amount of stock, which is equal to a certain per cent of its capital and surplus, but not a part of it.

Mr. WEEKS. Is it not necessary to pay for it? Mr. POMERENE. Most assuredly; and you would pay for it out of the assets of the bank.

Mr. WEEKS. What are the assets of the bank? Certainly not the deposits, because the deposits are liabilities.

Mr. POMERENE. The assets are in part derived from the sale of its stock, and the balance is made up of deposits.

Mr. WEEKS. Mr. President, the deposits in a bank are a

liability; they are not an asset at all.

Mr. POMERENE. I mean the proceeds of the deposits which

are brought into the bank.

Mr. WEEKS. The bank has no assets except its capital stock, its surplus, and its undivided profits derived from the investments of the deposits of the bank, but the deposits are a liability. If it invests money in something else on its own account, it must, in the final analysis, be charged against its own

property and not against its liabilities.

Mr. POMERENE. That might be so in the final analysis, but what I am insisting upon is that it is the people's money which goes into this stock. The capital of the bank is already invested, and if the bank is required to subscribe for stock in the regional banks it pays for it out of the funds in the bank. They may be the depositors' funds or they may be out of the funds derived from the payment for stock, if any such funds remain

in the vaults of the bank.

Mr. BRISTOW. Mr. President—

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Kansas?

Mr. POMERENE. I do.

Mr. BRISTOW. I should like to make an inquiry of the Senator from Ohio. I have here the statement of a national bank. In that statement it is required by the law to state its resources, of what such resources consist, and also its liabilities

and the detailed items of its liabilities. The resources of the particular bank whose statement I have are: First, "loans and discounts"—that is, the notes that are due the bank—"\$680,000"; 'overdrafts"-checks of depositors who have overdrawn their accounts and owe the bank, a resource—"\$3,700"; "United States bonds to secure circulation"—the bank's money is in the bonds--"\$100.000."

Mr. POMERENE. And in this case the money would be in

the stock.

Mr. BRISTOW. Yes; it would be in the stock, and that stock of the regional reserve bank would be listed as one of the resources of the bank; that is, as one of its investments, would it

Mr. POMERENE. It would be one of the assets or resources of the bank. When it comes to a question of bookkeeping, I am not going to determine that proposition, and I do not regard it as vital

Mr. BRISTOW. That is one of the bank's assets, and, of course, an asset which has been paid for out of the bank's re-

Mr. POMERENE. Certainly.
Mr. BRISTOW. Taken from its capital stock, its surplus, or its undivided profits.

Mr. POMERENE. No: it is paid for out of any funds that are in the bank.

Mr. BRISTOW. The bank could not pay for it out of funds that did not belong to it, could it?

Mr. POMERENE. Just as it invests other funds, and it must account to the depositors for the money. I care not what it is invested in.

Mr. BRISTOW. It has got to go out of business before it can account for this money if it is paid for out of the depositors'

Mr. POMERENE. We have not gotten to the point of going out of business in this matter. We are all going into the busi-

Mr. HITCHCOCK. If the Senator does not object to a further interruption on this point, I should like to ask him a question. I understand that he practically takes the position that the stock in the reserve bank need not be necessarily purchased out of the capital or surplus of the member bank, but may be purchased out of the depositors' funds. Is that cor-

Mr. POMERENE. Mr. President, I have tried to make clear, and I do not see how it can be made clearer, that this stock will be subscribed for and paid for out of cash that is in the When it comes to a question of bookkeeping, bank's vaults. I do not care whether it is money that is represented by the capital stock of the member bank or by depositors' money in that bank. It makes no difference in principle.

Mr. HITCHCOCK. Is it not a principle which all banking legislation recognizes, that a bank must keep its fundsin a liquid form; that is, in commercial paper or bonds or some other form upon which it can realize when the depositors demand their money? Now, if that is so, in case the banks are required to place fifty or one hundred or two hundred million dollars in this stock, will the Senator state how they can meet the demands of depositors when they are not permitted to sell the stock or

hypothecate it?

Mr. POMERENE. Mr. President, that is a proposition which it seems to me is not going to shed very much light upon this matter. Of course, as a general proposition, the funds of a bank should be invested in liquid assets; but now the banks largely invest in bonds, and so forth. The question of the legality of those investments has been sometimes raised, but by the provisions of the pending bill we are going to legalize this invest-Why? For the benefit, as we think, of the depositors and of the public at large, because we are creating an institution which is primarily for the benefit of the depositors of the bank and secondarily for the benefit of the public.

Mr. REED. Mr. President—
The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Missouri?

Mr. POMERENE. I do.

Mr. REED. With the permission of the Senator from Ohio, should like to answer the question of the Senator from Nebraska

Mr. POMERENE. I yield to the Senator. Mr. HITCHCOCK. I think it needs a better answer.

Mr. REED. The Senator from Nebraska very truthfully states that a bank ought to keep its assets in a liquid form. That much we all concede. By "a liquid form," however, is meant a form which will enable the bank, when it needs money, to get it. If a bank, by investing a very small part of its capital—3 per cent, or an amount equal to 3 per cent of its capital and surplus-in the stock of another bank, can thereby create a place where it can always cash all of its paper, and where it can secure Government currency as long as it has assets of value, it has made the most liquid investment of which the mind of man can conceive.

Mr. POMERENE. And by so doing it is contributing to the

liquidity of every other investment it has.

Mr. REED. Certainly.
Mr. HITCHCOCK. Mr. President—
The VICE PRESIDENT. Does the Senator from Ohio further yield to the Senator from Nebraska?

Mr. POMERENE. I do.

Mr. HITCHCOCK. The answer made by the Senator from Missouri is a good answer; but the protection which is secured by the establishment of these reserve banks, in which banks can discount their paper, is just as great if the people supply the money instead of the banks supplying the money, and in addition to that the banks are not loaded up with an investment which they can neither sell nor realize upon.

The result will be that to the extent that they have invested their money in this asset which can be neither sold nor hypothecated they will be compelled to rediscount paper more than they would have been compelled to rediscount it if they had not been required to tie up their money in this unavailable asset.

Mr. POMERENE. Mr. President Mr. HITCHCOCK. I believe the I believe the Senator will admit the truth of my statement.

Mr. REED. I think we ought not, in our argument, to interrupt the Senator from Ohio in his.

Mr. HITCHCOCK. I ask the Senator from Ohio to consider

Mr. POMERENE. If the Senator will permit me, I shall be very glad to do so. The money which is invested in this stock, in my judgment-bookkeepers to the contrary notwithstandingis the money of the people. In other words, it may be part depositors' money and part the bank's capital. I care not which it is; but it is invested in a permanent security from which the bank realizes a rate of interest two and a half times as large, or nearly three times as large, as it does on its deposits.

Mr. HITCHCOCK. Mr. President, I have heard the Senator make the statement before that banks earn only 2½ per cent upon their depositors' money, and therefore that a 6 per cent investment of their capital would be equally good. The Senator forgets that banks are not able to loan out their depositors' money except to a limited extent.

Mr. POMERENE. Why, of course.
Mr. HITCHCOCK. The law requires them, in the first place, to keep a part of it in cash available at all times. The necessities of trade and business demands do not call for loans at all times. The fact is, however, as the Senator from Ohio will admit, that the records show that the national banks last year paid in dividends to their stockholders an average of 11 per cent upon the stock. The Senator is requiring the banks to take that money, now operating at a high efficiency, and turn it into a 5 or 6 per cent investment, where it is practically unavailable in case the depositors demand it.

Mr. POMERENE. Mr. President, I quite well understand the Senator's position with regard to this matter, and this is the position to which he is driven: In the report which he submits he complains in one place that it is wrong to require a bank to invest its funds in securities which earn only 5 per cent, and in the very next sentence he makes the statement that it will be a

splendid investment for the people at 5 per cent.

Mr. HITCHCOCK. Are they not both correct statements? Mr. POMERENE. They are inconsistent.

Mr. OWEN. Mr. President—
The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Oklahoma?

Mr. POMERENE. I do. Mr. OWEN. The total resources of the national banks amount to ten thousand millions, including their capital stock, surplus, undivided profits, and resources arising from their deposits. Fifty million dollars is only one-twentieth part of one billion and only one two-hundredth part of the resources of the national banks. They will not be wrecked by such a contribution to this stock, which bears 6 per cent interest without taxes, equal to 7½ to 8 per cent in the case of an ordinary investment, and which investment will be taken out of their resources, which comprise for the most part the deposits.

The Senator from Ohio has made an overwhelming and crush-

ing answer to the suggestions of the opposition.

Mr. NELSON. Mr. President—
The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Minnesota?

Mr. POMERENE. I yield to the Senator from Minnesota, Mr. NELSON. I desire to ask the Senator from Oklahoma

question, with the Senator's permission, but I see he has left the Chamber

Mr. POMERENE. He has just stepped out. Mr. NELSON. If it is convenient for the Senator from Ohio to answer it, I shall be very glad to have him do so. Assuming that all the national banks joined this system, how much

would 6 per cent of their capital and surplus amount to?

Mr. POMERENE. It would amount, if I remember correctly, to about \$106,000,000. That is approximately the figure.

Mr. NELSON. Under the plan of the so-called Owen bill they are required to pay only half of that in the first instance?

Mr. POMERENE. The first half is paid in three payments.

Yes; and the balance remains as a liability? Mr. POMERENE. It remains as a liability of the member banks, to be called at any time.

Mr. NELSON. So that the capital in the first instance will be only a little over fifty millions, to be distributed among 8 to 12 different banks?

Mr. POMERENE. If I may try to express it in my way a little more accurately, that would be the paid-in capital at the end of six months.

Mr. NELSON. Yes; the paid-in capital. Under the bill as it reads those banks can commence business when one-sixth of the capital is paid in?

Mr. POMERENE. I think that is correct. Mr. NELSON. That would be \$500,000?

Mr. POMERENE. Yes.

Mr. NELSON. Then the regional banks can commence business as banks, to supply the other banks and help them, on a capital of merely \$500,000? Mr. POMERENE, Yes.

Mr. NELSON. Does not the Senator think they would be what I may call insignificant banks compared with the other

banks in the cities where they necessarily would be established?

Mr. POMERENE. Mr. President, of course the Senator will agree with me that he has taken the most extreme case possible in his illustration. If the \$500,000 were all the funds the banks would have, that criticism might have some force; but there is a certain part of the reserves that must be transferred immediately, and the reserves are turned over in several payments, the amounts differing in country banks, reserve banks, and central reserve banks. Let me suggest further that in the region where this small bank would be located, if there should be one so small as the Senator indicates, it would be in a locality which more than likely would not have banks of very large capital stock or of very large deposits; it would be the only bank of reserves in that immediate locality, and it does not necessarily follow that this bank would be resorted to at

POPULAR SUBSCRIPTION TO STOCK.

I wish to suggest a further thought in connection with the popular subscription to this stock. I think fairness compels the statement that up to date we have no acccurate knowledge as to what the earnings of these banks are going to be. It is my judgment that they will earn a sufficient amount to pay the dividends; but suppose they should not earn dividends regularly. Would it be wise to have the public, the widows and children, investing in a stock which might pass a dividend now and then? If this is going to be a good investment—and I believe it will be-it is not an excessive return upon the bank's stock. If it should be a poor investment, the public ought not to be required to "hold the bag" for the banks.

Mr. NELSON. Mr. President, will the Senator yield to me?

The VICE PRESIDENT. Does the Senator from Ohio

further yield to the Senator from Minnesota?

Mr. POMERENE. I do.

Mr. NELSON. I want the Senator to bear in mind that under the Hitchcock substitute or bill, providing for only four regional banks in the entire country, they will have sufficient capital and sufficient reserves to be of a good, respectable size, and their earning qualities necessarily will be enhanced. When, however, you split them up into a lot of petty banks, 8 or 12 in number, scattered over the country, there is danger that some of the banks, likely at some of these ambitious towns, will hardly earn enough to pay their expenses. If you make four strong reserve banks, unless the system should be an utter failure, they will undoubtedly not only earn an ample dividend and provide for a surplus and insurance, but they will bring a revenue to the Government.

There is the danger in your plan. You are proposing to make such a lot of petty little banks that, with the exception, perhaps, of one in New York and one in Chicago, the rest of them will not be able to earn hardly anything or to do any business.

They will be small affairs compared with the larger and better banks-the member banks-in the places where they are

Mr. POMERENE. Mr. President, I do not think that we are justified in saying that if there are four banks there will be four great banks, and if there are eight banks there will be eight petty banks, when the eight can be only on an average half smaller than the four big banks.

While I have great respect for the distinguished and learned Senator from Minnesota as a statesman, I will reserve my judgment when he assumes the rôle of a prophet in speaking of the success of one system or the failure of the other.

Mr. NELSON. Mr. President, in this connection-if it is disagreeable to the Senator, of course I will not interrupt him

Mr. POMERENE. I yield.

Mr. NELSON. I wish to call his attention to the fact that under the larger number proposed, Minneapolis and St. Paul, the Twin Cities, might have a bank located there, especially if you have 12. The capital and surplus of the national banks of Minneapolis amount to \$13,710,000 and of St. Paul to \$9,600,000. For commercial and financial purposes the two cities are practically one. The capital and surplus of the national banks of both these cities amount to over \$23,000,000. Now, what would your Lilliputian reserve bank be with a capital of only \$500,000 or with a capital even of half of the \$3,000,000? You propose a \$3,000,000 bank, and half of it will be \$1,500,000. What kind of a reserve bank would that be in the Twin Cities, and what a reserve bank would that be in the Twin Cities, and what figure would it cut? You would have to have the flag of the United States in front of the building, and you would have to have it labeled "This is a Federal reserve bank."

Mr. POMERENE. Mr. President, my distinguished friend is

not as candid this afternoon as he ordinarily is. I do not know what foresight he has which justifies him in saying that a Federal reserve board not yet created is going to place a bank in Minnesota which will have a capital of \$500,000, when he is not even assured that any Federal reserve bank is going there. It seems to me that that is dealing in speculation rather than in probabilities.

REDISCOUNTS OF SHORT-TIME PAPER.

Mr. President, there is another branch of this subject to which I wish to call attention. It was urged with a great deal of force before the committee that if we would limit the paper which was eligible to discount to 90-day paper the smaller banks in the West would not be able to avail themselves of the privileges of the bank. No figures have been presented, so far as I am aware, showing the amount of paper the average bank would have at any time which was 6-months, or 9-months, or 12-months paper. There is no evidence showing when this paper is taken. It is to be assumed that there is approximately an equal amount taken in each of the 12 months of the year. In any event, I dare say that there would hardly be a week in the existence of any one of these banks when it would not have a substantial part of its notes and bills receivable which would be eligible to discount under the limitation of 90 days.

To make my proposition a little clearer, if a bank is in the habit of taking six-months paper and there is an equal amount taken each month during that time, there is not a moment when one-half of the six-months paper would not be eligible to discount, and it will very rarely happen that any bank would want to discount more than one-half of its paper.

If I be not mistaken in that, there is a provision under the Owen bill whereby the member banks can execute their own paper, indorse it, and have it discounted at the reserve bank and hypothecate with it as collateral its commercial paper which has more than 90 days to run. So all these banks would be in a position where they could, to a very great extent at all seasons of the year, avail themselves of these privileges.

COMPULSORY REDISCOUNTS.

It is suggested that there should be something in whatever law is passed which would compel a regional reserve bank to rediscount a given amount of paper. Of course, these banks are for the benefit of the member banks. Other things being equal, every one is going to have its privilege to rediscount. But I doubt the wisdom of saying to any lender, "You shall loan to any borrower any amount of money." That is a matter which should address itself to the sound discretion of the bank loaning the money or discounting the paper. I think the Owen bill has amply provided for that in this language:

Said board shall administer the affairs of said bank fairly and impartially and without discrimination in favor of or against any member bank or banks and shall, subject to the provisions of law and the orders of the Federal reserve board, extend to each member bank such discounts, advancements, and accommodations as may be safely and reasonably made with due regard for the claims and demands of other member banks.

Mr. DRISTOW. Mr. President-

Mr. POMERENE. Permit me to add-and if the reserve bank board has at any time failed to live up to the spirit of this provision, its action or its failure to act would be subject to the supervisory power of the Federal reserve board. I can not conceive of a situation where a Federal reserve bank would feel at all disposed to deny a favor to a bank when it was justly and properly entitled to it, knowing that its action would be subject to review by the Federal reserve board. I now yield to the Senator from Kansas.

Mr. BRISTOW. The Senator from Ohio, I think, will admit that if a corporation or an individual extensively in business had short-time notes that were on the market, and if the regional board of directors would state to the bank in that region that the 90-day paper of this man or this concern was not regarded as good, it would be a notice to the banks, thousands of them, possibly, if the region embraced that number, that the discounting of that man's paper was regarded as unsafe. Now, that would destroy him in his business, would it not?

Mr. POMERENE. Not necessarily. I do not see how you can provide one rule for extending credit to a member bank that would be different from the rule which would require a member bank to extend a credit to the individual borrower. The banking rule should be the same, in my judgment.

Mr. BRISTOW. But the Senator admits that this regional board has the discretion to refuse paper which a member bank

may present, even if that paper complies with the forms prescribed by law; that is, 90-day paper.

Mr. POMERENE. Mr. President, that is not fairly stating my position. I am assuming—and every Senator must assume that whatever the form any of these boards shall take these men are going to act as broad-gauged business men, and that they will do their duty and nothing but their duty. On no other possible hypothesis could we establish and maintain a government.

We must assume that Senators are going to do their duty; we must assume that the Supreme Court is going to do its duty: we must assume that the Interstate Commerce Commission is going to do its duty; we must assume that these boards are going to do their duty; and if the board of directors of a reserve bank should not perform its duty, you have the supervisory power of the Federal reserve board to control its action.

Mr. BRISTOW. Now, it the Senator will pardon me, he assumes these men will, of course, do their duty. So do I. But suppose that for some reason the regional board of directors should decide that the paper of John Smith & Co. was paper that they did not care to rediscount, and so notified the banks in that region, that blacklists that company's paper with every bank in the region and every bank in the United States, so far as that is concerned. Complaint has been made, and made with great force, and the Senator from Ohio will not deny it, that concerns in this country that were good have been blacklisted, so far as credit was concerned.

Mr. POMERENE. Oh, I will assume that, in rare instances. Mr. BRISTOW. Well, it has been done.
Mr. POMERENE. We will assume that it is so in many in-Mr. POMERENE. We will assume that it is so in many instances, if that will avail the Senator.

Mr. BRISTOW. That has resulted in the financial failure of concerns that were financially sound, has it not?

Mr. POMERENE. I will assume that to be so. Mr. BRISTOW. I think the Senator and I agree that that Now, if the blacklisting by a few great banks of paper of that kind, with the wide-open condition that now prevails, is possible and does happen, would it not be much easier to destroy such a business when all the banks have to go to one regional bank for their rediscounts if the board of directors of that bank concludes that it does not care to rediscount that paper?

Mr. POMERENE. That is one side of the case, and an extreme side of the case. If the Senator will pardon me now, I think I heard his distinguished colleague on his branch of the committee refer in one of our meetings to an instance of which he had knowledge, in which certain concerns in the West were seeking credit at eastern banks, and the eastern banks, in their judgment, felt that it was not sound business policy to extend the credit, having due regard to their own investments and the interests of their own depositors. The credit was denied, and they believed that they were justified in denying that credit. After a time the suspicions which those bankers had were corroborated by the failure of the man who had sought to get the accommodation. Would it have been wise in that instance to have said to those bankers, "You shall loan to this borrower a given amount of money"? I dare say there is no banker, no investor, not even including the Senator himself, who would submit for one minute to any statute which would require him to loan his money to Tom, Dick, or Harry without the exercise of his judgment in the matter. Mr. BRISTOW. I am surprised that the Senator from Ohio should refer even indirectly to any member of the committee as ever having held that a member bank could be compelled to discount the paper of some citizen when it did not think that paper was good. Nobody has ever presumed to claim that any board of directors would have authority to require a bank to discount paper. That depends upon the judgment of the bank whose money is being loaned to the individual.

Mr. POMERENE. Of course, I did not think that any member of the committee entertained that view, but when you have an artificial limitation of this kind, how easy it is for a banker to say, "I will not loan that amount. My reason for it is that I do not believe he is worthy of that credit." If that be so, it is very readily seen that the limit you give is utterly unavailing. In other words, ultimately it comes down to the sound judgment of the man or the board that is extending the credit.

Mr. BRISTOW. I agree with the Senator as to that. There may be a thousand banks in the region, and a man doing business in that region wants to borrow some money. He goes to the bank in the town, and the bank thinks it can not loan him the money for some reason. He has a thousand other banks to go to and try, and if those banks are reputable banking institutions and belong to this regional system they can loan him that money. It is their money, and if they loan it to him and lose it, it is their loss. He has that opportunity.

Now, our contention is, as the Senator knows, that the bank must determine that for itself and it is not the business of the regional board. It is the business of the regional board to extend to the bank credit upon the bank complying with the requirements of the law. It is our position that that bank, when it meets the requirement of the law, is entitled to the credit. If it is not entitled to it because it is not good, then it ought to be closed up and put out of the association, and they should no longer intrust it with their funds.

Mr. POMERENE. The Senator will pardon me. I do not think any different rule can be applied to a bank than a bank would apply to a borrower. The Senator seems to have his view upon that subject, and I think he would have great difficulty if he would attempt to enforce it. As a matter of practical experience it can not be enforced.

## SHALL THE NOTES BE GOVERNMENT OBLIGATIONS?

Mr. President, I desire to speak briefly with reference to another question. It has been urged that these notes should be the notes of the banks and not the notes of the Government. This has been so strongly urged, and even upon the floor of the Senate, that I am constrained to discuss the subject for a few minutes.

The banks protest against the Government issuing these notes and urge that they should have the right of issue and not the Government; that if the Government should issue the notes it necessarily jeopardizes its credit to the extent that they are issued and that this might be embarrassing in time of war. It is said that the nations of the Old World do not issue notes as Government obligations; that all notes issued are bank obligations. This is perhaps true, but of itself it does not demonstrate either the truth of the position taken by the European banks or the faisity of the position assumed by the Banking and Currency Committee in making the notes the obligation of the Government.

By the act of March 14, 1900, the Government is obligated to maintain the parity of our currency system with gold. If that is to be her duty, and it ought to be, what objection can there be to the Government assuming the payment of a note when it is compelled to maintain its parity with gold. If these notes were purely fiat money there might be a considerable risk, but every dollar and every penny of them is properly and sufficiently secured.

First. By the prime commercial paper which the reserve bank must hypothecate with the Federal reserve agent as collateral security for these notes to the full amount thereof. Under the terms of this bill these notes are short-time paper not exceeding 90 days from the date of deposit until the date of maturity. They are first of all notes of the customers of the bank who are deemed worthy of credit by the member bank and of the class denominated prime commercial paper. They are the notes of the best individuals and firms and corporations in their respective communities; each firm is limited in the amount it can borrow at the bank to 10 per cent of its capital stock, except as to amounts drawn against existing values. These notes have been approved by the officials of the member bank; when they are presented for discount at the regional bank they must bear the indorsement of the member bank, which is always subject to examination by the Federal reserve agent, who is supposed to have full knowledge of the conditions both of the member bank and of the Federal reserve bank, which is also subject to examination by the Federal authorities

at any time. This paper is constantly maturing, and when paid either the money itself must be locked up in the chest of the reserve agent or a similar amount of new, prime, commercial paper must take its place, and here this renewed paper must be held for the redemption of these Federal reserve notes.

be held for the redemption of these Federal reserve notes.

Secondly. At the time of the issuance of these notes a reserve of 33½ per cent in gold is set aside to be used only for their redemption.

Thirdly. They are made a first and paramount lien upon all of the assets of the Federal reserve bank.

Fourth. The stockholders of the Federal reserve bank are the member banks. Their holdings are subject to a double stock liability, and the member banks which present the paper originally for discount to the Federal reserve bank are liable on their indorsement and the stockholders of the member bank are subject to a double stock liability.

Under these circumstances can it be said that the Government is running any risk? Surely it could be only a very limited risk at best. It would have nothing to lose or to pay after all the collateral to which I have just referred had been exhausted. How can the credit of the Government be jeopardized by assuming this obligation when for every dollar of liability it has so much collateral and other security to protect it? But it may be urged that with this security there is no risk to the bank and that the bank note is just as good security in this way as would be the Government note. My answer is that this is a new banking system; that the bankers have themselves taught us to realize the sensitiveness of money and of credit; that it may tighten the money market to adopt any change in our financial system; that people having money for investment or for deposit look with suspicion on any change.

I assume all these things to be true, and assuming that they are true, can we not readily understand that if a Federal reserve note issued by a reserve bank of Denver is presented some place in a New England district, it might not be received as readily as if it were the obligation of the Government. Men might hesitate to receive the obligation of a bank, but they will not hesitate to receive the obligation of the Government.

Again, it is urged that while this might be perfectly safe in time of peace, it is an unnecessary risk to assume in time of war. My answer is, and the answer of every good citizen must be, and it ought to be sufficient to say, that when we are framing a banking system it should be adapted to conditions of peace and not of war. If we are prepared for peace we will be prepared for war when the contingency arises.

Since the adoption of the Constitution we have had one war with Great Britain, another with Mexico, and another with Spain. I am speaking of foreign wars. So long as we shall attend to our own affairs there is little danger of conflict with any foreign nation. Shall we, in time of peace, in the preparation of a banking and currency system, be influenced in our judgment to adopt a scheme which is urged by a few extremists? If a system of finance is good in time of peace we will get more benefit from it in time of either war or peace than we will if we attempt to adopt a system applicable to a state of war and try to adapt it to times of peace. If this country was able to finance itself during the great Civil War, it can do it again against any force that can be brought against it.

Mr. WEEKS. Mr. President-

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Massachusetts?

Mr. POMERENE. I do.

Mr. WEEKS. Speaking of extremists, does the Senator from Ohio recall any witness who appeared before the Banking and Currency Committee who favored, or does he know of any competent expert in the world who is in favor of, issuing Government notes as a circulating medium?

Mr. POMERENE. Mr. President, perhaps I should not have used the word which I did. I did not mean it in any way offensively at all. I understand that bank notes rather than Government notes are urged by most of the financial experts; I understand that they refer to the great chests of gold that are held in each European country; but while I understand that, I also remember that those countries are always on a war footing, while we are not. Their need for gold—and gold is the money of war—can not be a standard for the American Nation, which, I hope, will ever be a nation of perpetual peace.

Mr. WEEKS. Well, Mr. President, I hope so, too; but when we are establishing a system which is likely to be the basis for the banking and currency system of this country for generations, if not for hundreds of years, why should we not adopt the experience of the world, and not only the experience of the world from a positive standpoint, but from a negative standpoint as well, and decline to do the thing which has always been injurious to the nation which has undertaken it?

Mr. POMERENE. Mr. President, I have the greatest respect for the judgment of my friend from Massachusetts, and I regret that I can not agree with him, but he asks my reasons. notes are perfectly secure; no banker has taken any exception to them, unless it be that the gold reserve is not quite high enough; but with the gold reserve and the other securities they were considered sufficient even by most of the bankers. Government is required to maintain all kinds of currency on a parity with gold; in other words, if a bank issues this character of note under the parity provision of our statute, it is for the Government to so exert itself that this note shall be redeemable in gold or the equivalent of gold. I believe that obligation is on the Government, and it ought to be. With all of the securities we have, I confess, then, that I am not able to see the force of the suggestion which the Senator makes, though I know he is supported by most of the authorities on financial subjects. I believe in doing things when there is a reason for doing them; I believe that when we are obliged to maintain the parity, and have sufficient security, and compel people to receive certain kinds of money as legal tender—that provision is not in the bill, but it ought to be—and under these circumstances, in my judgment, it should be the right and duty of the Government to issue these notes.

Mr. WEEKS. Mr. President—
The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Massachusetts?

Mr. POMERENE. I do.

Mr. WEEKS. I should like to call the attention of the Senator from Ohio to the fact that while the Government does redeem all bank notes outstanding, the banks furnish the means for the re-demption and furnish the security behind the notes. In this case you are not only asking the banks to furnish the redemption fund and also to furnish the security behind the notes, but in addition to that you are asking the Government to issue the notes direct. It is the first time since the Civil War that any such proposition has been seriously advanced in any country under any conditions, and it is the only time in the history of nations since the Civil War that any such attempt has been made. I want to say-and I am going to say it more definitely later—that, in my judgment, fundamentally it is the worst thing in this bill, and it is the thing which would make any man who knew the history of financial affairs hesitate to support the bill, even if he believed all the other provisions in it were good.

Mr. POMERENE. I understand that often we become scared by ghosts when there is not any reason for it. It is true probably that this has not been urged very strenuously, but I know that bankers are averse, and rightly so, to changes. I suppose that is one of the reasons which has persuaded them to put up

with our reserve system so long as they have.

RESERVE REQUIREMENTS UNDER THE PENDING MEASURE.

Mr. President, I have been occupying very much more time than I expected to. I want now to address myself for a few moments to the requirements of this bill in changing from the one system to the other. I have a statement and some tabula-tions here showing the change in the reserves under the proposed bill, the number of the bank's not in reserve or central reserve cities, the number in reserve cities, and the number in central reserve cities, as well as the capital stock and surplus of those banks, the amount of stock which is required to be subscribed by them and the amount of reserves to be transferred. I ask that they be incorporated in my remarks.

The VICE PRESIDENT. Without objection, that will be done. The matter referred to is as follows:

Capital to be subscribed. Capital stock (all national banks)	\$1,	056, 725,	345, 333,	786. 629.	. 00
Six per cent thereof (stock to be subscribed)  Payments of capital stock.	1,	781, 106,	679, 900,

Mr. POMERENE. Mr. President, the total of the 7,120 banks not in reserve or central res	der	nanc	l lia	bilit	ies

to \$3,136,329,730.27; the time deposits to \$459,377,757.19. The 315 reserve city banks have demand liabilities of \$1,821,413,-780.14, and time deposits of \$60,233,520.52; the 52 central reserve city banks have demand liabilities of \$1,605,579.970.29, and time deposits of \$13,755,310.58, making a total of \$7,096, 690,068,99,

As I have heretofore shown, a large amount of reserves will be released under the proposed legislation. Three per cent of the demand liabilities and 10 per cent of the time deposits in banks not in reserve or central reserve cities; 10 per cent of the demand liabilities and 20 per cent of the time deposits in the reserve city banks; and 7 per cent of the demand liabilities and 20 per cent of the time deposits in central reserve cities vill be released, making the total amount released \$449,357,-409.77. I ask that the table showing the figures may be incorporated in my remarks.

The VICE PRESIDENT. Without objection, that will be done.

The table referred to is as follows:

Reserves released under Owen bill. BANKS NOT IN A RESERVE OR CENTRAL RESERVE CITY.

3 per cent of demand liabilities (\$3,136,329,730,27) \_\_\_\_ \$04,089,891.91

10 per cent of time deposits (\$459,377,757.19) \_\_\_\_\_ 45,937,775.72 RESERVE CITY BANKS.

10 per cent of demand liabilities (\$1.821.413,780.14) \_\_\_\_\_\_ 12,046,704.10

CENTRAL RESERVE CITY BANKS.

7 per cent of demand liabilities (\$1.605,579,970.29) \_\_\_\_\_\_ 112,390,597.92

20 per cent of time deposits (\$13,755,310.58) \_\_\_\_\_\_ 2,751,062 11

Total amount released \_\_\_. 449, 357, 409, 77 Mr. POMERENE. I also have a statement here showing the amount of the reserves which must be transferred from each class of banks, the several dates thereof, and the amounts of the several payments. I ask that it be incorporated in my remarks as well.

The VICE PRESIDENT. Without objection, that will be done.

The matter referred to is as follows:

National banks not in a reserve or central reserve city	7, 120 315 52
Total	7, 487
Reserve requirements.	
BANKS NOT IN A RESERVE OR CENTRAL RESERVE CITY.	

12 per cent of demand liabilities (\$3,136.329,730.27) \$376,359,567.63 5 per cent of time deposits (\$459,377,757.19) \_\_\_\_\_ 22,968,887.86

Under present law six-fifteenths of these reserves must be carried in the vaults of the bank and nine-fifteenths in a reserve

city

Total \_\_

Under the proposed law four-twelfths are to be carried in the vaults for 24 months.

In the Federal reserve bank for a period of 6 months, twotwelfths, and for each succeeding 6 months one-twelfth, until five-twelfths have been deposited.

During the period of 24 months the balance of the reservesthree-twelfths-may be held in its own vaults or in the Federal reserve bank or in banks in reserve or central reserve cities as now defined by law.

After the 24 months' period all reserves except those required to be held in a reserve bank must be held in the vaults of the member bank or in the Federal reserve bank, or both, at its option.

Each bank not in a reserve or central reserve city, therefore, must transfer at the time of organization-

First installment, two-twelfths. Second installment, 6 months thereafter, one-twelfth. Third installment, 6 months thereafter, one-twelfth. Fourth installment, 6 months thereafter, one-twelfth.	\$66, 554, 742, 58 33, 277, 371, 29 33, 277, 371, 29 33, 277, 371, 29

Mr. POMERENE. Mr. President, one of the things which was so greatly feared by the banks was the disturbance which might be created in business circles by changing to the new system. They urged a reduction of the reserves and a more gradual distribution of the payments. That has been provided for, and, in addition to that, we have provided when it comes to the original transfer of the reserves that one-half of the amount may be made in commercial paper rediscounted. I recognize the fact that this has been subjected to some criticism, but, in my judgment, the criticism is not sound. If, for instance, a given member bank is required to make a transfer of \$100,000 to the new reserve bank to-day and it should have only \$50,000 in its vaults, it would be required to call in loans which it had made in the community for the other \$50,000 necessary. That would necessarily create some disturbance. If the payment were made in cash to-day, to-morrow it could go to the same reserve bank with other paper, borrow back the \$50,000 in cash which it had drawn from the marts of trade and restore it to those from whom it had been collected. Why should banks be required to call these loans in order to meet these transfers when it can be done partly in cash and partly by rediscounting its paper? It can make no difference to the system whether it receives \$100,000 in cash to-day and loans \$50,000 to-morrow to the same bank, or receives, in the first instance, \$50,000 in

cash and \$50,000 in paper.

We have felt that by this provision in the bill we would facilitate the reorganization of the banks in this country with a

minimum of disturbance to business

Mr. President, I have already occupied more time than I expected, and I will yield the floor.

Mr. WEEKS obtained the floor.

Mr. BURTON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hughes	Owen	Smith, S. C.
Bacon	James	Page	Smoot
Brady	Johnson	Pittman	Sterling
Bristow	Jones	Poindexter	Stone
Bryan	Kenyon	Pomerene	Swanson
Burton	Kern	Ransdell	Thomas
Chilton	La Follette	Reed	Thompson
Clapp	Lane	Root	Tillman
Crawford	Lea	Shafroth	Vardaman
Cummins	Lewis	Sheppard	Walsh
Gallinger	Martine, N. J.	Shively	Warren
Gronna	Myers	Smith, Ga.	Weeks
Hitchcock	Nelson	Smith, Md.	
Hollis	Oliver	Smith, Mich.	

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Fifty-four Senators have answered to their names. A quorum of the Senate is present.

Mr. REED. Mr. President, I desire to make a parliamentary inquiry. It is as to whether there is not a rule fixing some penalty for having the roll called at 10 minutes of 6 o'clock.

The PRESIDING OFFICER. There is no such rule so far as the Chair knows. The Senator from Massachusetts is rec-

Mr. WEEKS. Mr. President, I wish to take up for discussion some of the provisions of the amendment which is now under consideration which have not, I think, been discussed during this debate. First, I want to refer to the organization committee.

The House bill provided that there should be an organization committee of three members, consisting of the Secretary of the Treasury, the Secretary of Agriculture, and the Comptroller of the Currency. It provided that they should organize the system, and the reserve board should take control after the organization was completed.

It seemed to the members of the Committee on Banking and Currency that it would be desirable to have those who are to administer the system have to do with its organization. They will have an opportunity to hear witnesses who will appear to advocate the selection of certain places as the locations of reserve banks and branches of reserve banks; and in all the other multitudinous details which must be taken up in the organization of a system of this character it seemed to the Committee on Banking and Currency, without exception, that those who are to have the management and administration of this system should organize it, and presumably they will be the best fitted men to carry out that purpose.

The Secretary of the Treasury, the Secretary of Agriculture, and the Comptroller of the Currency are busy men. occupied, or should be, substantially all of the time in administering the affairs of the departments with which they are connected. Furthermore, without any reflection on the personality of those who at present hold those positions, their offices are political ones. I doubt if there is any Senator who has not expressed the view that every element of politics and political control should be kept out of this system; yet if the information which has leaked out of the Democratic caucus is to be depended upon, one of the questions which arose in that caucus was where the reserve banks should be located. I have no doubt there will be a radical difference of opinion among Senators and bankers as to the desirability of locating banks in the immediate community where their business is being

If I were representing the Commonwealth of Massachusetts alone in this matter, I should be very likely to advocate a sufficlent number of reserve banks so that Boston certainly would be the location of one of them. It is the third largest banking center in the United States. Its clearings almost every week, sub-stantially all of the time, are larger than those of any other city, than New York or Chicago. Therefore there are substantial reasons why Boston should be the location of a reserve bank, and yet my judgment is that having any number of banks larger than one is going to weaken the efficiency of the system. I advocate 4 banks as against 8 or 10 or 12, although I feel sure that 8 or 10 or 12 would give Boston one of these banks. I advocate 4 because I believe if we have 4 banks we are going to have a relatively efficient system, and I believe if we have 8 or 10 it is going to be relatively weak.

Therefore it is not from any selfish standpoint, either on my part or on that of those I am trying to represent, that I say that the question of the location of reserve banks is going to be one that will be extensively discussed, and many people will appear here, as is evidenced by the correspondence which all Senators are receiving, to advocate that their particular local-

ities shall be given a reserve center.

If you are going to leave to a political board, consisting of two Cabinet officers of the present administration—without, as I have said, any reflection whatever upon them-and the Comptroller of the Currency, the determination of the location of these banks and the other details relating to the system, it goes without saying that they are going to have put up to them political considerations and sectional considerations which they, as political officers and part of the present administration, are going to have difficulty in getting away from. Therefore it seemed to us that it was not wise that those men should be made

the board to organize this system.

The two branches of the committee have come to a different conclusion about who should organize it, however. One branch, the Owen portion of the committee, recommend that the Secretary of the Treasury, who is to be a member of the reserve board, and at least two members appointed by the President shall be the organization committee. The Hitchcock portion of the Banking and Currency Committee recommend that the entire board shall be appointed without delay, and that the board itself shall organize this system, for the very good reason, as I have stated, that it is to administer it, and it probably is the best and most competent body of men who can be found for that purpose.

Let us now discuss for a moment the difference between the

two propositions.

The Owen proposition provides that a majority of the organization committee shall be a quorum; that is, two members out of the three shall constitute a quorum for the conduct of business. In any case the Secretary of the Treasury is going to be the dominating influence in the board of three to which the organization is to be turned over. If there are only two, he has an equal vote with the other. I want once more to say that in these suggestions I do not intend in any way to reflect on the present Secretary of the Treasury, but I believe it is undesirable that even that element of politics which might enter into this organization should be made possible by limiting the number of the organization committee to three, one of whom shall be the Secretary of the Treasury.

The Hitchcock committee has removed politics as far as possible from this board by providing for a board of nine-one of whom shall be the Secretary of the Treasury and eight of whom shall be appointed by the President. In other words, one-ninth of the reserve board will be a part of the administration; the other eight will be divorced from political considerations. those nine men get together and organize this system, political and sectional considerations are going to be minimized to the

lowest possible point.

Mr. SMITH of Georgia. Mr. President, if the Senator will yield to me, is it not absolutely necessary that sectional considerations should be taken into account? Is it not a sectional question? Is it not a question as to where the business from a particular section goes?

I can not understand the Senator's criticism of the suggestion that a sectional proposition should be considered.

While I am on my feet, if the Senator will pardon me for just moment, reference has been made by him to the fact that in the Democratic caucus the question of the location of the regional banks came up. I think the only persons who raised that question were my colleague and myself. I wish to state just exactly

the basis of our raising it.

The proposition first submitted was that there should be eight regional banks—a fixed number. We asked: "Where will they be? If you say there shall be but eight, a fixed number, you ought to know that eight will exactly suit the division of the country. If there are but four, we understand they will be located in New York, Chicago, St. Louis, and San Francisco; but if there are eight, where are you going to put the southeastern section? We would prefer to be put in New York, with only four, than to have eight and be carried out of the direction where our business goes." That was all.

We raised the question, and that was the basis upon which we raised it-that we wanted to be sure that they had not fixed upon a plan that would take the southeastern States away from where their business goes, for we would prefer to vote for four and be sure we would go to New York, where our business goes, than to be taken, possibly, in a direction where our business

I have now repeated upon the floor of the Senate practically what was said there, so that the Senator can understand it.

Mr. WEEKS. I am greatly obliged to the Senator from Georgia for stating that fact. I did not know it before, in that form. He has made the best possible argument, however, for the contention I am presenting to the Senate. He, in a caucus of his party, tried to find out where these banks are going to be located. Now he provides, or the Owen amendment provides, that this organization committee shall meet, and shall have \$100,000 for the purpose of bringing witnesses before it-

Mr. SMITH of Georgia. One moment, Mr. President.

RECESS.

The PRESIDING OFFICER. The Senators will please suspend. The hour of 6 o'clock having arrived, the Senate stands in recess until 8 o'clock to-night.

The Senate thereupon (at 6 o'clock p. m.) took a recess until

8 o'clock p. m.

## EVENING SESSION.

The Senate reassembled at 8 o'clock p. m. BANKING AND CURRENCY.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. SMOOT. Mr. President, I notice very few Senators in

the Chamber and I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst Johnson Sterling Owen Brady Brandegee Bristow Page Pomerene Reed Robinson Swanson Thomas Thompson Thornton Jones Jones
Kenyon
Kern
Lane
Lea
Lewis
McCumber
McLean
Martine, N. J. Bryan Burton Tillman Townsend Vardaman Walshe Warren Weeks Shafroth Sheppard Sherman Simmons Clarke, Ark. Cummins Gronna Hitchcock Smith, Ga. Smith, Md. Smith, S. C. Smoot Myers Norris Overman Hollis Hughes James

The PRESIDING OFFICER. Fifty Senators are present—a quorum. The Senator from Massachusetts [Mr. Weeks] is

entitled to the floor.

Mr. WEEKS. Mr. President, when the recess was taken at 6 o'clock I was discussing the character of the organizing committee, and had just been interrogated by the junior Senator from Georgia [Mr. SMITH] on that subject. I had substantially said all that I had to say, which is to this effect, that I believe the provision in the Hitchcock bill which requires the appointment of the reserve board, eight members from civil tife and the Secretary of the Treasury, and that board being the organizing committee, is much wiser. It will remove any possibility of the charge that political action has been taken or may be taken. I should think it would relieve the Secretary of the Treasury from any embarrassment on that score. I hope

that that provision will prevail when an amendment is offered to that effect, as it will be separately later on, if the whole amendment that has been offered by the Senator from Nebraska is not accepted.

I wish to discuss briefly the provision authorizing subscriptions to the stock. It has been pretty generally discussed by other Senators, but I have one or two comments which I think may have some influence on the minds of Senators as to which

is the preferable method.

The House provided that national banks to be member banks should subscribe 20 per cent of their capital in stock, and that one-half of it should be paid in. The Owen amendment provides that 6 per cent of the bank's capital and surplus shall be subscribed. The Hitchcock provision provides that the stock shall be offered to the public through the national banks, and it is that particular point to which I wish to address

myself.

The Owen provision is to this effect: That the stock shall be offered to the banks; if the banks do not take the stock, then it shall be offered to the public; and if the public does not take the stock, then it shall be taken by the Government. Anyone who has ever had anything to do with exploiting any kind of an enterprise which necessitated selling stock to the public must necessarily know that stock which has been offered to one set of men and has not been taken by those men, and then from necessity is offered to some one else, goes to the second collection of individuals as damaged goods. You are providing on the other side of the House that if this stock is not taken by the national banks, after giving them time enough in which to consider whether they will take it, then you are going to turn around and offer it to the public. What is the public going to say under those circumstances? They are going to say, "This is not good enough for the national banks to take. They had an opportunity to do it. They have funds to invest. Why did they not take this stock? If it is not good enough for them Why to take, it is not good enough for us to take"; and they would pass it on to the last resort, in this case the Government itself. In other words, the Government would necessarily have to take the stock which had been refused by the two classes of investors in the country. From a business standpoint that is a wrong method of procedure. No banker would ever think of offering securities under those circumstances. If he offered it to the public, as it will be offered to the national banks in this case, and it was not taken, he would hold those stocks until some new consideration could be applied to it before it was offered to anyone else. That should be the course followed in this case

I believe that the public will take this stock, and I have a little evidence to corroborate that belief. A New York City banker issued a circular about two or three weeks ago describ-

ing the character of this investment.

A gentleman in Boston, seeing one of the copies of that circular, sent to the bank for a hundred copies and distributed those copies among the workmen in his factory, he being a manufacturer of machinery. The next day, at different times, 20 men came to him and asked him when they would likely have an opportunity to subscribe for that stock. Those were workmen in this factory, and they were attracted by the character of the investment.

Senators must remember that in Massachusetts there are at least two and a quarter million depositors in the savings banks, aggregating deposits to the amount of \$850,000,000. My judgment is, as is the practice in other cases, that very many of those deposits, which are small in amount, would be withdrawn for investments in this semi-Government institution. If that is the case, I submit to the Senate that that is the best character of stockholding these banks could have, because it would distribute among a very large number of people small holdings in this stock, which would strengthen the relations of the people to the banks, and it would in other ways be of advantage to the Government, the banks, and the people themselves.

I do not think it is necessary to pay over 5 per cent on that stock. A 5 per cent cumulative dividend paying stock not subject to taxation is a stock that should attract the attention of

small investors everywhere.

While I do not know what would happen in some sections of the country, and especially if we are going to have 8, 10, or 12 banks, in all cases I feel assured that as to the banks which are to be established in the eastern section of the country the stock would be subscribed for and oversubscribed for, if it were offered in the way that is proposed in the Hitchcock

Furthermore, I think there is another advantage which has been pointed out, and which was discussed somewhat by the

Senator from Ohio [Mr. Pomerene] to-day. If we establish banks with an aggregate capital of \$100,000,000, or even \$50, If we establish 000,000, as is proposed in the Owen amendment, and the banks are to give that sum, we are going to take \$50,000,000 from the banking capital of the country. There is no escaping that conclusion. But if we offer that stock to the public and the money is taken out of the stockings, and from this source and that source, and from the savings banks, if you please, then we are not taking anything from the banking capital of the country, but we are adding \$50,000,000 or \$100,000,000 to it.

The suggestion which has been made that this money could be taken from the national banks and charged to deposits has not any weight, because a deposit is an obligation of the bank, and if the money would be drawn out of the national banks by people who are likely to invest in this stock to invest in it, it would simply be reducing the liabilities of the bank without reducing the banking capital, which, I believe, is smaller in this country than it should be.

We have been going on increasing and multiplying deposits for many years until in several sections of the country the deposits in many banks are at least ten times, and frequently a greater number of times, larger than the capital of the bank.

think there is reason in the objection which has been made in the past to piling up the ratio of deposits to capital, and that in all cases, as far as possible, it should be limited to about ten

times the capital of the bank.

In some sections of the country, undoubtedly, the bank capital is less than those sections require to-day. I mean, of course, in the developing sections of the country—in the West and in the The very fact that New York banks are loaning now \$350,000,000 to the banks of the country and that one Chicago bank is loaning \$26,000,000 to the banks of the country is an indication that the banks in the developing sections of the West and in the South, where the cotton movement is now on, have less capital than they should have to conduct their ordinary business, and to draw any percentage of that capital out and invest it in this stock or the stock of reserve banks unnecessarily seems to me to be a lack of wisdom.

Mr. HITCHCOCK. Mr. President—
The PRESIDING OFFICER. Will the Senator from Massachusetts yield to the Senator from Nebraska?

Mr. WEEKS. I yield.
Mr. HITCHCOCK. As I recall the figures, the recent statements of the national banks indicate that they hold in their vaults about \$1,000,000,000 of money, chiefly for reserves. that about the correct figure?

Mr. WEEKS. I think that is correct.

Mr. HITCHCOCK. Practically they are down to the reserve limit.

Mr. WEEKS. Substantially that.

Mr. HITCHCOCK. I want to ask the Senator from Massachusetts what would be the result if out of this thousand million dollars of reserve money the banks were required to take, as under the draft of the bill of the Senator from Oklahoma [Mr. OWEN], \$50,000,000? Would that not reduce the loaning capacity of the bank to a very large extent?

Undoubtedly it would.

Mr. HITCHCOCK. Will the Senator state about the amount of the loaning capacity that that would take away from the banks of the system?

Mr. WEEKS. If you took \$50,000,000 in gold from the banks, you would take away three times their loaning capacity.

Mr. HITCHCOCK. Would it not be four times?

WEEKS. It would be four times-not only the \$50,-000,000, but you would reduce the loaning capacity, including the \$50,000,000 withdrawn, \$200,000,000.

Mr. HITCHCOCK. So that to take this cash out of the reserve money of the national banks would reduce their loaning capacity \$200,000,000, which would be practically a contraction of loans to that extent?

Mr. WEEKS. I think it would.

Mr. SHAFROTH. Mr. President, will the Senator from Massachusetts yield to me?

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Colorado?

Mr. WEEKS. Yes.

Mr. SHAFROTH. Take the case of a national bank that has \$100,000 in capital and a million dollars in deposits; let it operate under the Owen bill, and while it is required \$6,000 into the Federal reserve bank by reason of the reduction in the amount that is required of it in reserves from 15 per cent to 12 per cent, it is that much in its favor, and it is not a reduction of 3 per cent on capital and surplus, but it is 3 per cent on the deposits. If the deposits are \$1,000,000, 3 per cent of \$1,000,000 would amount to \$30,000. Consequently by going into the system where it has to pay \$6,000 it gets released for loaning purposes to the extent of \$30,000. that true?

Mr. WEEKS. Mr. President, that is true; but I was not discussing the question of releasing any part of the reserves. I was simply discussing the question of what would be lost to the banks in loaning capacity by taking \$50,000,000 in gold out of the banks

Mr. SHAFROTH. The question which the Senator from Nebraska asked was whether or not its loaning capacity would not be reduced.

Mr. WEEKS. And I want to add, Mr. President, that the Senator from Colorado is simply using that instance of one bank instead of all the banks of the country. The Senator from Nebraska has just suggested that the banks had about the reserve which they required, or did have it, at the last time a statement was made. As I recall it, the New York banks, instead of having 25 per cent, had a little over 26 per cent, the banks in Chicago had a little over 25 per cent, the banks in St. Louis had about 231 per cent, while the country banks had some-

thing like 16 per cent or a little lower.

Mr. SHAFROTH. The same rule would apply to the reserve city banks and to the central reserve city banks by reason of the reduction in the amount of reserves required. Consequently the loaning capacity of the banks would be five times more by the adoption of the Owen bill than it now is.

Mr. WEEKS. Mr. President, I did not state that there would not be some way to overcome that reduction in loaning capacity on account of the withdrawing of the \$50,000,000 and \$100,000,000 in gold. As a matter of fact, it would be reduced to that extent, but made up by the reduction in the reserves which are

required under this proposed act.
Mr. HITCHCOCK. Mr. President-

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Nebraska?

Mr. WEEKS. I yield to the Senator from Nebraska. Mr. HITCHCOCK. The Senator from Colorado [Mr. Shaf-

ROTH] well knows that the question here is not between the Owen draft of the bill and the present law, but it is a question of how we are going to amend the present law, whether it will be by the draft presented by the Senator from Oklahoma or by the draft presented by the section of the committee of which I am a member. The draft which I have reported here equips the banks to discount paper to just as great an extent as does the Owen draft of the bill, but does not deprive them of the power to loan \$200,000,000 by taking \$50,000,000 in gold away from them at the outset.

Mr. OWEN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Oklahoma?

Mr. WEEKS, I do.
Mr. OWEN. May I ask the Senator how he reconciles this \$200,000,000 contraction of the currency in this way with the explanation of the Senator from New York that this \$50,000,000, on a 331 per cent basis, would expand the currency \$150,000,000?

Mr. WEEKS. Well, Mr. President, I am not, of course, reconciling the figures which I am submitting with the figures which Mr. WEEKS. any other Senator has submitted. It is easy enough to ask that kind of a question about the speech delivered by another Sen-ator to which I may not have been listening and about which I know nothing. I do not know what phase of the subject the Senator from New York was discussing when he used the figures referred to by the Senator from Oklahoma.

Mr. OWEN. May I then put the matter in another form? If

this \$50,000,000 in gold is placed in the Federal reserve bank and the Federal reserve bank has a right to issue \$150,000.000 of Federal reserve notes against \$150,000,000 of gold and negotiable paper which may be offered to it, does it not expand the currency \$150,000,000?

Mr. WEEKS. Well, Mr. President, under the Hitchcock bill it would only expand it \$110,000,000 at most, but it is not a question of expanding the currency that we are discussing; we are discussing the question of expanding credit.

Mr. OWEN. But if you expand the currency, and the currency is a basis of credit, you make your expansion still larger; and it is a flat contradiction of the contention that it contracts credits \$200,000,000

Mr. WEEKS. I made the statement that that of itself, without any other element entering into it, would contract the currency \$200,000,000; and I still think it would.

Mr. SHAFROTH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Colorado?

Mr. WEEKS. I yield to the Senator from Colorado.

Mr. SHAFROTH. Mr. President, the question asked by the Senator from Nebraska, as I understood it, when he interrupted the Senator from Massachusetts, was whether or not the withdrawal of this \$50,000,000 would not impair the loaning capacity of the banks to the extent of \$200,000,000, as he put it? The only way to contrast that is whether it would contract and whether it would impair the loaning capacity to the extent of \$50,000,000 or \$200,000,000. When you take into consideration the provisions of this bill that turn back \$30,000 of the reserve in the case of a bank having a capital and surplus of \$100,000, and apply the same principle to the \$50,000,000, you will find that there will be many hundreds of millions of dollars that will be made loanable by the Owen bill. If this bill is going to make that much more money loanable, it seems to me that the theory of the Senator from New York might have something

Mr. HITCHCOCK. Mr. President—
The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Nebraska?

Mr. WEEKS. I yield. Mr. HITCHCOCK. I want to make my point clear to the Senator from Colorado, because I think if he understands it he will not dispute it. If a bank receives a deposit of \$1.000 it can loan out \$750 of that money, keeping a reserve of 25 per cent. I am now speaking of a bank in a reserve city. reserve of 25 per cent-\$250-represents a loaning capacity of \$750. If that \$250 is taken away from that bank it is compelled to call in \$750 of loans. Taking that in the amount of \$50,-000,000, which the Owen draft of the bill proposes to take away from the banks, it will necessarily contract their loans, and I think instead of four times it will be three times, it will be \$150,000,000. The Senator is correct in saying that the banks can borrow that back. No one denies that they can borrow it back under the draft of the bill that I have reported, but besides being able to borrow it back the bank has got the original

In answer to the statement made by the Senator from Oklahoma [Mr. Owen] to the argument of the Senator from New York [Mr. Root] here to-day, that the bills in his opinion would lead to an expansion of credits and to an expansion of the currency, that is one of the dangers that every member of the committee, I think, contemplated during the hearings; but before that expansion and before that inflation of the currency, we all know that there will be a contraction. There will be a contraction of credits when you take this capital away from the banks; and that will occur before the banks are able to make any discounts to create any expansion. The first effect of this legislation as proposed in the draft of the bill of the Senator from Oklahoma is going to be a contraction of credits; and that is occurring all over the country to-day. Every bank is calling in its loans in order to prepare to get the money to turn into the reserve banks. That contraction is now in prog-The country is suffering from it. Once in motion, this new machinery may result in expansion and even in inflation, but it will only be that we will go from one evil to another. Both arguments, therefore, that a contraction is possible now and an inflation is possible later are entirely true and entirely consistent.

Mr. SHAFROTH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Colorado?

Mr. WEEKS. Yes.

Mr. SHAFROTH. I thought I understood the Senator from Nebraska correctly when he said that there would be a contraction of the currency and a contraction of the loanable capacity of the banks by reason of the enactment of the Owen bill. That, it seems to me, it can be demonstrated will not occur; and I want again to call his attention to the instance of a bank with a capital and surplus of \$100,000 and with deposits equal to \$1,000,000, because that is about the average of the banks. By the Owen bill the bank will have to contribute 6 per cent-in fact only 3 per cent, but I will assume that it is 6 per cent-of its capital and surplus. How much is that? It is \$6,000. At the same time that occurs there is released, by reason of the reduction of the reserves, from 15 per cent to 12 per cent—that is, 3 per cent. Three per cent on what? On the deposits. On what amount of deposits? On a million dollars. Three per cent on a million dollars is \$30,000. So when you size up what the loaning capacity of the bank is you will invariably have \$30,000 added to its loaning capacity and \$6,000 taken away from it, or \$24,000 net in its loaning

Mr. WEEKS. Mr. President, that makes five times the Senator from Colorado has put that statement in the RECORD to-day, and I think he is right about it.

Mr. SHAFROTH. I think so, too; and I am glad the Sena-

tor admits it.

Mr. WEEKS. And yet the question the Senator from Nebraska asked me, if the circulation would not be contracted by the process indicated in his question was absolutely correct. Now, to proceed-

Mr. BRISTOW. Mr. President-

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Kansas?

Mr. WEEKS. Yes.

Mr. BRISTOW. I want to suggest to the Senator from Massachusetts that I think his statement that the position of the Senator from Colorado is right should be qualified. It may be right in regard to a city bank, but it is not right in regard to a country bank. I think the Senator from Massachusetts will admit that the country banks can not reduce their reserves down to 12 per cent. Even if there were no reserves at all required, those banks would have to keep more than 12 per cent; they would have to keep about the amount they keep now; they could not do business without it; it would not be safe. So there are very few country banks that will carry any less reserves than they carry now, and the advantage which the Senator from Colorado says they will have will never be actually realized so far as they are concerned.

Mr. WEEKS. Mr. President, to avoid any further controversy on that subject I will say that everybody is right. [Laughter.] The Senator from Kansas is right. There would be that reduction; but then, banker after banker testified before our committee that he could not reduce the amount of the reserves which he has to carry below 15 per cent even if the law allowed him to do so, and, therefore, the Senator from Kansas is quite right in his statement. This is the first time I have ever known three persons arguing a question from three differ-

ent viewpoints all to be right. [Laughter.]

Mr. BRISTOW. I desire to say that the junior Senator from North Dakota [Mr. Gronna] advises me that the country banks in his section of the country, as a rule, have to carry about 20 per cent. What good will they get out of this reduction of from 15 to 12 per cent?

Mr. SHAFROTH. In answer to the Senator, I will say that the very object of this bill was to provide such a system that they need not carry any more than the legal amount of reserves; and as soon as the bill is passed you will find that instead of carrying 20 per cent, as they do now, there will be released 8 per cent instead of 3 per cent.

Mr. WEEKS. Mr. President, I tried to explain the other day that there was a vital difference in the amount of reserves which the banks in different localities would have to carry under any law. If the banks are removed a considerable distance from a reserve center, as are the banks of North Dakota, whether the prevailing law is in force or whether any one of the pending bills becomes a law, it will be necessary for those banks to look after their own immediate personal necessities, and that will require them to carry a much larger reserve than would be necessary if they were located within 50 miles of Minneapolis, for instance.

Mr. BRISTOW. If the Senator will pardon me just a mo-

The PRESIDING OFFICER. Does the Senator from Massachusetts yield further to the Senator from Kansas?

Mr. WEEKS. I yield to the Senator from Kansas. Mr. BRISTOW. The Senator from Colorado made the statement with great confidence that the country banks after this bill was passed would have 8 per cent of their reserves released. I can not understand why the Senator from Colorado insists on not understanding and refusing to understand the reason why the country banks can not conduct their business on a 12 per cent reserve. In the first place, it is not safe for banks that are a long way from reserve cities to have such a small amount of cash on hand as would meet the legal requirements of this bill, and they will all carry more cash than the bill compels them to carry. They will have to do it; business will compel them to do it; and they will have to keep money with their correspondents. So this bill is utterly useless, so far as enabling the country banks to reduce their reserves is concerned. They could not do so, even if no reserves were required under the law.

Mr. SHAFROTH. Mr. President, that is where the Senator and I differ. As a matter of fact, if his theory of the bill, that there should be only four reserve banks, one at New

York, one at Chicago, one at St. Louis, and one at San Francisco, were adopted it would be very difficult for a member bank in a remote section to get to a reserve bank, and thereby they might be required to carry greater reserves; but we do not apprehend that the Senate of the United States is going to adopt the plan calling for four regional banks; we think they are going to adopt the plan calling for 8 or 12; and in that event there will be an opportunity for a bank in 18 hours to get reserves or get cash at one of the reserve banks. When that is the case, what would be the use of keeping high reserves when in 18 hours they could go to a reserve bank or send to it and get the relief there? Consequently, I think, with the faith and credit which the people will have in the country banks, knowing that they are connected with this system, that the country banks would adhere to the rule which will be prescribed; namely, that they can keep in their vaults 7 per cent and in the Federal reserve bank 5 per cent. Therefore, if they keep 20 per cent reserves now it will be a saving to them to the extent of the difference between 12 per cent and 20 per cent, which is 8 per cent. I am sure that that is the proper solution of it.

Mr. BRISTOW. Mr. President-

The PRESIDING OFFICER. Does the Senator from Massachusetts further yield to the Senator from Kansas?

Mr. WEEKS. Yes.

Mr. BRISTOW. If the Senator will yield again, just to show how utterly the Senator from Colorado, with all his acumen—and it is very great—has failed to grasp the situation as to these reserves, I wish to call his attention to the fact that we have now, including the central reserve and the reserve cities, not 12, not 8, not 10, but 50 reserve cities; and the country banks, with 50 reserve cities, are now compelled to carry more than 15 per cent reserve. The Senator from North Dakota is right when he says that as a rule they carry about 20 per cent. Their business compels them to do it. They have got to do that to conduct their business as it should be conducted and be on the safe side.

The law requires them to carry only 15 per cent reserve, but they carry 20 per cent. The banks in my State carry more than 15 per cent. The average for the State is more than 15 per cent. With 50 reserve cities, if business requires and compels them to carry more than 15 per cent-that is, more than the legal requirement-how does the Senator expect, having 8 or 10, a reduction to less than one-fourth of what we now have, to enable them to carry a less percentage?

Mr. SHAFROTH. I will say to the Senator, with respect to that matter, if the Senator from Massachusetts will yield-

Mr. WEEKS. Yes; I yield once more.

Mr. SHAFROTH. The Senator ignores, or rather forgets, the character of the Federal reserve banks. He says there are 50 reserve cities now, containing 315 banks, and that on that account they are scattered and they can get to them. Yes; but what is the reserve in the reserve city bank worth to the country bank? It is valuable only to the extent that is there; that is all. When the country banker enters this system, however, he can take his portfolio of notes and go down to the Federal reserve bank and get a discount of 50 per cent of all his deposits if he wants to. That is an entirely different proposition, and with that right he can well say, "I will keep in my vaults only the amount that the law requires, but if I have got to rely on a private bank that may not give me any more than the reserves which I have down there it will be of little avail in case of a run."

It is the fact that the Federal reserve banks provide a market for discounting paper that gives such strength to the country banks, and therefore lets them retain within their own vaults simply the amount of reserves required by law.

Mr. BRISTOW. Mr. President, if the Senator will yield

The PRESIDING OFFICER. Does the Senator from Massachusetts further yield to the Senator from Kansas?

Mr. WEEKS. I do. Mr. BRISTOW. I want to challenge the Senator from Colorado to name a single country banker who has stated that he could not get all of the discounts he wanted from his reserve agents whenever he called for them.

Mr. SHAFROTH. Why, in cases of panic none of them can

get them.

Mr. BRISTOW. The challenge is that the Senator shall name

Mr. SHAFROTH. The very fact that they suspended payment in New York City in 1907 is demonstrative of the fact that they could not get money.

Mr. BRISTOW. I issue the challenge again and invite the Senator from Colorado to name a single country banker who has said that he could not get his rediscounts from his corre-

spondents whenever he asked for them.

Mr. SHAFROTH. Why, I have not asked the bankers on that point, but I know there were just hundreds of bankers who did not pay cash. I know that. There is not any question but that nearly every town that had a clearing house issued what were called clearing-house certificates, and consequently

I suppose that prevailed universally.

Mr. BRISTOW. Ah, if the Senator will pardon me, I will invite his attention to the testimony of a banker from his own city, who stated that his reserve was greater at the end of the

panic than it was when it started in.

Mr. SHAFROTH. Yes; but they would not pay it out. That

was the trouble. New York had pretty nearly the same amount, and yet the bankers of New York would not pay it out.

Mr. BRISTOW. The banker from the Senator's city collected his reserves from other cities and put them in his own vaults.

Mr. SHAFROTH. Why did the bankers of the city of Den-

ver, then, absolutely have to issue clearing-house certificates?

Mr. BRISTOW. The truth is that they did not have to, because when they issued them they had more money than they

have to-day or had had a year previously.

Mr. SHAFROTH. Yes; but they would not pay it out.

Mr. BRISTOW. That is not the fault of the system. I again issue my challenge to the Senator to name a single banker who has said that he could not get all the discounts he wanted from his correspondents when he needed them.

Mr. SHAFROTH. I have not interrogated any banker upon the subject. This is the first time the subject has come up.

I have not any bankers around me.

Mr. BRISTOW. It was brought up frequently in the hear-

Mr. WEEKS. Mr. President, I have heard it said frequently that a woman insists on the last word. They have not any

monopoly of that. [Laughter.]

There are two questions which I want to discuss briefly, bearing on the questions of stock and management. One is that when the original Owen-Glass bill was printed the bankers of the country almost universally objected to the bank ownership of the stock, and especially to their being obliged to subscribe to it. I think there was not a banker before the Committee on Banking and Currency who did not object to being forced to subscribe to the stock of the reserve banks. Every one of them expressed the sentiment, as I recall, that they did not want to invest in it: that they could do better with their funds than invest in this security.

Since the two propositions have been given to the public, the Owen and Hitchcock propositions on the subject, it has been stated-I think it was stated here the other evening by the junior Senator from Kansas [Mr. Thompson], who read a letter or a telegram from somebody in Kansas—that they preferred the Owen method of procedure; that the banks should own the stock. I think his communication was from a banker.

In order to find out whether that sentiment was justified, certainly in the eastern section of the country, I wired a bank in New York and a bank in Boston, asking that a canvass on that subject be made in those two cities. I will read the telegram I have from Boston. I think there are now about 20 national banks in Boston, and perhaps 25 trust companies.

The telegram is as follows:

All the national banks, and all the trust companies except a few, favor public ownership of stock.

The telegram from New York is not quite so positive as that, but it is to this effect:

Feeling among bankers here-

And this was after a canvass-

is that the success of the undertaking will be more certainly established and very much wider interest will be created if the public should be given an opportunity to subscribe for the stock. Moreover, it would bring the banks more in touch with the people and more in their con-

I do not know whether those sentiments would be found in other cities or other sections of the country; but certainly those two cities represent a very large percentage of the banking capital of the country, and they are considerable in numbers as well. As far as any evidence before the Senate is concerned, we may conclude that the bankers, as well as the people generally, would prefer to have public ownership of this stock rather than ownership by the banks.

Now, as to the question of the directors of the reserve banks. I think perhaps I have all the prejudices which go with the desire to have expert management of the reserve banks and experts on the reserve board. Personally, I do not care whether

every one of the reserve board is appointed by the President or whether every one of them is elected by the banks, or by someone else, or whether every one of the directors of the reserve banks is appointed by the President or appointed by the reserve board or elected by the banks, provided suitable and competent men are selected for those places. There is the whole

The President might appoint better men than the banks would elect. The banks might elect men who had more expert knowledge than those the President would appoint. broad knowledge and experience, including banking experience, are selected for those places, those are the men that the people

of the United States wish to have occupy the places.

I have no disposition to quarrel with either method if we are going to get the same result. Men are not going on the board to represent the banks of the country, and should not do so. They are not going on the board to represent the Government, and should not do so. They should go on the board taking their oath to perform their duty to the best of their ability; and if that is done, as I have said, it makes substantially no difference what is their origin.

Criticism has been made and the argument frequently advanced by those who are supporting the Owen proposal, that the banks should have control of the reserve banks, because they are putting their money in them. That is not a good reason why they should have control of the reserve banks. putting their reserves there, and properly so. The Government is putting a couple of hundred million dollars there, and the capital will be subscribed by somebody, either by the public or by the banks. There will be different elements in the ownership

and the deposits in those banks.

I did at first have a prejudice on the subject. It did seem to me that it would be necessary to select bank men for the reserve board in order to get the best results; but it is up to the President and the Senate-the President to appoint and the Senate to confirm men who are suitable, without any regard to what their connections have been or are, except that no man should be on any of the boards who has any connection with any jointstock bank at the time he is appointed or during his service. I will add to that that in my judgment he should be free from all business entanglements. He should disconnect himself, dissociate himself from business affairs generally, so that his undivided attention, his undivided judgment, and his undivided interest may be devoted to the management of the great interests which are to be put in his charge. If that is done, we are going to have good results.

The Senator from Michigan [Mr. Townsend] asks me if I think that will be done. I have confidence that it will be. I certainly hope so, and if it is not done, so far as the appointing and electing power is concerned, the Senate has a veto, and it

should exercise it.

I wish to see these places, especially on the reserve board, filled by business men of the highest character and of as broad capacity for that kind of a place as are the places on the Supreme Bench filled by lawyers. We have had a Supreme Court for 125 years, and never yet, with one exception, have we had any scandal or any question about the capacity of the court. Wa should have the same result in this great board, because it is comparable to the Supreme Court in the interests which are involved and in the matters to come under its charge.

I have confidence and belief that, at least when the system is started, it will be started under the jurisdiction and guidance

of men of that character.

I yield the floor, Mr. President, Mr. BURTON. Mr. President, several days since I prepared considerable number of questions suggested by the pending bill. Some of them were propounded to me by correspondents. Concerning others, I found that there was a difference of opinion among my colleagues as to the correct answer. I have presented this list of questions substantially as it stands to the chairman of the Committee on Banking and Currency, and at this time I should like to take them up one by one.

There are portions of the bill which do not seem to me entirely clear, which perhaps will seem very simple to the Senator from Oklahoma, the chairman of the committee, and to the other members of the Banking and Currency Committee; but an answer will make the provisions of this bill clearer to the Senate and also more comprehensible to the people in the country

at large who are interested in this legislation.

I should like to ask the Senator from Oklahoma, or, indeed, any member of the Banking and Currency Committee, as a first question, Is it contemplated that all the members of the Federal reserve board shall be nominated and confirmed before the organization committee is chosen and begins its work?

Mr. OWEN. No.

Mr. BURTON. Mr. President, it will be observed that on page 32 of the bill there is a provision to the following effect:

SEC. 10. A Federal reserve board is hereby created which shall consist of seven members, including the Secretary of the Treasury, who shall be a member ex officio, and six members appointed by the President of the United States, by and with the advice and consent of the Senate. In selecting the six appointive members of the Federal reserve board, not more than one of whom shall be selected from any one Federal reserve district, the President shall have due regard to a fair representation of the different geographical divisions of the country.

I wish to say just a few words on that subject. It seems to me extremely desirable that all the members of this board should be appointed before the selection is made for the organi-It seems also desirable that the Federal zation committee. reserve board should itself undertake the work of the organization committee; that is, it would be better than if only two of them are to act in dividing the country into districts and selecting the localities for regional banks. The members of the reserve board will have great powers to exercise. It will be most desirable that their wishes in the way of division shall be observed, not after the system has commenced to work, but at the very beginning.

Mr. SHAFROTH. Mr. President-

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Does the Senator from Ohio yield to the Senator from Colorado?

Mr. BURTON. Certainly.

Mr. SHAFROTH. If the Senator from Ohio will yield, I will state the reason why that provision of the bill is there. It is because there is contained in the bill a provision that no two members of the Federal reserve board shall be from the same district.

Mr. BURTON. I read that provision.

Mr. SHAFROTH. Now, if we require all these men to be appointed before the districts are created, the President can not determine whether a man who lives, for instance, on the Mississippi River, would belong to the St. Louis district or the Chicago district, or, if there are two near there, whether they would not be in the same district. Consequently, it was that idea that made us avoid the question as to the whole board doing it.

The President may appoint them if he feels inclined to do so, but, as a matter of fact, it is difficult to tell, if we are going to have S or 10 or 12 districts, just where the line will be drawn; and inasmuch as the provision is there that no two shall be from the same district it would be almost impossible to figure out with accuracy the districts and also to ascertain whether the men would not be in the same district. For that reason we thought it was best to leave it to the Secretary of the Treasury and not less than two members of the Federal reserve board. The President could easily select one from San Francisco and another one from New York, and, with the Secretary of the Treasury, there would be no question as to a conflict.

Mr. BURTON. There is in this regard a difference, Mr. President, between the so-called Hitchcock bill and the Owen bill. The argument on behalf of the Owen bill is that no two should come from any one district and that special provision should be made to that end. The argument on the other side, and I think I can weigh the argument with entire impartiality, is that it is best to choose the board at the very beginning and have them divide the country into districts. As that board must have the full responsibility for the management and as they have the right to readjust or change the districts thereafter, it seems to me the argument in favor of conferring this duty or responsibility on the reserve board is stronger than the other argument which seeks to prevent two members from being chosen from the same district.

In any choice that is made by the President of the United States in the exercise of his high authority, which no doubt he will exercise with a great degree of responsibility, he would select men from different portions of the country. not choose two, say, from one of the great financial centers of the United States. It seems to me that the provision for the performance of this duty by the Federal reserve board is the preferable one of the two.

I note, Mr. President, that the Comptroller of the Currency is included in the Glass bill not only as a member of the Federal reserve board, but also as a member of this organization committee. He is now omitted from both. Of course, I can see an excellent reason for omitting his name from the Federal reserve board. The Comptroller of the Currency is to a very large degree an auditor. He reviews the accounts and he reports upon them. Now, if he were a member of the board and participated in its deliberations and in its actions and were afterwards required to pass upon its reports as an auditor, he would be ruling upon matters in which he had already participated, because he was a member of the Federal reserve board.

There is certainly a very valid reason for the change in the House bill in that regard, but I do not see why he should not be left on the organization committee if only two, at any rate, are

to be chosen from the Federal reserve board. The Comptroller of the Currency has more or less intimate knowledge of the banks of the country, the amount of their deposits, and their general transactions, and so in a very peculiar degree he would be qualified to aid in properly dividing the country into districts.

Mr. OWEN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Oklahoma?

Mr. BURTON. Certainly.

Mr. OWEN. I will ask the Senator from Massachusetts [Mr. Weeks], as my special representative, to answer that question. Mr. WEEKS. I beg the Senator's pardon. I did not hear his remark.

Mr. OWEN. The Senator from Ohio desires to know why the comptroller was left off this Federal reserve board.

Mr. BURTON. Oh, no; I have said there is a perfectly valid ason for that. There is no doubt of that. I should certainly reason for that. favor omitting him from the Federal reserve board. But my question was, Why is he left off this organization committee?

Mr. OWEN. I would be glad to have the Senator from Massachusetts answer the question, because he opposed placing the

comptroller on that committee.

Mr. BURTON. I am perfectly willing to yield to the Senator

from Massachusetts for that purpose.

Mr. SHAFROTH. I may state that I was in favor, and so was the Senator from Oklahoma in favor, of retaining the Comptroller of the Currency, but the Senator from Massachusetts—

Mr. BURTON. On the organization committee? Mr. SHAFROTH. Both on the organization committee and on the board. I believed that the Secretary of the Treasury, being at the head of the board, when he was absent from Washington should have a live, active representative here to represent the Government. The Senator from Massachusetts [Mr. Weeks] took the opposite view, and he can explain his position better than we can.

Mr. WEEKS. Mr. President, if I am to be given the credit for leaving the Secretary of Agriculture and the Comptroller of the Currency off the reserve board, I am getting more credit, I am sure, than I am entitled to, but I am satisfied I have really accomplished something during the past three months that is

I will say to the Senator from Ohio that there is every reason why an executive officer of the Government should not occupy a position on an important board in the Government service. The Secretary of the Treasury, the Secretary of Agriculture, and the Comptroller of the Currency are busy men in administering the affairs of their departments. That is especially true of the Secretary of Agriculture, who, I think, personally, is probably a well-equipped man for service on this board, but there is no position in the Government requiring more continuous and active service than is required in his position. Therefore it did not seem wise to put men who are so occupied in places that will require, or should require, the entire time of the incumbent. The same consideration applies to the Comptroller of the Cur-But we did leave the Secretary of the Treasury on the board, because it is presumed that some of the duties which the Secretary has been performing will be least conflicting with the duties of the reserve board. I think his former duties may be somewhat lessened. He has been in touch with very much of the work the reserve board will have to do in the future, and as a representative of the administration and of the Government, it seemed reasonable that he should be continued as a member of the board. However, I think there is no valid reason why the Secretary of Agriculture or the Comptroller of the Currency should be placed on the board.

Mr. BURTON. I understand that both bills agree in leaving the Secretary of Agriculture off both the Federal reserve board

and the organization committee.

Mr. WEEKS. Yes. Mr. BURTON. And in leaving on the Secretary of the Treas-

Mr. WEEKS. Yes. Mr. BURTON. Both bills concur in leaving the Comptroller of the Currency off the Federal reserve board and the organization committee?

They do. Mr. WEEKS.

Mr. BURTON. Mr. President, I have already stated that there is a valid reason why the Comptroller of the Currency should be left off the Federal reserve board. If he were to remain on it it would be his duty to pass upon reports and accounts of a board of which he was himself a member. why should he not stay on this organization committee, with all his familiarity with the national banks of the country, which is far greater than that possessed by anybody else?

Mr. BRISTOW. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Kansas?

Mr. BURTON. Certainly.
Mr. BRISTOW. I do not want the Record to show, or to have it inferred from the RECORD I should say, that all the members of the Committee on Banking and Currency believed that the Secretary of the Treasury should be on this board. While the bill which I advocated so provides, if the majority of the committee had felt as I do and as I did, he would not have been there, because I do not think the Secretary of the Treasury or any other Federal official ought to be a member of this Federal board.

Referring to the question of the Senator from Ohio, the fact that the Comptroller of the Currency is familiar with the banking business of the country so far as the management of the banks is concerned does not indicate at all that he is familiar with the commerce of the country. It seems to me that the board which is to administer this great system ought to lay it out, and I do not believe that anyone ought to be a member of the organization committee who is not a member of the board. I think every member of the board ought to be an active member of the organization committee. Being in at the beginning and having studied the country and listened to the contentions of the various sections in behalf of the establishment of these regional banks, their location, and the territory that should be attached to them, the membership of the Federal board would be equipping themselves for the administration of the system, and would quickly see wherein they had made mistakes in the original outlining of the territory. So I believe it is a grave mistake not to have the complete board appointed as the organization committee.

Mr. BURTON. Mr. President, it is my desire to devote the present time to the elucidation of certain points, and I do not wish to indulge in any considerable expression of opinion until those points have been made clear. However, I can say in passing that I quite agree with the Senator from Kansas that it is undesirable to have any executive officer with the position and with the onerous duties of Secretary of the Treasury on a board of this kind. There might be no collision between his responsibilities and his high position in the Cabinet were he on this reserve board, but there are other reasons that I might suggest why he should not be, such as the undue degree of importance which would attach to his suggestions as a member of that board. The weight of his opinions and suggestions would be strengthened and increased by the great authority vested in him in this bill. No member of the Federal reserve board would feel like opposing him, because in a great many important particulars he has authority to either overrule the board or else shape their action.

There is another point which ought to be mentioned. work of that great department, one of the most difficult in the Government to administer, is sufficient to take all of one man's time and energy. He can not at the same time be both a good Secretary of the Treasury and a good member of the Federal reserve board. Performing the separate duties of one of those offices, he might be either an excellent Secretary of the Treasury or an excellent member of the Federal reserve board.

I should like to ask the members of the committee when the duties of this so-called organization committee ends? When are they through with their work and when do they turn over

this control to the Federal reserve board?

Mr. SHAFROTH. The bill provides that the organization committees shall examine into the districts, take testimony as to the boundaries of the same, and then cease in its operation on the organization of the Federal reserve board.

Mr. BURTON. That is, when the number of banks provided in the bill are organized?

Mr. SHAFROTH. I should think so.

Mr. BURTON. That is, it would not be after the organization of one of them, or a part of them, but only when all the banks have been organized?

Mr. SHAFROTH. No; I think when the Federal reserve board is organized the organization committee ceases.

. Mr. BURTON. Might it not be a matter of very considerable importance to determine that? Suppose you were to organize according to this bill eight districts, and very much more rapid progress is made upon the first, the second, and third than on the rest, subscription might be more readily obtained, it is not only conceivable, but very probable, that there will be an interval of months between the organization of the first bank and the last bank. Now, when and at what point is the organization committee to turn over the work to the Federal reserve board?

Mr. SHAFROTH. My judgment is, from my recollection of it, that it turns it over when the Federal reserve board is or-

ganized. I should not think it would be proper to hold this matter up entirely because one far-off district could not organize. On that account it seems to me that the natural import of the bill is that the committee would turn it over after the selection of the districts.

Mr. BURTON. But suppose there are three banks organized ready to do business and five not organized. What is the relation between the organization committee and the Federal reserve board? The Federal reserve board will be appointed. Does the Senator from Colorado contemplate that under those circumstances when the Federal reserve board is ready to do business it would merely manage three banks, the organization of which was complete, and leave to the organization committee the organization of the other five?

Mr. SHAFROTH. No; I should think that the order of the organization committee with relation to the number of districts and to their boundaries would be put forth at the same time, and then their duties would end. Otherwise you are going to have no Federal reserve board for a long while.

Mr. BURTON. I will suggest to the Senator from Colorado, however, that the bill contemplates more than the mere laying out of the districts.

Mr. SHAFROTH. Yes; it does.

Mr. BURTON. It will have a great deal of work in the organization of banks.

Mr. SHAFROTH. But if you will examine the bill closely, you will find that the Federal reserve board is vested with this sole power.

Mr. BURTON. Certainly; I have already called attention to that fact.

Mr. SHAFROTH. That being the case, it can lapse at any time, and there is an organized body to take it up, namely the

Federal reserve board.

Mr. BURTON. Does not the Senator from Colorado think that it ought to be made perfectly clear, so that we may know when the duties of one of these bodies ends and when the other

begins; and does he think it is clear in the bill?

Mr. SHAFROTH. It seems so to me. We have never had a doubt about it. It was presented, and the theory is that as soon as the Federal reserve board is organized that ends the organization committee. I have not read the language closely, because I did not have a copy of the questions which the Sense because I did not have a copy of the questions which the Sena-tor served on the chairman, and I have not read them yet. Mr. BURTON. On page 5, line 19 and following, the state-

ment occurs that-

When a Federal reserve bank shall have been organized, every national banking association within that district shall be required and every eligible bank may be permitted to subscribe to the capital stock thereof in a sum equal to 6 per cent of the paid-up capital stock and surplus of such bank, one-sixth of the subscription to be payable on call of the organization committee or of the Federal reserve board, one-sixth within three months and one-sixth within six months thereafter, and the remainder of the subscription, or any part thereof, shall be subject to call when deemed necessary by the Federal reserve board, said payments to be in gold or gold certificates.

Where is all that money to be lodged? Here is a provision for a payment which, according to the calculations, would amount to at least \$50,000,000, made first a third down, then a second third, then a third, amounting in all to \$52,000,000, \$17,000,000 at a time. Where is that money to be lodged in the meantime?

Mr. SHAFROTH. I presume in the Federal reserve bank. Mr. BURTON. But there is no Federal reserve bank necessarily organized

Mr. SHAFROTH. In some instances it will be turned over to them; but if not ready to be turned over, it will be held sub-

ject to the direction of the Federal reserve board.

Mr. BURTON. Does not the Senator from Colorado think that it ought to be made definite as to where that money shall be lodged? It would be withdrawing some \$50,000,000 or more from the circulation of the country, of which some disposition should be made. Then, again, is it not a very wide discretion to leave to this Federal reserve board before the banks are organized?

Mr. SHAFROTH. Of course, this Federal reserve board will be composed of a very high class of men. I do not feel any anxiety on that score. It might be desirable to put in a little more specific provision, but it seems to me it would be operative as it is, because if the banks were not organized, and the Federal reserve bank was organized, they could just put in that bank the proportion which goes to the banks. If the Federal reserve bank was not organized, it would be held by the Federal reserve board until the Federal reserve bank was organized. We will make a note of it, because it may be well to make the

provision more specific.

Mr. BURTON. Of course, the intention is that it shall not be paid in until after the bank is organized, but it would seem

to me that that might be made a little clearer. I call attention to page 6, lines 3 to 9. I ask about this because a number of inquiries have reached me concerning it. This portion reads:

The shareholders of every Federal reserve bank shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such bank to the extent of the amount of their subscriptions to such stock at the par value thereof in addition to the amount subscribed, whether such subscriptions have been paid up in whole or in part, under the provisions of this act.

Mr. President, I suppose that the object of that provision is clear, and that it is to impose upon the stockholders of the regional or Federal reserve banks what is called the secondary ability. By shareholders is not meant the banks? Mr. OWEN. Oh, no.

Mr. BURTON. It does not mean by individual shareholders of the member banks that subscribe?

Mr. OWEN. Oh, no. Mr. SHAFROTH. No.

Mr. OWEN. There is a double liability of a member bankthe subscribing bank—as a subscriber.

Mr. BURTON. That is clearly the intention of this paragraph, I understand?

Mr. OWEN. That is the intention of the paragraph.

Mr. BURTON. So that if a member bank, State or national, subscribes \$100,000 and pays in \$50,000, it stands to lose the \$50,000 that it has paid, the \$50,000 of its unpaid subscription, and another \$100,000 on its secondary liability in case the bank proves to be insolvent?

Mr. OWEN. It does. Mr. BURTON. There is no ambiguity about it? Mr. OWEN. There is no ambiguity about it.

Mr. BURTON. Now, suppose a State bank subscribes to this stock where there is no State law allowing or sustaining secondary liability, does the Senator from Oklahoma give it as his opinion that merely coming into this organization would make that State bank liable to the extent of this secondary liability?

Mr. OWEN. If the State bank enters this system and subscribes as a contract, it would be bound unless the State law forbade it to make such a contract. In that contingency it could not become a member under the provisions of this act.

Would this provision here prevent it from Mr. BURTON. becoming a member, or other provisions of the bill?

Mr. OWEN. It would be by the provisions of the bill and the charter which it held from the State which forbade it making a contract of that character.

Mr. BURTON. I have no doubt that the Senator from Oklahoma has considered this matter very accurately, and I understand him to give the opinion that any prohibition of a State law would prevent a State bank coming in under this plan?

Mr. OWEN. The Senator's language is too broad.

Mr. BURTON. Suppose there is no provision in the State law for what is called secondary liability?

Mr. OWEN. The ordinary term "secondary liability" would apply to the stockholders of the State bank and not to the obligation of the contract entered into by the State bank.

Mr. BURTON. And the Senator from Oklahoma would maintain that the liability for an amount equal to the stock would be a contractual liability rather than a statutory liability?

Mr. OWEN. It would be a contract liability under the

statute. Mr. BURTON. A contract liability that could be enforced

unless there is an express prohibition in the State law? Mr. OWEN. That is my contention.

Mr. BURTON. Does not a question arise on this point: What authority would be sufficient to accept the terms of this bill? Could the directors alone do it, or would it not be necessary to have some action by the shareholders that would be equivalent to abandoning their old organization and reorganizing under another form?

Mr. OWEN. I take it that the State banks under the State laws, as a usual thing, have a right to enter into a contract. If the State law, however, precludes such a contract it would preclude them from entering the system, because the system requires them to enter into this kind of a contract.

Mr. BURTON. But would not the stockholders have to ratify

such an acceptance?

Mr. OWEN. That would depend upon the charter and bylaws.

Mr. BURTON. And the laws of the State in regard to their power?

Mr. OWEN. Certainly. I have made written answers to 53 questions of the Senator, if he wants to have them.

Mr. BURTON. I do not know but what I ought to have called or them before. I have been somewhat interested in this matfor them before. ter; and, in addition, I have received a large number of commu-

nications, in some of which these questions are suggested or framed.

On page 6, from lines 15 to 24, I find this language:

Should any national banking association in the United States or trust company engaged in commercial banking in the District of Columbia now organized fail within one year after the passage of this act to become a member bank under the provisions hereinbefore stated, or fail to comply with any of the provisions of this act applicable thereto, all of the rights, privileges, and franchises of such association granted to it under the national-bank act, or under the provisions of this act, shall, within the discretion of the Federal reserve board, be thereby forfeited.

The paragraph then goes on to state:

Any noncompliance with or violation of this act shall, however, be determined and adjudged by any court of the United States of competent jurisdiction in a suit brought for that purpose in the District or Territory in which such bank is located.

Is that provision, to the effect that if a member bank "fail within a year after the passage of the act," automatic or does it require the decree of a court? Is that a noncompliance with or a violation of the act?

Mr. OWEN. If the Senator will permit me, I think that the

practical effect would be that a bank would not wait for a decree of the court, but would transfer its charter to a State bank. If, however, it resisted, a decree would be necessary

Mr. BURTON. That is, if within a year a national bank has not subscribed, does not accept the provisions of this act, it nevertheless continues a national bank until there is a court decree?

Mr. OWEN. Yes.
Mr. BURTON. And the provision "any noncompliance with or violation" includes its failure to join?
Mr. OWEN. It would require a decree of the court to en-

force it if it resisted.

Mr. BURTON. I think, Mr. President, the distinction loses its importance from the fact that if a bank should fail to com-

ply with the terms of the law and suit should be brought the popular confidence in the bank would be so shattered that there would probably be little use or necessity for bringing action.

Mr. OWEN. That is why I said to the Senator that I thought

that no decree would be necessary, because a bank that did not wish to enter the system would take out a State charter and transfer its business to a State bank.

Mr. BURTON. It was probably for that reason; but a case might very naturally arise where a bank would say, "We have a national charter, and we intend to hold on to it.'

Mr. STERLING. Mr. President

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from South Dakota?

Mr. BURTON. I do. Mr. STERLING. If the Senator from Ohio will permit me, I will say that I think there is a question back of the one suggested by himself, and that relates to the discretion of the Federal reserve board.

Mr. BURTON. I intend to take that up, but I should be obliged to the Senator from South Dakota if he would state it in his own language.

Mr. STERLING. If the Senator has it in mind as one of the questions to propound, I will not interpose.

Mr. BURTON. Suppose the Senator does it. In fact I would be glad to have him. He may have a different idea from the one which I have in mind.

Mr. STERLING. Very well. I would like to ask the Senator from Oklahoma as to his understanding of the provision read by the Senator from Ohio, so far as it relates to the discretion the Federal reserve board. The language is:

Should any national banking association in the United States or trust company engaged in commercial banking in the District of Columbia now organized fail within one year after the passage of this act to become a member bank under the provisions hereinbefore stated, or fail to comply with any of the provisions of this act applicable thereto, all of the rights, privileges, and franchises of such association granted to it under the national-bank act, or under the provisions of this act, shall, within the discretion of the Federal reserve board, be thereby forfeited.

So, does it not appear from this language that, although any national bank may not see fit to accept the provisions of the act, the Federal reserve board might, in its discretion, continue that institution as a national bank? If it could decline to forfeit the charter of any bank not accepting the provisions of the act, could it not decline to declare forfeited the charter of any number of national banks or the national banks of a particular region under the particular language of this provision?

Mr. OWEN. I think it gives a broad ground of discretion to the Federal reserve board.

Mr. STERLING. Yes. So that it would be entirely within the discretion of the Federal reserve board as to whether or not it would declare the charter of any national bank forfeited for failure to comply with the provisions of the act?

Mr. OWEN. Yes.

Mr. STERLING. Then, it would be within the power of the Federal reserve board to render this act practically a dead letter, would it not, if it could refuse to declare forfeited the charter of any national bank for failing to comply with the provisions of the act?

Mr. OWEN. I think they could exercise their discretion with

regard to it and extend the time.

Mr. STERLING. It is not, I think, if I may say so to the Senator from Oklahoma, a mere question of time.

Mr. OWEN. If the Senator would complete the reading of the section on the next page of the last print-

Mr. STERLING. I am reading, I think, from the first print. The Senator has not read the whole of it. Mr. OWEN.

Mr. STERLING. The provisions in regard-

Mr. OWEN. The Senator has not read the whole of it. It

Any noncompliance with or violation of this act shall, however, be determined and adjudged by any court of the United States of competent jurisdiction in a suit brought for that purpose in the District or Territory in which such bank is located, under direction of the Federal reserve board, by the Comptroller of the Currency in his own name before the association shall be declared dissolved. In cases of such noncompliance or violation, other than the fallure to become a member bank under the provisions of this act, every director who participated in or assented to the same shall be held liable in his personal or individual capacity for all damages which said bank, its shareholders, or any other person shall have sustained in consequence of such violation.

The intention was to give a broad discretion to the Federal

reserve board.

Mr. STERLING. Exactly; but no proceedings would be instituted against the bank unless upon the motion of the Federal reserve board.

Mr. OWEN. That is right.

Mr. STERLING. The Federal reserve board might, in its discretion, conclude not to institute any proceedings in court at all. Is not that the conclusion?

Mr. OWEN. Certainly.

Mr. BRANDEGEE. If they concluded not to institute any proceedings, then t'e Federal reserve board could not declare the charter forfeited.

Mr. OWEN. If they declared the charter forfeited, they would institute proceedings, or the Comptroller of the Currency

would do so under their direction.

Mr. BRANDEGEE. But under the language of the bill the charter could not be forfeited until the court had found that they had violated the provisions of the act. Of course it is conceivable, though I can not suppose that the Federal reserve board would so act, that in their discretion they could continue national banks under their charters under the present nationalbank act, although the court had found that they had violated the provisions of the act.

Mr. OWEN. The court would never have jurisdiction until

suit was brought by the Comptroller of the Currency under the

instructions of the Federal reserve board.

Mr. BRANDEGEE. I understand that; but after the judgment of the court that a member bank had violated the provisions of this act, then it would still be in the discretion of the Federal reserve board whether or not to declare their charter forfeited.

Mr. STERLING. Mr. President, I think it is clearly meant by the section-and I think the Senator from Oklahoma has that idea-that, first, the Federal reserve board may, in its discretion, declare a forfeiture of the bank's charter for failure to comply with the provisions of the act, and that having declared a forfeiture a proceeding must be had in court under the provisions of the bill in order to have a judicial determina-

tion of the matter.

Mr. SHAFROTH. Mr. President, I want to say to the Senator from South Dakota that the object of this provision in not making it mandatory was this: Perhaps some of the banks might be prevented on account of circumstances from complying with the provisions, and it was thought wise to give them a further opportunity. Therefore discretion was vested in the Federal reserve board purely for the purpose of preventing the contingency of the banks not coming in. A bank might not, perhaps, have the money or it might be hard pressed or some other condition might arise—the bank building might be destroyed or papers might be destroyed at the very moment of the last day on which they could come in—which would cause delay, and so it was thought that it would be very harsh to say to a bank: "You can not become a member of this system at all." For that reason latitude was given the Federal reserve board.

Mr. STERLING. But, Mr. President, does not the Senator

think that this is rather a broad provision and that it might lead to some abuse on the part of the Federal reserve board

under particular circumstances?

Mr. SHAFROTH. No; I do not think so.

Mr. STERLING. It gives the Federal reserve board very wide discretion in the matter, without any further limitation upon their power in this respect than their discretion; such is the language of the act.

Mr. OWEN. Does the Senator think that there should be no discretion about it; that it should be absolutely compulsory,

without any possible discretion?

Mr. STERLING. Mr. President, I think with reference to that the law itself should fix the time within which the national banks could come within the provisions of the act or signify their acceptance of its provisions, and then it might prescribe conditions under which the time for their coming in might be extended, rather than to leave it, in the broad language of this act, wholly within the discretion of the board.

Mr. OWEN. It might easily occur that some banks with very

large properties might not be able within 12 months to make the transfer to a State charter without serious embarrassment, and in such a contingency there ought to be left somewhere a discretion, and we left it with the Federal reserve board.

Mr. BURTON. Mr. President, I have no doubt that it was the idea of the committee or of such members of the committee as inserted this provision, to show a certain degree of leniency to the banks in order to make the system work more smoothly; but it strikes me as dangerous. In the first place, is there not some question about the execution of a legislative provision in this way? The bill declares that if the bank does not come into the system in a year, it shall forfeit its charter. Can you add to that provision and make it optional with a board or with an executive officer whether that penalty shall accrue?

This is a pretty serious provision. The tendency of recent decisions in the last 20 years or more has been to sustain provisions of this general nature. But to my mind there is a more serious objection. It throws the door wide open for favoritism; it encourages a bank to hold out and take its chances, relying on bringing some influence to bear upon the Federal reserve board at Washington. While I do not doubt but what the committee has carefully examined the provision I question very much whether the addition of this clause to the bill, as it passed the House, is not really an injury rather than a benefit.

What are illustrations of noncompliance or violation? is meant by that? These are the provisions in the bill concerning the time of payment and the deposit of reserves. Now, what is meant? Does this noncompliance or violation refer to the original organization of the banks or to any violation or non-

compliance thereafter?

Mr. OWEN. There are a number of provisions in the bill with regard to reserves and other requirements which must be observed as a part of this act when they become members. there are two matters to be considered: First, the refusal to become members; second, when they become members a refusal to comply or a failure to comply with the provisions of the act. Mr. BURTON. Then this is a broad, general provision in regard to any violation of the provisions of the act?

Mr. OWEN. It is.

Mr. BURTON. Except as modified where discretion is given to the Federal reserve board?

Mr. OWEN. It is.

Mr. BURTON. Then, in case of noncompliance or violation, suit must be brought before the charter of a bank can be

Mr. OWEN.

Mr. BURTON. There are, however, exceptions. When a bank is in a failing condition then the Federal reserve board can, as I understand, take possession?

Mr. OWEN. It can, or the Federal reserve bank itself— Mr. BURTON. The Federal reserve bank or the board. Who brings the suit, and what is the measure of damages?

In cases of such noncompliance or violation other than the failure to become a member bank under the provisions of this act every director who participated in or assented to the same shall be held liable in his personal or individual capacity.

What is meant by that?

Mr. OWEN. That would depend upon the facts developed in each case

Mr. BURTON. Can the Senator from Oklahoma give several illustrations of what these damages for noncompliance or violation are?

Mr. OWEN. No; the Senator is not prepared to give any particular set of cases

Mr. BURTON. Would payment of one installment on a subscription and then failure to pay the second and third be a noncompliance or violation?

Mr. OWEN. It would.
Mr. BURTON. It would render a director liable?
Mr. OWEN. It would.

Mr. BURTON. That would be one illustration, then.
Mr. OWEN. Yes. A number of cases might arise that human imagination might develop; but I hardly think it is necessary for the chairman of the committee to indulge his imagination as to particular cases that might arise, because they are perfectly obvious where they violate the provisions of this law.

Mr. BURTON. I am far from asking the Senator from Okla-

homa to indulge in any flights of imagination. This clause, however, is somewhat indefinite, and might deter persons of competency from acting as directors. They would ask, "What does Under what circumstances are we to become that mean? liable?

The criticism I have to make on the provision is not that it imposes a liability upon the director, but that it seems to be indefinite. It does not make clear the nature of the liability. Perhaps it may be said to be clear enough the nature of the liability—he can be sued for it—but what makes him liable for it?

Mr. OWEN. The noncompliance or violation referred to is a noncompliance or violation of the terms of the act. The language is very plain. It says:

In cases of such noncompliance or violation \* \* \* provisions of this act. under the

Any violation of any of the provisions of the act which is of sufficient gravity might become a basis for holding responsible the director who was guilty of it.

Mr. BURTON. Is not that adding a new liability to the di-

rectors of all banks?

Mr. OWEN. I will say to the Senator that, as I recall, that is the practice in dealing with the national-bank system. That is the usual practice of the national-bank act. This is simply a reproduction of the national-bank act.

Mr. BRANDEGEE. Mr. President-

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Connecticut?

Mr. BURTON. I do.

Mr. BRANDEGEE. Let me ask the Senator from Ohio if he considers that there is any distinction intended in the language employed in the two parts of the bill to which he has called attention, in this respect:

It provides that if these associations fail to comply with any

of the provisions of the act, and so forth-

All of the rights, privileges, and franchises of such association granted to it under the national-bank act, or under the provisions of this act, shall, within the discretion of the Federal reserve board, be thereby forfeited.

Then it goes on to say:

Any noncompliance with or violation of this act shall, however, be determined and adjudged by any court of the United States of competent jurisdiction—

And so forth, in a suit before the association shall be declared dissolved.

Is there any distinction between the forfeiting of the franchises and the declaration of the dissolution of the association?

Mr. OWEN. I take it that the declaration by the Federal reserve board of a forfeiture would then be put in a suit as a basis of fact. They would declare that they had not complied and state that, in their discretion, they declared the forfeiture. Then a suit would be brought by the Comptroller of the Currency, with that as a basis of fact, asking the court to confirm the forfeiture.

Replying to the Senator from Ohio, in the national-bank act this language occurs, and we practically followed it:

In cases of such violation, every director who participated in or assented to the same shall be held liable in his personal and individual capacity for all damages which the association, its shareholders, or any other person shall have sustained in consequence of such violation.

So we simply followed the practice which has heretofore pre-

vailed in the national-bank act.

Mr. BRANDEGEE. I do not doubt that the practice has been followed, but I wondered whether, if the Federal reserve board declared the franchises of a national-bank association to be forfeited

Mr. OWEN. They do not deal with national-bank associations.

Mr. BRANDEGEE. I mean any member bank.

Mr. OWEN. The Senator means a Federal reserve bank, I take it?

Mr. BRANDEGEE. Yes; or any national banking association, which is the term used here.

Mr. OWEN

Mr. BRANDEGEE. That is a national bank, is it not? Mr. OWEN. Yes; that is right.

Mr. BRANDEGEE. It says that if any national banking association shall-

fail to comply with any of the provisions of this act applicable thereto, all of the rights, privileges, and franchises of such association granted

to it under the national-bank act, or under the provisions of this act, shall, within, the discretion of the Federal reserve board, be thereby forfeited.

Mr. OWEN.

Mr. BRANDEGEE (reading):

Any noncompliance with or violation of this act shall, however, be determined and adjudged by any court of the United States \* \* \* in a suit \* \* \* before the association shall be declared dissolved.

Mr. OWEN. Yes.

Mr. BRANDEGEE. Under that language, as it is drawn, it seems to me the Federal reserve board has absolute authority, in its own discretion, to declare the rights to be forfeited; its franchises are thereby forfeited, and only upon a suit brought afterwards in a court of competent jurisdiction can the question be determined whether the noncompliance or violation of the provisions of the act had actually taken place; and then, and not until then, the association can be dissolved.

Mr. OWEN. Let us suppose a case. The Federal reserve

board-

Mr. BRANDEGEE. What I mean to say is, what would become of the national banking association under this act after its rights had been thereby forfeited, and the Federal reserve board so declared, and before the decree of the Federal court that it was dissolved?

Mr. OWEN. Does the Senator desire to construe one part of the law without considering the other part of the law

Mr. BRANDEGEE. Not at all. I desire to get at the understanding of the Senator from Oklahoma for the purpose of supplying any deficiencies that may exist in my understanding.

Mr. OWEN. The Senator from Oklahoma will endeavor to

explain, then, still further.

The Federal reserve board, in declaring a forfeiture upon a certain state of fact, might have the fact itself challenged and evidence taken before the court to show that the judgment of the Federal reserve board in declaring a forfeiture upon a

certain state of fact was not justified.

Mr. BRANDEGEE. If the Senator will permit me to inter-rupt him there—and I do it only for the purpose of saving time-I desire to make a suggestion. Why does not the act say, putting it in the discretion of the Federal reserve board to forfeit all the franchises of the national banking association for a violation of the act, that the forfeiture shall not take place until the Federal court has found as a fact that the national bank has violated the provisions of the act, and has declared its provisions to be forfeited? In other words, it gives the Federal reserve board the right to declare the franchises all forfeited, and then there is a lawsuit, and finally the court declares the dissolution of the corporation.

Mr. OWEN. In actual practice, when a forfeiture would be declared upon a state of fact, it would not be denied. The bank would not contend further. It would simply transfer its charter to a State charter. That is the usual practice in the adminis-

tration of the national-bank act.

Mr. BRANDEGEE. The Senator, of course, is better posted

than I am in regard to that.

Mr. OWEN. I am speaking simply of the actual practice of the comptroller's office. When they are ready to declare a forfeiture the bank does not go into court, although it has the right to do so. I do not know of an instance of the kind. They are very rare. When they find the charter is going to be forfeited they simply acquiesce, because, as the Senator from Ohio [Mr. Pomerene] observes, when a bank stood before the community with a declaration of forfeiture of its charter the bank would be discredited; its deposits naturally would be with-drawn to a greater or less extent; its credit would be impaired. It could not afford to continue in business with the disapproval of the Comptroller of the Currency. My information is that they do not contend; but if they wished to contend, it would be proper to give them a forum.

Mr. BRANDEGEE. What the Senator from Oklahoma has

said suggests to me, I will not say the folly, but the lack of wisdom in providing that a Federal reserve board may declare a forfeiture, and thereby absolutely discredit a bank in a large section of the country and terrify depositors without any judgment of a court being pronounced upon a question of fact, and perhaps a question of mixed law and fact.

Mr. OWEN. I will say to the Senator that it is expected that the Federal reserve board will have as much dignity and as much character as any court in the country. Therefore I do not believe the presumption that it would do an indiscreet or foolish thing in administering this law has a practical foundation.

Mr. BRANDEGEE. Without being advised of the composi-

tion of the Federal reserve board to be created by this act, and with no intention of casting any reflections upon it, I assume that its members will not all be lawyers, nor men of the capacity of judges of courts. Of course, in their capacity they

will be the best men who can be obtained. But the very fact that before the corporation which they have adjudged to have forfeited its franchises can be dissolved the committee has seen fit to provide a judicial tribunal, consisting of one of the courts of the United States, to determine in fact whether or not the bank has violated the provisions of the act, shows that the committee itself considered that it would not be wise to impose in the Federal reserve board beyond the right of appeal the determination of questions involving millions upon millions of stock and deposits in a great national bank, as well as its reputation and its career forever.

We have implicit faith in the Interstate Commerce Commission, but we do not allow them to finally decide cases. There is always an appeal to a Federal court. Here, however, is a question of the forfeiture of a national franchise, and it seems to me the provision ought to be drawn with the utmost care.

The Senator has referred to the fact-I know very little about the banking business, but I would be very much surprised to learn-that a great national bank, or its directors, upon the mere finding of a Federal reserve board, in its discretion, that it had violated any provision of this act of 50 or 60 pages, would voluntarily close their doors and tamely submit to a forfeiture of all their franchises without contesting the matter in court. They certainly would not do so if what was declared forfeited was of any value to them.

Mr. SHAFROTH. That is the very reason the clause as to referring it to the court was inserted, so that the right could be

invoked

Mr. BRANDEGEE. I am not quarreling with the right of appeal, or the provision that before the corporation shall be dissolved a court must have found as a fact that the reason for declaring its franchises forfeited was valid. I am not quarreling with that at all. I am saying that instead of providing that a corporation shall not be dissolved until the court has found that it has actually violated some provision of the act. the provision ought to be that its franchises shall not be declared to be forfeited until the court has found that it has violated some provision of the act.' It does not say, even, that it must have willfully violated the provisions. Here are 50 pages of new, technical, unadjudicated provisions imposed upon all the national banks of the country which are coming into this scheme, which heretofore have been familiar with an entirely different banking law; and for any little, trivial, paltry violation, about which they may well differ in good faith with the construction which may lie in the mind of some gentleman not yet named upon the Federal reserve board, their franchises are to be declared forfeited.

Mr. OWEN. Mr. President, does the Senator make that argu-

ment in the face of the national-bank act, under which that

policy has been pursued ever since 1864?

Mr. BRANDEGEE. I am not making it in the face of the national-bank act. I am making it in the face of the language of the bill we are now considering.

Mr. OWEN. The Senator has obviously forgotten the terms

of the national-bank act.

Mr. BRANDEGEE. No; I have not forgotten them, because I never knew them. [Laughter.] I do not consider that they are of any relevancy at all to the point I am making. The national-bank act is going to be repealed, in so far as it conflicts with this act. This is the act that is to govern the reserve association and the new reserve banks, while the national-bank act, from which the Senator was about to quote, is an act which governs the national banks as they now exist.

Mr. OWEN. Mr. President, I do not want to consume time simply by answering questions. Of course, questions can be asked ad libitum, beginning with this act and going through every line of it, and thus keep the chairman of the committee on the floor just answering questions until the end of the year, suppose. But I do not feel inclined to answer questions further than I may really add some light upon this matter.

Mr. BRANDEGEE. As far as any question which I asked the Senator, it was asked so long ago that whatever illumination he could have shed upon it I am sure has been done. I am not asking the Senator any question at all. I am stating that I think if the violation of this act is the thing that is going to cause the forfeiture of the franchises of the banks that come in under it, they having been promised a special favor, enough to tempt them to come in, and having come in under a threat that their franchises would be forfeited if they did not, they ought to have the judgment of a judicial tribunal before their franchises, which are their property, are confiscated at the whim of a Federal reserve board, and I say, under the language of this act, such a judicial proceeding is not so provided.

Mr. STONE. Mr. President, will the Senator from Ohio

gield to enable me to make an announcement?

Mr. BURTON. Certainly.

Mr. STONE. The senior Senator from Mississippi [Mr. WIL-LIAMS] left here this afternoon about 1 o'clock to go to Philadelphia to fill an engagement made some time since, to preside over an important meeting in that city. The exact name of the society I am not able just now to state, but it is a distinguished body devoted to the advancement of scientific and economic subjects. He asked me to state, if there should be a roll call, that he had made this engagement and felt obliged

There have been two roll calls since then. I was in my committee rcom, just above here, near the gallery. I heard the bells ring and could have stepped down in a few minutes, butwas engaged with some constituents of mine on matters that I thought more important than to come down and say "Here" when my name was called. Out of consideration for the request of my friend from Mississippi, however, I desire to say that he is absent on the business I have indicated.

Mr. BURTON. Mr. President, passing to the next question which I have here, it is provided, in line 15 and following on

Should the subscriptions by banks to the stock of said Federal reserve banks or any one or more of them be, in the judgment of the organization committee, insufficient to provide the amount of capital required therefor, then and in that event the said organization committee may, under conditions and regulations to be prescribed by it, offer to public subscription at par such an amount of stock in said Federal reserve banks, or any one or more of them, as said committee shall determine, subject to the same conditions as to payment in and stock liability as provided for member banks.

I take it, that it is intended under that provision to leave the question entirely to the judgment of the organization committee. Is there any intimation here or elsewhere in the act as to the amount of time expected to elapse before subscriptions shall be opened to the public?

It is left to the organization committee.

Mr. BURTON. I wish to repeat a question which I asked when the Senator from Oklahoma was out of the Chamber. When does the work of the organization committee end and that of the Federal reserve board begin? Suppose in this list of eight banks there should be two or three districts which were very backward-where there is not sufficient capital subscribed-and the others are well advanced, with not only the stock subscribed but the bank already organized and prepared to do business, would this organization committee continue, then, to control those two or three backward banks or would the Federal reserve board control them?

Mr. OWEN. It would be merged into the Federal reserve

board, which would then control.

Mr. BURTON. Is it left entirely with the Federal reserve board as to when they shall decide that all the stock which can be obtained from the banks is subscribed before they go to the

public? It is left absolutely to their discretion?
Mr. OWEN. It is left to the Federal organization committee, and then, when the Federal reserve board is organized, if that work shall not be completed, it will be merged into the Federal

reserve board.

Mr. BURTON. The voting power of the public stock referred to on page 9 refers to both the stock subscribed by private individuals and whatever amount may be taken by the Government, does it not? It will be noticed that the term "public stock" is not used as applied to both these classes of stock, but only to one. Does the term "public stock" refer to both

Mr. OWEN. It does. Mr. BURTON (reading):

The voting power on said public stock shall be limited to one vote for each \$15,000 par value thereof, fractional amounts not to be considered.

How do you arrive at this sum of \$15,000?

Mr. OWEN. Because it is the average interest in a system of about 10,000 banks and about \$100,000,000 of subscribed

Mr. BURTON. It is the average for all?

Mr. OWEN. Yes; it is an amount approximating the average. Mr. BURTON. Is it not an amount very materially below the stock of any bank that would go into the system?

Mr. OWEN. It is not a question as to the stock of a bank going into the system.

Mr. BURTON. The stock subscribed?

Mr. OWEN. It is a question as to the amount of interest that the bank would have in \$100,000,000 of capital.

Mr. BURTON. I refer next to page 9, lines 13 to 18. What is to be the status of the reserve cities and central reserve cities after the passage of this act?
Mr. OWEN. They remain as they are except the fact of the reserve requirement that is in the bill.

Mr. BURTON. What functions do the banks of these reserve cities perform after this act is passed?

Mr. OWEN. After it goes into full effect they will not perform any function except to hold their reserves a little higher

than the country banks.

Mr. BURTON. "Shall not be construed as changing the present status of reserve cities." Is it the sole object of this provision to maintain the status quo entirely or partially until the time—three years I believe it is—has expired? Mr. OWEN. Yes.

Mr. BURTON. Then the readjustment of the reserves is to take place, and also for the designation of the percentage of That is all there is of it?

Mr. OWEN. That is all there will be of it.
Mr. BURTON. On page 10, lines 10 and following, when and by whom are branch offices to be established?

Mr. OWEN. Under rules imposed by the Federal reserve

Mr. BURTON. On page 10, lines 11 to 15, occur the words "under regulations of the Federal reserve board at points within the Federal reserve district in which located." Let me read the whole of it. The language is:

Each Federal reserve bank may establish branch offices under regulations of the Federal reserve board at points within the Federal reserve district in which it is located: Provided, That the total number of such branches shall not exceed one for each \$500,000 of the capital stock of said Federal reserve bank.

As I understand the change made, first the word "may" is stricken out and the word "shall" substituted for it, so that the establishment of branches is compulsory; and the limitation in the House bill, namely, one for each \$500,000 of capital stock, is stricken out. Those are virtually the only changes that are intended?

Mr. OWEN. The changes there were made because the lan-

guage was too rigid in the House provision.

Mr. BURTON. First it was limited to one branch for each

\$500,000 of capital stock.

I turn now to page 12, lines 16 and following. Of course it may be rather a violent supposition, but is it not possible that there might be a district in which no five banks would join, and under those circumstances the provision for organization could not be carried out?

Mr. OWEN. No; that is impossible.
Mr. BURTON. You regard that as so remotely possible that it was not provided for?

Mr. OWEN. It is not provided for, because it is impossible.

Mr. STERLING. Mr. President, I wish to make an inquiry upon the subject of branch offices or banks. I should like to ask the Senator from Oklahoma what would be the particular function of the branch offices or banks? Will they be of the same nature as the Federal reserve banks themselves, or will they have other functions, such functions as the member banks?

Mr. OWEN. That would depend upon the organization of the branch, the size of the branch, and the conditions which might be attending any particular branch. I take it that they would have a different organization, depending upon the size. They might have a branch, merely in the form of an agent, who would receive commercial bills and transmit them, or have a local board, perhaps, to pass upon such bills. They would be similar to branches that are controlled by the Bank of France. For instance, the Bank of France has 180 branches, with about 490 agencies and branches combined.

Mr. STERLING. Their functions, then, would be those of

rediscounting the notes of member banks?

Mr. OWEN. Yes; to bring the facilities of the Federal reserve banks closer to the people, where the people could get in contact with an organized representative of the bank.

Mr. BURTON. Regarding the appointment of officers and the amount of discretion they may exercise, that is left entirely with the Federal reserve board?

Mr. OWEN. With the Federal reserve board.

Mr. BURTON. For example, who would select the subordinates in regional bank No. 1?

Mr. OWEN. The directors.

Mr. BURTON. Of the regional bank?

Mr. OWEN. Yes.

Mr. BURTON. They would be subject to removal only by the directors of the bank?

Mr. OWEN. By the bank itself.
Mr. BURTON. The members of the Federal reserve board.
Mr. OWEN. No; the bank. The officers of the bank would be subject to direct removal by the board. The nine directors of the bank would remove the officers or employees of the bank at their will.

Mr. BURTON. In the first instance, they would be responsible to the directors of the regional bank?

Mr. OWEN. Yes. Mr. BURTON. With the right of supervision by the Federal reserve board?

Mr. OWEN. Yes. Mr. BURTON. Now, please turn to page 13, lines 16 to 20. Is there any provision in this act for dissolution in the case of insolvency, except the one that the Federal reserve board may Does not the corporate existence continue actake possession? cording to this act for 20 years?

Mr. OWEN. It does.

Mr. BURTON. Is there any clause which provides that its corporate existence shall not continue for 20 years even though it becomes insolvent?

Mr. OWEN. There is not. Mr. BURTON. Under what circumstances would it be dis-

Mr. OWEN. The Federal reserve board might take charge of it, and the Federal reserve board might, through the Federal reserve bank, establish branches within that district.

Mr. BURTON. Is there any provision in the bill that in case of insolvency of a regional bank a branch can be established in that district?

Mr. OWEN. No. Mr. BURTON. I I seem to remember some such provision as that. What would be the modus operandi in case of the failure of one of these banks?

Mr. OWEN. The Federal reserve board would direct the Federal reserve bank to establish an agency in that district for the accommodation of the bank.

Mr. BURTON. That is, whichever one was most convenient, in its discretion?

Mr. OWEN. Yes.
Mr. BURTON. On page 14, lines 2 and 3, in regard to the powers of the Federal reserve bank "to sue and be sued, complain and defend, in any court of law or equity," it is not intended in this act, I take it, to establish any different status for these banks than is true with any other corporation as regards a resort to the United States court?

Mr. OWEN. It is not.

Mr. BURTON. Except that in the case of an action brought by the comptroller or by a public official for the dissolution of the bank for noncompliance or violation, then the United States court has jurisdiction according to this section.

Mr. OWEN. The United States court would have jurisdiction of the member bank that failed to enter the system or failed to comply with the provisions of this act after it had entered. insolvency of the bank would be provided for by a decree of the Federal reserve board, and it would take charge of its business until it could be restored to solvency or its affairs wound up.

Mr. BURTON. Mr. President, I come now to a provision

about which there has been a considerable am ant of question. It is the eighth subdivision, at the bottom of page 14 and the top of page 15. I will read—— Mr. OWEN. What print is the Senator using?

Mr. BURTON. I am using the print of December 1. It is the one which shows the original House bill with erasures and interlineations.

Upon deposit with the Treasurer of the United States of any bonds of the United States in the manner provided by existing law relating to national banks, to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited, such notes to be issued under the same conditions and provisions of law which relate to the issue of circulating notes of national banks secured by bonds of the United States bearing the circulating privilege.

This is one of the powers of a Federal reserve bank under which it seems that any bonds of the United States may be deposited with the Treasurer in the manner provided by the existing law relating to national banks, and the banks will then receive from the Comptroller of the Currency circulating notes, and so forth. Is it understood that in all respects the existing law relating to national banks shall apply to these regional banks in this regard?

Mr. OWEN. It is.

Mr. BURTON. Suppose you have a regional bank with a capital of \$3,000,000, half paid in, how many of these circulating notes based on United States bonds could it issue?

Mr. OWEN. As many as they deposit bonds for, without regard to the capital.

Mr. BURTON. Then it is not altogether similar to the national banking law?

Mr. OWEN. Only in the matter of the method of issue, as stated here. In the manner provided by existing law they are entitled to receive, and they are entitled to receive upon the deposit of any bonds of the United States. It is not a limitation as to the capital.

Mr. BURTON. The law then places these notes and the power of the regional banks on the same footing with the national banks merely as to the modus operandi?

Mr. OWEN. That is all. Mr. BURTON. And under this act a bank which has a minimum authorized capital of \$3,000,000 and \$1,500,000 paid in could issue \$100,000,000 of bills, if it had the bonds?

Mr. OWEN. Of course, that is a very wild assumption, but if it had bonds and the Federal reserve board did not object to such issue, they might do so, under the terms of this act, for a thousand million.

Mr. BURTON. There is no provision in the paragraph giving discretion to the Federal reserve board to limit what they

shall issue?

Mr. OWEN. Yes; they have general supervision. Mr. BURTON. There is nothing except the general right of the Federal reserve board to supervise? That is all?

Mr. OWEN. Yes; they have a supervising control. Mr. BURTON. So far as this paragraph goes?

Mr. OWEN. No; as far as a charter right to do this is concerned, it does not put that limitation in the place of the charter The right to control the banks and the reserve power is held by the Federal reserve board.

Mr. BURTON. It is absolutely unlimited?

Mr. OWEN. Yes.

Mr. BURTON. This is an addition to the House bill, is it not?

Mr. OWEN.

Mr. BURTON. Is there such a provision in the Hitchcock This gives an unlimited right to issue bills on United States bonds. It is on page 14 of the so-called Owen bill, paragraph 8

Mr. WEEKS. The Hitchcock provision, Mr. President, is that notes can be issued either against commercial paper of an equal amount or against the refunding notes of the Government which are provided for in this bill; that is, that \$50,000,000 of 2 per cent bonds shall be refunded by \$50,000,000 of 3 per cent notes held by the reserve banks, and the reserve banks may either hypothecate these notes on commercial paper equal to the face value of the notes or refunding notes.

Mr. OWEN. We can not hear the Senator on this side. Mr. WEEKS. I was stating the provision of the Hitchcock

bill relating to the security behind the note issues of the reserve banks, that it should be either commercial paper or refunding notes-one or the other, or both-and unlimited, as far as the refunding notes are concerned.

Mr. OWEN. I should like to say to the Senator from Ohio that the available bonds which may be used by this whole banking system is limited to about \$44,000,000, unless some national banks should go out of the banking system and in

that way put their bonds on the market.

Mr. BURTON. Of course, perhaps that is not an imminent possibility, but it is entirely probable that that might be done. What impressed me in regard to this was the possibility of a bank of comparatively small capital, say, of not more than a million and a half paid in, obtaining bonds and floating nationalbank notes on them, or notes similar to our present nationalbank notes, to an almost unlimited extent.

Mr. OWEN. I will remind the Senator that in that contingency such a bank with a million and a half dollars paid in would have a capital stock subscribed of \$3,000,000, a double liability of \$6,000,000. The contract of such a bank would be the contract of the member banks to the extent of their double liability and the assets which might be in such banks; but, more than that, the banks would be under the supervisory control of the Federal reserve board. In giving a charter right it was not thought necessary in the charter right to impose any unnecessary limitation upon this provision.

Mr. BURTON. Mr. President, it is not so much the failure to pay the note-naturally they would be secured by bonds anyway—but the way of doing business, the very wide disparity between the capital stock and the normal activities of such a bank with a million and a half dollars paid in and 20, 30, or

40 million dollars of bills issued-

Mr. OWEN. I will say to the Senator that a national-bank note now secured by a United States bond is a perfectly good note, even if the officers of the bank by whom it is issued do not sign the note or if their names are forged to it. The reason The reason for that is that in reality it is the bond of the United States which gives validity to that note and makes it receivable by the public at par with gold, and the act of March 14, 1900, which, as a contract of the United States, bound the United States to maintain such notes at par with gold.

Mr. BURTON. Yes; I have read those statutes; but, as I

have already said, my question does not relate so much to

the lack of the validity of the bonds. It seems to be an unnatural kind of banking to make it possible for a banking institution to issue notes so out of proportion to its capital.

Perhaps at another time I shall wish to say something on the provisions of this bill for the retention of the national-bank note currency or any currency of that type. On page 15 of this print, from lines 18 to 25, it is provided:

print, from lines 18 to 25, it is provided:

Said board shall administer the affairs of said bank fairly and impartially and without discrimination in favor of or against any member bank or banks and shall, subject to the provisions of law and the orders of the Federal reserve board, extend to each member bank such discounts, advancements, and accommodations as may be safely and reasonably made with due regard for the claims and demands of other member banks.

It seems to me, Mr. President, that that is an unfortunate paragraph. It contains an intimation that the ordinary principles of banking shall not be observed, but that an effort shall be made to maintain a sort of equality between all the member

Another thing is suggested. Does this right of appeal "subject to the provisions of law and the orders of the Federal reserve board" apply this far: Does a borrowing member bank, which goes to a regional bank and seeks a loan and is refused, have a right to go over the heads of the directors of that bank to the Federal reserve board? Does the authority of the Federal reserve board extend to the point of considering appeals from the decision of the directors of a regional bank in a matter of discount?

Mr. OWEN. I take it that the Federal reserve board, under its general supervisory control of the system, would have a right to hear such a complaint, to call the attention of the board of directors to the complaint, and exact of them fair treatment of the member bank who might have been discriminated against; but I do not take it that the Federal reserve board would pass upon the question of the security or upon the particular transaction or take it out of the hands of the local board. It would only instruct them to discharge their duty properly under the provisions of the bill.

Mr. BURTON. What is discharging their duty properly?

Mr. OWEN. An attempt was made in this particular section, which the Senator has just read, to describe what their duty was in this particular-to deal justly and without discrimination as between member banks, and to extend them such accommodations as would be justified by the conditions of the Federal reserve bank and the right of other member banks to accommodations at their hands.

Mr. BURTON. That proposition goes without saying; but

And shall, subject to the provisions of law and the orders of the Federal reserve board, extend to each member bank such discounts, advancements, and accommodations as may be safely and reasonably made with due regard for the claims and demands of other member banks.

Mr. OWEN. The Federal reserve board has the right, finally, to fix the rate of interest, for instance. The local board first fixes the rate of interest, and then it is subject to review and order by the Federal reserve board. It would be an order within which the board of directors or officers of such bank would act.

Mr. BURTON. It seems to me that this goes further than that, and imposes upon them an obligation to make loans subject only to this limitation, that they must look out for the that is, suppose there were a hundred banks-there would, in fact, be more banks in one district or region—and one bank comes along with its piece of paper, could the directors of that regional bank say. "We can not do anything for you until we know what the needs of the other 99 banks may be"? Does not that clause at the end, "with due regard for the claims and demands of other member banks," seek to establish a rule of taiwass which would be changed as the end of the claims. fairness which would be observed anyway, and in addition do something that is useless, and that might create embarrassment?

Mr. SHAFROTH. Mr. President, that clause was placed in that paragraph largely for the reason that the Hitchcock bill contained a provision for compulsory discounts, asserting that any member bank going with paper to a Federal reserve bank should be entitled, as a matter of right, which it could enforce perhaps by mandamus, to compel the Federal reserve bank to discount that paper. We thought that was too extreme a provision; it was thought wise that there might be conditions of the bank that would not justify the discounting of its paper. For that reason we put in a clause, which to a large extent is advisory to them, but which, nevertheless, indicates the policy that should be pursued by them in making these discounts where they fairly can.

Mr. BURTON. It seems to me that it would be better to leave that out. I am not familiar with the Hitchcock provision in regard to it. May I ask if it is still in the bill?

Mr. SHAFROTH. Oh, yes. The Hitchcock bill contains a provision that when a bank takes paper to a Federal reserve bank the Federal reserve bank has no discretion, but must discount it, no matter what may be the condition of the reserves, and if the reserves are exhausted, then currency must be issued.

Mr. BRISTOW. Mr. President, the currency is issued, provided there is a sufficient gold reserve behind it.

Mr. SHAFROTH. Certainly.

Mr. BRISTOW. The Hitchcock bill provides that there must be a gold reserve of 45 per cent behind such currency

Mr. BURTON. Do I understand the Hitchcock bill contains a provision that compels a regional bank to lend just as far as

its reserves allow? It does not go that far, does it?

Mr. BRISTOW. The Hitchcock bill provides that any member bank shall be entitled to rediscounts at the minimum rate up to its capital stock when it demands them, and the regional bank directors may discount up to double the capital stock of the member bank; but for discounts over and above the capital stock there shall be an additional rate of interest imposed. Then, if a bank should ask for discounts for more than double its capital stock, the request could not be granted by the regional bank without permission from the Federal reserve board. The bill prescribes the kind of paper that shall be offered by the member bank for rediscount, and the member bank and all of its assets are liable for the amount of the discount, in addition to the paper which it is required to submit. The Hitchcock bill gives the bank the right to this rediscount. That right can not be denied.

Mr. POMERENE. Mr. President-

The PRESIDING OFFICER. Does the Senator from Ohio yield to his colleague?

Mr. BURTON. I do. Mr. POMERENE. Mr. President, I have the language of the Hitchcock bill, if the Senator desires to hear it. the latter part of section 14 of the Hitchcock bill:

the latter part of section 14 of the Hitchcock bill:

The rediscount by any Federal reserve bank of any bills receivable and of domestic and foreign bills of exchange shall be subject to such regulations as may be imposed by the board. The discount provisions of this act shall be equitably extended to all of its member banks by each reserve bank upon equal terms, and each member bank shall be entitled as a matter of right to the rediscount of eligible paper to the full amount of its capital stock upon the lowest current rate of discount, and no member bank shall be permitted to discount an amount of paper exceeding the amount of its capital stock except upon payment of a higher rate of discount, the increase in rate of discount to be I per cent for all in excess. In no case shall a Federal reserve bank discount paper for a member bank in excess of twice the amount of its capital stock without special authority by the board.

Mr. BRISTOW I desire to say that, so far as the rediscount

Mr. BRISTOW. I desire to say that, so far as the rediscount provision in the Hitchcock bill is concerned, I think it is absolutely equitable. The additional tax is imposed upon the member bank when it borrows in excess of the amount of its capital stock. It has been suggested by way of criticism that perhaps the demands from member banks might result in depleting the reserves below 35 per cent, which is the amount required in the Hitchcock bill against deposits. For every 2½ per cent below 35 per cent there is added a tax of 1 per cent additional.

Mr. BURTON. That is under the Hitchcock bill?

Mr. BRISTOW. That is under the Hitchcock bill. Then the

member bank which borrowed or rediscounted after the reserve was below 35 per cent would be required to pay an additional per cent. That is a penalty imposed upon the regional banks; but at the end of the year that penalty is divided among all of the member banks in proportion to the amount of rediscounts they have had during the year, so that the member bank which rediscounted in time of a crisis after the reserves may have been depleted lower than 35 per cent would not be compelled to pay any higher rate, unless it had previously participated in the rediscount and had aided in depleting that reserve, and consequently it would not, unless it had borrowed proportionately more than other banks, be taxed any more than other banks because of the depletion of the reserve.

Mr. OWEN. Mr. President-

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Oklahoma?

Mr. BURTON. Yes; certainly.
Mr. OWEN. I call the attention of the Senator from Ohio. to the effect of the proposed Hitchcock amendment. mary right under the discount provision would be the right of discounting a thousand million dollars, and there is a secondary right up to a thousand million dollars more, making two thousand million dollars, if all the banks of the national-bank system should avail themselves of that right. We thought it unwise to go so far. We used the very much more moderate provision which the Senator has just criticized.

Mr. BRISTOW. If the Senator from Ohio will pardon me, the provision in the Owen bill opens the door to the widest

possible favoritism. Under the Owen bill a regional bank, if it sees fit to do so, can rediscount for one member bank five times the amount of its capital stock, and it can refuse to rediscount any paper for another member bank.

Mr. OWEN. The Senator's suggestion, if it be agreeable to

him to be interrupted-I do not intend to interrupt him unless

it is agreeable

Mr. BRISTOW. That is all right; I do not object.
Mr. OWEN. The suggestion implies that the board of directors would be guilty of gross discrimination. In view of the fact that that board is to be constituted of the men chosen by all of the banks under a very carefully arranged plan, and that it will have three representatives of the United States sitting at that board to protest against such discrimination, we did not think that it was reasonable to suppose that they could be guilty of such conduct. There is supervisory control of the Federal reserve board in addition; so that any bank discriminated against or unfairly dealt with would have its appeal against such bad treatment.

I believe, as the Senator from Oklahoma Mr. BRISTOW. knows-I do not know that the Senator from Ohio will agree with me in this, and I do not know that the Senator from Oklahoma will-but I believe that certain banks and certain individuals and firms have been discriminated against in the matter of loans. I believe that the system of electing directors which have been provided for-and when we get to that feature of the bill I shall want briefly to state my objections in regard to it-I believe that the method of electing directors which has been devised by the chairman of the committee is an invitation to the big and powerful banks to control the directorates of the regional reserve banks; I believe that the powerful banks in New York will absolutely control the board of directors of the New York regional bank; and I believe that the powerful banks in St. Louis and in the large cities of that region will control the election of every member of the board of directors of the regional bank in that region. I believe that the great banks in this country, which have been accused of organizing a Money Trust, have here a plan prepared for them to organize one in fact under the forms of law, and that they can secure control of the regional bank boards and can use those boards and the reserve banks with their tremendous power to carry out their purpose of monopolizing credit in the United States and crushing anyone who might be unfriendly to their interests; and because of that belief I have advocated with all of the energy I could, and all of the earnestness I have, the absolute control by the Government of the boards of directors of the regional

Mr. OWEN. Mr. President, if the most sinister, the most officious, and the most wicked man were on that board, representing the bad people the Senator so much fears, and still there were three representatives of the United States sitting there to administer justice, with the Federal reserve board having the right to remove the six men who might not act properly, with a right of appeal to the Federal reserve board against an injustice on the part of the six men, if that injustice were not reported and controlled by the three men representing the Government, still under such circumstances there could be no injustice, for the reason that the Federal reserve board could correct it upon the appeal of the individual. The Federal reserve board would have every reason to expect, and the country would have every reason to expect, that the three directors representing the United States would prevent that.

In addition to that, however, the Senator seems to forget the pains that have been taken to divide the member banks into three groups. The larger banks are divided into one group, each bank having one vote only, not by capital stock and not by the size of the bank. The biggest bank would not have more of a vote than the smallest bank. A bank with \$25,000,000 of capital would not have more of a vote than a bank with \$25,000 capital. Under this proposal the banks would be divided into three groups-the big banks in one group by number, the mediumsized banks in one group by number, the smallest banks in one group by number-and each bank would have one vote as to

one director of class A and one director of class B.

We could not conceive a more careful method of selecting these six men. We believe these six men will be wisely chosen. We believe they will administer the affairs of the bank properly. If, however, they do not administer it properly, and if there could prevail some strange conspiracy such as the Senator has in his mind, which I do not understand, even then, with the Government of the United States represented by three members of the board, with the right to remove every one of the directors, and with the right of appeal on the part of a member bank denied its just right of accommodation, I can not conceive where the Senator lays the foundation for his dismal apprehensions.

Mr. BRISTOW. In the first place, I think the method of selecting the board of directors makes it as easy to control it as it is to control a county convention or a State convention by an organized few, when they undertake to do so; and, in my opinion, those boards will be so controlled, because the bill gives into their hands such tremendous power.

I am free to say that I can not understand why it is that Sena-tors who can not be in favor of permitting a selfish interest to get control of this great, gigantic banking monopoly will not concede, to remove any doubt, to establish in the public mind confidence in the absolute impartiality and justice of these boards, that the United States Government should have a majority control. Why is it that Senators insist that banks shall not have a single member of the Federal board? They say they do not believe the banks are entitled to representation on the Federal board, and with equal persistency they demand that they be given the majority of the directors on the regional board, which is the effective controlling board that will control the credits.

Senators may say there is the right of appeal. What would be the standing of a bank if it were turned down for rediscounts by the board that controlled the regional bank in which it was located? What would be the credit of that bank? What would be the effect upon the credit of any business man if his notes were refused by the regional bank as paper not fit for

discount?

My contention is that the proper party to pass upon the credit of the individual borrower and his reliability is the member bank. When the member bank comes to the regional bank and says, "Here are notes that comply with the law, that conform to the requirements; I want them rediscounted; I stand for them, that bank is behind every one of the notes. It is no business of the regional bank to go into that paper at all except to see that it conforms to the law, and then it rediscounts it. The bank can not and ought not to be refused that which is its legal right.

Mr. OWEN. Mr. President, the reason has been frequently assigned. The Senator seems to disregard it. That is, we do not believe the great body of the banks would come in under such

circumstances.

Mr. STONE. That has been said a hundred times.

Mr. OWEN. Yes.

Mr. STONE. What is the use of saying it over and over again? The PRESIDING OFFICER. The Senator from Ohio is entitled to the floor.

Mr. BURTON. Mr. President, in the next portion of the bill, including pages 16, 17, and 18, it seems to me that two amendments are essential to make the provision clear and consistent. There is some complication in this part, and I shall have to explain it at some length.

Such board of directors shall be selected-

This refers to boards of directors of regional banks-

as hereinafter specified, and shall consist of nine members, holding office for three years, and divided into three classes, designated as classes A, B, and C.

Class A shall consist of three members, who shall be chosen by and be representative of the stock-holding banks.

Class B shall consist of three members, who at the time of their election shall be actively engaged in their district, respectively, in commerce, in agriculture, and in some other pursuit.

Class C shall consist of three members, who shall be designated by the Federal reserve board.

Here is a provision to which I wish to call special attention: No director of class B or of class C shall be an officer, director, employee, or stockholder of any bank.

Directors of class A and class B shall be chosen in the following manner.

The bill then goes on to provide that in each region or district there shall be three groups of banks to make this selection, and, beginning at line 4, on page 17, the text reads:

At a regularly called meeting of the board of directors of each member bank in the district it shall elect by ballot one of its own members as a district reserve elector, and shall certify his name to the chairman of the board of directors of the Federal reserve banks of the district—

That is, there must be three groups in each region—
The chairman shall establish lists of the district reserve electors thus named by banks in each of the aforesaid three groups, and shall transmit one list to each elector in each group.

Then, following that, erasing quite a good deal of the House bill, on page 18, there is this provision:

Every elector-

That is, one of the directors chosen by the respective banks in each group-

shall, within 15 days after the receipt of the said list-

That is, the list prepared by these electors, who are all directors, by the way-

certify to the chairman his first, second, and other choices upon the list, upon a preferential ballot, on a form furnished by the chairman Monday, December 15, 1913, at 10 o'clock a. m.

of the board of directors of the Federal reserve bank of the district. Each elector shall make a cross opposite the name of the first, second, and other choices for a director of class A and for a director of class B, but shall not vote more than one choice for any one candidate. Any candidate having a majority of all votes cast in the column of first choice shall be declared elected. If no candidate have a majority of all the votes in the first column, then there shall be added together the votes cast by the electors for such candidates in the rescond column to the votes cast for the several candidates in the first column. If any candidate then have a majority of the electors voting, by adding together the first and second choices, he shall be declared elected. If no candidate have a majority of electors voting when the first and second choices shall have been added, then the votes cast in the third column for other choices shall be added together in like manner, and the candidate then having the highest number of votes shall be declared elected. An immediate report of election shall be declared.

I pass over one feature of this rather involved provision for elections.

I find that the average number of banks in each district would be 936 and the average number in each group would be 312, and as a result of that this list would be enormously long. It would be practically impossible that anyone should have a majority of the 312 on the first or second ballot, because there is the whole list of 312 from which to choose. Nobody, I believe, may vote for himself; but with an enormous ballot of that size, and with 312 eligibles, the votes would naturally be so scattered that no one would have a majority.

There are, however, one or two things rather worse than that in the provision. In lines 9 to 11, on page 16, it is provided by a proposed amendment of the six members of the committee, headed by the chairman, that at the time of their election the three members in class B shall be actively engaged in their districts in commerce, in agriculture, and in some other pursuit,

respectively.

Thus you have three groups, and you have here a requirement that one must be engaged in commerce, one in agriculture, and one in some other pursuit. How are you going to work that

out in selecting them?

Suppose the first group is predominantly an agricultural district, and it elects as a director of class B some one engaged in agriculture. Suppose the second group is engaged in agriculture, and it elects some one engaged in agriculture. pose the third group is likewise so engaged, and it also chooses some one engaged in agriculture. You would have, then, a plain violation of the law, which provides that at the time of their election they shall be engaged, respectively, in three different pursuits.

There is, however, even a more serious defect than this. The electors whose names are placed on the eligible list must all be bank directors, according to the provisions contained in lines 4 to 10, on page 17. That is, you choose one of class A and one of class B, both from this list of eligibles, every one of whom is a director of the member bank, and right here, on

page 16, you plainly have this provision:

No director of class B or of class C shall be an officer, director, employee, or stockholder of any bank.

Now, in the very teeth of that you have a provision on the opposite page and the page following making up a list of eligibles for directors of class A and class B, every one of whom must be chosen at a meeting of the board of directors, and must belong to its members.

Mr. President, that is clearly a defect in the bill.

Mr. OWEN. Mr. President

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Oklahoma?

Mr. BURTON. Yes. Mr. OWEN. The electors are directors of the bank.

Mr. OWEN. But they are not expected or required to elect themselves to be directors of the Federal reserve bank.

Mr. BURTON. If the Senator will turn to page 18, he will see that the list must be made up by the chairman of the district reserve bank board of directors, and on page 18 it is also

Every elector shall, within 15 days after the receipt of the said list, certify to the chairman his first, second, and other choices upon the list.

I think I can see how this error arose. In the Glass bill, in lines 14 and following on page 17, there was a provision which was stricken out, to this effect:

Every elector shall, within 15 days of the receipt of the said list, select and certify to the said chairman \* \* one name, not his own.

The PRESIDING OFFICER. The hour of 11 o'clock having arrived, the Senate stands adjourned until Monday morning at 10 o'clock.

The Senate thereupon (at 11 o'clock p. m.) adjourned until

# SENATE.

# Monday, December 15, 1913.

The Senate met at 10 o'clock a.m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

O'Gorman Oliver Owen Page Perkins Pittman Poindexter Pomerene Ransdell Reed Robinson Shafroth Ashurst Borah Brady Brandegee Bristow Gallinger Gronna Hollis Hughes Jackson James Johnson. Smith, Md. Smith, S. C. Smith, S. C. Smoot Sterling Stone Sutherland Swanson Thomas Thompson Tillman Townsend Walsh Weeks Williams Works Bryan Burleigh Burton Jones hamberlain Kern La Follette Lane Chilton Clapp Clark, Wyo. Clarke, Ark. Colt Cummins Dillingham Shafroth Sheppard Sherman Shively Simmons Smith, Ga. Leane Lea McCumber Martin, Va. Martine, N. J. Nelson Works Norris Fletcher

Mr. SHEPPARD. I wish to announce the necessary absence of my colleague [Mr. Culberson], and to state that he is paired with the Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

Mr. SMITH of Georgia. I desire to state that the senior Senator from Georgia [Mr. Bacon] is detained in his room by a severe cold, and that he will not be able to attend the sessions of the Senate to-day on that account.

Mr. RANSDELL. I wish to state that the senior Senator from Louisiana [Mr. Thornton] is unavoidably absent. I will I wish to state that the senior Senator

let this announcement stand for the day.

The VICE PRESIDENT. Sixty-five Senators have answered to the roll call. There is a quorum present. The Secretary will read the Journal of the proceedings of the preceding session.

The Journal of the proceedings of Saturday last was read and

approved.

NOBEL PEACE PRIZE (S. DOC. NO. 312).

The VICE PRESIDENT laid before the Senate a communication from the counselor of the Department of State, transmitting, at the request of the secretary of the Nobel committee of the Norwegian Parliament and for the information of the Senate of the United States, a copy of a circular issued by the Nobel committee furnishing information as to the distribution of the Nobel peace prize, which, with the accompanying paper, was referred to the Committee on Foreign Relations and ordered to be printed.

## FINDINGS OF THE COURT OF CLAIMS.

The VICE PRESIDENT laid before the Senate the following communications from the assistant clerk of the Court of Claims, transmitting certified copies of the findings of fact and conclusions filed by the court in the following causes

The cause of Michael McClellan Knight, administrator of the estate of J. M. C. Knight, v. United States (S. Doc. No. 313);

The cause of the Tudor Co. v. United States (S. Doc. No.

The cause of Trustees, Mount Carmel Cumberland Presbyterian Church, of Williamson County, Tenn., v. United States

(S. Doc. No. 315); The cause of Trustees, Presbyterian Church, Marietta, Ga.,

United States (S. Doc. No. 316); The cause of A. R. Thomas, administrator of William A. Thomas, deceased, v. United States (S. Doc. No. 317)

The cause of John W. Clements, administrator of the estate of Afred Laws, deceased, v. United States (S. Doc. No. 318);
The cause of Thomas L. How, heir of J. J. and Isaac S. How, deceased, v. United States (S. Doc. No. 319);
The cause of Mrs. V. R. Davenport, sole heir of Sidney Markham, deceased, v. United States (S. Doc. No. 320);
The cause of Matilda F. Risedown, widow of John G. Rise.

Markham, deceased, v. United States (S. Doc. No. 320);
The cause of Matilda E. Risedorph, widow of John G. Risedorph, v. United States (S. Doc. No. 321);
The cause of Mollie Dorsey, administratrix of Stephen N. Dorsey, deceased, v. United States (S. Doc. No. 322);
The cause of Edgar L. Hendricks, Ella Hendricks Dunn, Mary A. West, and Myra J. Smith, children and sole heirs of William C. Hendricks, deceased, v. United States (S. Doc. No. 323):

The cause of Elvira S. Hardy, widow of James L. Hardy,

deceased, v. United States (S. Doc. No. 324);
The cause of William B. Ford, administrator of William M. Ford, deceased, v. United States (S. Doc. No. 325);

The cause of Jennie Esslinger, widow of Isidore Esslinger, deceased, v. United States (S. Doc. No. 326); and The cause of Jacob W. Cline, v. United States (S. Doc. No.

The foregoing findings were, with the accompanying papers, referred to the Committee on Claims and ordered to be printed. PETITIONS AND MEMORIALS.

Mr. THOMPSON. I present a letter in the nature of a petition from D. F. Coe and other citizens of Hutchinson, Kans., praying for the immediate enactment of the Glass-Owen currency bill. The petition is short, and I desire to have it read, with the first name on the petition, as indicating the sentiment of the people of Kansas.

There being no objection, the letter was read and ordered to

lie on the table, as follows:

THE SWEET-COE INVESTMENT CO., Hutchinson, Kans., November 20, 1913.

Hon. W. H. THOMPSON, Washington, D. C.

Washington, D. C.

Dear Sir: We have talked with a great number of Democrats, as well as Republicans, and find them almost to a man in favor of immediate action on the Owen-Glass currency bill.

We are pleased to believe you are doing all you can to assist in putting it across this session and assure you of our best wishes.

Respectfully,

D. F. Coe

D. F. COE (And others).

Mr. MARTINE of New Jersey. I present two telegrams I have received in the nature of petitions, which I ask may be read and properly referred.

There being no objection, the telegrams were read and ordered to lie on the table, as follows:

ELIZABETH, N. J., December 14, 1913.

Hon. James E. Martine, United States Senate, Washington, D. C.:

United States Senate, Washington, D. C..

I, as vice president of the Elizabeth branch of the organization o posed to woman suffrage, would like to enter my protest against the proposed amendment to the Constitution, granting suffrage to women.

Mrs. Frederick H. Levy.

Hon. James E. Martine,

United States Senate, Washington, D. C.:

Organized in this city May last. Our membership is now 1.175 women of voting age, and they have authorized me to have recorded with our national representatives their earnest protest against the granting of further suffrage to women. Thanking you for your support in the past.

Miss Florence Stillman,

Secretary Elizabeth Branch.

Mr. MARTINE of New Jersey presented a petition of sundry citizens of Elizabeth, N. J., praying for the enactment of legislation authorizing the payment of the balance due depositors of the Freedman's Savings and Trust Co., which was referred to the Committee on Claims.

He also presented a petition of sundry citizens of Rahway, N. J., praying for the enactment of legislation granting relief to members of the United States Military Telegraph Corps who served in the Civil War, which was referred to the Committee on Pensions

Mr. SMITH of Maryland presented a petition of sundry citizens of Baltimore, Md., praying for the enactment of legisla-tion granting relief to members of the United States Military Telegraph Corps who served in the Civil War, which was referred to the Committee on Pensions.

Mr. JONES. I present a resolution of the King County Democratic Club of the State of Washington in reference to the seamen's bill which passed the Senate some time ago. It calls attention to certain provisions of the bill that will be especially injurious to the local shipping interests of Puget Sound and recommends an amendment to section 12 of the bill. I ask that the resolution may be printed in the RECORD.

There being no objection, the resolution was ordered to lie on the table and to be printed in the RECORD, as follows:

REPORT OF EXECUTIVE COMMITTEE ON THE SEAMEN'S SERVITUDE BILL, SENATE NO. 136.

SENATE NO. 136.

To the King County Democratic Club:

Your executive committee, to which was referred a resolution relative to a proposed amendment to a bill which has passed the United States Senate and is now pending before the House of Representatives, commonly called the seamen's servitude bill, Senate No. 136, beg leave to report as follows:

Your committee held a public hearing at the Democratic headquarters in Seattle on November 6, 1913, which was largely attended and at which hearing the bill, and especially the following proposed amendment thereto, were fully discussed:

And it appearing that Puget Sound has a shore line, including its tributaries and the islands therein, of over 1.790 miles and that it is not a harbor, and therefore would not be excepted from the provisions of section 12 of said bill, although it is thoroughly protected and no part of it is more than 3 miles from the nearest land:

And it further appearing that if the bill were enacted into law in its present form it would not only be disastrous to the local shipping interests of Puget Sound but would cause such a large and unnecessary increase in the cost of fitting, maintaining, and operating boats thereon

that they would either be forced out of business or passenger rates would necessarily be raised to a prohibitive point, and as a result hardship, injury, and ruin in many instances would be inflicted on farmers and others who have been induced to settle along the shores of Puget Sound, having been attracted thereto by reason of the low

Puget Sound, having been attracted thereto by reason of the low passenger rates:

And as all of those present at the hearing unanimously approved of the amendment contained in the following proposed resolution, and as public sentiment on this coast is overwhelmingly in support of the amendment, and your committee having fully considered the same, but being of the opinion that the amendment should be general in scope, and thereby not only benefit Puget Sound but other protected waters, do therefore unanimously recommend the adoption of the following resolution embodying the proposed amendment, to wit:

\*Resolved by the King County Democratic Club, That the House of Representatives be, and it is hereby, respectfully petitioned and urged to amend Senate bill No. 136, entitled "An act to promote the welfare of American seamen in the merchant marine of the United States, etc.," by inserting in section 12 thereof, on page 10, line 4, after the word "harbors," the following words:

"And all vessels exclusively engaged in navigating the inland waters of the Atlantic and Pacific coasts of the United States as such waters are now defined by lines of demarcation from the high seas."

\*Resolved further, That with said amendment added to said bill this club heartily indorses the same and urgos its prompt enactment by Congress.

\*Resolved further. That a copy of these resolutions be forwarded to

Resolved further, That a copy of these resolutions be forwarded to the Speaker of the House of Representatives, to the chairman of the House Committee on Merchant Marine and Fisheries, and to each of the Senators and Representatives in Congress from the State of Wash-

JOHN D. WENGER,
Chairman ex officio.
HENRY S. VOLKMAR,
Secretary ex officio.
J. D. TRENHOLME,
J. M. HAWTHORNE,
C. D. FULLEN,
JUDSON W. SHORETT,
PORTLAND C. HUNT,
Executive Committee.

Mr. BURTON presented a resolution adopted at the regular monthly meeting of the Council of the Federation of Churches of Cincinnati, Ohio, favoring a suspension of the naval construction program for one year, which was referred to the Committee on Naval Affairs.

He also presented a petition of sundry citizens of Delaware City, Ohio, praying for the enactment of legislation empowering the Government of the United States to exercise complete authority over the water courses of the United States, which was referred to the Committee on Commerce.

He also presented a petition of sundry citizens of Cincinnati, Ohio, praying for the enactment of legislation granting relief to members of the United States Military Telegraph Corps who served in the Civil War, which was referred to the Com-

mittee on Pensions.

Mr. WARREN presented a petition of sundry letter carriers and postal clerks employed in the post office at Laramie, Wyo., praying for the enactment of legislation providing for the retirement of employees in the civil service, which was referred to the Committee on Civil Service and Retrenchment.

Mr. WEEKS presented resolutions adopted by the Board of Trade of Medford, Mass., and a resolution adopted by the common council of Malden, Mass., favoring the building of the proposed supply ship at the Boston (Mass.) Navy Yard, which were referred to the Committee on Naval Affairs.

Mr. SMITH of South Carolina. In view of the message of the President and also of the agitation of the question of rural credits, I present a letter which I ask may be read and appropriately referred.

There being no objection, the letter was read and referred to the Committee on Agriculture and Forestry, as follows:

CHAMBER OF COMMERCE, Greenville, S. C., December 12, 1913.

Senator E. D. SMITH, Washington, D. C.

Washington, D. C.

MY DEAR Sir: At a conference of farmers and business men held under the auspices of the department of agriculture of the Greenville Chamber of Commerce on the 10th instant, the following resolution was passed:

"Resolved, That we urge our Representatives in the National Congress to do all in their power to bring about the early enactment of such legislation as will make it possible for our farmers to get both long and short time credit at lower rates of interest than now prevail."

I take pleasure in forwarding you this resolution, and assure you that any efforts you may be able to put forth in this direction will meet with a most cordial response and will help to solve a pressing problem.

problem. Yours, very truly,

ALBERT S. JOHNSTONE, Scoretary.

Mr. SMITH of Michigan presented a memorial of the Rotary Club, of Detroit, Mich., remonstrating against the passage of the so-called La Follette seamen's bill, which was ordered to lie on the table.

He also presented petitions of the Trades and Labor Council of Escanaba; of Local Union No. 64, International Brotherhood of Bookbinders, of Lansing; and of Local Union No. 1352, Machine Hands' Union, of Grand Rapids, all in the State of Michi-

praying for the enactment of legislation to make lawful certain agreements between employers and laborers and persons engaged in agriculture or horticulture, and to limit the issuing of injunctions in certain cases, and for other purposes, which were referred to the Committee on the Judiciary.

Mr. ASHURST. Mr. President, on the 18th day of last September I called attention to the fact under the various lieu-land selection laws the Santa Fe Pacific Railway Co. had mulcted the United States out of over a million acres of its finest land by transferring to the Government lands of a com-paratively small or of no value and selecting in lieu thereof lands of great value. In my remarks at that time I realized the hopelessness of ever trying to reacquire title for the Government to those lands that were thus relinquished, but I did indulge the hope that the evil, pernicious, and wicked practice would no

longer be continued and would never be indulged in again.

Notwithstanding the fact that I pointed out very specifically the great abuse of such practice, I have satisfactory advices which lead me to fear that in my own State a certain railroad company, which needs a certificate of character—if, indeed, it can be given any character at all—is now trying to induce the Department of the Interior to permit it—this railroad companyto surrender some 21,000 acres of practically worthless lands to the Government and select in lieu thereof 21,000 acres of valuable land.

May I not, therefore, ask permission to incorporate into the RECORD, under the head of "Petitions and memorials," some letters and documents pertaining thereto? Having protested to the proper bureau against this practice, I agree with the President that "pitiless publicity" may have a tendency to bring bureaucratic officials charged with responsibility in the matter to some reasonable judgment as to what ought to be their final action in this matter. I ask permission to incorporate the cor-

respondence and protests into the RECORD.

The VICE PRESIDENT. Is there objection? The Chair

hears none.

The matter referred to is as follows:

#### A STATEMENT.

The Secretary of the Interior at present has under consideration a proposition involving the exchange of approximately 21,000 acres of valuable Government land lying in close proximity to the town of Winslow, Ariz.—land which the Reclamation Service on November 18, 1904, withdrew from entry under the act of June 17, 1902 (first form), for the contemplated purpose of irrigation—for an equal area of land within the boundary of the Navajo Indian Reservation, Ariz., and owned by the New Mexico & Arizona Land Co., a corporate adjunct of the St. Louis & San Francisco Railroad Co., otherwise known as the Frisco System.

A CHRONOLOGICAL STATEMENT OF FACT.

A CHRONOLOGICAL STATEMENT OF FACT.

1. Under the provisions of the act of Congress of June 17, 1904 (32 Stat., 388), the Secretary of the Interior on November 18, 1904, Issued an order withdrawing from entry, among other lands, about 21,000 acres near the town of Winslow, Ariz., pending an examination of the lands by the Reclamation Service for the purpose of irrigation. These lands, although the order withdrawing the same from entry was issued over nine years ago and although the Reclamation Service has never carried into effect its contemplated purpose of Irrigating the same, have never been restored to public entry, notwithstanding the fact that the Government has repeatedly been requested by homeseekers to do so.

same, have never been restored to public entry, notwithstanding the fact that the Government has repeatedly been requested by homeseekers to do so.

2. On September 25, 1912, F. H. Abbott, Acting Commissioner of Indian Affairs, addressed a letter to the Secretary of the Interior stating that practically every acre of land within the Navajo Indian Reservation is now and will hereafter be required by the Indians for the proper care of their stock; that the indemnity limits of the Atchison, Topeka & Santa Fe Raliroad extend into the Navajo Indian Reservation for a considerable distance; and that it is very destrable from many standpoints to eliminate these holdings, and the acting commissioner asks for permission to negotiate with any raliroad company owning lands within this reservation with a view of securing an immediate surrender of all base lands owned therein by them. This letter was concurred in by Hon. Fred Dennett, former Commissioner of the General Land Office.

3. On October 8, 1912, the Secretary of the Interior approved the suggestions contained in Acting Commissioner Abbott's letter of September 25, 1912, and authorized him to enter into negotiations with any valiroad company owning lands in the Navajo Reservation with a view of exchanging the same for other Government lands in lieu thereof in the State of Arizona, under the provisions of the act of April 21, 1904 (33 Stat., 211).

4. On October 15, 1912, Acting Commissioner Abbott addressed a letter to Mr. Thomas P. Littlepage, attorney for the New Mexico & Arizona Land Co., suggesting that should the St. Louis & San Francisco Rallroad Co. own any lands within certain townships lying within the Navajo Indian Reservation, "it would be appreciated if the necessary steps were taken to initiate the exchange at the earliest practicable date."

5. On December 26, 1912, Mr. Littlepage, on behalf of the New Mexico & Arizona Land Co., advised the Secretary of the Interior that

dafe."

5. On December 26, 1912, Mr. Littlepage, on behalf of the New Mexico & Arizona Land Co., advised the Secretary of the Interior that they were willing to make the proposed exchange of lands, and submitted a list of lands lying near Winslow, Ariz., which the land company were willing to accept in the proposed exchange, which lands embraced in the said list were withdrawn from entry on November 18, 1904, by the Reclamation Service, pending an investigation to irrigate the same.

6. On September 8, 1913, the Arizona State Land Commission addressed a communication to the Secretary of the Interior vigorously protesting against this proposed exchange of lands.

THE REASONS ALLEGED BY THE INDIAN SERVICE FOR THE PROPOSED EXCHANGE.

The Hon. Cato Sells, Commissioner of Indian Affairs, in a letter addressed to Senator Henry F. Ashursar, under date of October 30, 1913, states the reasons why this exchange is desired by the Indian Service to be the following:

1. It would place the Indian lands en bloc.

2. It would "eliminate numerous cases of conflict, trespass of cattle, etc.. with which we are annually confronted."

These are the only grounds upon which the exchange is urged, and it is presumably upon these grounds that the Acting Commissioner of Indian Affairs and the former Commissioner of the General Land Office recommended that the exchange be made.

It is unquestionably true that this proposed exchange would place the lands of the Leupp Addition to the Navajo Indian Reservation en bloc. But, at the same time, would it not also place the lands of the railroad company en bloc, a condition of affairs which Congress most earnestly sought to avoid in 1866, when it passed the Atlantic & Pacific Railroad grant?

In other words, the authors and sponsors for this proposed exchange of lands not only here seek to contravene the spirit of the act of Congress in 1866, whereby these lands in the Navajo Reservation were originally granted to the railroad company in a checkerboard formation, thus eliminating, as Congress thought, the possibility of consolidating the lands in large tracts, thereby greatly enhancing the value of the whole, but they would actually permit the railroad company to select lands in lieu of those exchanged which are known to be irrigable—lands which the Government itself has withdrawn from entry for that very purpose—and londs which are of a marketable value manyfold greater than any lands in the Leupp Addition to the Navajo Indian Reservation which are of each proposed exchange, and in this particular instance the advantages seem to be altogether on one side.

Not possessing any information as to the number of cattle grazing through lease of railroad lands upon the area within the Navajo Indian Reservation which are here so

to number and unimportant in nature.

WHAT THIS EXCHANGE WOULD MEAN TO THE GENERAL PUBLIC.

1. The exchange would effectually preclude the possibility of bona fide homeseekers entering valuable lands in this section. Homeseekers have been waiting to enter these lands ever since they were withdrawn from entry in 1904 by the Reclamation Service for the Little Colorado River irrigation project, under the hope that they would be restored to entry, and the action in withholding them from entry for over nine years has served to deprive many good, worthy men and women from securing a home.

home.

2. By this action the Government would place in the hands of a corporation every available acre of land surrounding the growing town of Winslow, Ariz., and restrict the future growth of this the second largest town in northern Arizona and the surrounding country as well to such limitations and conditions as that corporation would

impose.

3. Hon. Cato Sells, Commissioner of Indian Affairs, in his letter to Senator Ashurst under date of October 30, 1913, heretofore mentioned, also suggests solidifying by appropriate legislation the Leupp addition to the Navajo Indian Reservation by exchanging for the privately owned odd-numbered sections north and east of the Little Colorado River an equal number of even-numbered sections south and west of the said river.

This proposed exchange would also place in the hands of a single corporation the entire winter range of the cattle that graze on the eastern portion of the Coconino National Forest between the eastern boundary of the forest and Bellemont, Ariz., or for a distance of nearly 40 miles east and west and nearly 60 miles north and south.

And, further, many of the same objections are now urged against this proposed consolidation that have heretofore been urged against the proposed consolidation of the lands around Winslow, Ariz., both of which are manifestly against the public welfare.

QUERIES

which are manifestly against the public welfare.

QUERIES.

Why is it that practically every demand for an increased area of an Indian reservation in Arizona involves the enlargement of a reservation that includes land owned by the Sauta Fe Railroad, which, under the act of April 21, 1904, can be converted into scrip?

Why, if it was deemed wise and prudent to pass the act of March 3, 1905, and thereby prohibit the selection of lieu lands by forest-reserve relinquishments, would it also not be wise and prudent to repeal the provision of the act of April 21, 1904, whereby practically worthless Indian reservation lands can be exchanged for valuable Irrigable lands which the Government field operatives seem to insist upon classing as of equal value with arid, nonirrigable Indian lands, a specific instance of which may be found in the letter of Assistant Law Clerk S. V. Proudfit, addressed to the Commissioner of the General Land Office under date of October 22, 1913, a copy of which was inclosed to Senator H. F. Ashurst by the Secretary of the Interior November 13, 1913?

In conclusion, these matters are of vital interest to the people of northern Arizona, particularly so to the citizens of Winslow, permittees upon the Coconino National Forest and prospective home seekers. A thorough investigation should be made, bringing the investigating officials, by means of mass meetings, in contact with the citizens of the section affected, or at least in contact and consultation with their respective county officials, before any decision is made.

A. T. Cornish,

Senator Henry F. Ashurst.

Senator Henry F. Ashurst. United States Senate. Washington, D. C. **DECEMBER 8, 1913.** 

STATE LAND COMMISSION, Phoenia, Ariz., November 26, 26, 1913.

Hon. Henry F. Ashurst, United States Senate, Washington, D. C.

Hon. Henry F. Ashurst,

United States Senate, Washington, D. C.

Dear Senators: I am very much interested in the subject covered by your letter of October 17, 1913, to Hon. Cato Sells, Commissioner of Indian Affairs, and his letter in reply thereto under date of October 30. The frequent extensions of the Indian reservations in Arizona has become a matter of vital concern to the people of the State, and the State land commission notes with much satisfaction the inauguration, upon your part, of an effort to prevent further aggressions of this character. The extensions of and additions to the Navajo Indian Reservation (which at the present time comprises, in Arizona and New Mexico, almost 12,000,000 acres) have proved particularly burdensome, accompanied, as in most cases they have been, by an issue of so-called Moqui or Navajo base-land scrip, which scrip, as you have absolutely truthfully stated, has, with the permission of the General Land Office, been used to secure lieu lands from among the best and choicest undeveloped lands in the State, thus at once defeating the law; enabling the Archison, Topeka & Santa Fe Raliroad Co. to reap great profits for its most worthless holdings; enabling speculators to gather rich harvests; affording opportunities to corporations to acquire and hold, undeveloped, large bodies of choice lands, to the detriment of the general public and of the State; and depriving legitimate home seekers of the full benefits of the beneficent land laws of the United States. All Arizona, with the exception of the corporations, companies, and private individuals who are the chief beneficiaries of the Government's complaisant attitude, is up in arms over the manner in which the areas upon which the Commonwealth must chiefly rely for its future development are being grabbed, and your endeavors to call a halt—in which I know you have the hearty cooperation of Senator Smith and Mr. HAYDEN—will meet with almost universal approbation. The State land commission will be proud to uphold your hands in every

ment of which he is now the head, as a man of his reputation would be had no control.

Mr. Sells is mistaken in the impression, which he seems to have that the feeling against the Indian Service in Arizona has been caused by the exchanges of railroad lands in Indian reservations for indianside, having been confused with the exchange of worthless forest confused, which he seems to have that the feeling against the Indian Service in Arizona has been caused by the exchanges of railroad lands in Indian reservations for indianside, having been confused with the exchange of worthless forest confused with the exchange of worthless forest confused with the exchange of worthless forest confused with the exchange of worthless from the Confused since the latter abuse was a particularly serious and utterly shameful one; but the fact remains that the practice of extending Indian reservations over worthless railroad lands, and exchanging the railroad lands for scrip which sells readily for \$3 per acre and is in turn laid upon land in many instances worth ten or twelve times that price, is an abuse practically identical in character, no less reprehensible, and even more injurious to the State of Arizona. I say even more injurious, for the reason that while the comparatively worthless forest-reserve lands which served as a base for the so-called forest lieu scrip, were situate in Arizona, the scrip was generally placed upon real timber land in other States, so that those other States, after the United States, were the states, so that those other States, after the United States, were the states, and the dependent of the states, and are thus withdrawn from the domain upon bicin, as the case of Indian vithdrawn from the domain upon bicin, as the said before, the State, and therefore not entirely lost; but when an indian reservation so far as development or utilization is concerned, and when some organization of speculators, with a view to letting the development of the State, and therefore not entirely lost; but when an Indian re

railroad lands in Arizona.

Mr. Sells seems to feel—and I presume he can naturally be expected to—that the Navajo Indian Reservation is not larger than the needs of the Navajoes demand. I can not and would not question the census figures of school attendance which he cites in support of that position, but I know that there are almost 12,000,000 acres of land within the present boundaries of the Navajo Reservation and that, according to the Indian Bureau's statement, there are only about 26,000 Navajoes—men, women, and children—in Arizona and New Mexico, and that one may travel over this reservation for days at a time, as I have myself done, and rarely see an Indian, a sheep, a

horse, or a head of any kind of stock. If there is any need for this vast empire or if it is doing the Navajoes any good, appearances are very deceitful. In considering the amount of land which has been included within the Navajo Reservation, it should be borne in mind that many Indians have been allotted lands off of the reservation and that at the present time 30 townships, amounting to nearly a million acres, are withdrawn from settlement and entry for the purpose of making allotments to these Indians. It is safe to assume that by the time these lands are restored to entry all those of any value will have been allotted, and the Lord only knows when a restoration will occur.

acres, are withdrawn from settlement and entry for the purpose of making allotments to these Indians. It is safe to assume that by have been allotted, and the Lord only knows when a restoration will be a settlement and the Lord only knows when a restoration will occur.

The information extended you by the commissioner to the effect that there is under consideration a suggestion that the odd-numbered sections owned by the rulirond company (Atchison, Topeka & Santa Fe) north and can be included the Little Colorado River, which is important and should be carefully considered. I must admit that as a general proposition I view with suspicion any proposal to exchange railroad lands in the Indian reservation for lands outside, but that suspicion (which is natural, I think, in the light of the history of such exchanges) need wise and proper thing, even though it may place the burden of proof on the railroad company and the Indian Bureau.

Considering the proposed exchange from an unbiased standpoint, it appears that there would be applicable to it some of the objections we have advanced in our letter of the 25th instant to the Secretary of the exchange of Inada belonging to the New Mexico & Arizona Land Co. for a solid block of land under the Little Colorado River project. I do not know just how closely connected the New Mexico & Arizona Land Co. may be with the Atchison, Topeka & Santa Fe Co, but it is not unlikely that they are closely affiliated and south and west of the Little Colorado, which would be immediately contiguous to a similar body of land which the former company would own if the exchange it is asking for and against which we protest should be approved, would be tantamount to adding to the New Mexico & Arizona Land Co. consolidated body of land, upon which it relies for an about monopoly of my seculation is correct as to the closeness of these companies, the exchange would be not only very wrong in morals and in principle, but very injurious his operation.

It can not be denied that this suggested exchan

MULFORD WINSOR, Chairman State Land Commission.

NOVEMBER 25, 1913.

The honorable the SECRETARY OF THE INTERIOR, Washington, D. C.

Washington, D. C.

Sir: In further response to the letter, under date of October 20, of Hon. A. A. Jones, First Assistant Secretary, inclosing copy of a letter of October 16, from Mr. A. S. Grieg, president of the New Mexico & Arizona Land Co., in regard to the proposed exchange of some 21,000 acres of land owned by the above-named company, in Coconino and Navajo Counties, Ariz., for a like acreage near the town of Winslow, Navajo County, the State land commission begs leave, in support of its protest against the consummation of the proposed exchange, to submit the following representations, recommendations, and suggestions: A careful perusal of Mr. Grieg's letter, which was called forth by the commission's protest, addressed to you under date of September 8, against the proposed exchange, falls to disclose any reason why the commission should alter the views expressed in its communication of above date, or, in the opinion of the commission, why you should approve and authorize an exchange which we most emphatically believe would be an imposition upon the United States Government, an injustice and a hardship to the State of Arizona, a decided detriment to

the district immediately concerned, and a contravention of the spirit of the Atlantic & Pacific Railroad grant act of July 27, 1866 (14 Stat. L., 492), a spirit which in the light of developments has not during recent years been considered of heavenly origin or thought to be possessed of celestial attributes. But, however satanic the spirit of that act may have been, however bad the act itself has proved, the proposed exchange would clearly seem to us to magnify the evil of the one and the other.

The New Mexico & Arizona Land Co. (which, as Mr. Grieg's letter goes to some pains to set forth, is an Arizona corporation, but which, not so set forth, is composed of gentlemen having neither residence nor other interests in the State) is, as successor to the St. Louis & San Francisco Railroad Co., the owner of more than half a million acres of land in Coconino, Navajo, and Apache Counties, Ariz. This land, title to which was conveyed by the Government under the railroad land-grant act of July 27, 1866, is wholly held in the odd-numbered, alternate sections, the "checkerboard" arrangement, which may possibly have suggested the many "moves" the owners of the railroad-grant lands of northern Arizona have made toward the relinquishment to the Government of such portions of their holdings as were practically er wholly worthless and their replacement with lands many times more valuable.

One large block of the New Mexico & Arizona Land Co.'s holdings

lands of northern Arizona have made toward the relinquishment to the Government of such portions of their holdings as were practically or wholly worthless and their replacement with lands many times more valuable.

One large block of the New Mexico & Arizona Land Co.'s holdings comprises the odd-numbered sections lying north of the Atchison, Topeka & Santa Fe Railroad, in township 18 north, ranges 17 and 18 east, and townships 10 to 24 north, ranges 16 to 18 east, inclusive, the lands involved in the proposed exchange lie within this block, the company proposing to relinquish all of its sections in the west half of townships 21, 22, 23, and 4 north, range 15 east, for certain carefully selected sections and fractional sections in townships 19 and 20 north, ranges 15 and 16 east.

The lands proposed to be employed as a basis for the exchange—that is, the odd-numbered sections in the west half of townships 21 to 24 north, inclusive, range 15 east—are within the exterior boundaries of what is generally understood to be (and so shown on the map of Arizona issued in 1912 by the General Land Office) the Navajo Indian Reservation in Arizona. This matter of the proper boundaries of the said reservation will be referred to later in a more orderly and appropriate connection.

The alleged reason—and the phrase is used advisedly—for the proposed exchange, as disclosed by the official correspondence on the subject which passed between the said New Mexico & Arizona Land Co., the Acting Commissioner of Indian Affairs, and the Secretary of the Interior, your predecessor, is the alleged need—and the term is again employed advisedly—for the sections designed to be used as base to support the sheep and stock of the Navajo Indians.

The State land commission has no desire to reflect unjustly upon any person, department, or institution, but in the light of its knowledge of the history of railroad land-grant exchanges in Arizona; in view of the ease and facility with which the Navajo Indian Reservation in Arizona has been frequently

ber 18, 1904, withdrawn under the first form of withdrawal authorized by the act of June 17, 1902 (32 Stats., 388), for the Little Colorado River project.

These lands, embracing approximately 15 townships, or, deducting the alternate sections owned by the railroad company and its successors and the lands owned by settlers, something like 175,000 acres of Government lands, have therefore been withdrawn from settlement and entry for nine years, although the Reclamation Service soon after the examination of the proposed project abandoned the idea of its construction under the act of June 17, 1902. (32 Stats., 388.) Frequent and urgent efforts during these years, and in the light of the knowledge that the Government would not construct the project, have been made to secure the restoration of these lands to settlement and entry, for the benefit of settlers and in order that plans for the carrying out of the project and the reclamation of the lands embraced within the limits of the proposed Little Colorado River project might be consummated. For reasons apparently not ascertainable until a comparatively recent date, all efforts to secure the restoration of these lands have falled, notwithstanding the withdrawal nine years ago was merely to afford the Reclamation Service an opportunity to determine whether or not the project should be attempted under the provisions of the reclamation act, and notwithstanding this occasion for the withdrawal has long since passed. It finally developed, however, as the result of correspondence with Mr. F. H. Newell, Director of the Reclamation Service, that the lands had not been restored, because of the consideration being given to a proposal to trade certain of them to the New Mexico & Arizona Land Co. for certain other lands owned by that company—the proposed exchange, in fact, which is now under consideration. Attention is now called to the fact that the formal application of the New Mexico & Arizona Land Co. for lands lying within this withdrawn area does not appear in the records

In the act of April 21, 1904 (33 State, 211), appears under date of September 25, 1912. The conclusion is inevitable that the influences which have prevented these lands, not for many years desired by the Government for the purpose for which they were withdrawn, from being restored to settlement and entry, were at work long before the date of the New Mexico & Arizona Land Co.'s application of December 26, 1912; and if this be true, it follows that the motive luducing the effort to secure this exchange is not disclosed by the official records. That there exists no adequate, legitimate occasion for the proposed exchange, from the standpoint of the Government of a map the effort to secure this exchange is not disclosed by the official records. That there exists no adequate, legitimate occasion for the proposed exchange, from the standpoint of the Government of a map the exchange, is proved by the letter of its president, Mr. Grieg, which letter in this connection will hereafter be quoted to the company requesting the exchange, is proved by the letter of its president, Mr. Grieg, which letter in this connection will hereafter be quoted to be used as a basis for exchange—without seeing either an Indian, a sheep, or a head of any kind of stock. It is the belief of this commission that not within the entire so-called extension to the reservation, embracing townships 21, and the entire so-called extension to the reservation, embracing townships 21, and the first of the company and the land within this so-called extension to care for the stock and sheep of the Indians is, in the opinion of this commission—an opinion which, it is a company to the stock of an absolute absurdity. If any other portion of the single short of an absolute absurdity. If any other portion of the single short of an absolute absurdity. If any other portion of the single short of an absolute absurdity. If any other portion of the single short of an absolute absurdity. If any other portion of the single short of an absolute absurdity. If any other p

and prosperous community.

It may be, as the president of the New Mexico & Arizona Land Co. avers, that "at the best the Little Colorado River project is one which requires every opportunity for exploitation," but it will hardly be claimed that at the worst all the rights, privileges, and equities of an enterprise which in its final analysis is dependent upon the exertions of others belong, or in justice ought to belong, to the exploiter; and monopoly has never yet shown itself to be the ally either of labor or of the ultimate consumer. And it is pointed out that the ratification of the proposed exchange would, in effect, give to the New Mexico & Arizona Land Co., to its successors, and very likely to its successors' successors ad infinitum an absolute monopoly upon the Little Colorado River project, to construct, if the company should see fit, and, unhindered and unrestricted, to exploit the settlers who might be induced to purchase the land and water thus joined under a single ownership, or to pass, undeveloped and unimproved, to successor after successor at an everincreasing fletitious valuation finally to be wrung from the tiller of the soil.

the soil.

It is to a considerable extent true, though by no means entirely so, that "it is water and not land," as Mr. Grieg states, "which is the resource in that part of the country," and that "the land is practically worthless without the water," but it so happens that the right to water, which in the case of the drainage of the Little Colorado River project the president of the New Mexico & Arizona Land Co. claims to have been secured for his company, depends for perpetuation upon the reasonably prompt development of the enterprise for which the water is appropriated It follows that if half of the lands, which might be irrigated by the Little Colorado River project, lying in alternate sections and as favorably situated as any other lands, were subject to entry and

the acquirement of title in the various ways comprehended by the United Status and laws, it would afford competitors for the privilege of the company owning the dednumbered alternate sections should neglect or fail to protect its water rights by actual and prompt development, the company owning the dednumbered alternate sections should neglect or fail to protect its water rights by actual and prompt development, president detracting from the feasibility of the enterprise—to either carry out its alleged recinantion plans or to abandon them, together are been enterprised. The company of the affected drainage as may have been acquired.

If, on the other hand, the proposed exchange should be consummed, thus consolidating under the ownership of one company, if not constituting the key to the situation—land which is absolutely essential to the success of the project—to he are any rival projectors, it would should not have—an air-tight monopoly for all time to come on both this and and the water which are essential to the project. As stated, we have been development of the enterprise of the monopoly for all time to come on both the should not have—an air-tight monopoly for all time to come on both the company of the company

opportunity to promptly carry forward the work made possible by the company's neglect to protect its water rights, and would not be deterred by the New Mexico & Arizona Land Co.'s ownership of the odd-numbered sections coming under the project.

However, whether entirely pertinent or not, it may not be wholly out of place to suggest that the conditions surrounding the agricultural industry in northern Arizona are of such a nature that it might be considered a positive advantage to have tracts of nonirrigable lands interspersed among the tracts to be watered. Northern Arizona is mainly a stock country, and even in the case of an irrigable belt will continue to be so. Under the circumstances it might well accrue to a farmer's advantage if he could secure, conveniently situated, a section, a half section, or quarter section of grazing or pasture land contiguous or convenient to his irrigated land on terms which it is safe to say will not obtain in the case of the irrigable lands owned by the New Mexico & Arizona Land Co., thus enabling him to economically join the cattle and farming industries, as they must, in the very order of things, be joined in that locality.

Feeling confident that the development of the Little Colorado River project, as all other feasible opportunities for irrigation in the State was, if not unduly restricted, inevitable, the State land commission considers that an injustice to homestead seekers, who have thus been deprived of an opportunity to which they were entitled, to the district which would profit by the development of the land, and to capital which should have had, and still should have, equal opportunity with the New Mexico & Arizona Land Co. to engage in this inportant enterprise, has been done by the continued withholding from settlement and entry since November 18, 1904, of the even-numbered sections coming under the project. This injustice is perpetuated every day the land is withheld, and will, particularly in the case of prospective hemesteaders, be greatly accentuated if opp

The act of April 21, 1904 (33 Stats., 211), provides that such exchanges may be made, under such rules and regulations as may be prescribed by the Secretary of the Interior, for \* \* \* public lands of "equal area and value \* \* \*."

changes may be made, under such rules and regulations as may be prescribed by the Secretary of the Interior, for \* \* \* public lands of "equal area and value \* \* \*."

It will not be difficult to point out that this condition is not being met. Admitting, for the sake of argument, that the general character of the lands within the sarea comprising the proposed base lands is similar or even identical with the general character of the lands within the proposed lieu-land area, it is a noticeable fact that the sections specified for relinquishment comprise all of the land—good, bad, and indifferent—owned by the company within the first-named area, while the lands which the company is willing to accept consist of carefully selected sections and fractional sections down to the smallest legal subdivision, and in some cases available fractions of sections in which selections were made are omitted from the company's list. Is it not entirely too much to expect that all of the lands relinquished, not only in entire sections but in entire half townships, are of equal value with the lands so carefully picked from particular sections chosen by the company proposing the exchange? Is it not more likely that the average quantity of lava deposits; of rocky peaks and crags; of pink, white, and blue volcanic clay, pleasing to the eye but a stranger to vegetation; and of other of the worthless kinds of lands with which the Navajo Reservation is quite generally marked characterize the whole sections, located at regular intervals, proposed to be relinquished; and is it not equally likely that in carefully choosing lands to be accepted in lieu of those relinquished the company making the selections avoided these unfavorable conditions? The State land commission has not made an examination section by section and tract by tract of the lands affected by the proposed exchange, but having personal familiarity with their general character, can not doubt that its deductions in this respect are correct.

The point made has to do entirely with th

rae proposed exchange, but having personal familiarity with their general character, can not doubt that its deductions in this respect are correct.

The point made has to do entirely with the physical character of the lands and of their comparative values as influenced by such qualities as soil and contour, but in determining the respective values of lands to be exchanged there are other and more important considerations. Land values are by no means entirely determined by character of soil, depth to water, or the extent of the mountainous contents. These should be taken into account, but they may well, in given cases, be practically identical and the respective values still vary greatly. It is so in the present case, where the lands proposed to be relinquished lie, in alternate sections, from 15 to 40 miles from a railroad station, while those to be received in exchange will, if the proposal be ratified, lie in a consolidated, compact body within an area the outside limit of which is not more than the lesser of the distances above named.

While, therefore, it may be true that the intrinsic value of the general average of land in the two districts involved is about equal (though that rule will not hold good as to the tracts actually proposed to be exchanged), the potential value is far apart, one district being comparatively isolated, while the other practically surrounds the active, thriving, growing town of Winslow.

Another phase of the question of values in this particular instance is presented in the fact that the proposed exchange comprehends that the New Mexico & Arizona Land Co. is to be permitted, with the assistance of the Government, to secure lands granted by the act of July 27, 1866, in a solid body, thereby greatly enhancing their value for speculative purposes, and, as has already been suggested, violating the spirit of the granting act.

By the act of July 27, 1866 (14 Stats., 292), there was "granted to the Atlantic & Pacilic Railroad Co., its successors and assigns, for the purpose of aliding i

The wisdom or unwisdom, justice or injustice, of this act are long past discussion, as are the good or evil motives of the Congressmen who supported the measure and the quality of the influences which brought the legislation about. But, passing the munificence of the gift to the

mission knows to be in existence, to have the Navajo Reservation extended over the area last above described be visited with your disapproval.

In this connection it is noted that Mr. Grieg, in his letter of October 16, declares that "the statement \* \* \* that an effort is being made by us to secure the addition to the Navajo Indian Reservation of tewnships 21, 22, 23, and 24 north, ranges 15, 16, 17, 18, 19, 20, and 21 east, is absolutely without foundation." The commission will simply reply that it did not say that the effort in question was being made by Mr. Grieg's company.

Since the matter, as is usual in early stages of such negotiations, is not of record, and as it has frequently occurred that many important facts in connection with such cases never become of record, it can not be positively stated at this time who the author of the effort to again extend the Navajo Reservation may be; but that such an effort has been inaugurated or conceived the commission is authentically advised. If Mr. Grieg's company is not guilty, there is no occasion for it to fiee, and the commission does not propose to be convinced of the error of that which it has ample grounds for believing true by any such diversion as Mr. Grieg's uncalled-for denial—a denial apparently advanced for no better reason than to make it appear that his company was being unfairly charged.

In any event, the State Land Commission, representing the State of Arizona and the people thereof, can not justly be chided for any alarm it may feel, or any alarm it may express, over rumored proposals to extend the already well-nigh boundless boundaries of the Indian reservations within the State; over underground murmurings of a movement to pour upon the Commonwealth which, heretofore helpless and unable to secure protection, has had thousands of acres of its richest and most valuable lands—exchanged under the guise of law for barren and sterile wastes—diverted from their proper channel of disposition and confirmed in the ownership of speculators, another floo

By \_\_\_\_\_ Chairman,

### BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SWANSON:

A bill (S. 3689) to provide for the construction, maintenance, and improvement of rural post roads through the cooperation and joint action of the National Government and the several States in which such rural post roads may be established; to the Committee on Post Offices and Post Roads.

By Mr. SMITH of Maryland:

A bill (S. 3690) to refund to the corporate authorities of Frederick City, Md., the sum of \$200,000, exacted of them by the Confederate Army under Gen. Jubal Early July 9, 1864, under penalty of burning said city; to the Committee on Claims, By Mr. BRISTOW:

A bill (S. 3691) authorizing the Secretary of War to donate 2 cannon and 34 cannon balls to the John A. Logan Post, Grand Army of the Republic, Salina, Kans.; to the Committee on Military Affairs.

A bill (S. 3092) granting an increase of pension to Edwin Snyder (with accompanying papers); to the Committee on Pensions

By Mr. MARTINE of New Jersey:

A bill (S. 3693) to remove the charge of desertion on the first enlistment of Daniel B. Stone, alias Nelson Davis; to the Committee on Military Affairs.

A bill (S. 3694) granting an increase of pension to Maurice C. Stafford (with accompanying papers); to the Committee on Pensions

By Mr. WARREN:

A bill (S. 3695) to provide for the completion of certain homestead entries for lands within the abandoned Fort McKinney Military Reservation; to the Committee on Public Lands.

By Mr. DILLINGHAM:

A bill (S. 3696) providing for the removal of snow and ice from the paved sidewalks of the District of Columbia; to the Committee on the District of Columbia.

By Mr. THOMPSON:

A bill (S. 3697) granting an increase of pension to James W.

Plummer (with accompanying papers); and A bill (S. 3698) granting an increase of pension to John M. Miller (with accompanying papers); to the Committee on Pensions.

By Mr. SIMMONS:

A bill (S. 3699) granting an increase of pension to Harriet G. Hayes; to the Committee on Pensions. By Mr. PERKINS:

A bill (S. 3700) making an appropriation for the construction of a dry dock on San Francisco Bay; to the Committee on Naval Affairs.

A bill (S. 3701) for the relief of Bernard G. Dingler and others, lately laborers employed by the United States military authorities under the Quartermaster's Department at San Francisco, Cal.; to the Committee on Claims.

By Mr. POINDEXTER:

A bill (S. 3702) granting an increase of pension to Catherine Ewing; to the Committee on Pensions.

By Mr. THOMAS: A bill (S. 3703) granting an increase of pension to Overton E.

Harris; to the Committee on Pensions.

By Mr. WEEKS:

A bill (S. 3704) for the relief of Charles Henry Harlow; to the Committee on Naval Affairs.

By Mr. TOWNSEND:
A bill (S. 3705) granting an increase of pension to John P. Baker (with accompanying papers); to the Committee on Pen-

By Mr. SHIVELY:
A bill (S. 3706) granting a pension to Martha Fitzpatrick;
A bill (S. 3707) granting a pension to James M. Nelson;
A bill (S. 3708) granting an increase of pension to Joseph

Lansen (with accompanying papers);

A bill (S. 3709) granting an increase of pension to Charles

A bill (S. 3709) granting an increase of pension to Charles Kretchmar (with accompanying papers); and A bill (S. 3710) granting a pension to Benedikta Hess (with accompanying papers); to the Committee on Pensions. By Mr. SMITH of Michigan:

A bill (S. 3711) for the relief of Henry La Croix (with accompanying papers); to the Committee on Claims.

By Mr. BURLEIGH:

A bill (S. 3712) granting an increase of pension to Randall B. Williams; to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 3713) granting a pension to Neal England, alias Joseph England (with accompanying paper); to the Committee on Pensions.

By Mr. BORAH:

A bill (S. 3714) granting pensions to the surviving members of the Forsyth Scouts and to the widows of the deceased members of said organization; to the Committee on Persions.

AMENDMENTS TO BANKING AND CURRENCY BILL.

Mr. BURTON. I submit several amendments which I intend to propose to the pending banking and currency bill. They are

brief, and I ask that they may be read.

The VICE PRESIDENT. The Secretary will read the proposed amendments.

The Secretary read as follows:

The Secretary read as follows:

On page 54, line 16, strike out the following: "\$1, \$2."

On page 39 strike out subdivision K, as follows:

"(K) To authorize member banks to use, as reserve, Federal reserve notes or bank notes based on United States bonds to the extent that said board may find necessary."

On page 67 strike out lines 5 to 8, inclusive, reading:

"Any Federal reserve bank may receive from the member banks as reserves, not exceeding one-half of each installment, eligible paper as described in section 14 properly indorsed and acceptable to the said reserve bank."

On pages 37 and 38 strike out subdivision (c), as follows:

"(c) To suspend for a period not exceeding 30 days (and from time to time to renew such suspension for periods not exceeding 15 days), any reserve requirement specified in this act: Provided, That it shall establish a graduated tax upon the amounts by which the reserve requirements of this act may be permitted to fall below the level hereinafter specified, such tax to be uniform in its application to all Federal reserve banks and to member banks required to keep the same reserves."

On page 48, line 5 to line 10 of the original bill, strike out the following words: "and may, at their joint discretion, charge interest thereon and fix from month to month a rate which shall be regularly paid by the banks holding such deposits: Provided, That no Federal reserve bank shall pay interest upon any deposits except those of the United States."

On page 67, line 21 to line 24, strike out the following words:

On page 67, line 21 to line 24, strike out the following words:
"No member bank shall extend directly or indirectly the benefits of
this system to a nonmember bank, except upon written permission of
the Federal reserve board, under penalty of suspension."
On page 67, line 18 to line 21, strike out the following words:
"Except as thus provided, no member bank shall keep on deposit with
any nonmember bank a sum in excess of 10 per cent of its own paid-up
capital and surplus."

The VICE PRESIDENT. The amendments will lie on the table and be printed.

WITHDRAWAL OF PAPERS-GEORGE M. BRADLEY.

On motion of Mr. WARREN, it was

Ordered, That leave be granted to George M. Bradley to withdraw papers on file in the office of the Secretary of the Senate with the bill, S. 5948, Fifty-eighth Congress, third session, granting an increase of pension to George M. Bradley, no adverse report having been made thereon.

## PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had on this day approved and signed act (S. 488) to authorize the sale and issuance of patent for certain land to H. W. O'Melveny. PERSONAL EXPLANATION-THE BANKING AND CURRENCY BILL.

Mr. HITCHCOCK. Mr. President, I rise to a question of

personal privilege.

The VICE PRESIDENT. The Senator will state it.

Mr. HITCHCOCK. Mr. President, I much regret the necessity of presenting to the Senate a matter of a personal nature. It involves not only a wrong done me by the Senator from Oklahoma [Mr. Owen], but it involves also a serious breach of the privileges of the Senate.

The Senator from Oklahoma made a speech in the Senate on Thursday. In the main it was a reply to my speech of that day. Very largely it consisted of a criticism of me and of my course. To that I did not object, because I was present to interrupt, to challenge, and to correct his statements as made. He vielded to me for the purpose from time to time, and I felt entirely satisfied with the result. Next day I looked for the matter in the Congressional Record and found that Senator Owen had held out the report. This, also, was proper enough to make correction of errors in grammar or expression. On Saturday I found the matter printed in the RECORD with such significant changes and such new matter as to constitute a misrepresentation of what the Senator from Oklahoma had said.

I therefore move that the official reporters be directed to reproduce from their stenographic notes the report of what was actually said by Senator Owen at that time, and that the false portions be omitted. I ask that the corrected report be published in the next issue of the RECORD and in the permanent

RECORD in place of the misleading report.

Before I concluded to take this step, I sent for the reporters' official record which Senator Owen had edited. I was informed that after editing it and securing a revised copy the Senator had withheld the original copy instead of leaving it with the reporters. I then sent the reporter to Senator Owen to ask for it. The reporter returned to me with the statement that Senator Owen did not know where it was. Later, Senator Owen came to me and stated that he had thrown it into the wastebasket. I thereupon asked the reporters to reproduce from their notes certain parts of the speech. First, I asked for the complete speech, but was told that they were so rushed that they could not reproduce it. I then asked them to reproduce certain portions of it which seemed to me to be new. I selected two or three which in the RECORD struck me as alterations, if not gross perversions. I have one here. It consists of a whole paragraph. It is new matter. It is an attack on me, and appears to have been delivered in my presence. As a matter of fact, it was not so delivered and is therefore a misrepresentation of fact as well as a falsification of the RECORD.

I send it to the Secretary's desk and ask that it be read. will say that the official reporters have marked in blue pencil

the portion to which I refer.

The Secretary. Reading from the Congressional Record of date Friday, December 12, 1913, on page 772, near the top of the page, left-hand column:

The Senator from Nebraska is not justified in discrediting the sensible party action of his colleagues, so essential to party solidarity and party responsibility, by painting it as gag rule by secret, sinister caucus action. The perfecting of the Democratic plan in party conference was wise and fully justified, and it is regrettable to see a Senator elected as a Democrat from Nebraska joining with the Republicans in abusing the Democrats of the Senate in this unfair criticism, holding up the Democratic President to public scorn in an unwarranted accusation, denouncing the Democratic House for a bad bill, almost every fundamental of which he then adopts.

Mr. HITCHCOCK. Mr. President, the whole paragraph is fictitious. It was written and inserted by Senator Owen the day after he made his speech. This paragraph is only one of the changes thus made. I shall not take the time of the Senate to refer to the others, and I have no desire to introduce personalities into this debate of what ought to be a great discussion of an important measure. To write and insert in the RECORD as a pretended part of a speech an attack on a Senator, or anyone else, is an abuse of the privileges of the Senate. Such instances in Congress are rare. I remember only one case during my service in the other House, and that, on order of the House, was promptly corrected by expunging the false matter, as I ask to have this expunged, as well as other false matter interjected and inserted in the report of the same speech by Senator OWEN.

Mr. OWEN. Mr. President, the objection which the Senator makes to the interlineations in the remarks which I submitted on December 11, 1913, and his very harsh description of that language as being a falsification of the Record, and so forth, I do not think is justified by him, because the habit of Senators has been by interlineations to make more clear the meaning of those who addressed the Senate; and in this matter which is

complained of the only thing the Senator can justly feel wounded at is the practical reiteration in another form of what had already been stated, because I had said in the Senator's presence these words, and I call the attention of the Senate to them:

Ha

Referring to the Senator from Nebraska-

Referring to the Senator from Nebraska—

He advises us with great violence that we are coerced by some powerful and mysterious person exercising tyrannical power over us, and that we have been ordered not to change a letter of the bill coming over from the House, not to cross a "t" nor dot an "1," and yet in the same breath he tells us that we have changed the bill until only 40 per cent of it remains.

What kind of consistency is this? When I challenge him to name the man who has intimidated every Democratic Senator except the brave Senator from Nebraska, "No: he will not." The obvious meaning of the Senator is that the President of the United States has exercised tyrannical power over the Senate of the United States, and has sent forth an edict that not a letter shall be changed in the House bill, not the crossing of a "t" nor the dotting of an "i." I say to the Senator from Nebraska that I recard it as poor party loyality to misrepresent on the floor of the Senate the President of the United States and the titular head of the Democratic Party.

The Senator was present when I said that. This interlinea-

The Senator was present when I said that. This interlineation, which makes a summary of what I said, does not change the meaning of the language; and I was justified in putting into the Record what I intended to say, and I now put into the RECORD these words as expressing my opinion, and I shall take occasion, in answer to the Senator from Nebraska, to justify this opinion by the record which he has made in this matter:

The Senator from Nebraska is not justified in discrediting the sensible party action of his colleagues, so essential to party solidarity and party responsibility, by painting it as gag rule by secret, sinister caucus action. The perfecting of the Democratic plan in party conference was wise and fully justified, and it is regrettable to see a Senator elected as a Democrat from Nebraska joining with the Republicans in abusing the Democratic President to public scorn in an unwarranted accusation, denouncing the Democratic House for a bad bill, almost every fundamental of which he then adopts.

Mr. President it can not be described to the control of the control

Mr. President, it can not be denied that every word of this is justified. As a matter of fact, I am justified in stating it now. The Senator from Nebraska has undertaken to show that the party caucus action was gag rule. His own language in his own comments shows it. The Senator has constantly made reference to the action of the President, as if he were browbeating the Senate, trying to overwhelm the Senate with his power, trying to coerce the Senate, and keep them from changing this bill in the slightest particular—not to cross a or dot an "i," is the language of the Senator-and in that particular he has had support in that criticism of the President by a number of Republican Senators. That criticism was made of the President in the committee, and I then had occasion more than once to defend the President against that very charge.

The Senator from Nebraska was elected as a Democrat. The people of Nebraska would not have elected him except as a Democrat; they believed he was a Democrat; they had a right to believe that he was a Democrat; and when a man accepts a position of trust as a Senator representing a party in a State he owes some obligation to the party organization. He ought not to indulge in unfair criticism of the President of the United States, the titular head of the Democratic Party, and especially ought he not to do it upon so unjust a charge. If he finds the ought he not to do it upon so unjust a charge. If he finds the President making a mistake, he ought to go to him as a friendly counselor and advise him where he is making a mistake; he ought to advise his party associates if they are making a mistake; he ought to help guide them in the proper path; and if he can not do so, and he finds he can no longer cooperate with them, and that his opinions are so far from theirs that he can not cooperate with them, then he should withdraw from his party allegiance with them; but I do not think that, when he is elected as a Senator from Nebraska to represent the Democrats, he ought to criticize the Democratic House for its action in the way he has done, and I do not think he ought to harshly criticize his party colleagues for their conference on this bill.

In June the President of the United States, as the titular head of the Democratic Party as well as the President of the United States, made an appeal to the Congress-to the Senate and to the House of Representatives met in joint assembly. He said:

There are occasions of public duty when those things which touch us privately seem very small—when the work to be done is so pressing and so fraught with big consequence that we know that we are not at liberty to weigh against it any point of personal sacrifice. We are now in the presence of such an occasion. It is absolutely imperative that we should give the business men of this country a banking and currency system by means of which they can make use of the freedom of enterprise and of individual initiative which we are about to bestow upon them.

I have come to you, as the head of the Government and the responsible leader of the party in power, to urge action now, while there is

time to serve the country deliberately and as we should, in a clear air of common counsel. I appeal to you with a deep conviction of duty. I believe that you share this conviction. I therefore appeal to you with confidence.

A very short time afterwards certain of the citizens of Nebraska, certain of the Democrats of Nebraska, who regarded the Senator as their representative, sent to him a petition as

Whereas President Wilson has wisely recommended to Congress the immediate passage of a currency measure carefully designed to protect the people and honest business of the country against the possibility of the money stringency now and always threatened by the powerful capitalistic combinations whenever just remedial legislation seems probable or possible; and
Whereas it is imperative that the administration at this time receive the loyal support of all Democratic Members of the House and Senate in its great battle against greed and privilege, and for the common people: Therefore be it

people: Therefore be it

Resolved by the Democratic county central committee of Sarpy County, Nebr., That all Democratic representatives in Congress be, and hereby are, called upon and earnestly requested to loyally and patriotically give unqualified support to the great administration measures now pending before Congress relative to tariff and currency, and to defer until some future session of Congress the offering of amendments or criticism likely to delay, obstruct, or defeat the passage of either measure; be it further

Resolved, That copies of this resolution be immediately transmitted to our representatives in Congress, Hon. Gilbert M. Hitchcock and Hon. C. C. Lobeck.

Adopted, July 19, 1913.

B. J. Melia, Chairman.

B. J. MELIA, Chairman.

W. D. Schaal, Secretary, Springfield, Nebr.

The Senator from Nebraska, instead of respecting the urgent appeal of the President of the United States, the titular head of his party, who had a right to appeal to him, and instead of respecting the humble prayers of the Democrats of Sarpy County, who appealed to him in like manner, saw fit to rise upon the floor of the Senate and read into the RECORD this appeal of the Democrats of Nebraska and then treat it with contumely, and say that he was strongly opposed to any comprehensive currency legislation during the present session—that he was strongly opposed to the appeal of the President of the United States.

It may be said that any Senator has a right to oppose the President of the United States in any of the President's views. I think that general observation might be made. I do not think any Senator must be denied his liberty of conscience or his duty as a Senator to obey his conscience; but I do not think it is proper party loyalty to denounce the program of the President or to treat his Democratic associates in Nebraska in this fashion.

I have no idea that any emergency exists which will excuse Congress in railroading through a revolutionary measure such as has been intro-duced by my friend from Oklahoma [Mr. Owen].

He goes on to give his reasons why he will not and should not. From that time the Senator from Nebraska has indicated his strong hostility to any action upon this matter. Only recently has he been willing to yield to the overwhelming sentiment of When the chairman of the committee attempted to get hearings upon this matter and attempted to promote it, it was regarded as an indignity by the Senator from Nebraska.

The chairman was told in a moment of passion that the Senator from Nebraska was not going to be hurried in this matter; and the Senator from Nebraska found it convenient to go to the White Sulphur Springs and play golf while the chairman was

extremely anxious to get action.

That is an exercise, also, of a senatorial privilege, against which I may have no reason to complain; and yet when the House of Representatives and the whole country stand practically unanimously behind the President of the United States in the demand for this reform, stand for speedy action; when it was easy to forecast that the banks of this country would stand silently waiting and hoarding their reserves and constricting credits with a view to knowing what this bill would be before they relaxed credits; when any man could have foreseen that there might have been a serious stringency arising out of this condition, the Senator from Nebraska exercised his privilege of ignoring the appeal of the President, despising the action of the Democratic House, and when his own colleagues in the Senate met in conference and decided by a vote that they would take action on this matter and would go promptly to the performance of their duty, as requested by the President at the extra session of Congress, the Senator from Nebraska was not at all moved by their views. His independence of his party associates is so great that he is not willing to listen to them. Then, after having had abundant opportunity to know how wise the action of the President was in advising this legislation, after having had abundant opportunity to know what the wisdom of the House action was, he still persists in this criticism.

I remind the Senate now, and I take occasion to say, that in judgment he is entirely unjustified in treating the House bill as being utterly unworthy. The House bill provided for the concentration of reserves. We have not materially changed the concentration of reserves in this bill. The House bill provided for the mobilization of reserves. We have not in any substantial transfer of the mobilization of reserves. tial way changed the mobilization of reserves. The House bill provided for elastic currency. We have adhered to the same important principle in this bill. The House bill provided for an open discount market. We have not materially changed the House provision in that respect.

These four great fundamentals of the bill as passed by the House remain, and ought to remain. They were wise. They were justified. They were the soul of the bill. The House of Representatives deserves great credit for the bill which was passed there. The members of the House Banking and Currency Committee who conducted the Pujo hearings, and held the Glass hearings upon this matter, and assisted in drafting and putting the bill through the House, deserve the highest praise, and are not to be treated as having discharged their public duty in an

unworthy or discreditable manner.

The Senator speaks of the House bill in derision, as a-

sacred document \* \* \* of which, as I have said, we were forbidden to dot an "i" or to cross a "t,"

Mr. Owen. By whom?

Mr. HITCHCOCK, And which we were commanded to pass without a hearing and without much investigation.

I criticized the Senator for that, and in summarizing my comments I referred to this, and I interlined the objectionable words. Perhaps it was a liberty. Perhaps it was not just as the Senator would have it. In interlining those words, however, I did not change the meaning of what I had said.

I had said to the Senator that I regarded it as poor party loyalty to criticize the President. I repeated it in this para-

graph which I made as a summary.

If it be the custom of the Senate not to put in such interlineations, I am perfectly willing to abide by the custem, but I know that it is the custom to put them in. Senators have taken the liberty on both sides of this Chamber, I think almost without a single exception, of making the language of the Record speak the words they intended to speak, even if the reporter did not get the words exactly, or even if they did not say at the instant precisely the words they intended to say to represent their

I do not think the Senate should be disturbed by a controversy of this character, however. I regret that the Senator felt so sensitive about it. I had a perfect right to criticize him. I have a perfect right to criticize him now, and I feel entirely at liberty to do so. He may feel that he has a right to criticize me.
The Record was placed before him immediately, however. When
I learned that he desired to know what interlineations I had made, I immediately went to him and told him what the interlineations were as far as I could. Now he has taken occasion to have it appear that I had falsified the RECORD.

I put in the RECORD now some elemental truths that I desire to go into the RECORD, and I repeat every word to which the Senator objects. Now I ask the Senate to acquiesce in the wish of the Senator, to eliminate the words which are objectionable to him.

Mr. HITCHCOCK. Mr. President, I do not care to eliminate any words objectionable to me. That is not what I am asking. I am asking for the protection of the integrity of the Senate records. I desire to have them appear as true records of what actually occurred here in the Senate.

I have not any objection to any personal criticism the Senator from Oklahoma may care to visit upon me, providing he delivers it upon the floor of the Senate. I think it would be a serious evil, a great danger, if any Senator is to be permitted to put into the RECORD an attack upon a Senator not actually delivered upon the floor of the Senate.

I had not any objection when the Senator sought to degrade this discussion of a great question into a personal controversy between himself and me, and I have not any objection now, when this issue is raised, that he should seek to convert it into an issue involving the bill. The real issue here to-day is whether Senators are to be permitted to take the RECORD as made up by the official reporters and change it to represent something which was not said upon the floor of the Senate.

I have referred to only one of the changes. It was not an interlineation. It was the insertion of 11 lines, in a separate paragraph, constituting a separate attack, and it is only one. There is another change there which involves the meaning of a colloquy that occurred between the Senator and myself when I interrupted him. He so changed his own language that my interruption appears to be absolutely out of place and ridiculous.

All I am asking for is to have the Record appear as it was made up by the very accurate official reporters at the time.

far as concerns the criticism which he visits upon me regarding my attitude toward the President and the House of Representatives, I may say a word to correct the inaccurate impression which the Senator from Oklahoma seeks to give. We have by common consent, in all legislative bodies, the privilege of criticizing a coordinate branch of the Government, when we think the public needs require it. Our criticisms should be respectful. I submit that not only has my criticism of the President's attitude and his action been respectful, but my criticism of the House bill has been considerate.

In order that this may be placed in the RECORD at this time, I desire to read two or three paragraphs from a speech which I delivered in the Senate on the 25th of November.

Referring to the agitation for currency reform, I said:

Referring to the agitation for currency reform, I said:

Possibly this condition of agitation and discussion might have continued for some time had it not been for the action of President Wilson in bringing the matter before Congress, thus making banking and currency reform an administration measure. In so doing, the President has merited and received the praise of the whole country. His wisdom and his courage in bringing this needed reform to a practical issue is to be highly commended. Nothing less than presidential influence would have made banking and currency reform possible for some

That does not look like a very serious attack upon the President of the United States. I added:

I yield this tribute to the President of the United States the more readily because I have frankly opposed and criticized him when he urged hasty action, which I deemed dangerous.

Now, concerning the statement just made by the Senator from Oklahoma, incorporated also in the misstatement which he caused to be inserted in the RECORD, referring to the House of Representatives, let me read what I said about the House of Representatives:

Representatives:

The bill before us reached the Senate on the 18th of September, having passed the other House after several months of discussion in committee, caucus, and in the full House. As I look upon it now, Mr. President, I am disposed to think it somewhat remarkable that the House succeeded in sending to the Senate so good a bill, considering the difficulties of the situation. In the first place, it was formative and original legislation. It dealt with a difficult problem, which to some extent has puzzled the civilized world for many years. It was pushed through the House in a hurry. It is but fair to its authors to say that it represented much hard work, great study, and original thought. To some extent, of course, it was an adaptation of the European system of a central bank, with such modifications as political exigencies and American institutions made necessary.

I merely insert this in the RECORD at this time, Mr. President. in order that it may be seen that I have observed a respectful and considerate attitude not only toward the President of the United States but toward the House of Representatives. I have criticized the bill; I have insisted on its amendment; and I am glad to say that as the result of efforts made by myself and other members of the committee the bill has been enormously amended and vastly improved; and I am not here now to urge an unnecessary delay in its passage. I am in favor of an early vote. But those are not the issues of this controversy. question is whether the Senate is to have its RECORD made up as the official stenographers make it up or whether it shall be made up as a Senator may determine to make it up by inserting matter which was not delivered upon the floor of the Senate, and I ask for the adoption of my motion.

The VICE PRESIDENT. The question is on the motion of

the Senator from Nebraska.

The motion was agreed to.
The VICE PRESIDENT. The RECORD will be so corrected.

BANKING AND CURRENCY.

Mr. WORKS. Mr. President, I desire to give notice that this evening at 8 o'clock, with the permission of the Senate, I shall submit some brief remarks on the currency bill.

Mr. SMITH of South Carolina. I understand that the morning business is closed; and in the absence of any motion to take up the currency bill, I ask that it be laid before the Sen-

I move that the Senate proceed to the consideration of House bill 7837.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purpose

Mr. SMITH of South Carolina. Mr. President, the President in his message before the joint assembly of the House and Senate made some remarks in reference to this legislation, which I ask leave to print as preliminary to what I have to say in reference to the bill now pending, and from which I shall make some quotations. I ask leave to have it printed.

The VICE PRESIDENT, Is there objection? The Chair hears none, and it is so ordered.

The matter referred to, from the address of the President, is

The matter referred to, from the address of the President, is as follows:

I turn to matters of domestic concern. You already have under consideration a bill for the reform of our system of tunking and currency, for which the country waits with impatience, as for something fundamental to its whole business life and necessary to set credit free from arbitrary and artificial restraints. I need not say how carnestly I hope for its early enactment into law. I take leave to beg that the whole energy and attention of the Senate be concentrated upon it till the matter is successfully disposed of. And yet I feel that the request is not needed—that the Members of that great House need no urging in this service to the country.

I present to you, in addition, the urgent necessity that special provision be made also for facilitating the credits needed by the farmers of the country. The pending currency bill does the farmers a great service. It puts them upon an equal footing with other business men will had themselves quite financy of the difficulties which now hamper them in the field of credit. The farmers, of course, ask and should be given no special privilege, such as extending to them the credit of the Government itself. What they need and should botain is legislation which will make their own abundant and substantial credit resources available as a foundation for joint, concerted local action in their own behalf in getting the capital they must use. It is to this we should now address ourselves.

It has, singularly enough, come to pass that we have allowed the industry of our farms to lag behind the other activities of the country in its development. I need not stop to tell you how fundamental to the life of the Nation is the production of its food. Our thoughts may define the country of the farcety, but it is from the quite the force of the credit of the country of the farcety, but it is from the quite the production of its food. Our thoughts and the free hillsides that we draw the sources of the open valleys and t

Mr. SMITH of South Carolina. Mr. President, the President recognizes the need of legislation to enable the farmers and agriculturists of this country to finance their business. said-and I quote his exact words:

We must add the means by which the farmer may make his credit constantly and easily available and command when he will the capital by which to support and expand his business.

No stronger terms than these can be used; in this expression he covers completely the exact object which all financial legislation, up to the present and including this bill, has striven to do for what is known technically as "commercial" business.

The conditions under which the farmer produces his commercial commodities by the laws of nature are different from those of any other commercial productivity. By the very nature of things he is forced to a longer period of credit without any intervening marketable return. As the President says he is dependent upon the seasons which can not be forced during the period necessary for the growth, maturity, and harvest of his crops. A constant outlay is absolutely necessary. This time for the production of staple farm products averages from six to eight months. He, therefore, is forced by the unchangeable nature of his business to obtain his loans for this length of time. A 90-day loan either would have to be renewed under the present system or the farmer be forced to obtain it elsewhere than under the present proposed banking act. Under the conditions above set forth it means an accumulation of indebtedness, representing the cost of the production of his entire crop and the cost of harvesting. This indebtedness, extending over a period of six or eight months, naturally becomes due and payable when his crop is ready for the market. Under present conditions he has to pay the highest rate of interest when he secures a loan for making his crop, and these loans becoming due when his crop is gathered and ready for the market, he is forced to sell practically his entire production within a period of 30 to 90 days in

order to meet his obligations. Hence, he is handicapped both in the production and sale of his crop.

His paper not being recognized as ordinary prime commercial paper is discounted at the highest possible legal rate, if he is able to obtain a loan at all, and then his crop, when ready for market, necessarily must be sold, regardless of the law of supply and demand in order to meet these obligations. In other words, the farmers of this country, in order to meet the obligations incurred in producing their crops, have to put upon the market a 12 months' supply of farm products within 30 to 90 days. It is inevitable under such conditions that the purchasers or the buyers of these products, having to carry them for the next 12 months for distribution, discount the price and all expenses incident to the risk incurred in carrying them, and then charge what profit they think sufficient to remunerate them. Therefore, as I have just said, the farmer is handicapped, both in the production and sale of his crops. It is to remedy this condition that the Government should address itself.

The farm is an intimate and vital part, in fact, the essential part, of every nation's life and prosperity. This is a trite saying, but none the less true, because so often repeated, and whatever tends to improve the conditions surrounding the farm, facilitate production, aid in supporting and expanding business, and assists in wise and profitable marketing, tends to the upbuilding and enrichment of the Nation. In view of the relation that the farm bears to every department of our life, every effort should be used to promote every facility for obtaining loans for the farmer sufficient for the production of his crop and for market-

ing it to the best advantage.

As said before, the farm differs from every other business. A day's production from a mine is ready for the market to meet the expense incurred in that day's production; the output of a lumber mill is ready at the end of the day for shipment and liquidation of the debt incurred in producing that day's output. The same is true of the factory and mercantile business; in fact, every other form of commercial activity. And all of these have to wait upon the farm for their sustenance and comfort, and the farmer has to wait upon all of these to be served first in financial and commercial life. He has a right to demand recognition, preeminent recognition, in the financial legislation of America. We do not belong to those nations of Europe which by hereditary influence or present condition, have unchangeable class conditions. But we are Americans, under that form of government where every condition surrounding each and every vocation and avocation is of equal concern to the legislator and should be given its proper recognition in the laws pertaining to the general welfare.

If the farmers of this country could secure six to nine months loans, at reasonable rates of interest, to produce their crops, the cost of production would be reduced materially; and when their crops are ready for the market be able to borrow upon these products for a sufficient length of time to permit the marketing of them to the best advantage, the greatest problem confronting the development and success of the agricultural interests of this country would be solved. In this bill some measure of relief may be looked for. It is provided that certain prime commercial paper is to be made the basis of currency issue, thus providing an additional, if temporary, increase in the circulating medium to meet the requirements of trade. This. of course, will tend to give opportunity for loans elsewhere than in our banking and currency system of sufficient length of time to meet the requirements of the farmers. Hence the farmer will be indirectly the beneficiary, perhaps, of a system in which he should have been the beneficiary directly.

I am going to vote for the bill, believing that it is a first

step in the right direction, with a hope and faith that from time to time there will be such amendments and modifications as the needs of the agricultural interests may demand. appreciate that at this time there might arise some embarrass ment, perhaps, with these time notes extended for a longer period than specified in this bill. On account of the adjustment of trade since 1865 up to the present day, perhaps would make it necessary that we do not introduce too great an innovation. Necessarily there must be change and readjustment, and these should be as easy and successful as possible. Reserves are to be established, deposits and credits built up, gold and other securities accumulated, and the system gotten into working shape, and then perhaps—and I hope in the near future—the farmers of this country may find an adequate way of meeting all of their needs under the proposed system when established, amended, and developed.

This bill also for the first time in our banking history recognizes real estate as a banking collateral. This also is of great benefit to the agricultural interests of the country. It makes

possible the financial resources organized under this bill for the benefit of those who wish to realize upon their vested capital. Before this those who wished to use their landed property as collateral for its development were dependent upon such loans as they could negotiate outside the law governing national banks and the resources controlled by the national laws. This is one of the most important features of this bill and is a recognition of the value of the property upon which the entire Nation depends and upon which the farmer necessarily is de-

The great cry has been "Back to the farm." The Agricultural Department is spending millions of dollars for the development of agricultural interests. All of this may avail something, but until agriculture is relieved from the financial handicap under which it is now laboring, until it is placed upon a financial footing with the other commercial and industrial activites of the country, the condtion now obtaining will become no better and the high cost of living become more acute as the years go It is idle to talk about getting young men of education and ability to engage in a pursuit in which credit and the means of obtaining it are doubtful and uncertain, and the products of which are forced upon the market, regardless of price, in order to meet the obligations incurred in their production.

We do not realize, Mr. President, the fact that under the development of the means for education, for communication, and transportation young men of brain of this country have not developed the real wealth, which is the agricultural interest of the country. They are not going to subject themselves to a system which is not recognized in any financial or commercial legislation and is left entirely to the caprice of those who desire to mulct the producer of the raw materials on the one hand and to raise the prices for their own benefit on the other. The middle man neither produces raw material nor does he own the factory that makes the finished product. Speaking of that very condition, President Wilson says:

And yet the farmer does not stand upon the same footing with the forester and the miner in the market of credit; \* \* \* the security he gives is of a character not known in the broker's office or as familiarly as it might be on the counter of the bankers.

In the same connection he said:

Our thoughts may ordinarily be concentrated upon the cities and the hives of industry, upon the cries of the crowded market place and the clangor of the factories, but it is from the quiet interspaces of the open valleys and the free hillsides that we draw the sources of life and prosperity.

This approaches poetry and reads splendidly and is an appeal for ultimate action, but it does not meet the crying needs that stand face to face with a thousand oppressed homes in America that furnish the food for the masses to eat and the clothes that they wear and who by the laws of Congress are relegated to such fortuitous chances as they may avail themselves of for securing the finances that make the life and prosperity of the Nation. The President was right. We have a right to demand that here in the beginning of the reformation of financial legislation the fundamental principles upon which every breakfast table is furnished and every man clothed in comfort shall be recognized; and those who produce these necessities should not be made the indirect beneficiaries of those laws of which they should receive first recognition. It is for this reason that the ancient cry of unrest all over the country comes up against the inequalities in wealth, and it is the most potent reason for the political unrest that characterizes conditions to-day.

In the last 10 years the percentage of increase in agricultural products has been 97.1, while the increase in money circulation has been but 72.4 per cent, a difference between the relative increase of the two of about 25 per cent more in agricultural products than in circulating medium. When the fact is taken into consideration that a very small per cent of the entire capital of the country is used under our present system for the purpose of producing and marketing our agricultural products it will be seen how inadequate are the means for financing this great industry and establishing confidence in its certain remuneration.

The greater per cent of the actual capital of this country is concentrated in the great centers of trade and used for purposes of speculation and gambling in stocks, bonds, and even in agricultural products themselves, a use of capital which adds not one dollar to the material development and welfare of the country. It is for the following reason, among others, that I shall support the bill: It seeks to establish regional banks, to decentralize this dangerous concentration of capital in the few great centers of speculation and gambing, and to place the money of the country where those who are engaged in legitimate industry may secure adequate accommodations at all times. favor the establishment of eight reserve banks, even though the accommodations that they may be able to extend to the industries in the regions in which they may be placed may not at first be as great as may now be received from some of the present reserve centers. But they will become the nuclei of the wealth of the different sections in which they are located, and, I believe, rapidly increase that wealth. With wise administration, I predict the rapid development of the latent resources of these sections, resulting from the establishment of these reserve banks.

Not only does this provision of eight reserve centers tend to decentralize capital and equalize conditions of opportunity in the country, but it will aid powerfully in the development of the latent resources of each region. It necessarily tends to make the capital of each of these sections nonmigratory. It retains the wealth of each section for the benefit of the section in which the wealth is produced; it makes the money of each section available for the development of the resourcs of that section; it so utilizes it that it may not be transferred to the great centers of speculation and gambling. I for myself would be willing to pay a higher rate of interest and suffer a temporary lack of capital in order to see these eight reserve banks established, believing, as I do, that they will ultimately result in the development of the undeveloped resources of the Nation and render an adequate accommodation as the years go by in the section where they rightfully belong and where they should be utilized.

It is a monstrous proposition that right now watered stocks and bonds in our banks and financial centers are recognized as adequate collateral security for immediate loans, while agricultural paper, based on one of the very fundamentals of the wealth of the country-agriculture-is not recognized under our

present law or in the pending bill. Under our present system all sections of the country have been but tributary feeders to the few financial centers, making possible the building up of the colossal fortunes of the few, rendering easy means for the shameful speculations which have disgraced our market places, and making possible the floating of colossal schemes that have destroyed competition, so essential to the healthy growth of our industries. They have drained from every quarter of the country the capital so sorely needed

for the development of its vast and undeveloped resources.

The Senator from New York [Mr. Root], in his wonderful analysis of this bill the other day, called attention to the fact that in the West and in the South there are yet vast undeveloped resources, and said that if we dared pass a provision in this bill that would give that undeveloped wealth the right to be capitalized and then developed we should inflate our currency to billions of dollars; in other words, rather than see the undeveloped resources of this country developed, rather than see the sanguine hopes and aspirations of the young men and of the people of this country generally realized by furnishing them a safe and adequate means of financing those sections which stand so sorely in need of it, we must still adhere to the present system of a restricted currency, an inflexible currency, an arbitrary currency, in which the few can control the markets at their will and hold the country as tributary to them.

This bill provides further that in times of emergency the assets of the country, the real wealth of the country, may be used as a basis of circulation, making the possibility of the recurrence of disastrous panics remote, if not wholly impossible. Should this bill establish confidence in the ability of cooperation of the Government and the bankers in meeting any emergencies that may arise, should it establish confidence in the fact that the credit of the vast resources of the United States shall be back of those who hold the currency of this country, plus the resources of our gold currency, the vexed problems that now confront us will have passed, and we shall enter upon an era where each man, according to the real wealth he commands or that which he produces, shall find an adequate means of financing his resources and relieve the conditions which now confront the oppressed.

Mr. VARDAMAN. Mr. President, I have received a telegram this morning from one of the leading banks in Mississippi, which I desire to have read.

I wish to say that I have great faith in the inerrancy of the common sense of the most. The judgment of all the people is more to be relied upon than the conclusions of any selected few. As a contribution to the general fund of information, and as an expression of opinion of a certain class of people vitally interested in this currency question, I ask that the telegram I send to the desk be read, which, as I have said, is from one of the largest banks in the State which I have the honor in part to

The VICE PRESIDENT. In the absence of objection, the Secretary will read the telegram, as requested by the Senator from Mississippi.

The Secretary read as follows:

CANTON, MISS., December 14, 1913.

Senator James K. Vardaman, Washington, D. C.:

We earnestly request your support for bank control of regional banks in preference to Hitchcock amendment for Government control. Do not think it just to require banks to subscribe for stock and have no control over investment. Do not believe banks of State will join Federal reserve associations with absolute Government control.

FIRST NATIONAL BANK.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Nebraska [Mr. HITCHCOCK].

Mr. BURTON. Mr. President, at the close of the session on Saturday evening I was calling attention to certain features of the bill which did not seem entirely clear. It is evident that in the provision relating to the selection of directors, beginning at the top of page 16 of the print of December 1, material modifications must be made.

The defects now appearing in the bill as reported by the six members of the Banking and Currency Committee headed by the chairman, the Senator from Oklahoma [Mr. Owen], are three in number: First, the complication which would arise in the election of directors. Provision is made for three groups of banks in each district or region. The number of banks of each group, if we may take an average of the whole United States based on the number of national banks, would be about 300-312 is more nearly exact. It is provided that a list shall be prepared from which the selection is to be made, as upon the Australian ballot, giving a number of eligibles for appointment. On the eligible list there would be 300 names. There is a plan for preferential voting. Each elector of the 300 must give his first choice, his second choice, and his third choice. If there is a majority of the 300 on the first choice for one man, he would be elected a director of class A or of class B, as the case may be. It is absolutely impossible under any ordinary result of voting to obtain from 312 voters a majority on the first vote in an eligible list of 312.

The bill then provides for a second choice, and if by the addition of the votes for a candidate who is first choice and second choice there is a majority, that person is selected. That also is practically impossible. There is then a provision in the bill that the first, second, and third choice of candidates shall be added, and the one having a plurality shall be considered as chosen.

What would be the result of this in so large a number? scattered vote. One with not more than 20 or 30 votes might be elected a director, and the rest of the choices would be divided among this very long list of 300.

In order to make this bill more perfect, I suggest, Mr. Presi-

dent, that there should be some system of nominations, so as to reduce the number of eligibles from one for each bank to a number which will not be confusing to the electors in making their choice. Suppose one of these electors receives a list with 300 names upon it; how can he wisely and carefully make a selection from so large a number? It is true that this part of the bill would be workable, but it would not be sensible.

There are, however, two other features in the clauses of the bill relating to the choice of directors which are absolutely inconsistent and which would not work. The first is a provision that each group shall make a selection of a director of class B who is actively engaged in commerce, agriculture, or some other pursuit. In a manufacturing district presumably the one elected would be associated with some form of manufacturing; in a district where some other branch of business, such as mining or lumber, assumed predominance, a third director would be chosen from this class; but the three groups are to vote indiscriminately, while the provision of the bill, in lines 7 to 11, on page 16, is:

Class B shall consist of three members, who at the time of their election shall be actively engaged in their district, respectively, in commerce, in agriculture, and in some other pursuit.

Each of the three groups vote under that provision. It stands to reason that all three might very probably select a man associated with agriculture, or each one of the three might select a man engaged in commerce or in some other pursuit. That would be directly contrary to the substantive provision that the three classes shall be represented respectively; and in this measure as it is now drawn there is no avoiding noncompliance with an essential provision of the bill, relating to the choice of

There is a third defect, which is more serious than either of the other two I have named. On page 17 it provides that-

At a regularly called meeting of the board of directors of each mem-ber bank in the district it shall elect by ballot one of its own mem-

That is, a director-

as a district reserve elector and shall certify his name to the chairman of the board of directors of the Federal reserve bank of the district. The chairman shall establish lists of the district reserve electors thus named by banks in each of the aforesaid three groups and shall transmit one list to each elector in each group.

It then provides, on pages 18 and 19, that the directors of classes A and B shall be chosen from this list. By the provision which I have read everyone on that list, whether a candidate for director of class A or of class B, is a director of a bank; and in lines 14 and 15, on page 16, there is a provision that—

No director of class B or class C shall be an officer, director, employee, or stockholder in any bank.

We may disregard the provision as to class C, because that does not apply; but, in the first place, there is an eligible list confined to directors; and, in the next place, there is a provision, positive in its nature, that no director of any of the banks shall be chosen as one of the directors of class B. This proposition is entirely inconsistent, and I do not see what can be done except to correct it.

As I said the other evening, it is quite easy to see how this rather serious error crept into the bill. It is due to the erasure of certain provisions in the House bill contained on page 17,

beginning with line 14.

I desire to ask of the chairman of the committee, What are the powers of the Federal reserve agent? Is he to be the chief executive officer of the regional bank? The provisions of the bill do not seem to be entirely clear in this regard. I do not see the chairman present, and I should like if some other member of the committee will answer that question.

Mr. NELSON. Mr. President—

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Minnesota?

Mr. BURTON. Certainly; indeed I desire to ask questions of members of the committee.

Mr. NELSON. I think the design of making one member of the board a reserve agent is for the purpose of making him custodian of the commercial paper that is presented for discount, and on which currency is sought to be obtained. I think if the Senator will examine other provisions of the bill in reference to the issue of notes by reserve banks, he will find that the commercial paper is to be deposited with the reserve agent, and I think it also contemplates that the reserve agent is to have control of the gold reserve.

Mr. BURTON. That is clear. That is set forth here very

distinctly.

Mr. NELSON. So in a measure, if the Senator will allow me, while he is a member of the board of directors, he is the special representative of the reserve board here in Washington. the agent of the board here in Washington. He is the custodian of the commercial paper, of the gold, and of the reserve

BURTON. But the bill goes further than that. order that it may be clearly understood, I think I had better read what precedes the part I have already read:

Three directors belonging to class C shall be appointed directly by the Federal reserve board, and shall have been for at least two years residents of the district for which they are appointed, one of whom shall be designated by said board as chairman of the board of directors of the Federal reserve bank of the district to which he is appointed and shall be designated by said board as "Federal reserve agent."

So far as you can gather from the language of the bill, he has a dual capacity. He is to be Federal reserve agent, and as such is to have custody of the commercial paper presented for discount, and he has a number of other duties as the representative of the Federal reserve board, but the expression is used that he-

shall be \* 'reserve bank. chairman of the board of directors of the Federal

The bill goes on, later, to state his qualifications, but does not state his duties as chairman of the board of directors of the Federal reserve bank.

Mr. NELSON. Mr. President-

The VICE PRESIDENT. Does the Senator from Ohio further yield to the Senator from Minnesota?

Mr. BURTON. Certainly. Mr. NELSON. I think the purpose of that was simply to make him the presiding officer of the board-that is all; nothing more. He has no other powers except as the presiding officer of the board. He is, you may say, the chairman of the board; that is all. It gives him no special powers in his capacity of chairman. His special powers come to him in his capacity of

Mr. BURTON. The defect in the bill, so far as I can ascertain from the examination I have given to it, is that it does not |

specify at all the powers of the chairman of the board or provide an executive head. There are widely different grades of presiding officers. There may be one who is a mere parliamentarian, who presents motions that are offered in a parliamentary body, asks for a vote upon them, and decides on points of order. There are other presiding officers, especially in business organizations, to whom are given duties of a very comprehensive character. Indeed, such an officer exercises a predominant influence in any board of directors to which he

Now, what is intended? Is this Federal reserve agent to be simply a representative of the Federal reserve board, and merely a presiding officer over the nine directors; or is he the executive officer of the regional bank by reason of his position as chairman of the board of directors of the Federal reserve bank?

Mr. OWEN. Mr. President, he is only the chairman. The board of directors, under the charter of the Federal reserve bank, has the authority to elect its officers and to remove its

officers at will.

Mr. BURTON. I know that is true; but you start out with a provision under which, when they meet to elect their officers, they have a chairman already selected, designated by the Federal reserve board.

Mr. OWEN. They have.

Mr. BURTON. What are his powers?
Mr. OWEN. What are his duties as chairman?
Mr. BURTON. Yes.
Mr. OWEN. To preside at the meetings and see that the proper records are kept. Those would be the natural duties of a chairman. He does not of necessity constitute an executive officer, as the president or cashier or teller; but the charter of the Federal reserve bank expressly provides that those officers shall be elected by the board of directors. The six directors of the bank, representing the banks, selected by the banks, of course, would exercise the power of naming the presi-

dent, the cashier, the teller, and so forth. Mr. BURTON. It seems to me there are two defects here. In the first place, the duties of the chairman are indefinite. In the next place, it does not seem to me desirable that a director of class C, appointed by the Federal reserve board, should act in a dual capacity, both as agent of the Federal reserve board and as chairman of the board of directors of a regional bank. He could constantly say to his fellow members of the board: "I am here as the representative of the Federal reserve board, which can review your action, which can direct you to do this and to do that, and I am also chairman of this board." It gives him an undue degree of power. In a way the duties are inconsistent. He is standing over a regional bank, having custody of the commercial paper, seeing that they comply with the law, and at the same time he occupies the position of chairman, which gives him dominance as the manager of the bank.

Mr. OWEN. Mr. President—
The VICE PRESIDENT. Does the Senator from Ohio further yield to the Senator from Oklahoma?

Mr. BURTON. Certainly.

Mr. OWEN. It was the policy in framing this provision that the Government should have a supervisory power that would be perfectly clear and would be vigorously enforced. The banks were given the right to select six members of the board in order that they might, by their vote, control and safeguard the funds which they were placing in these banks and would be administering in this way. The alternative proposition, the socalled Hitchcock amendment, gives five of the directors to the Government and only four to the banks, which of course would permit the banks merely to look on and see the Government administer. We desired and thought it was necessary, in order to have the friendship of the banks to this system, in order to induce them to enter this system, to permit them to safeguard their own funds and to administer their own funds, under the scrutiny and safeguard of governmental supervision. There was the difference in the two points of view, the Hitchcock amendment and the Owen amendment.

Mr. BURTON. I recognize the two different theories presented by the two bills in question. After all, however, there is not so very much difference between them, except in theory. The so-called Hitchcock bill gives the appointment of five out of the nine directors to the Federal reserve board. This bill provides for three classes of directors—the first three to be directors of banks, the second three not to be directors of banks but to be chosen by the banks or their directors, the third to be chosen by the Federal reserve board. However, in a proposed amendment to the bill a provision is added that the Federal reserve board shall have absolute authority to remove any offcial or director under that plan; that is, any one of the nine, whether one of class A or of class B or class C, can be removed by the Federal reserve board, as well as any subordinate officer

or official who may be chosen.

Arguments may be advanced on both sides of that question. The argument for the right of removal is that it gives entire control to the members of the Federal reserve board. It vests in them the determination of the policy of all the banks, and also gives them that intimate association with each of the banks which enables them to control their specific operations. On the other hand, there is the objection that no director subject to this comprehensive power of removal will feel free to act on his own initiative.

I do not know that at this time I have the matured judgment to enable me to express a preference between the two, but that is not the objection I make to this provision. It seems to me ambiguous. In the first place, it does not sufficiently define the duties of the chairman. In the second place, it puts him in an

inconsistent position.

It is said that he is there to supervise the operations of the What is he supervising? Why, if he is chairman, he is supervising himself. He is himself the head, in a very important sense the manager, of the bank, while the Federal reserve board select him to exercise powers on their behalf which have been termed here powers of representation of the board and also of supervision.

I should like to ask the Senator from Oklahoma about a point of no very great importance, relating to the phraseology at the

bottom of page 19:

Three directors belonging to class C shall be appointed directly by the Federal reserve board and shall have been—

The House provision was "shall be"-

and shall have been for at least two years residents of the district for which they are appointed.

Under the wording of these lines, in case a man had lived, say, in Atlanta for two years and had removed to New York and lived there for 10 years, would it not be possible to appoint him one of the directors of class C in the regional bank at Atlanta?

Mr. OWEN. I think, of course, that such a construction would be possible. The language would have been more aptly phrased to express its real meaning if the words "immediately previous to appointment" had been inserted.

The House bill would have permitted a man to move into the section, and then say he was a resident, and be appointed. was intended to prevent that being done, in order that those who were appointed from a district should have been bona fide residents there at least two years previous to appointment. I think the construction the Senator suggests might be possible; but any doubt on the point can be easily removed by inserting the words "immediately previous to appointment."

Mr. BURTON. It seems to me those words should be inserted; for, while it is hardly probable that the power of appointment would be abused, it would be possible to appoint as a director in a new district a man who had lived there for

two years and who had been absent for a long time.

On page 23, in line 20, in the provision for increase and

decrease of capital, it is said:

In case a member bank reduces its capital stock it shall surrender a proportionate amount of its holdings in the capital of said Federal

Then it goes on-

and in case a member bank goes into voluntary liquidation it shall sur-render all of its holdings of the capital stock of said Federal reserve bank and be released from its stock subscription not previously called.

As the House bill was drawn it provided that the subscriptions to the regional banks should amount to a certain per-centage of the capital stock. The proposed amended bill filed by the six members including the honorable chairman bases the subscriptions to the stock of the regional bank on capital stock and surplus. After the words "capital stock," in line 20, should not the words "and surplus" be added?

Mr. OWEN. Mr. President, it would make it more harmonious with the matter of the subscription; but since it is not a very important matter, and since the surplus is not infrequently modified by loss, it was not thought necessary to do it. It would make it a little bit more harmonious if it were done, because there is no great difficulty about changing the

Mr. BURTON. It seems to me that you must have one theory or the other running consistently through the bill-either that of the House, basing the subscriptions to capital stock on your capital, or the other theory, that adopted by the Senate amendment, basing subscriptions on the capital stock and surplus, and that the same theory should be adopted in all portions of the bill.

Is any provision made for increased subscriptions in case of impaired capital, or is it intended that when the capital of a bank is impaired by losses—that is, the capital and the surplus as well-the bank shall then reduce its subscription to the regional bank?

May I ask what is the theory regarding that? Suppose a bank has a capital of \$1,000,000 and a surplus of \$500,000, and the surplus of \$500,000 is wiped out by losses. Is it contemplated that the subscription to the regional bank shall remain

the same or that it shall be diminished?

Mr. OWEN. It was thought that in case of a reduction of surplus, which sometimes occurs, that would not be material; but if the capital stock itself were impaired it would be so seri ous that in that contingency it certainly ought to be reduced. I think, however, there would be no objection whatever to agreeing with the Senator that the word "surplus" might be properly inserted.

Mr. BURTON. If a regional bank has outstanding circulation based on bonds, must that circulation be increased or dimin-

ished with fluctuations in capital and surplus?

I think the Senator from Oklahoma answered that question last Saturday evening, but it might be well to have it clearly answered again. If a regional bank has outstanding circulation based on bonds, must that circulation be increased or dimin-

ished with fluctuations in capital and surplus?

Mr. OWEN. My answer to that would be that that is not contemplated by the bill; that the power was not given that these reserve banks might have the right of issuing their notes against the Government bonds, dollar for dollar, as in the case against the Government bonds, doing for doing, as in the case of national banks, but the amount of such bonds available is not over \$40,000,000 for all these banks, and even that amount is constantly being absorbed by new national banks coming into the system. The probability is that after this bill passes a sufficient number of national banks will immediately absorb for circulation purposes whatever outstanding bonds there may be available, so that these Federal reserve banks probably will not get any of those bonds.

Mr. BURTON. In other words, it is not intended to maintain any equality of relation—

Mr. OWEN. Between the capital and the notes.

Mr. BURTON. Between the capital of the bank and the amount of national-bank notes that it may issue based on United States bonds.

Mr. OWEN. No; that relation was not intended to be fixed

by this bill.

Mr. BURTON. It is to be entirely independent.

A rather more serious question arises in this connection. Is it contemplated that the banks issuing currency on the security of United States bonds shall redeem them in the same manner in which provision is made for the redemption of Federal reserve notes based upon commercial paper?

Mr. OWEN. No; they would be redeemed in the same man-

ner as national-bank notes.

Mr. BURTON. The system continues as is now the case with national banks?

Mr. OWEN. Precisely the same.

Mr. BURTON. And their redemption is to be just the same as now

Mr. OWEN. Yes.

Mr. BURTON. Mr. President, at some future time I may wish to make some remarks on that phase of the bill. Our currency is already of too motley a character.

Mr. OWEN. I will agree with the Senator very heartily that that is true, and I believe we ought to have a bill considered by Congress looking to the unification of the currency. But this bill not being intended for that purpose it did not interfere with the existing system, but merely recognized it as existing for the purpose and adapted itself to the present system. I agree with the Senator that there ought to be a unifica-

tion of our currency.

Mr. BURTON. I shall be glad to have an expression from the Senator from Oklahoma, the chairman of the committee, as to whether he believes in taking early steps for the withdrawal or abolition of this national bank-note currency.

Mr. OWEN. Mr. President, speaking for myself alone, and not intending that my answer should represent the views of any other person, I say, most emphatically, yes. I think that this bond-secured currency known as national bank note currency should be changed, and I should like to see it changed. We now have 7,500 of these banks. Each one has from 5 to 8 plates, making a total of some 30,000 different plates from which our national bank note currency is printed. That makes the number of these forms of money, using it in the ordinary colloquial sense, exceedingly numerous. Therefore it is easier

to counterfeit. It would be better to have a smaller number

of the plates. It would be much more economical.

Since the Government of the United States is compelled by law of March 14, 1900, to maintain at par with gold these notes, it is obvious that the Government charged with that responsibility might wisely adopt a plan which would unify the notes and make them more easily and economically handled by the

Mr. BURTON. Is there not another objection to that currency besides the complication involved, namely, the rigidity of the circulation and the unnatural basis which bonds so formed

constitute as a basis for circulating medium?

Mr. OWEN. I think the element of rigidity is a serious objection to the issuance of paper money, but this, of course, has become a permanent part of our circulation; and, as far as the volume is concerned, I think it could not be constricted without perhaps a serious contraction of credits, because credits are largely based upon these funds held as reserves in the State

Mr. BURTON. I am very much interested in the views of the Senator from Oklahoma on this subject, which I regard as very

I should like to ask him another question. Does he not think that under our present currency system, with the national-bank notes outstanding, at certain seasons of the year we have a

redundant or an unnecessary amount of currency?

Mr. OWEN. I think at seasons of the year we have currency that is redundant in a small degree, but at other periods of the year we have a serious scarcity of reserve money, and we have been compelled to permit the State banks of the country to operate with a very small amount of actual reserves. They do not have much over 7 per cent of actual money reserves, which is very small. In this system, which releases a portion of the reserve money now held by the central reserve banks and the reserve city banks, there would be released for issue under the terms of the bill a considerable amount of money, which would assist them to raise their actual reserves in cash to a higher figure, which, I think, the stability of the banking system requires.

Mr. BURTON. Does not the fact that frequently, in times of strain, when the so-called autumn drain is upon us, the demand for moving crops and the products of our industries assume a magnitude greater than at other seasons of the year, that that in itself proves that in some seasons of the year we have more

currency than we need?

Mr. OWEN. No; I do not think so, because I think that the amount of currency which we have fixes a standard to which the country adjusts itself. When the country reaches a point where the limit of the reserves is required by the banks to be held in reach, then the letting of credit must cease, and the country adjusts itself to whatever the condition is. It must adjust itself to the minimum there is. When the crops are in, as the Senator observes, there is a relaxation and a larger amount of currency than at other seasons.

Mr. BURTON. Is there not, however, a certain tendency toward injurious enterprises and overspeculation arising from

the use of that money in slack seasons of the year?

Mr. OWEN. I think that the method of holding our reserves. by which a large part of the country reserves, 9 per cent of their deposits out of the 15, may be held in reserve cities, and where the reserve cities may hold a part of the reserve required of them in central reserve cities, has a tendency to pyramid these surplus funds in the central reserve cities; and since they are compelled to earn interest it does lead, I think, to speculation in stocks and bonds almost unavoidably, because the banks in the central reserve cities are compelled to keep these funds where they can earn interest, and they are compelled also to keep them where they can get quick cash in case of a demand from their depositors.

Mr. BURTON. But without this reserve system would not the mere existence of a currency redundant at certain seasons of the year tend to promote speculation and injurious expan-

I think that these funds being held by the banks, who always anticipate and who know what the demand is going to be upon them very soon, they hold the funds available for the demand when it comes on in the due course of business. The high point is generally reached in the latter part of January and February. Then the money begins to flow out after the seasonal demands of the country, and reaches a low point along in the summer. Then when the crops are garnered, harvested, and marketed the accumulation of funds gradually takes place until the high point is reached again in the latter part of January.

Mr. BURTON. Of course, there are outside alternations and demands for currency, and for credit as well, in business activities

I maintain, and I think it is of very vital importance. that any currency system which does not provide with equal care for contraction as well as for expansion is fatally defective. There exists a prevalent opinion that every act either of legislation or of policy should look toward expansion, with the idea that plenty of money means prosperous times, the employment of labor, and favorable conditions; but it seems to me that that view entirely ignores the fundamental questions relating to the uses of currency-that is, that it should respond to demands made by the varying activities of trade. In different seasons of the year the amount of credit extended, the needs of trade, and consequently the demand for currency, differ very widely, so that you never will have a perfect system until we provide for proper contraction.

Mr. OWEN. Mr. President, I should like to say to the Senator that I very keenly appreciate the importance of contracting any expanding currency. Any inflation which means an undue and unrestrained enlargement of the currency, an enlargement beyond the needs of the country, an enlargement which leads of necessity to speculation, I think would be most injurious, and against such a method I should strongly protest. In this bill, however, we have undertaken to safeguard the currency known as the Federal reserve notes against undue inflation and to provide for its automatic contraction. Perhaps the Senator has not clearly in mind all the means by which we have endeavored to accomplish this, and if he will permit me, I would venture to

acquaint him with some of them.

Mr. BURTON. I shall be very glad to hear them. I called

attention to that matter the other day.

Mr. OWEN. In the first place, none of these Federal reserve notes could be emitted unless there was a commercial demand from individuals applying to a member bank for currency which they did not have. If they had abundant currency in the bank they would obtain the currency they need from the funds which the bank has. Ordinarily a citizen applies for credit rather than for currency. Ordinarily a citizen simply wants a credit in the bank upon which he can check to pay his bills and pay the demands upon him. But if he really needs currency he would go and apply to the bank for currency, to be used by him in passing the currency from hand to hand among those who pick cotton perhaps, or those who want currency and not banking credit. If the bank has exhausted its supply of ordinary currency, consisting of legal-tender notes, gold, gold certificates, silver certificates, fractional currency, and nationalbank notes, in such a contingency the citizen would then appeal to his bank to obtain additional currency from the Federal reserve bank. So the first check upon the inflation of these Federal reserve notes must be the commercial demand of the citizen who needs Federal reserve notes, because there is no available currency of the ordinary kinds which he might use.

That is the first check. The next check is that the member bank must apply to the Federal reserve bank for such notes.

The third check is that the Federal reserve bank must agree to supply such notes, because if the Federal reserve bank has in its vaults an abundance of the ordinary kinds of money it would furnish the ordinary kind of money and not go to the considerable expense of taking out Federal reserve notes against securities. That is a third substantial check.

The fourth check is the consent of the Federal reserve agent, who represents the United States Government, who represents the public interest, and who would realize that it would be an unwise thing to expand the currency when there was an abundance of currency which was available. So his consent must

be obtained.

Then the provisions of the law must be complied with requiring the Federal reserve banks to place with the Federal reserve agent, in his possession, commercial bills of a qualified class, having not exceeding 90 days to run; and as those notes fall due they must be paid in money, unless the Federal reserve bank again gives its approval and again takes other securities in lieu of those.

In addition to that, there is 331 per cent gold reserve required against these notes, which is another additional and important check, because obviously the amount of gold which would be available by the Federal reserve bank would measure absolutely the extent to which such notes could be emitted.

But there is another check beyond that. In addition to all these which I have enumerated, the demand of the individual citizen, the consent of the member bank, the approval of the Federal reserve bank, the approval of the Federal reserve agent, the putting up of these commercial bills, and the putting up of 33½ per cent in gold, the Federal reserve board has the authority to refuse to have these notes go out, even if the consent of all these parties has been obtained. But besides that, the Federal reserve board has an automatic method of control by fixing a rate of interest upon these notes as notes; and that may be fixed at whatever figure they see fit, in order to have the working of the plan automatic. It was thought wise to the working of the plan automatic. It was thought wise to leave the adjustment in the hands of the Federal reserve board when they should study the system and ascertain what would be a proper rate of interest to prevent any improper expansion.

In addition to that there is another safeguard, and that is the right of the Federal reserve board, and I may say the duty of the Federal reserve board, to determine the rate of interest which would be charged by the Federal reserve board upon loans extended by the Federal reserve bank, which would include these Federal reserve notes that might be loaned to member banks in case of a stringency for currency.

There is still another safeguard. It is the safeguard of a sound public opinion, because this country has long since determined upon the wisdom of stability in its commerce and finance. This legislation is in response to a direct demand of public sentiment in the United States requiring an end of financial panic and to the financial stringencies which have so sadly shaken our institutions of credit and so often resulted in the complete dislocation of our commercial, financial, and industrial affairs.

Mr. BURTON. Mr. President, I am greatly obliged to the Senator from Oklahoma for his statement, and I recognize that this measure contains many provisions based on sound principles

As I understand it, there is one other check—that these notes can not be paid out except by the bank on whose account they are issued, which seems to me quite as effective as any.

There are, however, two or three questions about the system that I regard as very doubtful, to say the least. One is whether the gold reserve is sufficient. Perhaps only experience can answer that, but it is below the average usually employed, and in this country that question is complicated by the very considerable amount of paper money now outstanding. So the problem is more serious with us than in other countries which have a unified paper currency or a smaller volume of it.

I do not believe very cordially in this idea of a tax on notes. What is the object of a tax on circulating notes of issue? Is it to provide revenue for the Government or is it to impose a certain check on inflation? If it is for revenue for the Government it is useless, because it takes out from the resources and funds of the banks a certain sum, equivalent to the amount of the tax, which diminishes the surplus paid to the Government by an exactly equal amount. If it is as a check on inflation there may be some benefits which will accrue, but that check can be secured in another way by reserve requirements. I believe there is a proposition pending under which a tax shall be imposed when the reserve falls below a certain figure.

Now, you have the discretionary power to impose a tax on circulating notes of issue. What is the inevitable result of The borrower pays that tax. Very likely he pays more than the amount of the tax, because the expense is passed on to him with an increased percentage. But if you have a tax on deficiency of reserves it gains all the benefit which could possibly be given by a tax on the notes. It provides a brake on undue expansion and in every way stimulates caution.

Mr. President-

The VICE PRESIDENT. Does the Senator from Ohio yield to the Senator from Oklahoma?

Mr. BURTON. Certainly.

OWEN. I wish to say to the Senator that we have provided both plans, the tax upon the reserve banks being left for the discretion of the Federal reserve board, because we thought it could exercise it more judiciously than it could be forecast in a concrete statute.

The method of the Imperial Bank of Germany, the Reichsbank, is to have a fixed 5 per cent tax on the Reichsbank notes, which are emitted against commercial bills. That has been intended to prevent the possibility of expanding those notes to excess. But, in addition to that, we have also adopted the plan, which the Senator approves, of providing that the Federal reserve board may fix a tax upon the reserves where they go below the required figure, the figure fixed by law. So they may use both

Mr. BURTON. It would seem to me that one method fixed by statutory law and universally adhered to would be better than to leave this to discretion. Here there is room for a wide variance of opinion. Emergencies may arise making it desirable that discretion should be used, so that regulations will be different at one time from another. But any uncertainty as to what the regulations shall be makes a certain amount of con-

fusion and makes it impossible to calculate perfectly just what may be done.

I desire to pass from that subject to another. The payment of deposits of failed banks is restricted to depositors in national banks. Will not this be alleged as a reason why State banks should not join?

I do not desire at this time, Mr. President, to argue the question of the desirability of any guarantee of banking deposits. I do not at all approve of that proposition. But is a plan of this kind fair and feasible which includes the guarantee merely of deposits of national banks and excludes State banks?

Mr. OWEN, Mr. President—
The PRESIDING OFFICER (Mr. Robinson in the chair). Does the Senator from Ohio yield to the Senator from Oklahoma?

Mr. BURTON. Certainly.
Mr. OWEN. In reality the banks would join this system, I take it, because it would give stability to the banking system.

This and protect them against stringency and against panic. This provision might be enlarged, as the Senator suggests, so as to embrace the member banks instead of national banks. I think it is a debatable point as to whether it would not be better to read "member banks" rather than "national banks." If left as it stands—"national banks"—it will probably have the effect of inducing some of the State banks to become national banks in order to have the benefit of this insurance fund. But I think it is a debatable question as to whether one or the other is the better. It was finally agreed upon as it stands, but with some division of opinion on the question.

Mr. BURTON. May I ask the Senator why he believes the

national bank should be included and not the State bank? What is the main reason?

Mr. OWEN. The reason would be to induce the State banks by this larger measure of security to become national banks.

Mr. SHAFROTH. May I interrupt the Senator?

Mr. BURTON. Certainly.
Mr. SHAFROTH. Then I might say, Mr. President, that in addition to that the United States Government has the inspection of national banks, and they would have a more thorough inspection, and it might be that they would regard national banks as solvent-

Mr. BURTON. It is not understood under this system that any State bank institution which comes in shall submit to the same regulation regarding examinations as national banks.

Mr. SHAFROTH. It can, however, accept State examination, if it desires.

Mr. OWEN. It is provided in the bill that State examinations may be accepted by the board, but I think the Senator has just ground to criticize the form of the bill in having this apply only to national banks. In my own personal judgment I should think it better to have it as a member bank.

Mr. BURTON. As for the statement that there is some distinction between the two as to who may accept the examination, it seems as though that would be an objection to the whole plan of admitting State banks. If you are going to bring them in here, they certainly should meet the same standard of sol-

vency that belongs to the national banks. It certainly would not do to give to one set of banks the advantages of this system, which it is expected will be so very beneficial. It would not be fair to compel one class of banks to submit to very searching examinations and force them to comply with certain rules relating to stability and solvency, and by the same law allow another class to come in and be exempt from those regulations.

Mr. OWEN. Mr. President-

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Oklahoma?

Mr. BURTON. Certainly.

Mr. OWEN. Another reason which I think affected this determination was that the State banks have some advantages over the national banks. They can do certain things which the national banks can not do. There are 18,000 of the State banks and only 7,500 of the national banks, and the larger number of the State banks appears to be due to their having some advantages over the national banks. It was therefore thought not undesirable to give the national banks some little advantage in this matter to offset the advantages which the State banks have which are going to be admitted into this system upon equal terms with the national banks.

Mr. BURTON. I would like to ask where the fund collected under this provision is to be deposited? A certain percentage of the profits of the regional banks is to be set apart for this purpose. It is to be hoped, of course, that months and years will elapse before there will be any draft upon it. In the meantime where is it intended that it shall be deposited?

Mr. OWEN. I take it, Mr. President, that the fund would be deposited, under the rules and regulations of the Secretary of the Treasury, in the subtreasuries of the United States until it is available.

Mr. BURTON. With the Secretary of the Treasury?

Mr. OWEN. Yes. Mr. BURTON. He might redeposit it.

Mr. OWEN. He might place it with the proper banks.

Mr. BURTON. With the regional banks?
Mr. OWEN. It is fully safeguarded in the vaults of the subtreasury of the United States for safekeeping until it is ready to be turned over.

Mr. BURTON. This is one of several instances in the bill where provision is made for the accumulation of funds, and yet nothing is said about what disposition shall be made of them. What would be the rule of precedence as to apportionment in case of the successive failure of several banks, in the event that the fund is insufficient? Suppose bank A fails in the month of January, bank B in the month of April, and bank C in the month of July, and in the process of liquidation the amount of losses to the depositors is first ascertained in the case of bank C, which failed last, or of bank B, which was the second to fail—what rule would be adopted under this provision as to the division of

Mr. OWEN. Is the Senator from Ohio making reference now to the depositors of member banks of some particular Federal reserve bank to ascertain how this insurance fund might be applied?

Mr. BURTON. Yes.

I should say that it would be naturally in the Mr. OWEN. order of time; but I remind the Senator from Ohio that the amount of losses to the depositors of national banks for the last 15 years has been a negligible quantity, and that the earning power of these banks, which should be from ten to fifteen million dollars a year at a very modest estimate, would be more than enough to meet any exigency that might by any possibility arise under this new system, which will be a more stable system than was the old system. Therefore we have no reason to apprehend any such losses as the Senator from Ohio seems to contemplate as possible.

Mr. BURTON. Mr. President, it is always well to look on the cheerful side; that is a general proposition; but when we are providing for contingencies which may transpire, it seems to me we should take into account all possible eventualities. In the years 1893 and 1895 a very large number of national banks failed. My recollection is that in the year 1893 the number was something over 200 and in 1895 somewhere between 100 and 200. It is, of course, our most earnest hope, and I should like to say our confidence, that so many failures will not again occur; but in a provision of this kind it will not do to entirely ignore the history of the past or the possibilities of the future. A season of serious depression might occur; a number of national banks might fail and the liabilities be very large. It does not seem to me that a provision of this kind is sufficient unless it provides for every possible or, at least, probable situation.

And here I should like to ask another question. Is it intended that this fund shall be a general fund for all regional banks, or is it to be a fund for the particular region in which it

is accumulated? Mr. OWEN. Mr. President, I understand that it relates only to each particular regional bank, each bank having its own par-

ticular fund. It is not a general fund.

Mr. BURTON. I think the general impression is that it was to be a general fund for all insolvent banks in whatever district

Mr. OWEN. That impression has not been justified by the language of the proposed act.

Mr. BURTON. The provisions are on pages 25 and 26 of the print of December 1.

Mr. OWEN. On page 20 it simply says:

For the benefit of depositors in failed national banks.

Mr. BURTON. Does not that include all national banks?

Mr. OWEN. I think it would refer to failed national banks which were members of the particular reserve bank which accumulated such a fund.

Mr. BURTON. I can hardly agree with the Senator from Oklahoma in regard to that. At least I do not think it is clear that such is its meaning. The provision is general; it reads:

And of the remaining one-half 50 per cent shall be paid to the United States—

Paid to the United States-

as a franchise tax, and 50 per cent shall be paid to the United States, as a trustee for the benefit of depositors in failed national banks.

Mr. OWEN. I will say, Mr. President, that I think it would be quite proper to insert the word "all," so as to leave no doubt about it.

Mr. DURTON. That is to make the accumulation from every district one fund.

Mr. OWEN. The Senator was explaining what the language was intended to mean when it was drafted, but I believe it would be better to have it as a common fund, because in that case it would perhaps serve in some instance where otherwise it might not be sufficiently large to take care of a failed bank.

Mr. BURTON. I think that would be better. Mr. OWEN. The interpretation put upon the language by the Senator from Ohio not being what I have thought it would be, I should prefer to adopt the interpretation of the Senator from Ohio, and to have the word "all" inserted, so as to relieve it of ambiguity.

Mr. BURTON. It would seem to me, Mr. President, that that is what it now means. It goes on to say:

The money to be kept in and losses from failures-

It does not say in any particular region-

to be paid from it as a depositors' insurance fund under a division of the Treasury—

Which, again, looks toward a general provision-

to be constituted and managed under such regulations as may be pre-scribed by the Secretary of the Treasury.

Mr. BRADY. I should like to ask the Senator on what page

of the bill is that language found?

Mr. BURTON. On page 26 of the print of December 1; the one which contains the House bill as a basis, with certain erasures and interlineations.

The next question relates to page 27, section 8, where this provision is found:

Sec. 8. Any bank incorporated by special law of any State or of the United States, or organized under the general laws of any State or of the United States, and having an unimpaired capital sufficient to entitle it to become a national banking association under the provisions of existing laws, may, by vote of the shareholders owning not less than 51 per cent of the capital stock of such bank or banking association, with the approval of the Comptroller of the Currency, and acting through a committee, organize a national banking association with any name approved by the said comptroller and transfer its business to such national banking association: Provided, however, That said acts are not in contravention of the State or local law.

What follows is not perhaps pertinent to the inquiry. is this proportion, which is now two-thirds, changed to 51 per cent? Is it with a view to inviting State banks and making it easier for them to come into this system than under the present law?

Mr. OWEN. The House bill as it was drawn contemplated that 51 per cent of the stock of a bank could determine its course of conduct, and the matter was put into the bill in that way so as to enable any bank that desired to transfer its business to do so, and to do it easily, with as little dislocation as possible.

Mr. BURTON. And to make the percentage of stockholders as required less, it is reduced from 663 to 51 per cent?

Mr. OWEN. It simply was to be neither more nor less, because I know of no fixed precedent upon this particular question. If the State law does not permit it, of course it would not be possible. It was only giving the consent of the United States, so far as the United States was concerned, that such persons might organize a national bank under the provisions of the section and transfer their business to such a bank if they saw fit, upon 51 per cent of the stock voting for it, if the State or local law did not forbid.

Mr. BURTON. Then do I understand that the Senator from Oklahom, concedes, as a principle of law, that a State bank could not become a national bank without the consent of the

Mr. OWEN. I think that, as a principle of law, a State bank could not become a national bank at all under the existing statute. It would be necessary to apply for a charter, and some-body would have to apply for it. That charter would have to be granted in the usual way. Ordinarily five persons join together and ask for a charter from the comptroller's office. After they have complied with certain requirements the charter is issued There is no provision which I know of that permits a State bank to become a national bank except in the way mentioned in the method of procedure.

Mr. BURTON. Does not this, however, contemplate the maintenance of the organization, the continuance of the same directors, and a transfer from one system to the other, with, as I say, maintaining the old organization as it was?

Mr. OWEN. It simply permits them to become members of the new bank if they see fit to do so. Fifty-one per cent of the stock can bring that about in any contingency, unless there

should be a State law against it; and that is provided for in the

Mr. BURTON. In line 22 of page 28 I find this language, reading it as it appeared in the House bill:

SEC. 9. That from and after the passage of this act any bank or banklug association or trust company incorporated by special law of any State, or organized under the general laws of any State or of the United States, may make application to the Federal reserve board hereinafter created for the right to subscribe to the stock of the Federal reserve bank organized or to be organized within the Federal reserve district where the applicant is located.

The preceding section, section 8, as it is in the proposed amended bill, points to a change of organization from a State bank to a National bank. Section 9 looks to the subscription to the stock of the regional bank by a State bank and such steps as shall make a State bank a member of the new system. Now, why are the words in the House bill "or banking association or trust company" stricken out of the amended bill?

Mr. OWEN. For the reason that in the definitions in section 1 the term "bank" is made to cover those institutions.

Mr. BURTON. It is not meant to exclude trust companies,

Not at all; it includes trust companies.

Mr. BURTON. Yes; I see that in lines 5, 6, 7, and 8, on

Mr. O'GORMAN. If the Senator from Ohio and the Senator from Oklahoma will pardon the interruption, in line 5, on the

Mr. BURTON. I recognize that.
Mr. O'GORMAN. It is provided:
Wherever the word "bank" is used in this act the word shall be held to include State bank, banking association, and trust company.

Mr. BURTON. I see that that makes it possible to strike out those words from section 9.

What is meant by the expression "organized under the laws of the United States"? To what institutions does that refer-

to those in the District of Columbia and the Territories? Mr. OWEN. Those in the District of Columbia were es-

pecially in mind, and also the banks that might be organized under the laws of the United States in Porto Rico or Hawaii, if there were such.

Mr. BURTON. It has no other significance, but is intended merely to include banks in portions of the country or its colonial possessions which are outside of State law and under the jurisdiction of the national law?

Mr. OWEN. That was the purpose of it.

Mr. BURTON. On page 28, lines 6 and 7, there is this proviso:

Provided, however, That said acts are not in contravention of the State or local law.

Why should this reservation appear in the preceding section and not in section 9? The preceding section pertains to a change in the form of organization from a State bank to a national bank, while this section, as I have already said, relates to membership by a State bank in this new system. Why is not a reservation of that kind equally as necessary in this section as in the preceding section?

Mr. OWEN. Mr. President, I will reply to the Senator that, in my judgment, it is not necessary in the preceding section.

Mr. BURTON. That is, it goes without saying?
Mr. OWEN. It is merely put in as a courteous observation.
In reality I do not think it is actually necessary, because no State bank having its charter under a State law could violate the law of its own being. It was thought well, however, to put it in to show that there was no purpose on the part of Congress to disregard the local State law, but merely to give its assent provided the State law permitted it to be done.

Mr. BURTON. The question may arise, though it is probably not of very great importance, particularly under that intimation

that it is not necessary, why, if it is inserted in one section, should it not be inserted in another?

A question of some considerable importance arises from the fact that the regional banks will presumably provide banking facilities for a number of States. Suppose a bank is organized in a district containing six or eight States, each with different usury laws, what usury laws will prevail; or is it the idea of this bill that the State usury laws shall not affect the rates which may be charged?

Mr. OWEN. I assume that the State usury laws would apply to the State banks.

Mr. BURTON. I am referring to the rates charged by regional banks.

The State usury laws would not apply to a Fed-

than the rates ordinarily contemplated by the usury laws that the possibility of conflict is hardly to be contemplated.

Mr. BURTON. Then the Senator from Oklahoma puts on

this provision of the bill the interpretation that the State usury laws do not apply and are not binding on any regional bank?

Mr. OWEN. I think they are not; they would not be under the decisions in the case of the national banks where State laws do not control the national banks. That is on the theory that if they did, the States could eliminate the national-bank system by imposing such restrictions as they saw fit.

Mr. BURTON. In the clause beginning in lines 21 and 22,

on page 30, occurs this language:

Such banks, and the officers, agents, and employees thereof-

What does that refer to-member banks or Federal reserve

Mr. OWEN. On what page is that?

Mr. BURTON. That is on page 30, and seems to refer to member banks, does it not?

Mr. OWEN. I can not hear what the Senator says.

Mr. BURTON. The bill provides:

Such banks, and the officers, agents, and employees thereof, shall also be subject to the provisions of and to the penalties prescribed by sections 5198, 5200, 5201, 5208, and 5209 of the Revised Statutes.

That refers to member banks, does it not?

Mr. OWEN. It does. It relates to the question of the extension of credit by a bank in excess of 10 per cent of its capital and surplus to an individual borrower, and also to other

statutes affecting prudent banking.

Mr. BURTON. Section 5198 of the Revised Statutes also applies to rates of interest. I read the first portion of that sec-

tion as follows:

SEC. 5198 (as amended 1875). The taking, receiving, reserving, or charging a rate of interest greater than is allowed by the preceding section, when knowingly done, shall be deemed a forfeiture of the entire interest which the note, bill, or other evidence of debt carries with it, or which has been agreed to be paid thereon.

Mr. OWEN. That imposes a usury law where there is none in a State, I take it.

Mr. BURTON. The preceding section, section 5197 of the Revised Statutes, makes this provision:

SEC. 5197. Any association-

That is, any national bank-

That is, any national bank—
may take, receive, reserve, and charge on any loan or discount made, or
upon any note, bill of exchange, or other evidences of debt, interest at
the rate allowed by the laws of the State, Territory, or District where
the bank is located, and no more, except that where by the laws of any
State a different rate is limited for banks of issue organized under
State laws, the rate so limited shall be allowed for associations organized or existing in any such State under this title. When no rate is
fixed by the laws of the State, or Territory, or District, the bank may
take, receive, reserve, or charge a rate not exceeding 7 per cent, and
such interest may be taken in advance, reckoning the days for which
the note, bill, or other evidence of debt has to run. And the purchase,
discount, or sale of a bona fide bill of exchange, payable at another
place than the place of such purchase, discount, or sale, at not more
than the current rate of exchange for sight drafts in addition to the
interest, shall not be considered as taking or receiving a greater rate
of interest.

That is, the law passed in 1864 makes the retreader of the

That is, the law passed in 1864 makes the rates charged by the national banks conform to the rates charged in the States. I take it for granted that, without some such provision as that, the Federal Government in establishing a banking system might exempt those institutions organized under the law from the usury laws of the States. But here we have this situation: By express provision each bank located in a State is subject to the usury laws of that State. Is there anything in this bill which makes the regional banks subject to the usury laws of the respective States in which they are located, and if a bank ministers to the wants of a number of States what rule would apply?

Mr. OWEN. This section provides for the imposition upon member banks of the penalties of section 5198, which is the penalty for taking unlawful interest. Section 5200 is a limitation on the liabilities which may be incurred for money borrowed by any one person or company. Section 5201 is directed against a national bank loaning on or purchasing its own stock. Section 5208 provides a penalty for falsely certifying checks. Section 5209 provides a penalty for embezzlement, abstraction, willful misapplication, false entries, and so on.

So that those provisions of the national banking act are made to apply to member banks for the solvency and the safety of

the Federal reserve system.

Mr. BURTON. That is true; and those are all salutary provisions. The limitation of the amount which may be loaned to one person I regard as one of the best features of the national-Mr. OWEN. The State usury laws would not apply to a Federal reserve bank. Of course, as a practical matter, the rates of interest charged by the reserve bank would be so much lower most necessary and desirable rule of banking. But the question which interests me here arises from this: What relation does this have to the rates of interest?

The member banks are brought under the terms of section 5108 of the Revised Statutes as to interest. That is a recogni-tion of the law as it now stands as regards member banks. Is there any regulation by this proposed bill of the rates which regional banks may charge?

Mr. OWEN. None, beside the fact that the board of directors are authorized to fix the rate of interest, and, under the supervision of the Federal reserve board, they could charge any rate. So far as the law is concerned they might charge 25 per

Mr. BURTON. So that the laws of the State apply to member banks, but do not apply to regional banks?

Yes; of course.

Mr. BURTON. I am frank to say, Mr. President, that I consider that a good provision, if that is the case. While ordinarily the rate of interest charged by the regional banks would probably be somewhat lower than the regular rate, in a time of stress it might be desirable to raise the rates beyond those authorized by the laws of the State. But how could the member banks in such a case derive any benefit from the system? In any event they would be subject to usuary laws.

Mr. OWEN. If there were undue inflation, the rate ought

to be raised.

Mr. BURTON. For instance, if a regional bank were located in a State where 6 per cent is the ordinary rate and 8 per cent is allowed, circumstances might arise where it would be desirable to charge not only 6 or 8 per cent but even 10 per cent.

Mr. OWEN. The Bank of England sometimes allows 10 per cent in order to attract gold to London. The regional reserve

banks ought to have the same power, and we have given it to

Mr. BURTON. On page 33 I note that the tenure of the respective members of the Federal reserve board has been changed from that provided in the House bill. What is the reason for this change? What arguments are advanced for making the term shorter?

Mr. OWEN. The reason was in order that one of them might retire each year. There being six of them, the term was fixed at six years, with an arrangement whereby one of them would

retire each year. Mr. BURTON. Mr. President, in that connection, I think the strongest arguments favor the longer tenure. The longer the tenure the more the appointee is withdrawn from political influence or from local or sectional affiliations and prejudices.

I think the great danger in this bill is found in the enormous power vested in the Federal reserve board. That danger arises from circumstances closely connected with our political ideals, by which those holding public office are expected in an undue degree to aid their party or to aid the locality from which they With reasonable limits, it seems to me, the longer the term the better.

Mr. OWEN rose.

Mr. BURTON. Does the Senator from Oklahoma desire that

I should yield?

Mr. OWEN. I would only say that I had myself preferred a longer term; but since the number was changed to six appointive officers, and it was desired to have one of them retire each year, it resulted in this form of bill.

Mr. BURTON. On page 37 provision is made for the statement not only of the money held as reserve, but also of the amount, nature, and maturities of the paper and other invest-

ments owned or held by Federal reserve banks.

I think it is a debatable question as to whether it is desirable report the maturities. I am fully aware of the popular opinion that prevails at this time in favor of giving the greatest degree of publicity to the action of corporations. I strongly share that sentiment. I believe in admitting the light. There has been too much concealment and secrecy in the past. Nevertheless, there is a limit to that; and I question very much whether it is desirable to enter upon the complication of reporting maturities.

We all recognize that in the banking business there are certain reports and impressions which cause alarm and destroy confidence. I query whether a report of the maturities of paper-which, by the way, are under strict legal regulation-

would not do more harm than good.

Mr. OWEN. Mr. President—

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Oklahoma?

Mr. BURTON. Certainly.

Mr. OWEN. The maturities, of course, are easily ascertainable, because the maturities of each particular day are within a leaf of a portfolio; and that all that would be necessary

would be to have a clerk with an adding machine run through the portfolio and make the statement. He could do that in an hour or two. Then it will show just how the maturities are running.

The Bank of France had a showing, not a great while ago, that the average maturity of its paper was 28 days, which showed that the assets were of a liquid and mobile character. The report as to the maturities is a matter of some interest. We have just had a report from the national banks of the United States as to the maturities of their paper, showing the amount of 30-day paper, the amount of 60-day paper, and the amount of 90-day paper. It is a very interesting exhibit, which was made with a view of explaining this bill, showing that they did have a very abundant amount of short-time paper which might be discounted if they should really require accommodation.

Mr. BURTON. Nevertheless, I question the desirability of making that report. I take it the statements would contain the average maturity. It would not go into detail as to the different classes, nor would it spacify the amount of 15-day paper, 20-day paper, and so on.

Mr. OWEN. It was only anticipated that it would show how much there was of a certain number of days.

Mr. BURTON. That is so much 15-day paper, and so on?

Mr. BURTON. That is, so much 15-day paper and so on? Mr. OWEN. So much 15-day paper, so much 30-day paper, so much 45-day paper, so much 60-day paper, in order that there might be a comprehensive understanding of just how liquid and how mobile their paper really was.

Mr. BURTON. What is the significance of the words "or held," inserted in the proposed Senate amendment in line 6, inserted in the proposed Senate amendment in line 6, page 37? The language is, "money held as reserve and the amount, nature, and maturities of the paper and other investments owned or held by Federal reserve banks." If it was

owned, how could it be other than held?

Mr. OWEN. They are made fiscal agents of the United States, and they would hold paper and perhaps other investments that might belong to the United States, or they might hold securities belonging to other Federal reserve banks, or they might hold securities belonging to member banks, without really owning them.

Mr. BURTON. Then it is intended that that should be inserted in the statement?

Mr. OWEN. Yes. Mr. BURTON. If they held merely as trustees, that would not affect their assets.

Mr. OWEN. is intended that they should make an exhibit as to the extent to which they are acting as trustees.

Mr. BURTON. As well as in regard to the assets which they actually own? Mr. OWEN. Yes

Mr. BURTON. Is Is the suspension of the reserve requirement to be made public?

Mr. OWEN. I should say that it ought to be made public by all means. There is no reason why it should not be made public.

Mr. BURTON. It would probably be made public, in any event, even if there were an attempt to conceal it.

Mr. OWEN. It would be impossible to conceal it if you should try to conceal it.

Mr. BURTON. On page 39, it seems to me the proposed amendment, Subdivision K, is altogether objectionable. I will read it. It is among the powers of the Federal reserve board-

To authorize member banks to use, as reserves, Federal reserve notes, or bank notes based on United States bonds, to the extent that said board may find necessary.

Mr. President, that is virtually putting up debts as reserves. Except for this amendment, the system of banks which has the regional bank at its head would be required to maintain gold or lawful money for reserves. Under this amendment Federal reserve notes, which are a debt, and which might be a debt of that district or region, affecting the standing not only of the regional bank but of every member bank, are allowed to be used by the member banks as reserves.

May I ask why this provision is included here?

Mr. OWEN. There is a very simple reason for it. On November 22, 1913, in Senate Report 133, Sixty-third Congress, first session, page 18, in a report made by the chairman of the committee, I pointed out to the Senate that after permitting the discount from the available reserves of the Federal reserve banks, including the discounts from United States funds, if the Federal reserve bank had as members of it all of the State banks, after allowing them to discount also from the bank up to the reasonable amount of one-half of their contributions in reserves, there still would be a total net deficit of \$239,000,000 of cash, because the national-bank notes can not be used as re-

serves, nor could these Federal reserve notes be used as reserves unless by permission. Since, however, these notes are secured in the most extraordinary manner, as explained by the Senator from New Hampshire [Mr. Hollis] a day or two

Mr. NELSON. Mr. President, will the Senator yield to me? Mr. OWEN. Just a moment. I was right in the middle of sentence and I should like to conclude it.

Mr. NELSON. I wanted to make one suggestion to the Senator from Oklahoma in this connection.

Mr. OWEN. Very well; I yield to the Senator.
Mr. NELSON. As I understand, the bill reported by the Senator from Oklahoma provides that these reserve notes, as well as national-bank notes, may be used as a part of the reserves. Is not that correct?

Mr. OWEN. The Senator from Ohio [Mr. Burton] was asking the Senator from Oklahoma the interpretation of that lan-

guage. I am trying to explain it now.

Mr. NELSON. Very well.

Mr. OWEN. The amount of the net deficit under the circumstances just described would be \$239,000,000. national-bank notes are secured by bonds of the United States as well as by the assets of the national bank which emits them, they stand with a better security than almost any other note in the world. For instance, take such a bank as the First National Bank of Cleveland, we will say, which might issue national-bank notes to the extent of its capital. Those notes would be secured for the full face of the notes by a like amount of United States bonds. In addition to that, the First National Bank is responsible for every one of the notes if the United States should default in any degree, and the assets of the bank probably would be ten times its capital. The double liability of its stockholders is also behind the notes.

There are no notes in the world better secured than nationalbank notes, and the United States was entirely justified on the 14th of March, 1900, in declaring that they should be kept by

the United States at par with gold.

The Federal reserve notes are even better secured than the national-bank notes, because the first line of securities behind the Federal reserve notes is the commercial bill of a citizen having sufficient credit to be able, upon that bill, to obtain the money from his member bank. The bill is due in not exceeding 90 days. Before the commercial bill can fail the man who made that bill, who was deemed worthy of credit by his member bank, and who received the money upon the bill, must fail. probability of his failing is only one in ten thousand.

Mr. NELSON. Mr. President— Mr. OWEN. I must ask to be excused until I conclude my

In the second place, the member bank which has furnished him the money must also fail within the 90 days. The probability of the member bank failing within the 90 days-a bank which has been examined by the comptroller's office and found sound and solvent, a bank whose reports are in the hands of the Federal reserve bank for daily examination—is not one in twenty-five thousand. The probability of the individual citizen so trusted by the member bank and the bank itself failing within 90 days is as 10,000 multiplied by 25,000, which would make substantially one chance out of two hundred and fifty

If that one chance out of two hundred and fifty millions should happen, there are a number of safeguards against that remote contingency:

First. The amount of stock which the member bank has in the Federal reserve bank.

Second. The amount of reserve which the member bank has in the Federal reserve bank.

Third. The double liability of the stockholders of the member

Fourth. Of the assets of the member bank.

In addition to that, there is 331 per cent of gold on deposit as security against such Federal reserve notes. In addition to that, such Federal reserve notes have a lien upon the entire assets of the Federal reserve bank, upon its surplus earnings, and upon its gold reserve. In addition to that, it has also a claim against the double liability of the various member banks, averaging 2,000 banks to each of the Federal reserve banks, and also a further claim against the double liability of the stockholders of the member banks-all to cover this remote contingency of one out of two hundred and fifty millions.

There never were, in the history of the world, notes which had the same high character as these notes, or which were so safeguarded. Therefore the authority given to the Federal reserve board to use the Federal reserve notes as reserves if it

be found necessary to furnish reserve money in addition to what we have under the operations of this act is entirely justified. Indeed, it is more than justified. It is made absolutely necessary. You have got to have the reserve money required under this act, and there is not enough reserve money otherwise. I have shown by the figures given in the report to the Senate, on page 18, that if all the banks came in and complied with the requirement of reserves which we impose there would be an obvious deficit of \$239,000,000.

I hope the Senator will excuse me for making so long an answer, but it was necessary in order to explain fully and com-

pletely the justification for provision (k).

Mr. BURTON. I hope to examine that statement carefully, and then perhaps I shall have something more to say on this

subject.

Reserves, however, are not debts of the institution maintaining them. They are, or at least should be, money. The general requirement in European banks is that gold shall be the reserve. In our own country we have very carefully restricted the maintenance of reserves to lawful money, gold, gold certificates, silver certificates, and greenbacks. With equal care we have ex-cluded the national-bank notes from reserves. There is no other way in which they can serve their purpose, namely, that of maintaining security. The moment you allow something to be used as reserve which possesses the element of a debt-the debt of the organization that issues it-instead of obtaining security vou create danger.

Take the very case of the First National Bank of Cleveland, which was used as an illustration. Suppose it issued a million dollars of national-bank notes. Those national-bank notes are secured by a million dollars in United States bonds. may be true in regard to the security afforded by the bonds, that is a debt of the bank. It must maintain a redemption fund and it must redeem the notes if they are presented at its counter. This is departing from the rule which now prevails not only by our law but everywhere, under which actual assets in the way of money that is gold or its equivalent are to be used and are the only form of money that can be used for reserve, and permitting a debt of the bank itself to be used for

that purpose.

This appeals to me as contrary to every principle of banking. It is destructive of the security which should exist. If a contingency arises in which there is going to be a deficiency of reserves, it shows that the amount of credit which can be extended should be pared down to what can be provided by the reserves actually in existence.

If the amount of reserve required against deposits is greater than that which now exists, it is no reason why we should bring in tokens or debts as reserves; but it is a reason why we should contract our obligations to that extent. It seems to me this introduces an absolutely novel idea, and one which is fraught with danger.

Mr. OWEN. I will remind the Senator that every State bank

in Ohio is using national-bank notes as reserves

Mr. BURTON. Very well; that shows the dependence of the State banks upon the national banks. I am perfectly well aware of that fact. Suppose, however, a change arises under which the quantity of lawful money, gold or that which can be readily transformed into gold, which is not a debt of the national banks, is diminished; then as our basis we ought to contract our structure of credit as well.

Mr. OWEN. Under the theory of the Senator from Ohio he would have the State banks in Ohio contract their credits, and not use the national-bank notes as reserves.

Mr. BURTON. Not at all.

Mr. OWEN. I think that would be a very injurious thing. Mr. BURTON. Not at all. The national-bank notes are n Mr. BURTON. Not at all. The national-bank notes are not the obligation of the State banks. They can go through the process of having them exchanged for lawful money and then for gold. On the other hand, in the national banking system they are an obligation of the national bank.

Mr. OWEN. The same thing is true in regard to the Federal reserve notes, because they are convertible into gold. They are on a par with gold. Under the act of March 14, 1900, the United States is under obligation to keep them on a par with gold; and the Federal reserve bank notes are not the obligations of the Federal reserve banks.

Mr. BURTON. But the difference is absolutely vital. one is the obligation of the Government, based upon an outside obligation. The Federal reserve notes are, it is true, in form-and I do not believe in that-the obligation of the Government; but the amount is issued to each regional bank, and is, in its essence, an obligation of the regional bank.

Mr. OWEN. No, Mr. President, I do not concede that it is the obligation of the regional bank. It is the obligation of the United States.

Mr. BURTON. Which it ought not to be.

Mr. OWEN. That may be.

Mr. BURTON. In its essential nature it is the obligation of the regional bank.

But by this act the notes are made the obliga-Mr. OWEN.

tions of the United States, and intentionally so.

Mr. BURTON. But the United States in the most careful manner provides that there shall be provided by the regional banks the means to redeem every Federal reserve note.

Mr. OWEN. Quite right.

Mr. BURTON. It compels the maintenance of a reserve in gold. It compels the deposit of 100 per cent in commercial paper. Are these regional-bank notes the same as the greenbacks? No; not by any means.
Mr. OWEN. They are better.

Mr. BURTON. That is not important to the question I am The greenbacks are the direct obligation of the

So are these Federal reserve notes.

Mr. BURTON. Ah, yes; but in the one case the final liability rests with the Government; in the other case it is only the

intermediate liability, a species of guaranty.

Take the \$20 greenback as an illustration. That is the obligation of the United States. If you want to have it redeemed you must take it to the Treasury, and the \$20 in gold is paid out. The Government then has the note, redeemed-a note which, it is true, may be reissued. Take a \$20 Federal reserve note to the Treasury. It is redeemed, and immediately the Government calls on the regional bank which issued it to make good the amount. In the one case the transaction is completed when the note is presented to the Treasury; in the other case, that of the Federal reserve note, the transaction has only just begun.

Mr. SHAFROTH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Colorado?

Mr. BURTON. Certainly.
Mr. SHAFROTH. Does the Senator object to the Federal reserve notes being held as reserves by the national banks?

Mr. BURTON. I do, most decidedly. It seems to me a very

dangerous principle.

Mr. SHAFROTH. It is not the same bank, you know. The argument upon which the Senator has been laying considerable stress with relation to the national-bank notes being held was on the ground that they were their own notes.

Mr. BURTON. Yes.

Mr. SHAFROTH. But notes of the Federal reserve bank are

not notes of the national banks.

Mr. BURTON. But they are part of a system. Suppose you have a regional bank, and that regional bank applies to the Government for the issuance of ten millions of reserve notes. Those ten millions of reserve notes are based upon the obligations of bank No. I, bank No. 2, bank No. 3, bank No. 4, and so on all through the system. When they are presented to the Treasury for redemption, that region, through its regional banks, by virtue of the resources of the member banks, must redeem every dollar of those notes.

Would the Senator invite the State banks Mr. SHAFROTH. into a system and not provide the reserve money by which they

can come into the system?

Mr. BURTON. I would invite them into the system, but I would say to them: "There may be as much of reserves as there is sound money here. We will not change the law under which, for years, money has been the basis of reserves, and now, by some jugglery, make debts the basis of reserves."

What is the difference in a case of this kind? Suppose a man borrows \$10,000 on a mortgage. He has his farm as the security for the mortgage. According to this plan, he could take the note on which he has borrowed the \$10,000 to the bank and say that the note and mortgage must be the basis for further credit. It is exactly the same principle.

Mr. SHAFROTH. The Senator surely can not think that any of these Federal reserve notes are not sound.

Mr. BURTON. Oh, I presume they are sound. I presume if I gave my note to the Senator from Colorado it would be paid; but that is not the question. Can I use that note as a basis for further credit after I have given it? That is what you are seeking to do here. You are saying we are compelled to go beyond our ordinary resources; we are compelled to use notes; we are in debt to the amount of those Federal reserve notes; but at the same time and in the same breath the Federal reserve board can make those very notes the basis for the credit

of the banks in the form of reserves. You are forming the basis for tremendous inflation. That is where the danger lies, not

in the question of the soundness of the notes.

Mr. SHAFROTH. I do not see any objection to it if, as a matter of fact, the reserve will be found. We have a system of State banks, and they have been holding these national-bank notes for reserves. If we invite them into this system, there will be no money to take its place. Is it possible that that is fair or right when it has been demonstrated by the Senator from Oklahoma in his address in chief that there is not a chance in a billion that there can be a loss to the Government by reason of any mishap which might occur, either to the paper of the banks or the Federal reserve bank which would affect these notes?

Mr. BURTON. If you have to repress your credits because of deficiency of reserves, you ought to do it, and not create an

artificial basis where you ought to have money.

Mr. SHAFROTH. If the law had been that nothing but gold could be used as reserves, then you would probably decrease the amount of the credits in the United States below 50 per cent. According to that kind of a system, you ought to fix reserves of stable money, of good money, which it seems to me would not likely affect the entire credit of the United States.

Mr. BURTON. The entire credit of the United States is just that which can be safely extended on a sound basis. If you change the laws which have existed and worked well for 50 or 60 years, and provide that hereafter not only gold and lawful money may be used as reserves in the national banking system but also pile on notes issued by the new system based upon the debts of that system, you are making a most vicious addition which is bound to lead to inflation, to overexpansion, and to danger. I do not care how safe the notes are, it is not a

correct principle.

I regard this, Mr. President, as one of the most objectionable features of the bill in the form in which it now appears. It is

contrary to every rule of sound banking.

Mr. OWEN. Would the Senator have the State banks not

permitted to use the national-bank notes as reserves?

Mr. BURTON. I would not necessarily, because they are an entirely separate organization. The national-bank notes are not

their obligation. They are entirely outside of the national banking system.

Mr. OWEN. They are debts.

Mr. BURTON. It is true they are debts, but they are assets upon which they can obtain gold any time they apply for it.

Mr. OWEN. That applies with equal force as to Federal reserve notes.

Mr. BURTON. Suppose one man owes a debt and another man holds that debt; there is some difference between the two, is there not?

Mr. OWEN. There is no difference whatever between the national-bank note and a Federal reserve bank note when gold

can be obtained upon either one.

Mr. BURTON. But that creates a credit on your gold supply, and the national reserve note—I have stated it already with repetition-is a debt, an obligation of the system of regional banks, while every greenback, every dollar in gold, every gold certificate, is lawful money.

Mr. OWEN. The Senator has not strengthened his position by making the statement, because he confesses that a nationalbank note, although a debt, is convertible into gold. He confesses that a Federal reserve note, although a debt of the United States is convertible into gold. Therefore the argument which obtains with regard to the national-bank note, which he says is permissible as a reserve for the State bank, applies with equal force to a Federal reserve note, which may likewise be held as

a reserve for a State bank.

Mr. BURTON. But I do not admit that the principle is correct that allows national-bank notes to be held as reserve. Here is a State bank that holds a national-bank note. It is outside of the national banking system. It can call on the bank in that system to redeem that note and get gold on it. That is the only reason State banks can hold national-bank notes as reserve; but even so, I repeat, it is wrong in principle. Thus far and in that particular the State bank is the creditor. The moment you get into the national banking system the bank that issues that note is a debtor. Now, you are proposing to put the two on the same footing and say that debtor and creditor alike may use those notes as reserve.

In regard to the possible deficiency of national-bank notes and other reserve money for State banks, while I have not examined the statement, I presume that is based on the idea that all the

State banks will go into the system. Is not that so?

Mr. OWEN. I think that nearly all of them will. I hope to see that done. But the Senator does not reach the real point of

the proposal, that the national-bank note being convertible on demand and the Federal reserve note being convertible into gold on demand, it ought to be just as good as gold for reserve

Mr. BURTON. It seems to me the Senator from Oklahoma absolutely ignores the vital difference, which is as plain as any matter can be. The fact that you can transmute this into gold by putting it from one pocket into the other does not place it on the same footing with another bill or obligation which is due from some outside agency. Here is the gold. That is valid as reserve. So is a bill which is exchangeable for gold from the vaults of the Government. If a bank holds either the gold or the greenback, it can obtain the gold from the Government. But here you give to these banks a right to obtain circulating notes which are their own obligations, their own debt. They must maintain 331 per cent reserve against them. They must redeem them in gold or lawful money if they are presented. In one case you have a perfectly valid obligation of the Government, the gold, or an obligation which can be transferred into In the other case you have your own notes, your own debts, that you must ultimately pay yourself.

Mr. OWEN. The Senator ignores the fact that in the case of the national-bank notes the bank has the obligation of the United States dollar for dollar for every one of its notes outstanding. It has the United States bonds to secure that note. But, more than that, as far as the Federal reserve note is concerned, the United States holds in its hands the securities and the gold of the Federal reserve bank as a security for that note of the United States, which the United States is bound to keep at par with gold, and which it has loaned to that bank in ex-

change for the securities and the gold of that bank.

The Senator continually reiterates that it is the obligation of the bank, and if he does that, of course no argument will prevail.

Mr. BURTON. May I ask the Senator from Oklahoma, who says that one class of notes depends on a bond of the United States and another, the Federal reserve notes, on commercial paper or securities, would the Senator from Oklahoma favor allowing the bonds of the United States to be used as reserve money?

Mr. OWEN. That is not the question.

Mr. BURTON. I think it is more than the question. If you are going to take these notes which are good only because they are secured by bonds, then why not take the bonds as reserves in the first instance?

Mr. OWEN. The value of a note of the United States as reserve consists in its character as liquid money, able to be used as a money, while a bond would have to be marketed and converted into money. Therefore, it would not be convenient for the purpose of reserves, but in so far as the value is concerned the bonds of the United States might be properly held as reserves. The Bank of England holds as a part of its note issue the Government securities. The Bank of France as a basis of its securities issues the notes, which is a Government security. The Bank of Germany does the same thing. In so far as these securities are quickly convertible into money, it is a good form in which to hold reserves, because the only purpose of the re-serve is to be able to pay the depositor when he calls for his money in something which will serve the purpose of money.

Mr. BURTON. The circulation of the Bank of England on Government stock rests on an entirely different basis. As I said the other day, the amount of £14,000,000 and more was fixed as a minimum circulation under any and all circumstances, a circulation that would be outstanding all the while in the pockets of the people. The circulation of the Imperial Bank of Germany—the contingent fund, as it is called—is based on the same theory, namely, that a certain amount will be required and will not be presented in any embarrassing degree for re-

Mr. OWEN. But, Mr. President, the national-bank notes are in the pockets of the people, except \$40,000,000 in the hands of the national banks and \$60,000,000 in the hands of the State banks and \$45,000,000 in transfer to the Treasury for redemption. Only about \$150,000,000 of those notes are in sight anywhere: The balance of the \$750,000,000, or \$600,000,000, of those notes are in the pockets of the people, now being used as a circulating medium. So, with the \$150,000,000 of these nationalbank notes available and in sight, there are \$750,000,000 bonds of the United States in the hands of the comptroller as security, and the assets of the national banking system in effect of about \$10,000,000,000 as a further security, if there was any further security necessary for this \$150,000,000 of bonds.

Mr. BURTON. We can not, however, get away from the real nature of reserves. A reserve here and everywhere should be something that is of intrinsic value, not merely liquid assets-

not assets that can be changed into money, but something that is money now and is free from any obligation of the bank that holds it.

Even with this somewhat extended discussion I am unwilling to allow this paragraph to pass, and I trust it will come up again in the Senate

Mr. BRANDEGEE. Will the Senator permit me to ask a question there?

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Connecticut?

Mr. BURTON. Certainly.

Mr. BRANDEGEE. The Senator from Oklahoma states that these Federal reserve notes are redeemable at the Treasury in gold. The bill provides that they shall be redeemed in gold on demand at the Treasury or in gold or lawful money at a Federal reserve bank. So they are not necessarily redeemable in gold.

Mr. BURTON. The very place to present it is at one of the regional banks or at any of the regional banks.

Mr. SHAFROTH. That is exactly the process of the nationalbank notes now. They are not redeemable in gold at banks. They are redeemable as lawful money at the Treasury and then as lawful money are redeemable in gold at the Treasury. But the provision for the redemption of national-bank notes is even less favorable than the provisions which we have put in

Mr. BURTON. Then according to the theory of the Senator from Colorado, the law has been erroneous in all these past years in that national banks have not been allowed to use

national-bank notes as reserves? Is not that so?

Mr. SHAFROTH. Not necessarily. There is not plenty of reserve money. We know there is a shortage even for national-bank notes. We know there comes in for redemption at the National Treasury every year \$600,000,000 of national-bank notes. Why? For the purpose of obtaining money that can act as reserves lawful money. That is the object of it. The national-bank notes can not act as reserves for money, and it must be proper for the National Government to provide in some way, so that there can be an adequate reserve money. That is just what we have done in this instance. It is not done by force. This is not to be done except in the discretion of the Federal reserve board. Their hindsight is a great deal better than our foresight, in my judgment.

Mr. BURTON. There have been frequent occasions in many nations, indeed, in almost all, when it was thought there was a scarcity of money and wiseacres have set out to supply the amount, perhaps by putting the printing press at work. some security-oftentimes, apparently, very ample security-has been offered, as in the case of the assignats in France. But those experiments have always resulted badly. It has appeared that the only way in which to make a further issuance of money safe was to increase your capital, was to keep good all the while the money you had and, if possible, make it more efficient.

That is the only way.

Now, here we have this proposition just like the old plans which led to depreciated currency. We do not have reserves. Let us see the magician's wand. Let us transmute debts into reserves. The policy of the past has been wrong. We need more money. We will not rely on gold; we will not rely on paper that is redeemable in gold; but we will make a kind of paper of our own regional banks, for which we promise to pay gold ourselves, to enlarge our reserves and everybody can bor-

Mr. President, I do not see anything in this provision except possible disaster and a violation of every principle of finance.

I have some other questions, but I am inclined to yield the floor at this time, perhaps resuming later.

There is one question, however, that I should like to ask. Mr. BRANDEGEE. Will the Senator cite me the page and

line where that language appears?

Mr. BURTON. In the print of December 1, 1913, page 39, lines 17 to 19. It was not in the House bill. It is an amendment and appears, possibly, in the first bill as presented by the portion of the committee headed by the chairman. I should like to ask a question of the Senator from Colorado [Mr. Shaf-ROTH] or my colleague, the Senator from Ohio [Mr. POMERENE]. who is also present.

(1) To grant by special permit to national banks applying therefor, when not in contravention of State law, the right to act as trustee, executor, administrator, or registrar of stocks and bonds under such rules and regulations as the said board may prescribe.

This question of allowing national banks to act as trustees has been up a number of times before the committees of Congress. I am frank to say it seems to me a right the granting of which would be of doubtful expediency for this reason:

With our minute subdivisions of labor there results a subdivision of capacity; and the work of trustee, the business of a trust company, differs quite materially from that of the ordinary commercial bank. The tendency would be to gather in a bank men who were far more competent for one branch of the business than for the other. Commercial discounts might be neglected and a great deal more care given to the trust department, under which naturally the commercial discount business would suffer.

I recognize, though, that in a number of country banks the amount of trust business is growing, and yet there is not sufficient to form and maintain a trust company, and that there are perhaps arguments for throwing the door wide open and allowing the national banks to act as trustees. But why should this, which is virtually legislative authority, be left to the Federal reserve board? Why not make a general provision or else omit it entirely?

Mr. SHAFROTH. I will state to the Senator that in the hearings that we had before the Banking and Currency Committee the representatives of a great many of the national banks insisted that they should have certain rights with respect to the administration of trust, bank procedure, and the question arose as to the fact whether if we gave them any such power they would not dissolve as national banks and reincorporate as trust companies under the laws of the State.

There are arguments on both sides of the question, as the Senator has said, and yet in the judgment of those who heard the various sides of it it was thought best to put it as the provision is here.

There is no doubt that there is some objection to it, and there is no doubt that there are some very strong arguments in favor There are, no doubt, some very strong arguments for giving the right absolutely without regard to the Federal re-But we felt that under the circumstances it would keep the national banks in and would not impair their ability to do business and would be best subserved by the provision we incorporated.

Mr. BURTON. There is the still further question, Why should this be left discretionary with any board? Why should there not be a general provision; or, if it is necessary to make distinctions according to size and locality, why not incorporate them? This makes it possible for the board to say to one bank, "We will not allow you to so act," and then, in the exercise of favoritism, to say to another, "We will grant your request."

Mr. SHAFROTH. No; I do not think the Federal reserve board is going to attempt to do anything with relation to individual cases. It will have grantly adverse the statement of the statement of

It will have general rules with relation to it. vidual cases. We thought that it would be considered a dangerous proposition to do so and that the Federal reserve bank would find it out. In that event, by a general rule, it would probably be able to correct an evil of which it would have special knowledge. We felt it was better to do it that way.

As we all know, many of these things which are absolutely new may not be a success. There may be failures, and the arguments which were presented on the one side and which were turned down may be the true arguments; and yet experience is the only thing that will demonstrate it.

Mr. BURTON. I will not proceed further with this line of question at present. I feel amply justified in consuming the time that has been occupied, because I think some provisions of the bill have been made very much clearer to the Senate than they were before we entered on this line of inquiry.

Mr. BRISTOW. Mr. President, I understand the pending amendment has been debated about as fully as any Senator desires to debate it, and I know of no one who wants to discuss it Since there is a very slim attendance of the Senate at this time, and there should be as full an attendance as possible when the vote is taken-

Mr. BURTON. What is the pending amendment?

Mr. BRISTOW. The Hitchcock amendment to section two. The Senator from Ohio has just suggested that he may want to discuss it a little more. I rose for the purpose of suggesting the absence of a quorum.

Mr. BURTON. The Senator had better wait— Mr. BRISTOW. With a view of getting a full Senate when the vote is taken-

Mr. CLAPP. I suggest to the Senator from Kansas whether it is not just as essential to have a full membership of the

Senate present when discussing the measure preliminary to voting as when the vote is taken.

Mr. BRISTOW. I think that is true, but we have made many futile efforts to obtain a quorum of the Senate while the debate was going on. That being the case, I was going to try the virtue of calling for a quorum when the vote was to be

taken to see if we can get a quorum when the votes are to

Mr. CLAPP. The Senator would not want to practice any deception by calling for a quorum with a view of a vote, when, in fact, a vote is not to be taken?

Mr. BRISTOW. I have understood that there are a number of Senators who want to be present when the vote is taken. The Senate Office Building is so far away from the Chamber that after the bell rings for a vote some Senators may not be able to get here before the roll call has been completed. So I think when there are but few in the Senate, before any vote is taken on an important amendment, a quorum should be called in order that Senators who may be otherwise engaged may get here in time to cast their votes.

Mr. CLAPP. I quite agree with the Senator that there ought to be a fairly full attendance when we vote, anyhow.

Mr. OWEN. Mr. President-

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Oklahoma?

Mr. BRISTOW. I do.

Mr. OWEN. I agree with the Senator from Kansas that it would be well enough to have Senators present as far as pos-sible, and in view of his action, which I suppose contemplates making a point of no querum, I should like simply to make my motion now to lay the pending amendment on the table.

Mr. BRISTOW. I wish the Senator would not put his motions in that way. I would prefer, so far as I am concerned, to vote on these questions as amendments, and not on a motion to lay on the table. I would rather a vote would be had on the question to adopt rather than a motion to lay on the table. Of course, a motion to lay on the table forces an immediate vote; I recognize that; but if we are ready to vote we can take the vote just as easily on the merits of the amendment.

Mr. OWEN. I was only making the motion because I thought the Senator said the debate had ended on the matter.

Mr. BRISTOW. My understanding is that it has ended. Mr. BURTON. I shall only desire to be heard very briefly. Mr. BRISTOW. If the debate has ended, the Senator accom-

plishes the same purpose when he gets a vote on the amendment, and it comes direct on the proposition, which is a little more agreeable so far as our vote is concerned—that is, so far as mine is concerned. I do not want to assume to speak for other Senators.

The PRESIDING OFFICER. Does the Senator from Oklahoma renew his motion to lay on the table?

Mr. OWEN. I renew my motion to lay the amendment on the table.

Mr. BRANDEGEE. On that I ask for the yeas and nays. Mr. HITCHCOCK and Mr. NELSON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hitchcock	Norris	Smith, Ga.
Borah	Hollis	O'Gorman	Smith, Mich.
Brady	Hughes	Oliver	Smith, S. C.
Brandegee	James	Overman	Smoot
Bristow	Johnson	Owen	Stephenson
Bryan	Jones	Page	Sterling
Burton	Kern	Perkins	Stone
Chamberlain	La Follette	Poindexter	Sutherland
Chilton	Lane	Pomerene	Swanson
Clapp	Lea	Ransdell	Thomas
Clark, Wyo.	Lewis	Reed	Townsend
Crawford	Lippitt	Shafroth	Vardaman
Cummins	McCumber	Sheppard	Warren
Dillingham	McLean	Sherman	Weeks
du Pont	Martin, Va.	Shields	Williams
Gallinger	Martine, N. J.	Shively	
Gronna	Nelson	Simmons	

Mr. WEEKS. I wish to state that my colleague [Mr. Lodge] is absent on account of illness, and to have that statement stand for the day

The VICE PRESIDENT. Sixty-six Senators have answered

to the roll call. A quorum is present.

Mr. NELSON. Mr. President, a motion has been made to lay the amendment on the table, and I ask that the amendment be now read.

The VICE PRESIDENT. The Secretary will state the amend-

The Secretary. It is proposed to strike out all of section 2 as it appears in the House print and to insert in lieu thereof the following:

SEC. 2. That the Federal reserve board, hereinafter provided for, shall, as soon as practicable after their appointment and confirmation, designate from among the reserve and central reserve cities now established a number of such cities to be termed Federal reserve cities, and shall divide the continental United States into districts, each district to embrace one of such Federal reserve cities: Provided, That the district shall be formed with due regard to the convenience and customary course of financial and commercial business in each district, and need

not necessarily coincide with State or county boundaries. The districts thus established shall be known as Federal reserve districts, and each of them shall be designated by the name of the Federal reserve city located therein. The Federal reserve board shall, as soon as practicable after the said districts have been established, proceed to organize, conformable to the provisions of this act, in each Federal reserve city designated as aforesaid, a Federal reserve bank, which shall be known by the name of the city in which it is established, as, for example, "Federal Reserve Bank of Chicago," Four Federal reserve cities, and appurtenant to them four Federal reserve districts, and no more, shall in the first instance be designated and established as such by the Federal reserve board: Provided, That after Federal reserve banks have been organized and in operation for a period of two years in said four Federal reserve cities, the Federal reserve board may, in its discretion, from time to time, designate not to exceed in all eight additional Federal reserve cities, with the requisite Federal reserve districts appurtenant thereto, and for that purpose may alter and change the limits and areas of existing Federal reserve districts. There shall be allotted to every national bank within a Federal reserve district, of the capital stock of the fully padd-up capital stock and surplus of such national bank, which stock so allotted shall be underwritten by said bank and for a period 60 days after allotment be offered for subscription at par to the public at large, but no more than 100 shares shall be allowed to be subscribed for or held by any person, firm, or corporation, and all of the allotted stock not subscribed for and taken by the public shall immediately be subscribed for and taken by the public shall immediately be subscribed for and taken by the national bank to which the same was in the first instance allotted. The preparation, allotted the smaller subscriptions, the mational banks shall, in the first instance, ac

Mr. GRONNA. I ask the Senator from Oklahoma [Mr. OWEN] to withdraw his motion to lay the amendment on the table until I have an opportunity to offer my amendment to the amendment. I made a suggestion the other day to the Senator from Nebraska [Mr. HITCHCOCK] that I had an amendment to offer to his amendment. On page 6, line 7, after the word "for," I desire to insert the word "owned."

Mr. OWEN. Mr. President, I will gladly withhold my motion until the Senator from North Dakota offers his amendment to

the amendment.

Mr. President, I wish to say that I believe it Mr. GRONNA. is very important to make it as clear as possible that no more than 100 shares, or \$10,000 worth of this stock, shall be held by any one person, firm, or corporation. I believe that under the language of the amendment as offered by the Senator from Nebraska it is possible for one person, firm, or corporation to own more than 100 shares. For that reason I offer this amendment. After the word "for," on line 7, page 6, of the Hitchcock amendment I move to insert the word "owned," so as to read:

But no more than 100 shares shall be allowed to be subscribed for, owned, or held by any person, firm, or corporation, etc.

Mr. HITCHCOCK. Mr. President, as I have heretofore stated, if there be no objection, I shall gladly accept the amendment offered to the amendment by the Senator from North Dakota.

Mr. BURTON. How does that change the meaning? As it is now it reads "subscribed for or held." What can be the mean-ing of "held" under those circumstances, except owned by one person?

Mr. GRONNA. I think it is possible to hold stock and not own it, and I believe it is possible to own stock and not hold it. Mr. BURTON. I do not see that there is any objection to

that, but at the same time I do not see any great purpose to be served by that amendment to the amendment.

Mr. OWEN. I move that the amendment proposed by the Senator from Nebraska be laid on the table.

Mr. BRANDEGEE. On that motion I have already demanded the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BANKHEAD (when his name was called). I have a pair with the Senator from West Virginia [Mr. Goff]. If he were present, I should vote "yea."

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. JACK-

son]. In his absence, I withhold my vote.

Mr. SHEPPARD (when Mr. Culberson's name was called). I again announce the unavoidable absence of my colleague the table was agreed to.

[Mr. Culberson]; but he is paired with the Senator from Dela-

ware [Mr. DU PONT].
Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. If he were present and I were free to vote, I should vote "nay,

Mr. McLEAN (when his name was called). I have a pair with the senior Senator from Montana [Mr. Myers], but I transfer that pair to the senior Senator from New Mexico [Mr. CATRON | and vote. I vote "nay."

Mr. NELSON (when his name was called). I have a general pair with the senior Senator from Georgia [Mr. Bacon]. If he were present, I should vote "nay"; and I presume that he would vote "yea."

Mr. HOLLIS (when Mr. Saulsbury's name was called). junior Senator from Delaware [Mr. SAULSBURY] is absent from the city. He is paired with the junior Senator from Rhode Island [Mr. Colt]. If the Senator from Delaware were present,

he would vote "yea."

Mr. ASHURST (when the name of Mr. Smith of Arizona was called). My colleague [Mr. SMITH of Arizona] is unavoidably detained from the Chamber. He is paired with the Senator

from New Mexico [Mr. FALL].

Mr. SMITH of Georgia (when his name was called). I have a general pair with the senior Senator from Massachusetts [Mr. LODGE]. Were I at liberty to vote I should vote "yea," and I have no doubt if the Senator from Massachusetts were present he would vote "nay."

Mr. STERLING (when his name was called). I have a pair with the senior Senator from Louisiana [Mr. Thornton] and therefore withhold my vote. If permitted to vote, I should vote

nay."

Mr. WILLIAMS (when his name was called). pair with the senior Senator from Pennsylvania [Mr. Penrose]. I transfer that pair to the Senator from Oklahoma [Mr. Gore] and vote. I vote "yea."

The roll call was concluded.

Mr. DU PONT. I have heretofore announced my pair with the senior Senator from Texas [Mr. Culberson], but I now transfer that pair to the junior Senator from Maine [Mr. Burleigh] and vote. I vote "nay."

Mr. SUTHERLAND (after having voted in the negative) voted inadvertently. I now observe that the Senator from Arkansas [Mr. CLARKE], with whom I have a pair, has not voted. On account of his absence, I withdraw my vote.

Mr. CHILTON. I transfer my pair announced a moment ago to the senior Senator from South Carolina [Mr. TILLMAN] and

I vote "yea."

Mr. COLT (after having voted in the negative). I inquire if the junior Senator from Delaware [Mr. Saulsbury] has voted? The VICE PRESIDENT. The Chair is informed that he

Mr. COLT. Then I transfer my pair with that Senator to the Senator from New Mexico [Mr. CATRON], and will allow my vote to stand.

Mr. McLEAN (after having voted in the negative.) Observing that the senior Senator from Montana [Mr. Myers] is now present and has voted, I withdraw my pair with the senior Senator from New Mexico [Mr. Fall], and will let my vote

The result was announced-yeas 40, nays 35, as follows:

So Mr Own	ex's motion to le	w Mr Hrrcnco	or's amendment

So Mr. Owen's motion to lay Mr. HITCHCOCK's amendment on

Mr. HITCHCOCK. Mr. President, before offering the next amendment which I shall propose, I desire to ask unanimous consent that an order be entered providing that debate on the pending banking and currency bill be limited, beginning Wednesday, December 17, so that no Senator shall speak more than once on any amendment nor more than once upon the bill itself, nor at greater length than 15 minutes, and that beginning the same day the Senate shall meet at 10 a.m. and adjourn at 6 p.m. each day, except that if the bill shall not have passed by 6 p.m. of Thursday, December 18, the Senate shall, beginning with Friday, December 19, remain continuously in session each day until 11 p. m. until the bill is passed by the Senate.

Mr. President, I make this suggestion of a unanimous-consent agreement as a possible compromise. There are certain Senators who object to naming a day upon which to vote, and I have not attempted in this proposed unanimous-consent agreement to fix a day for the final vote. I believe, however, that the same result will be obtained if we can limit debate in the

way I have proposed.

It is not my intention to offer any except the most important amendments; it is not my intention to speak more than 15 minutes at any time, and I believe that by limiting the debate to 15 minutes we can proceed to an early vote without binding unalterably any Senator.

Mr. OVERMAN. May I ask that the proposed agreement be read at the desk, so that all Senators can understand it?

Mr. HITCHCOCK. I will be very glad to have it read. Mr. WILLIAMS. Mr. President, reserving the right to object, I want to say that while I can not give my consent to this immediate request, I should be glad, and I think the Senate

Mr. HITCHCOCK. We are unable to hear the Senator.

Mr. KERN. We can not hear a word.

Mr. WILLIAMS. I say, reserving the right to object, I want to say a word upon the subject before making the objection.

Mr. RANSDELL. Let us have it read at the desk.

Mr. WILLIAMS. I do no see that this proposed unanimous consent would do any particular good.

Mr. ROOT. Will the Senator from Mississippi permit the request to be read?

Mr. WILLIAMS. It has been read once.

Mr. OVERMAN. It has not been read at the desk,

Mr. ROOT. But many Senators did not understand it.

Mr. WILLIAMS. I am perfectly willing to have it read again.

The PRESIDING OFFICER. The Secretary will read the request.

The Secretary. The proposition submitted by Mr. HITCH-COCK is as follows:

I ask unanimous consent that an order be entered providing that debate on the pending banking and currency bill be limited, beginning Wednesday, December 17, so that no Senator shall speak more than once on any amendment, nor more than once upon the bill itself, nor at greater length than 15 minutes, and that beginning the same day the Senate shall meet at 10 a. m. and adjourn at 6 p. m. each day, except that if the bill shall not have passed by 6 p. m. of Thursday, December 18, the Senate shall, beginning with Friday, December 19, remain continuously in session each day until 11 p. m. until the bill is passed by the Senate.

Mr. WILLIAMS. Now, Mr. President, I do not see that that would do any good. It would land us on Thursday morning just where we are now. I should be very glad at any time to hear some Senator ask unanimous consent to fix a day to begin the voting and at the same time couple with it a request for the vacation of the present order of the Senate requiring it to meet at 10 o'clock a. m. and continue in session until 11 o'clock p. m. In other words, a request for unanimous consent to begin the voting upon a given day and with it couple a request that the Senate shall begin to meet to-morrow at 12 o'clock and adjourn at 6. I object to the request.

The VICE PRESIDENT. Objection is made.

Mr. REED. Mr. President, I intended to put into the RECORD, before the vote was taken, some figures which were more pertinent to the matter we just voted on than to any other question that may hereafter come up. The vote has been had, and I am offering the figures now simply for whatever light they may give, and because an amendment similar to the one offered by the Senator from Nebraska will undoubtedly be offered hereafter, because there are various amendments of the same nature pending.

Just a preliminary word. The claim is made that there ought to be public ownership of the stock of the reserve banks which are about to be created, and that some element of safety to the public would grow out of a scheme by which the stock would be offered to the people to purchase, instead of being offered to the banks, the idea being that by scattering the stock widely there would be such a public interest in the banks as would in some way constitute a guardianship or control over the

system in the public itself.

Mr. President, the total stock that is proposed to be issued under the bill as reported by the Senator from Oklahoma [Mr. Owen] would be \$53,000,000. I undertake to say that if it were all offered to the public and purchased by the public it would not very largely contribute to the ideas of those gentlemen to whom I have referred, for the reason that if the stock is taken by the banks now existing it will, of course, in fact be owned by the stockholders of the present banks. I find from the report of the comptroller that in our national banks alone there are now 432,920 stockholders and that the average holding of shares is only 24.4.

There are no accurate data as to the number of persons interested in State banks and trust companies as stockholders; but there have already reported to the comptroller 14,011 State banks and 1,515 loan and trust companies, making a total of 15,526. It is certainly fair to assume that the stock in these State banks and trust companies is as widely and generally scattered as the stock in national banks. If that be true, there would be in the State banks and trust companies alone approximately 800,000 stockholders, and in the State and national banks together there would be approximately 1,200,000 stockholders. So, if the banks take the stock, it will be, in fact, owned by 1,200,000 citizens of the United States who are now holders. interested in the banks and trust companies that will become

members of the system. I am assuming that all come in.

That ought to be a sufficiently wide and generous distribution of stock to satisfy the most fastidious, and it ought to end the branch of the argument which declares that there is a greater element of safety in a system where the stock is owned by the public at large; for an institution that is owned by 1,200,000 people in this country comes about as near being publicly owned

as we could either wish or hope for.

Mr. HITCHCOCK. Mr. President, I now offer, as an amendment to the House bill, section 4 of the bill reported by the section of the committee of which I am a member. I omit section 3, as it is not of any considerable importance and involves no vital principle; and I desire, as far as I am concerned, to limit the discussion here to the important differences that have arisen regarding this legislation.

I offer, and ask to have read, as an amendment to the House bill, section 4 as reported by our section of the committee.

The VICE PRESIDENT. The Secretary will read as re-

quested.

The Secretary. On page 4 of the House print it is proposed to strike out all of section 4 as amended, and in lieu thereof to insert the following:

to strike out all of section 4 as amended, and in lieu thereof to insert the following:

SEC. 4. When the Federal reserve board has established Federal reserve districts, as prescribed in section 2 of this act, the governor or vice governor of such board shall, under his hand and seal, execute a certificate designating the territorial limits of such districts and the Federal reserve city in each district, and shall file such certificate with the Secretary of the Treasury. When such certificate has been executed and filed, as aforesaid, the board shall allot to each and every national bank stock in the reserve banks as prescribed in section two of this act, and when, conformable to section two of this act, and when, conformable to section two of this act, and when, conformable to section two of this act, and when, conformable to section two of this act, and when, conformable to section two of this act, and when, conformable to section two of this act, and when, conformable to section two of this act, and when, conformable to section two of the sact, and when, conformable to section two of this act, and when, conformable to section two of this act, and when, conformable to section two of this act, and when, conformable to section two of this act, and when contracts the territorial limits of the district, the territorial limits of the district, the amount of the capital stock subscribed and the amount paid in on such seal, issue a certificate in writing specifying the name and location of the reserve bank in such district, the territorial limits of the district, the amount of the capital stock subscribed and the amount paid in on such subscription, and the name and amount of stock taken by each subscriber. Such certificate shall be acknowledged before the clerk of a court of record, or a notary public, and shall be filed with the Secretary of the Treasury.

Upon the filing of such certificate with the Secretary of the Treasury as aforesaid, the said reserve bank so formed shall become a body corporate and as such,

Federal reserve board, and shall be known as directors "A," and 4 of whom shall be known as directors "B," and who shall be selected and appointed by the member banks as follows:

As soon as practicable after a reserve bank has been incorporated as above provided, the board shall notify the member banks in said iffederal reserve district to elect four directors within a certain date, to be named in the notification. Said board shall supply to each member bank a blank for the purpose of recording the vote of said member bank. Each member bank shall vote for four "B" directors upon the blank so forwarded, shall certify that they are the choice of the board of directors of said bank and forwarded to the board within the time which said board shall limit. Said board shall canvass the ballots so received from said member banks. The candidate for director receiving the largest number of votes shall be elected for four years; the candidate for director receiving the largest number of votes shall be elected for director receiving the third largest number of votes shall hold office for three years; the candidate for director receiving the third largest number of votes shall hold office for one year. During each subsequent year, the election shall be held in the same manner except that each bank shall vote for only one director unless in case of vacancies, when the number to be elected shall be certified by the board to each member bank, and in such cases a plurality vote shall elect.

No person shall be qualified to hold the office of director "A" or director "B" while he is an officer, director, stockholder, or employee of any other bank or of any trust company, and no person shall be appointed or elected director who is not at the time of his appointment or election an actual and bona fide resident of the Federal reserve board shall designate and appoint one of said directors "A" as chairman of the board of directors, who shall be known as "Federal reserve board of the board of directors, who shall be known as "Federa

predecessors.

Upon its own initiative, for cause, or upon written complaint under oath presented by 10 or more member banks charging any director of a reserve bank with incompetency, dishonesty, or other matter affecting his efficiency as a director, the board shall have the power, after hearing and proof and pursuant to a written notice specifying the grounds thereof, to remove such director. The accused director shall be allowed 30 days in which to make defense thereto. Pending the hearing the board may within its discretion suspend the accused director.

Mr. HITCHCOCK. Mr. President, there are in this amendment two important particulars in which the section differs from the provisions of the so-called Owen bill and from the provisions of the House bill. One involves the size and strength of the reserve banks. Certainly anyone who hopes that the new system we are about to create will fulfill its great functions of stabilizing the credits of the country, preventing bank disasters, regulating the rate of interest, and protecting the depositors of the country bases his hope largely upon the strength of the reserve banks which it is proposed to organize.

The section I have offered as an amendment, and which is indorsed by the section of the committee of which I am a member, provides that no reserve bank can be organized with a capital less than \$6,000,000, and that it shall not commence business until two-thirds of this capital is paid in, or \$4,000,000. The House bill provided that no reserve bank could be organized with a capital of less than \$5,000,000, all of which was required to be paid in before commencing operations. Senator Owen's draft of the bill provides that no reserve bank can commence operations with less than \$3,000,000 capital, but it provides that it may commence business with only \$500,000 paid in.

I notice that the Senator from Missouri [Mr. STONE] is about

to leave the Chamber. I hope he will return before I have progressed far, because I intend to make some comment upon a recent speech of his, and I should like to have him present at the time.

Mr. STONE. I will be back.

Mr. HITCHCOCK. No one can claim that a reserve bank with a paid-in capital of half a million dollars can be of any sort of material assistance to the individual banks of its district. It seems to me almost pathetic that the necessities of the case should have driven the other section of the committee not only to reduce the minimum capital of a reserve bank from \$5,000,000, as provided by the House bill, to \$3,000,000, but that they should have also felt compelled from the necessities of their position to provide that it could commence business with only half a million dollars of capital paid in.

We have in this country banks with a capital of \$25,000,000 and \$25,000,000 surplus. We have, in cities no larger than that in which I live, banks with a million dollars capital and half a million dollars surplus. We have a bank with \$500,000 cap-Ital and \$1,000,000 of surplus.

These individual banks are supposed not to be strong enough now to guarantee absolutely to the business world stability and We are proposing to put a prop under the present banking system. To attempt to do so with reserve banks of a capital of \$3,000,000, of which only \$500,000 has been paid in, seems to me to approach the ridiculous and makes it almost inevitable either that such reserve banks will utterly fail to serve their purpose or that they will be clamoring to the Federal board in Washington for currency for the weak districts and for the weak reserve banks when there is a plethora of money in other districts.

Either we need no reserve-bank system at all or we need a reserve-bank system strong enough to bear some resemblance to the reserve-bank systems of Europe.

Think of a reserve bank like the Bank of England with \$70,000,000 of capital and surplus, and the Bank of France with something like \$40,000,000 of capital and surplus, and the Reischbank with almost \$60,000,000 of capital and surplus, and then think of a poor little reserve bank out in one of the great sections of the United States with \$3,000,000 capital, starting in business with \$500,000 paid in.

It seems to me the very element of strength, which is perhaps the first thing to be considered, is absolutely lacking in such a proposal. I think the section of the committee to which I belong went to the very limit in permitting a bank to be authorized with so small a capital as \$6,000,000, of which \$4,000,000 should be paid in. I consented to it only because I knew that with only four regional banks there would be none organized

with a capital less than \$15,000,000.

That is one of the differences between the section I have offered

and the section whose place it is supposed to take.

Mr. SHAFROTH. Mr. President, if the Senator will yield, does he not recognize that the strength of these banks is going to be, not in the capital, but in the reserves which are required to be kept in them? Some Senators have advocated that there should be no capital at all required, that the mobilization of these mighty reserves, equaling \$400,000,000, would make a great bank, even if it did not have one dollar of capital stock.

Mr. HITCHCOCK. Every reserve bank system of the world has the reserves; and yet it would be a heresy, a phantasy of reckless banking, to suggest in any other civilized land in the world that you could organize a reserve bank without a capital. You could just as reasonably organize a private bank without a capital, and depend upon the deposits to furnish the money to loan to borrowers.

There are fly-by-night concerns which organize in the United States without capital, paper concerns, which assume to do business on wind and on hope but they have no place in the banking world, least of all in a reserve system which we are designing for the purpose of strengthening the banking system.

Our national banking act does not permit a bank to organize anywhere with less than a certain amount of capital; and when a town has reached a certain population it is not permitted that a bank of a small capital shall be organized. The capital is absolutely one of the great essentials in the banking business.

Mr. SHAFROTH. I am not contending that there should not be any capital. We have provided a capital for these banks of 6 per cent upon the surplus and capital of their member banks. On the question, however, as to whether or not these banks are going to be great banks, while it is desirable that they should have some capital, it is not an absolute necessity that they should have even any capital at all in order to be great banks, because of the reserves which they have in them.

Mr, HITCHCOCK. I am willing that the Senator from Colorado should go on record as saying that banking can be done without capital, and I do not care whether it is individual banking or reserve banking. The intelligence of the world will look with pity upon the idea of adding to the strength of a banking system by providing reserve banks either without capital or with an inadequate capital.

I shall not go over the minor differences involved in the amendment I present. I presume, from indications in the vote to-day, that the matter is foreclosed on most of the amendments I shall urge, and for that reason I am not disposed to take up unnecessary time. I wish, however, to draw attention to another important difference.

The amendment I have offered provides that-

Every Federal reserve bank shall be conducted, managed, and controlled by a board of nine directors, five of whom shall be appointed by the Federal reserve board and shall be known as directors A, and four of whom shall be known as directors B, and who shall be selected and appointed by the member banks as follows.

That raises the great issue, already discussed here to some extent, whether the reserve banks shall be controlled by the Government or controlled by the banking interests of the district. I believe that is a vital issue. I think to turn over to the private banking interests of the United States the control of the great public utilities we are creating is likely to prove the monumental blunder of this legislation. I am sure when the people of the United States come to understand the issue they will view with suspicion the plan by which Congress may turn over to the banking interests the control of the reserve banks, which are, in effect, Government institutions-public utilities for the safeguarding of the banking interests of the United States.

Although I do not talk so loudly as some Senators do, nor go to such extremes as some Senators go in denouncing the bankers of the United States, I believe it is a strange anomaly that some of the Senators who denounce the banks and the bankers of the United States with the greatest fierceness and with the most extreme language seem to be perfectly willing to turn over to them the administration of this great trust.

Take, for instance, the Senator from Missouri [Mr. Stone]. So far as his public utterances go, he seems to hold very strong views on the character and purposes of the bankers of the United So far as his public utterances go, he seems to distrust them. He seems to feel that they are in a conspiracy against the public weal. Let me read from a speech which he delivered on the floor of the Senate a few days ago.

On page 727 of the Congressional Record the Senator from Missouri [Mr. STONE] said:

Mr. President, I believe there are bankers in this country who are the enemies of the public welfare, at least indifferent to it, and who would sacrifice the industrial interests of the country if they deemed it necessary to promote their own selfish ends.

Yet the Senator from Missouri proposes to give to them six out of the nine directors in the reserve banks. There is an inconsistency there that can not be explained. If the Senator from Missouri believes those things which he stated on the floor of the Senate, how can he justify his act in voting against the proposition to give the Government the control of these regional banks and in favor of placing the control of the reserve banks in the hands of the bankers whom he so criticizes?

He proceeds:

I have no kind of doubt that in the past a few great banks have fomented policies and projects that have paralyzed the industrial energies of the country in the belief and expectation that in the end they would accomplish results that would sustain and perpetuate their tremendous power over the financial and business industries of the

Yet he proposes to turn over to them the control of each one of these reserve banks, giving them 6 out of 9 votes upon the board of directors. He has seen them enter into a conspiracy; he has seen them without any semblance of law hold the power in one banking center of the United States after another; and now he proposes to give to them the law under which to operate in the control of these organizations. He has seen them control clearing houses and crush out antagonistic banks; he has seen them enter into conspiracies to blacklist certain paper and to bankrupt certain men; yet he turns over to them the control of a majority of the board of directors in every one of these regional banks. The Senator proceeds:

I believe there is a combination, well established and long continued, between a number of the great central banks who, under our present monetary system, have in their hands and under their control a sufficient volume of the available money of the country to enable them with too great success to sit as arbiters on the financial policies of the Government and on the industrial enterprises of the people. What is the use of men here or elsewhere denying this patent truth or to offer explanations or apologies about it?

Yes; and if, Mr. President, they had been able to do those things under our present banking system, where they merely controlled the voluntary reserves of banks intrusted to their care, what will be their power when they control the reserves of banks placed with them under the dictates of a law in which they are given a majority of the board of directors? All their acts heretofore, all their combinations heretofore, will be legalized here. What they did without the semblance of law they may hereafter do under the provisions of this act with the full power of the law behind them.

He proceeds a little later in his address:

I have myself known of more than one occasion when bankers refused credit to men who opposed their political views and purposes. I have been told by men of high character and large business connections that they have asked credit of banks and were told that their credit could not be extended, no matter how ample the security, as long as they advocated certain political policies and sought to advance the success of a certain political party. Why, Mr. President, this is an old story, going, anyhow, as far back as 1896.

I know that as well as the Senator from Missouri. attempting in 1896 to publish in the city of Omaha a Democratic paper. I was practically summoned into a bank and given to understand that I must change my policies or have my credit withdrawn. Yet the bankers who so summoned me and so treated me were not inspired by personal hatred. They had I wonder, if the Senator from Nebraska could have his way in

been my friends. They had a motive which they thought justified them. They were alarmed. They thought that the success of Bryan in that campaign meant the ruin of the country. But I merely cite it to show that it is a dangerous thing to place in the hands of bankers the control of credit to be used either on political occasions or any other.

I know that the bankers have used their power at times without justification, and it is for that reason that I deny the wisdom of placing in their hands the control of a great utilitythe control of the reserve banks of the United States. has not done it. No country in the world, so far as I know, has done it. The Bank of England does not do it; the Bank of France does not do it; the Reichsbank, in Germany, does not do it. Here in the United States, where we should be more democratic than they are anywhere else, where our public utilities should be more free from private control than anywhere else, why do we elect to place these reserve banks at the very outset in the hands of men who may at least be tempted to use

that control for private purposes?

Mr. STONE. Mr. President, the Senator from Nebraska [Mr. HITCHCOCK], as I was leaving the Chamber for a moment, informed me that he was intending to make some remarks in which I might be interested, and I hastened back to hear what

it was he had to say. I would have come back in any event.

Mr. WEEKS. Will the Senator speak a little louder? It is difficult to hear him in this part of the Chamber.

Mr. STONE. Mr. President, I am not in a speaking mood. am suffering from grip and I am aching all over with cold. do not like to speak. I could not be induced to say a word except under the circumstances.

Mr. President, there are different kinds of bankers. I said in the speech from which the Senator has quoted, and I repeat it, that I believe that most of the bankers of this country, a very large majority, in fact, so large a majority that where I find the rule any different it is an exception to the rule, are honest men, and desire, like other honest men in all lines of legitimate industry, to discharge every duty of good citizenship; that they are in no way concerned, intentionally or designedly, in any movement or effort to do injury to the public welfare. But I think there are exceptions to that general rule, but I have stated what I have to say in the speech referred to by the Senator from Nebraska upon this subject. I do not feel that it is necessary now to repeat what I have already said in this behalf. The Senator from Nebraska concedes that in his own experience he was confronted with situations and under circumstances and conditions such as I referred to and condemned.

The Senator then asks why I would vote to turn over these regional banks to this class of men. I would not vote to turn over these banks to this particular class of men. It is possible that some such men may occasionally get on the directorate of a regional bank. I hope not; but it is possible. If this system is established, in each of these directorates there will be three bankers and three other men who are not bankers but who are identified actively in the commercial, agricultural, and other industrial interests of the country. Then, the central reserve board will have the power to appoint three others of these directors and also to exercise a supervising control over all of them, with a large power of removal.

I think, therefore, there will be little danger that Mr. Hepburn, Mr. Vanderlip, or Mr. Ailes, or men of that kind, will become potential or dangerous forces in any regional bank. If we have 8 or 10 of these regional banks established in well-arranged sections of the country, it is certain that the directorates in practically all of them will be in the hands of men who can be

The great bulk of bankers, I say, are like other men, sincere and honest and upright, and want to do things that are right, and I think that the personnel of these directorates will be, so far as bankers are concerned, in the main representative of the best class of bankers and business men. I do not think the criticism of the Senator from Nebraska is well taken. It is superficial.

Mr. President, I shall vote for this particular provision of the bill to which the Senator from Nebraska calls attention as it has been reported, and I will do so without any apprehension that the Vanderlips and the Aileses and men of that character

are going to control. It is a little remarkable, I will say in conclusion, that these gentlemen whom I have personated, and there are others of like kind I might personate with equal propriety, are opposed to this whole system. They have been down here fighting the bill; they are fighting it yet, and have invoked every agency and influence that can be rallied to defeat it. They want a great central bank. this behalf, what potential influence this class of men would in time come to exercise over the administration of a central bank. I can not but express, I will express, a feeling of astonishment that the Senator from Nebraska has found it consistent with his views to cooperate with the class of men I have seen proper to criticize.

Mr. REED. Mr. President, about half the trouble in this life arises from a confusion of terms. It so happens that there are such limitations to the English tongue it is difficult to express one idea without at the same time expressing another and a different idea. Nine-tenths of the dispute over the provision of the bill which the Senator from Nebraska has discussed, and to which I shall specifically refer, arise, in my opinion, from a confusion of terms.

The Senator from Nebraska [Mr. HITCHCOCK] states that under the bill as reported by the branch of the committee to which I belong a bank can be opened with only \$500,000 of capital, and he comments that a bank with \$500,000 of capital is a puny and insignificant thing in comparison with some of

the great banks of the country.

Mr. President, the provision of the bill is that no bank shall be organized with less capital stock than \$3,000,000, and that the bank may be opened for business when the first payment has been made, which, I think, may be as little as \$500,000. Hence, the Senator argues that the bank when it begins business will have resources of only \$500,000 and declares that such a bank is a weak and puerile thing. The same argument has been made repeatedly upon the floor of the Senate. I undertake to say that the argument is based upon a fallacy, as can be clearly demonstrated. The fallacy arises from confusing the word "reserves" in its relation to ordinary banks with the same word in its relation to the proposed reserve banks. It will take a few minutes to make that plain. The reserve bank will not only have \$3,000,000 of capital stock when it is organized, but it will have approximately 12 times that amount of money which we have in the debate called "reserves," simply because they come from the funds of member banks, which have hereto-fore been set aside as reserves. So a bank with \$3,000,000 of capital stock will have approximately \$39,000,000 in its vaults. Mr. HITCHCOCK. Mr. President-

The PRESIDING OFFICER (Mr. LEA in the chair). the Senator from Missouri yield to the Senator from Nebraska? Mr. REED. I wish the Senator would pardon me until I con-

clude this sentence.

We provide in this bill that a reserve bank shall have a capital of not less than \$3,000,000. By this provision we intend to say that the bank shall have \$3,000,000 of capital stock and an equal amount of money represented by that stock. The funds so raised constitute a part of the assets of the bank.

But we provide for other assets.

The present banking law requires each national bank to keep on hand in cash or on deposit with other banks a certain per cent of its general deposits, the amount varying from 15 per cent to 25 per cent. All these moneys we call reserve moneys. They are held as a part of the general funds of a bank and are subject to be used at any moment when depositors demand their These reserves, therefore, are nothing but a portion of the deposits retained in cash and subject to call.

When we came to frame this bill, following the beaten path, we provided that each bank should retain "reserves," and then we provided that a certain per cent of these reserves should be paid into the regional bank. Our expression would have been much more accurate if we had provided that a bank should keep in its vaults a certain per cent of its deposits in eash as its reserve, and that it should pay into the regional bank of the district an amount in cash equal to a certain other

per cent of its deposits.

But we did not do this. We speak of a transfer into the regional banks of a certain proportion of "the reserves" the regional banks of a certain proportion of "the reserves" the member bank is required to keep, using the old stereotyped phrase "reserves," although, as a matter of fact, the moneys paid into the regional banks by the member banks are impounded for an entirely different use than the moneys now held by banks as reserves. Nevertheless, because we have used the term "reserves," we unconsciously attach to the moneys paid into the reserve bank the same conditions we attach to the real reserves of an ordinary bank.

Mr. President, I assert that, instead of being of the nature and character of reserves, when these moneys get into the Federal reserve bank they become in fact to all intents and purposes primary capital of that bank. The better term would be to say they are a part of the actual resources of the bank.

Let us see what the distinction is between the reserves of an ordinary bank and the money which is to be turned over to a re-gional bank. In the ordinary bank the reserve is held back of

the ordinary deposits, and as the ordinary deposits are liable to be drawn at any minute, the demand for the reserve is a demand which may come at any minute. Hence the bank can not use it; the bank can not employ it; it is a mere temporary fund, which must be paid when called for. But when the same amount of money is paid over to a regional bank, it becomes practically a permanent fund. The member banks have simply taken a certain amount of money from their vaults and de-livered it into the vaults of the regional bank. It is not thereafter subject to withdrawal or recall by the member bank, except that when the general deposits of a member bank are reduced its deposits with the regional banks may be proportionately reduced. Taking the banks of the country altogether, there can not be any great fluctuation in the aggregate deposits. Consequently the fund held by the regional bank is, in fact, practically stationary in its character and amount.

The money that comes in in payment of capital stock and the money that comes in as a contribution of reserves can alike be loaned. The dollar of capital stock and the dollar of reserves perform exactly the same functions. The so-called "reserve" contributions can be made to serve every purpose that the capital represented by stock can be made to serve, even to the meeting of the liabilities and the expenses of the reserve bank. It can be used to create a gold reserve, and, based upon that gold reserve, the reserve bank can have issued to it Federal reserve notes. Therefore, when we organize a bank with \$3,000,000 of capital stock, to be paid for by the member banks, and also require the member banks to contribute a further sum of \$36,000,000 which we have wrongly called reserves, but which, in fact, the Federal reserve bank can use as primary capital for practically every purpose, we have given that bank substantially the same strength and the same power it would have if it had in its vaults \$39,000,000 directly obtained from the sale of capital

So when it is argued that because a bank only has \$3,000,000 of capital stock it has only \$3,000,000 of resources the argument is based upon this fallacy—that it omits from consideration the other resources that are to be placed with that bank, which can constantly be employed and used by it in the general transaction of the business for which it was created.

Therefore, if you compare one of the regional banks with the banks of other countries you must not only have regard for the capital stock of our banks, but for the so-called reserves, which are, in fact, capital, because they can not be taken away from the bank. I am speaking, of course, in the broad sense. Small amounts could be withdrawn, but approximately equal sums would at once flow in from other banks, and the general average would be maintained. So that we shall find that any one of the smaller banks that may exist under our system will compare favorably with the great banks of other countries.

'The Bank of England is the largest, having, in round numbers, a capital of \$225,000,000, but that is substantially its only financial resource which is not offset by a liability.

The Imperial Bank of Germany has a little over \$60,000,000 of

capital. When that is gone, the bank is gone.

Assuming, now, that we establish in this country a bank with \$6,000,000 of capital stock, along with that capital stock we lay down 12 times as much money, which we have been calling re-serves. This money immediately becomes a part of the bank's resources, so that the bank will actually have in the neighborhood of \$72,000,000 plus the capital stock of \$6,000,000. We now have a bank that has on hand \$78,000,000 which it can loan or use as a gold reserve, subject, of course, to the requirement that it shall keep a reserve of its own equal to 35 per cent. Such a bank is as well equipped as the Imperial Bank of Germany.

The Bank of France has a capital stock of about \$36,000,000. That is its resource; that is what it has to use. Of course, it has general deposits, but they are liable to be called any minute. It has a right of issue, but we have a right of issue to offset

that. Its real resources amount to about \$36,000,000.

Each of the banks to be established under this system will probably have resources, in the sense I have been using that word, as great as those of the Bank of France. So that our regional banks, which are capitalized, first, by a captial stock, and, second, by permanent resources, which for all practical purposes are not subject to withdrawal or recall, will stand in a position very different from what they would if their only resources were to come from the subscription of the capital stock. Indeed, Mr. President, the Senator from Nevada [Mr. New LANDS] is not at all wrong when he states that these reserve banks could be established and successfully run without the subscription of a single dollar of capital stock. Why? Because we are impounding in a permanent way the reserves of other banks.

Those reserves become the resources of this system. We take them and rediscount the paper of the member banks; we use them as a gold reserve, and upon them we issue currency. They are to all intents and purposes as available under this system as

primary capital contributed by stockholders.

I know that men can differentiate; I know that men may call attention to the fact that these moneys are, after all, the reserves of the member banks and hence are liable to be called; but before they can be called by a member bank that bank must have reduced its deposits to a point where it is entitled to call them or the bank must have gone into liquidation; and when the bank goes into liquidation the moneys which it has deposited with the reserve system are primarily held to answer the obligations of the reserve system.

In treating this system, therefore, and its capital, we should not confuse merely capital stock with that other form of capital which constitutes the resources of the system, but should treat it in the larger way. Candor must compel everyone to admit that we can not measure the strength of the banks of the system by the mere amount of their capital stock; we must measure them by the volume of those resources which they can at all times and under all circumstances absolutely command. In that light and in that view we are not creating a puny system. Whether we have 4 regional banks or 8 banks or 12 banks, each bank will nevertheless be a bank of respectable proportions and will possess respectable powers.

Mr. President, I believe if Senators will candidly take this view and study the provisions to which I have referred they will arrive at the same conclusion I have, which is that the reserves of member banks deposited with reserve banks take on the nature of permanent capital and permanent resources.

I do not say that there is no merit in the argument for a smaller number of reserve banks than we propose to create, but there is also a legitimate argument for the number we propose. We must balance one argument against the other. Speaking for myself, I shall vote to establish not less than 8 nor more than 12 banks, such being the provision reported by that branch of the committee to which I belong; yet I say in all candor that I do not believe that the success or failure of this bill depends upon the exact number of banks we may create.

It is a false argument to say, however, that 8 banks or 12 banks will be so weak that they can not perform the functions for which we create them. It is not a sound argument, and therefore we ought not to make it here upon the floor.

The thing at which all Senators ought to aim is to get at the very truth regarding the bill; to admit the virtues of an argument upon the other side, if any it has. We shall not get far toward the coordination of opinion if we pursue a different course. shall not pursue the path of wisdom with calmness and discretion if we lift our voices in plaintive wailings and declare that the passage of this bill will cause the Government of the United

States to fall as fell old Rome.

For the first time in my life I have heard assigned as the occasion for the fall of Rome the guaranty of bank deposits. I have often heard excited gentlemen upon the temperance platform declare to an equally excited audience that Rome was destroyed by the vice of drunkenness. I have heard others claim that the people became corrupt in their private lives, and thus Rome fell. I have heard it asserted that Rome became cruel, and hence her destruction. But not until the Senator from New York [Mr. Root] gave the world the information did any of us suspect that the real cause of Rome's destruction was the guaranty of bank deposits. That was a contribution modern states-manship made to ancient history. It ought to be laid up among the classics and preserved sacredly as an intellectual and historical curiosity.

It has been suggested to me by the Senator from Mississippi [Mr. WILLIAMS] that notwithstanding all our intellectual and historical meanderings, the real truth has even yet been overlooked-that the fact of the matter is Rome fell from the early introduction and excessive use of hobble skirts. [Laughter.]

Mr. President, why do gentlemen go into tragic declamation about this bill? They do not think it will destroy the Republic; they are simply talking. Why bottom an argument upon a false premise? Why not look at the bill calmly and dispassionately? Why not discuss the facts and discard the fanciful and grotesque?

The other day we listened to a remarkable argument, presented in masterful and convincing style. The orator [Mr. Root] pictured the horrible results of inflation. Of course, if we are to have unlimited inflation the results depicted would followleast many of them. The question remains, Is there anything upon which to bottom the inflation claim? Does this bill provide for unlimited inflation?

The most the learned Senator could say was that inflation was possible under it—not probable, but possible. In order to lift the possibility into probability, the Senator, in substance, declared the Secretary of State, Mr. Bryan, to be an inflationist, and that he will control the reserve board and dominate its policies. Accordingly the Senator argued from the assumed premises that we shall have unlimited inflation under this bill.

#### CAMPAIGN OF '96.

The orator took us back to 1896 and in fervid phrases discussed the "glorious victory" the advocates of sound money and honest government had then achieved. He told us of the patriotic legions that had stood and battled to save the country from an appalling calamity.

Mr. President, if there is one page of our country's history to which no stand-pat Republican ever ought to want to turn his eyes, it is the campaign of 1896. I wonder that any man dare use the word "honesty" when speaking of that "triumph." Why, sir, in 1896 there was a saturnalia of corruption such as never before disgraced the politics of this country. In 1896 you had a proud victory, did you? By what means did you achieve it?

I can understand how the soldier who upon the field of battle, in fair contest and by honorable means, overcomes his enemies may feel some sense of pride as he exhibits his wounds and recounts his deeds of valor, but I can not comprehend the individual who boasts an advantage gained by fraud, trickery,

deceit, oppression, bribery, and crime.

"In 1896"! Why, you have just heard the Senator from Nebraska tell how in that campaign coercion was attempted to be applied to him. If those who opposed us had the temerity to attempt to intimidate the proud-spirited, the talented, the independent man, running a great newspaper that had wide influence throughout the States of the Central West, if they dared thus hale him before the officers of the bank to be there told that his credit would stop if he continued to express his opinions as a citizen and a newspaper man, then, in Heaven's name, what kind of coercion, think you, was applied by these and other high priests of virtue to the poor and the humble, to the man who labored in the trench and back of whom stood the pale-faced wife and children dependent upon his weekly wage for bread?

Some things I saw myself. I saw men in my own city-and we have more, much more, independence in the West among our working classes than you find in the East, because their opportunities are better-I saw these men marched like soldiers under orders from their places of employment. I saw them mustered behind banners that were yellow as gold and that bore the legend, "Sound money and honest government." I saw them march by, thousands upon thousands; I heard from their lips muttered curses upon those who ordered them to sacrifice their manhood or to lose their jobs. I saw them go to the polls on election day wearing yellow badges. We all believed the election had gone overwhelmingly against the Democratic Party. We closed our campaign headquarters and gave up the fight; we conceded the defeat even of our local ticket. Then the votes were counted, and we discovered that these coerced and compelled men, who went to the polls wearing upon their breasts the yellow badge of their servitude and of their masters' dishonor, had, in the privacy of the election booth, where there was no eye to witness but their God's, voted the Democratic ticket. We won by a bigger majority than we had rolled up in 20 years. But our victory was local. In the Nation at large coercion and fraud won the fight.

You boast of the election of 1896! Shame upon all such boasters! You resorted to every form of coercion. You resorted to every species of corruption. The chairman of the Republican national committee in 1896 sent out his orders to levy tribute upon the special beneficiaries of your laws. He gave his commands in the brutal language; "Fry the fat out of the manufacturers." The fat which was to be fried out of the manufacturers had been first fried out of the bodies of the people of the United States.

To-day, and largely because of the infamous campaign you made, largely because of the brutal methods you employed, largely because of your corruption, largely because of your intimidation and bribery in the year 1896, we have upon the statute books a law which makes it a crime for corporations to permit "the fat to be fried out of them."

You won in 1896 by methods that are now recognized as violative of the statutes of this country, methods that always were in violation of the statutes of Almighty God.

You go back to 1896 and boast. Why, had I engaged in that iniquity I would close down the book and seal its leaves and

ask a kindly world to forget. I would try to solace my conscience with repentance rather than arouse it by boasting.

You won in 1896. Well, what has 1896 to do with this bill, anyway? Some Senator—I have forgotten whom—remarked when the speech of the Senator was being delivered that the only similarity between the campaign of 1896 and the present debate was that then the issue was over 16 to 1, while just now the issue is over the sixteenth section of the bill.

Mr. President, what are we trying to do by this bill? Are we trying to establish a banking system? No; not that. No; not trying to put coercion and compulsion upon the banks? that. Are we trying to make a forced contribution from the capital of the banks? No; not that. I will tell you what we are doing in this bill. We are trying to remedy the weaknesses, the defects, the evils, of an existing system—evils which are the results of some bad legislation and some bad banking.

The banks of this country always have loaned their customers' money down to the point where, when the slightest disturbance comes, they can not meet the customers' demands. Not once, but in a number of instances, almost all of the great banks have repudiated their obligations, have closed their doors, paralyzed industry, shut down manufactories, stopped business, and throttled progress. The fundamental reason back of these catastrophes was the desire of the banks to make money. This desire led them to loan their reserves down to the danger point

and then beyond that point.

Such being the facts, we could justly enact a law compelling the banks to keep within their own vaults a reserve sufficiently large to enable them at all times to meet the obligations they incur.

Instead of doing that, and because we do not want to injure the banks, because we want to help them and help the country, because we want to relax whatever hardship there is in the present conditions, we propose, first, to lessen the reserves they are required to keep by law, and, second, to impound those reserves in such places and under such regulations as will enable the banks to utilize the reserves in the time of need.

In addition to that, in this bill we do for the banks that which is done for no other class of our citizens. to issue to them money upon their assets and to back the money with the faith and credit of the people of the United States.

Finally, we propose to deposit with the reserve banks the moneys of the Government without any interest charge.

Mr. President, that is not waging war on capital. That is not an effort to abuse men who have money. That is an effort to give strength to our banking system, not weakness. It is a plan which primarily benefits the capitalists and only secondarily benefits the citizens of the country. The cry that we seek to degrade the currency or ruin credits is a false cry.

It is claimed that there is a possibility of inflation. Mr. President, I shall talk of this bill frankly. There is a possibility of inflation in the bill, but because there is a possibility of inflation in the bill no man has the right to assume that that inflation will necessarily follow. I do not quarrel with those men who desire to make this bill so that by the terms of the law a check shall be placed upon the volume of currency, but I do take issue with those men who are willing to denounce the bill as an inflation measure designed to inordinately swell the volume of currency, and as inevitably leading to a disastrous end. The possibility that something may happen is very different from the probability that it will occur.

Mr. President, the Senator from New York in his speech

assumed that, because there was a possibility that inflation might occur, it followed that it certainly would occur. All of which was very false reasoning. Then followed a picture of the horrors of inflation.

It is possible, sir, that a foreign soldiery may sometime invade our shores. It is possible that they may come with fire and sword, that blood will flow down the streets of this Capital. But because we are not able to forestall against that mere possibility we do not distrust or seek to supplant the Republic.

It is possible that our courts may become corrupt. He who assumes the possibility to have become a reality may rave and weep over a people deprived of their liberty and life by the decrees of tyrannical judges; but is there any likelihood the event will ever happen? Not, Mr. President, while the American people retain their manhood and their high sense of honor.

It is always possible for calamities to happen. It is possible, when we elect a President of the United States, making him Commander of the Army and Navy, that some time in the providence of God the man we have elevated may use his immense powers to oppress his countrymen, but because that possibility exists we were not warranted in refusing to elect a President.

Coming, then, to the possibility of inflation. If any man can suggest a plan that will make inflation impossible and that will not injure the bill, I shall be glad to see the plan brought

But let us look at the provision of the bill and see what must be done before there can be any inflation. The member banks, presided over by bankers, must determine that there is a need for money and must be willing to give security in order to obtain it. After the member banks have demanded the money, the regional bank directors, a majority of whom have been selected by the banks, must determine that the money should be advanced and must be willing to apply to the reserve agent for currency and to give security for it. So that before there can be a dollar of money issued two separate boards composed of or selected by bankers must have passed upon the question and concluded that the money is so necessary that they are willing to pledge their property to obtain it.

It is only after these bankers who are interested in sound money, in sound times, and in sound business methods-it is only after they have made their demands that a single dollar of this currency can be issued.

But other steps yet must be taken. The reserve agent must be satisfied that the security offered is good, and the reserve board must be convinced that the money ought to be issued.

If we ever have inflation under this bill, it will be primarily

caused by the bankers of this country, and by nobody else.

The Federal reserve board represents the country. It does not have the power to put out a single dollar of currency until it is applied for by two sets of bankers. It does not have the initial power of expansion.

#### DEFENSE OF MR. BRYAN.

Even if Mr. Bryan is all that is claimed by his enemies; even if he is an inflationist-and no man has any right to make that charge-even if he will stand back of the reserve board and control it-and no man has the right to make that chargeyet the fact, assuming it to be a fact, is immaterial, because that board can not put out a single dollar of money unless and until there shall have been a call by capitalists controlling banks, by sound-money men controlling banks, by wise men controlling banks, and their call must have been O. K.'d by a board of directors of another bank that is controlled or elected by bankers.

So if the shadow of Bryan be 10 times as dark, if his arm be 10 times as strong as they loom before the imagination of the distinguished Senator who first drew the name of the Secretary of State into this debate, yet the Secretary of State could not cause an expansion of the currency.

Unless the banks themselves want the expansion, unless the capitalists demand it, unless these wise bankers, who know everything about finance, who know just how every dollar in the world ought to be coined, and generally insist they ought to coin it—unless they cause the inflation there will be no inflation.

Mr. President, that fact being established, and no one dare gainsay it, the tremendous argument that we will have inflation on account of the supposedly sinister influence of Mr. Bryan, or Mr. Anybody Else, falls flat and should never have been made.

But, sir, I am so much opposed to inflation-and I use the term in its ugly sense—that I am willing to remove the naked possibility of inflation if a suggestion can be made which will remove it and yet leave the bill sufficiently generous to meet the purposes we have in view.

Mr. President, when any man stands on the floor of the Senate and announces that this is a scheme of the Secretary of State to inflate the currency, that he will control this board, and that we will have a wild period of speculation and inflation and a corresponding crash I am amazed.

And yet it is not hard to understand why the Secretary of State was dragged into this debate. When ambition beclouds the vision and its far-off voice is calling to higher and greater honors, men sometimes allow political fervor to overcome the sense of fairness and candor.

Mr. President, this bill is not a perfect measure. No bill that has to be wrought out by a compromise of opinions is a perfect There are good things in the bill introduced by the measure. Senator from Nebraska [Mr. HITCHCOCK], but this bill is a workable bill, and it is not a bill that is surcharged with de-

Mr. President, I do not think any man has the right to stand on the floor of the Senate, with full knowledge that this bill, or one very similar, will be enacted into a law, and undertake to alarm the country. I doubt the high sense of patriotism of that man who cries "Wolf! Wolf! Wolf!" when there is no wolf, who is willing to injure the multitude who may hearken to the false alarm.

Speaking for myself, I assert that in the discussion of this bill Senators ought to have regard for present conditions; they should remember that to-day a financial struggle is going on in Europe; they should remember that in this country there is a condition of doubt, uncertainty, hesitancy. It is unjust for any man to undertake to convince the country that this bill is intended to inflate the currency, intended to give an improper expansion to business, intended to finally push us over a precipice and destroy us. That is not its purpose; it is not its intent; it will not be its effect.

Its purpose is to strengthen business. Its purpose is to quiet the troubled waters. Its purpose is to instill life and energy into the channels of commerce and of trade. It is the duty of every Senator to try to add proper amendments, but it is wrong to try to alarm the country when there is no cause for alarm

Mr. President, the Senator discussed this bill, but he did not discuss his own amendment. In a word, his amendment proposes to empower the banks to issue the money. That is an old philosophy; it is an aucient theory. No man need quarrel with those who believe in it, but at this time it will not be accepted by the American people, and I think all Senators here know that to be the fact. Hence its advocacy merely tends to delay.

Speaking for myself, I am unalterably opposed to any system

which gives to private bankers the right to control the credits of this Nation. I am opposed to it because in its essence it violates that provision of the Constitution of the United States which confers upon the Federal Government the right to coin I believe the issuance of currency which must be redeemed in coin is covered by the spirit of the provision of the Constitution which makes the coining of money a governmental function. I believe that the power of issuing money, of control-ling its volume, of safeguarding it, is a power that belongs to the representatives of all the people, not a power which should

be vested in a few of the people.

Mr. LANE. Mr. President, I do not know of any reason why the pending amendment should not be adopted. It seems to place the management of these banks in the hands of the people. That is good Democratic doctrine. It is the only Democratic doctrine that I know of, and I see no reason why there should be any opposition to it. It seems to me to be unfortunate that it was not suggested by the majority party. When any Senator comes with a suggestion which is an actual improvement on the one which has been adopted, it also seems to me good party policy to accept it and to take the best we can get, no matter who offers it, even though it be presented by our most bitter enemy, and I am in favor of doing so at all times

Mr. OWEN. Before the Senator passes final judgment upon the matter, perhaps it might be well for him to hear the reasons which moved the committee in the matter. If it will not interrupt him, I will be glad to give them; but if it does, I will wait until it suits his convenience.

Mr. WEEKS. Mr. President, it is impossible to hear the conversation that is going on upon the other side of the Chamber. Mr. OWEN. I interrupted the Senator from Oregon to say that I should be glad to give him the reasons which justified the committee in their opinion and the conference in not agreeing to this proposal. There is a very sound reason, which I do

not believe the Senator has had presented to him.

Mr. LANE. I have heard a good many reasons advanced. There are a great many different paragraphs in the amendment under consideration, and mostly they are at variance the one with the other, and my mind is still open to conviction; but it will take a very good and logical reason to make me believe that the business of people directly should not be placed directly in their hands, if it can be done,

If you have one that will convince me to the contrary, I will listen to it. I might say, however, that I am prejudiced on the subject and perhaps the Senator will have a hard task.

Mr. OWEN. If the Senator will permit me, I will give the reasons which moved us in this matter,

Mr. LANE. All right; go ahead. Mr. OWEN. There are two conceptions which have been considered in regard to the banking and currency plan. One of them is the idea of a people's bank, with the stock owned by the people of the country, just as they may happen to subscribe, such as the Bank of France, where the bank known as the people's bank is in active, direct competition with the individual banks engaged in banking business in the country. It was necessary in the German Empire, where they only had a few large banks, which might easily fix a rate for the people of the German Empire unless there was some competition absolutely These only represent a few of the objections which come; assured. For that reason the Reichsbank went into active and but the real reason is that the proposed plan requires of the

direct competition with the other banks of the German Empire, dealing with the individual citizens. In the American system it has not been really proposed on the part of anybody, where we have these 25,000 individual banks competing with each other, and we have not thought to have a Government-controlled central bank, owned by the people and managed by the Government directly, in competition with the 25,000 individual banks. It might be necessary at some time in our history to do that, but the purpose of this bill is to enable these individual banks to be sufficiently independent that they might compete with each other in reality.

We are not proposing to establish a Government bank, but we are proposing to coordinate the reserves belonging to these individualized competing banks to enable them to be independent of a few great concerns that heretofore have exercised too large a measure of control over credits. So the plan of bank we propose contemplates the admission into the system of these member banks. If they did not come in, the system would,

of course, be a failure.

We had much discussion with the representatives of the various banks coming before our committee, and they insisted upon many things to which we would not agree. One of the most important matters which they urged was that they should have representation on the Federal reserve board. Another urgent insistence which they made was that it should be left voluntary with the banks whether or not they would put their reserves in the Federal reserve banks. They objected to the amount of the reserve; they objected to the question of exchanges; they objected to the savings-bank clause; and it was thought wise, in so far as governmental supervision and control was concerned, to accede to some of the suggestions of the banks which were expected to come into this system. I have received within the last few hours some telegrams bearing upon this matter which would indicate that the banks would not come into this system if we took from them a majority of the board of directors of the Federal reserve banks. On Saturday last, I remind the Senator, the Senator from Connecticut [Mr. McLean] put into the Record certain letters which he had received, showing that the banks were not inclined to enter this system:

As to myself-

This is from Meigs H. Whaples, of the Connecticut Trust & Safe Deposit Co., calling attention to the fact that the Connecticut Bankers' Association unanimously approved the Aldrich bill, which put all the power in the hands of the bank, He says:

As to myself, I believe that the Owen bill or the Glass bill, if passeld, will create a financial disturbance. And I doubt if there will not be a stampede of national institutions to take refuge under State charters. Our own commissioners, one of whom, as you know, is a Democrat and a Wilson man, told me that in this small State they had already had twenty-odd applications for forms for State charters from national banks, members of whom expressed the intention of surrendering their national charters if either of these bills became a law.

That evidence is given to us by one of the Senators opposed to this measure, and I have in my hand a telegram from Festus J. Wade, who represents the American Bankers' Association, and who is on their currency commission, who says:

ST. Louis, Mo., December 13, 1913.

Senator R. L. OWEN, Washington, D. C .:

If plan of Hitchcock committee to have directors in reserve banks confined exclusively to Government appointment should carry, I do not believe banks of Nation would go into plan. Provisions of bill as amended by your committee in that regard will meet universal approval and do more to bring National and State banks and trust companies in than any other provision of bill. Hope you will not waver in your present position.

I have a telegram from Granger A. Hollister, in which he says:

ROCHESTER, N. Y., December 13, 1913.

tor Owen, United States Senate, Washington, D. C.:

As chairman of the banking and currency committee, Rochester Chamber of Commerce, I beg to urge that the management of the regional banks be kept in control of the member banks, as proposed in the original bill.

I have a similar telegram from Albert P. Eastwood; I have a similar telegram from the Morgan Machine Co.; I have another telegram from J. C. Powers, vice president of the Fidelity Trust Co., of like purport; another from Mathews & Boucher, of like purport; and one from C. H. Babcock, president of the Lincoln National Bank, of like purport, all of these being from Rochester, N. Y.

These only represent a few of the objections which come;

national banks that they shall contribute four hundred and odd million dollars of their reserves into the keeping of this board of directors. We have safeguarded the board of directors in the most careful and painstaking way by putting upon the board of directors three Government representatives, who include the chairman of the board and the deputy chairman of the board, the chairman of the board being the Federal reserve

agent representing the United States.

The Senator from Ohio [Mr. Burton] complains that under such circumstances the banks would have no power whatever. I do not think that is really true, because, at least, they would have the power to safeguard their own funds; they at least would have the power to choose the officers of the bank; but they would not have the power to deal unjustly with member banks; they would not have the power to do anything that was discriminating or unfair; and since these banks are under the supervisory control of the Federal reserve board, since the Federal reserve board is exclusively composed of representatives of the United States Government, and since the Federal reserve board could remove from office every one of these directors of Federal Reserve banks, the Government has complete control over the management, although the Government trusts the banks to safeguard their own funds and to administer judiclously the affairs of these banks. That is the real situation.

There are 18,000 State banks which are not in the national-

bank system, and which we can not compel to come into the system. The reason for the existence of that large number of State banks as compared with 7,500 national banks is that the State banks are more attractive in some respects; they are allowed a larger latitude in some respects; and if now we put this imposition upon the national banks and allow them no other privilege than to come to see the Government bureaus manage their reserves, we have a just right to believe that the representations which are expressed in the telegrams I have just read are well founded, and that a very large number of the national banks will take out State charters and our attempt will fail to establish a great bankers' bank, which will restore the freedom of the little bank and give it an opportunity of transacting its business with safety under governmental supervision of the reserves of the Nation.

Mr. LANE. Mr. President, I can understand how it is that the national bankers would object if they thought they were going to be deprived of the control of the reserves. That is the business view of it. They always object. I do not quite see, however, how a minority stockholder is going to control the business of a concern. I was a minority stockholder at one time in a corporation, and I know what that cost me, and I know

about what influence a minority stockholder has.

I did not know that there was so much complaint from the bankers in relation to this measure. I do know that I have personally talked to two, one of whom said that they would be able to accommodate their business to this new system, and one of them expressed his satisfaction with the bill. I do not know a large number of national bankers. I do know the fundamental fact, however, that the management of the business of the people should be under their control; it is intrusted to us, as their agents, and I see no reason why we should delegate that power to a coterie of national bankers and take it away from the people, where it by right belongs. I think that to do so is an error; I think that is an organic weakness in this

I do not believe that a measure founded on a basis of that kind can succeed to the extent that would a measure founded on a proper basis. I am firm in that belief. I believe the people are better able to govern their affairs than is some one who is delegated to the task. I believe they will not wittingly do wrong to themselves, whereas it might be to the interest of some appointee put over them to do them wrong. No doubt all the national banks which enter the system under the terms of the bill would enter it with benevolent intentions, but their own interest is a selfish one, which might lead them to lose sight of the interests of others. It would be but a very human failing. I do not like to see the interests of the people in a measure so important as the one now before us pushed to one side and this great power given into the hands of that particular interest which has used it in the past for profit and not for the benefit of the people.

I have heard a number of different opinions here from all sides. It sort of reminds me of the philosophy of Omar the tent-

maker:

Myself when young did eagerly frequent Doctor and saint, and heard great argument About it and about; but evermore Came out by the same door wherein I went.

The distinguished Senator from New York [Mr. Root] made an eloquent and forcible speech here the other day, and since wherein all the great natural resources of the country, or nearly

then, on the strength of it, I believe has been nominated for the Presidency of the United States. In that speech he in-dorsed the present existing system. A few days before that I heard a speech by the distinguished Senator from Massachusetts [Mr. Weeks], in which, as nearly as I could make out for a good deal of distracting talk goes on at one's elbow all the time-he proved by mathematical demonstration beyond dispute that the panic of 1907 was due to the fact that the banks in New York were loaning more money than they ever did before and at a lower rate of interest; so that it was seemingly a surplus of money which brought on the panic. [Laughter.

The Senator from New York finds the present conditions to be admirable. We all know what the conditions of the last few years have been. The Senator from New York fears calamity and dislikes to enter upon a change which may bring about inflation and the utter ruin of this country. I suppose that from the earliest dawn of time down to this day there never was a change proposed, either for the better or for the

worse, but that some good soul had-

More pangs and fears than wars or women have-

over what was going to happen if the change took place. There has always been the contest between the men who wanted to go ahead and those who did not. Without change there would have been no advance; without change brought about by some one who was dissatisfied we would still be savages, cannibals perhaps, and eating one another, and perhaps that would be the most merciful way in which we could get away with one another. [Laughter.] It would probably be less cruel and better than the present system and more useful to the world. There is always the contest, then, between the man who dreads what is going to happen if a change is made and the other man who wishes to go ahead.

Jubal sang of the wrath of God
And the curse of thistle and thorn,
But Tubal got him a pointed rod
And scrabbled the earth for corn. And scrabbled the earth for corn.

Jubal sang of the cliffs that bar
And the peaks that none may crown;
But Tubai clambered by jut and scar,
And there he builded a town.

New, new as the nine point two,
Older than Lamech's slain;
Wherever they be they can never agree—
Jubal and Tubal Cain.

What are the present conditions, which seem to appeal to my distinguished friend from New York, the conditions of to-day and those of the last 25 years?

I picked up the Washington Herald as I came down town this morning, and I read an article which is symbolic of many of them. It is headed:

Federal-owned plant is urged. "Armor ring" wants United States at mercy in time of war.

Then follows a statement which seems to have originated with Representative Tavenner, of the House of Representatives. The article says, for instance:

The article says, for instance:

Why is the War Department paying private manufacturers \$17.50 for a 3.8-inch shrapnel when it can, and is, manufacturing the identical article in its own arsenals for \$7.94?

Linger for a moment over these figures, Mr. Reader; it is your money that is being spent here. Seventeen dollars and fifty cents is more than twice \$7.94. The Government can manufacture two shrapnels for the price it is paying the ammunition ring for one and have \$1.62 remaining on each transaction.

Gen. William Crozier, Chief of Ordnance, testified before House committees that the Government can save 35 per cent by manufacturing its own artillery ammunition, and 25 per cent on artillery equipment. The program of the War Department calls for \$20,000,000 worth of ammunition, \$6,000,000 worth this year and \$14,000,000 in succeeding years, and \$11,000,000 worth of artillery equipment.

Were a business man in Uncle Sam's place would be give a large portion of this \$31,000,000 order to private manufacturers, or would be enlarge his own plants and save from 20 to 50 per cent on that portion of the order be would thus be able to take care of himself?

The solution of the problem is for Congress to provide in all bills appropriating money for munitions of war that the work be done in the Government arsenals and navy yards.

There is a statement here to the effect that these benevolent gentlemen who, under existing conditions referred to by Senator Root, have secured control of the manufacture of shrapnelwhatever they may be-and armor and other things, and have discriminated and did discriminate against this Govrenment in favor of the Russian Government on the price of armor plate, and so forth. It is indicative of a general condition which exists throughout this country, and it is one of the present conditions which are pointed to with pride as exhibiting the great advance of this Nation and the wonderful civilization to which we have attained and which we should be careful, very careful, not to disturb.

We have at the present time a state of affairs in this Nation

all of them, have gone by unfair methods into the hands of a few people—billions of dollars' worth; more natural resources than any other nation ever possessed in the history of the world-and the children of the people of this country barred from all opportunity of ever securing possession of any of them. This is one of the present conditions which I wish to see changed. It is one of the present conditions which I have hoped, or did hope, this bill might in a way be the entering wedge to separate us from.

We have had and do have combinations of a few whereby prices were fixed, and are now fixed, all over the United States to the producer, and then the same combination, on the other hand, fixes a determinate and an unalterable price which the people must pay for the same article or the products thereof, stifling the opportunity of the farmer and the farmer's children, on the one hand, and reaching greedy and unclean hands into the cupboard and taking the crust of bread from hungry children, on the other. Under the present conditions in this country which have grown up accompanying our financial system, false values are placed upon the stocks of public utilities, through which those who control them wring and wrest from the people who must use them as a necessity of life ten dollars for every one dollar of actual value returned to them.

I think it was along about June, about the time our friends on the other side were talking about the great calamity which would overcome the country in the event the tariff bill was passed and calling attention to the fact that factories at that time were beginning to shut down that the report was printed in one of the papers here that a certain single great corporation had just paid a dividend of \$1,000,000 a day profit for 120 consecutive days-\$120,000,000 profit on a concern one-half of whose stock consisted of water; \$120,000,000 in three months, the half of which, or \$60,000,000, was wrung by the meanest species of theft out of the people of this country. At the same time there were, and there are to-day, children working in the great factories, in the cotton mills North and South, children black and white, who work for less than enough to buy them food and clothing, for a mere pittance, wasting their little lives, shriveling up their physical beings, until when they reach the age of maturity they will be of the unfit and will reproduce the defective ones and the criminals of the future; and then, in the face of this, there was this one fatted corporation raking down a million dollars a day of profit, the half of which was practically stolen money.

Yes; it would be a great pity, almost a shame, to do anything

to disturb such a wonderful condition of affairs as this.

At the time they declared their dividend there were farmers who had their crops from the year before left on their hands and rotting in the ground and on the ground for the reason that

they were unable to reach a market with them.

Money which was carefully saved and set aside to the extent of millions upon millions of dollars by people who desired to lay aside something for the benefit of their loved ones after they died-insurance money-placed as sacred trust funds in the hands of great capitalists, these wonderful captains of finance, if you please, was turned against those who had deposited it in trust, to make conditions of life harder for them, and to maniputhe stock markets and to secure possession of public utilities and to squeeze out even more money from the people until the matter became a national scandal.

These are some of the antics which can be played with money and the finances of the country when they are intrusted to the hands of a few with the power to use them as they wish for their own personal benefit at the expense of the many.

Some statistician claims that under the present beneficent system of carrying on business in this country in the course of 25 years 90 per cent of all business enterprises fail inevitably. Ninety per cent are failures, despite every effort and the hardest kind of toil upon the part of those who inaugurate them, and the most careful supervision which they are able to give to them. It is not a good condition where 90 per cent of all men must of necessity fail.

It seems to me it would be a good country, or rather a much better one, a fairly good government, wherein the affairs of the people were placed upon a basis by which 90 per cent of them could succeed.

The Senator from New York said truly that gold goes to the country where it can purchase most. It always will, and it always has. Some one who has written upon the subject says that the portion of the specie which disappears and can not be accounted for afterwards, which returns no more into circulation, has been proved after careful investigation of the subject to have gone into and disappeared in India, and never comes out of that country, and that there are greater hoards of gold in India in the private hands of the ruling class in that than of them, and I wish to say a word on that subject.

in any other country in the world. Yet that country is upon a silver basis, and the rate of wages is about \$3 a month. Buckle, in his introduction to the "History of Civilization," says that in 2,000 years of the history of that country, under the caste system which exists there, there were thousands upon thousands and hundreds of thousands of people who never at one time in that period ever had enough to eat, who lived entirely upon the broken damaged rice, and the flour from it, and had never been able to eat the whole grain of rice. They were so put to it with distress and poverty that each and every year they had to sell even their seed rice, and live upon the offal; and one of the causes of their poverty was the extortionate rate of interest which they have to pay for money to buy their seed to put in their crops each and every year.

That is the condition in a country which gathers the surplus of gold. The collection of gold and the hoarding of it has had nothing whatever to do with the matter. I hoped to hear the Senator make mention of that fact but he did not do so.

In that country, barring the Sepoy rebellion, there has not been a rebellion in 2,000 years. Every 10 to 20 years, however, a famine comes and kills off hundreds of thousands of those unfortunate people. That is no evidence of prosperity. It is no evidence of the prosperity of a people to set forth as an example a country which gathers gold.

It was pointed out by the Senator that England had a good system of financial management of its currency, a good system in which banking was safe, and that the affairs of that country were well handled in that respect-England, with an increasing rate of pauperism which is greater than that of any other nation in Europe! England, which stands shivering in terror at the thought of an invasion on the part of Germany, with the physical measurements of her soldiers decreasing year by A great and successful banking system, then, to which the Senator who is chairman of the committee that submitted this report and the Senator from New York points with pride, brings no prosperity to the people of England. They are the most unhappy of people, where women—full-grown women—with children work for \$2 a week! The adoption of their financial system will not help this country.

The trouble with England, and the trouble with India, is that the people are kept from free access to their governmental They are kept from having equal access to their circulating medium, and to the natural resources of the country, and to its soil.

In India, so closely are the people driven that they give mortgages on the unborn calf. In England the lands are taken up in large landed estates, and any person who travels through England will see more lands uncultivated in proportion to the size of the country, more unimproved and untilled farm lands, used merely as sheep runs, than he will find in any farming section of this country.

The people of this country have had opportunities in the past, but now they are being forced aside. The coal is gone. The timber is gone. No more can you go out and secure a homestead. The oil is under the domination of a few. powers are being taken up. The opportunities for young men are becoming scarcer day by day and year by year. The condition here will soon be what it is in European countries. form of bill affecting the circulating medium of the country will do its duty if it does not allow the people, each and every one, to have full and free and an equal access to it.

There is in this bill a giving over of the entire management into the hands of the national bankers. It adopts the national bank system, which always was a special privilege. A set of men, five or more, who raised \$100,000, let us say, could go to the National Government with it and secure \$100,000 worth of bands which raised \$100,000. bonds which paid 2 per cent, less half a cent for some Federal tax, leaving 1½ per cent clear; and then the Government gave them the privilege of issuing a dollar's worth of currency, the full equivalent of the amount of gold which they placed on deposit, and a handier circulating medium than gold. The citizen could not secure that right. That was a special grant and a special privilege, and it grew into an evil. It is those people, the representatives of a special privilege, who are now in this bill receiving the right to say how the financial affairs of the country shall be managed. I deny their right to do so. I do not believe they should be granted any such privilege if it is to be refused to the humblest citizen.

The Senator from Oklahoma [Mr. Owen] this morning, in taking to task my friend, the Senator from Nebraska [Mr. Hitchcock], for his sins of omission and commission, went off to one side and said something unpleasant about other Demobonds which paid 2 per cent, less half a cent for some Federal

to one side and said something unpleasant about other Demo-cratic Senators who did not go into the conference. I was one

did not go into the conference, not for the reason that I did not like the Senators who did go into it, not that I would not go far to please them, but because I felt that the business of the people should be done openly and freely and not behind closed doors. It is not that I think there was anything wrong done there; yet I believe a better measure, a measure more nearly conforming to the desires of the people, can be made in the open, where each man is held responsible for what he says and where the people know what he says and where to find him, than can be accomplished where the people are not allowed to hear what is said or know what is being done.

If you please, by what right do the agents of the people re-fuse unto the people full and free access to their affairs? What right has the agent to shut the door on the owner and say, "We will exclude you"? It is a public-be-damned sort of a proposition, which I do not like. If I had an agent working for me, carrying on my affairs, and he locked the door and shut me out on the implied assumption that I was a fool, while he carried on my affairs to suit himself, just as soon as he unlocked that door and got out from behind it he would lose his job. I would be so infernally mad about it I do not know what I might

or might not do to him.

I do not want to say anything discourteous, and I do not mean to cast any reflection, but I think it would be a lot better for the people of this country, and their affairs would be managed more nearly in their interest, if we did away with the caucus and came out and discussed their business in the open. In a question of party policy perhaps the caucus would be necessary and useful. I will not say a number of things I had put down on my notes to say, for I might have to apologize

for them. [Laughter.]

There seems to be a good deal of worry about the gold I was looking over the Treasury report a day or two As far as the balance of the gold is concerned, I find that there is in the country \$633,000,000. That is \$6.33, if you please, for each man, woman, and child in the United States per capita, and 100 men, I am told, hold nine-tenths of that. That leaves about 63 cents for the rest of them. It would not buy eggs for breakfast. [Laughter.] There is not enough gold in the hands of the people, the plain common people of the country, to buy eggs for breakfast for two days. There is no use to worry about that amount of money. There is not enough gold in the hands of the people to fill all their decayed teeth. [Laughter.] There is not enough gold in the

Give him free opportunity to get what he can earn day by day and free access to it and he will get along all right. This bill places great power in the hands of a few. The farmer, anybody, any citizen of the United States who can establish the fact that he is a citizen, should have the same right here granted to the national banks to present his dollar and receive a dollar bond, if you please, drawing 2 per cent interest, and be permitted to issue a dollar of currency, if this method establishing an elastic

currency is founded on any basis of justice. You will not have gold in circulation nor can you get it in

circulation by such legislation as this.

The people do not need any self-appointed guardian to take charge of their currency or the circulating medium. Make your law plain and simple, and put it freely in the hands of the people, where they can adapt it to their needs, and there will be no inflation or further trouble. No man in the world is fool enough to do a thing which is going to harm himself. He will not do it intentionally. He may make a mistake and hurt himself, but if he does he will correct it as soon as he can. can trust the people.

I am going to close by saying, in a general way, that in so far as this bill is concerned I believe it will be an improvement over the bad condition of affairs which now exists. But it is

merely an improvement; it is but a step forward. It is a step in advance, but it is a limping one. I hope it

will lead us unto something better.

The Senator from Oklahoma can talk here from now until

the time expires next Saturday night.

Mr. WORKS. Mr. President, I gave notice this morning that I would submit some remarks on the pending legislation at 8 o'clock this evening, but I have no desire to delay a vote upon any of these amendments or upon the bill itself, and as there is an amendment pending now to which my remarks will apply to some extent, with the permission of the Senate, I will say what I have to say at the present time.

Mr. President, I know but little about practical banking and currency, and that only theoretically and from observation. I shall avoid any attempt to deal with the technical features of the bill. I should like, rather, to take a common-sense view of the evil to be remedied and the sufficiency or insufficiency of the proposed legislation to give the needed relief. I am not at all satisfied with either the Owen or the Hitchcock bill, and the

House bill is out of the question. I am strongly in favor of one central Government-controlled bank. The Hitchcock bill comes nearer to this than the other, and, principally for that reason, is less objectionable than the Owen bill, from my point of view. Therefore I shall address myself to what seem to me

to be the defects—the iniquities of the latter.

Mr. President, the avowed object of this proposed legislation is to relieve and protect the people from the evils and oppression of the present banking system, and, to this end, to limit and restrain the money power of the country operating through that system. I am not one of those who believe bankers to be worse. less honest, or less patriotic than men engaged in other lines of business. But they are in the banking business for profit and gain. Banks are not charitable or benevolent institutions. They are not even organized or operated primarily for the public good or convenience. They are operated in the interest of the people only to attract trade and make money for their stockholders. If they can serve their private interests best at the time and without permanent loss to themselves by so doing, they forsake the people and look wholly to their own interests. While they are not dishonest or unpatriotic, they are the most cold-blooded and merciless of all classes of reputable business men in their business transactions. They form their local clearing houses in every city of any size and make them the medium of combinations and, sometimes, conspiracies against the public interests, and thereby produce business stringency, fear, and finally a panic nation wide. There is no more cowardly man of business than the banker.

The fear of a "run" on his bank is always before him.

the first indication of a depression in business or a stringency in the money market, he begins to refuse loans, draws in the loans his bank has already made, and shuts up in the vaults of his bank the money collected. Thus he contracts the money in circulation, adds to the existing alarm over conditions, and brings on the panic it should be his business to prevent. He fails to of the pame it should be his business to prevent. He fails to help people when they need it most. The banks are the feeders of the great trusts that Congress is trying so hard and so inef-fectually to curb, control, and regulate. They invest the money of their depositors in the powerful combinations they serve and deny credit to competing men or corporations, thus establishing and maintaining the monopoly that is so inimical to the public By this misuse, often criminal misuse, of their power, they build up and maintain great combinations of wealth, and bankrupt and destroy lawful and legitimate competitors. Whatever good may come from our banking system, I have mentioned

a few of the evils it fosters and maintains.

Mr. President, any effort at legislation affecting banking and currency should have for its object the destruction of at least some of the evils existing under the present system. thing that would be effective, above all others, would be to deprive banks and bankers of the power to combine against the public interests and serve big business, as against the people, by bringing them under governmental control. Any effort to control the greed of the trusts and render the overwhelming influence of the money power the guardian and not the enemy of the interests of the masses of the people, must deal with the banks as among the chief offenders. Without it, any effort to control the great trusts and combinations will be just as fruit-

less in the future as it has been in the past.

So, Mr. President, in the study of this bill, that has been agreed upon by the Democratic caucus, I have tried to find to what extent, if at all, it meets this prime requirement. I am anxious to aid in the enactment of any law that will be effective to remedy wholly, or in part, these crying evils of the existing banking system. This investigation of the merits of the proposed legislation has brought sore disappointment. Instead of taking away any part of the vast power for evil, now resting in the banks, it increases that power. It places in the hands of the banks one more powerful instrument of oppression and one that is no better guarded than the present national banks. The regional banks provided for are in no sense Government institutions. They are private banks owned and controlled, not by individuals, as in case of national banks, but by the banking corporations already in existence and which we are assuming to control in the public interest. The bill, to use plain language, is, when we consider its objects and purposes, a sham and a delusion. It affords no protection to the public interests, but adds to the power of the banks. It assumes to control the banks it creates through the Federal reserve board. That board will have just about as much control over the practical daily business of the regional banks as the man in the moon.

Now, sir, let us look for a moment at the scheme provided for in the so-called Owen bill, but really the bill of the secret cau-

cus of the Democratic Party.

To begin with, it provides for bankers' banks, not people's banks or Government banks. It has been so stated, in broad terms, and correctly stated, by the Senator from Colorado [Mr. SHAFROTH]. He takes us into his confidence and that of the secret caucus and says you could not form any other kind of bank, because the banks and bankers would not support it. That does not sound quite good, does it? Have we come to the point in the history of this country that we can not form a bank without the consent of existing banks or maintain it without turning it over to them? That is the essence of the declaration of the Senator from Colorado.

The bill is founded on that understanding and belief. Senators do not, in my judgment, believe in the establishment of any such banks. The bill is an unfortunate compromise, founded in part on a mistaken declaration in the last Democratic national platform. If Senators were free to follow their own convictions, and would do so, I am persuaded that a large majority of them would stand for a central bank owned and financed by the people and managed and controlled by their Government. But let us see whether the regional banks provided for in the bill are bankers' banks or not. It provides, in the first instance, that national and other eligible banks shall have the first right to subscribe for the stock of the new banks, and they are required, by the terms of the bill, to subscribe for an amount of the stock equal to 6 per cent of their paid-up capital stock and surplus. suppose it is expected that this will take up all of the stock. No one can doubt that it will take up a majority of it and give the banks complete control. But it can make but little difference whether they acquire a majority of the stock or not, for the bill is scrupulously careful to give the banks control in any event, for the private individuals who may acquire any part of the stock are denied the right to vote, except by voting trustees who are directors of the banks. To insure continued control by the banks it is provided that shares of stock owned by member banks shall not be transferable or hypothecable. The directors of the banks are chosen by electors selected by the banks, and other holders of stock, even if they own a majority of the stock, are not allowed to vote or participate directly in the election of the directors who are to conduct the business of the banks. Does that look like legislating in the interest of the people? Did some one say this bill is objectionable because it forces the banks to take the stock? Does anyone really believe the banks will need either coercion or persuasion to induce them to subscribe for the stock?

Has anyone heard of any bank or bankers opposing the bill in its present form? If anyone has, he does not know how good our Democratic friends have been to him or how they have deferred to his wishes. You may feel perfectly sure that banks will be eager to take over and manage these banks for the bankers' good. The bill does not extend to the people the right to subscribe for any part of the stock, even under the unfavorable conditions I have mentioned. It only provides that-

should the subscriptions by banks \* \* \* be, in the judgment of the organization committee, insufficient to provide the amount of capital required therefor, then, and in that event, the said organization committee may, under conditions and regulations to be prescribed by it, offer to public subscription, at par, such an amount of stock \* \* \* as said committee shall determine.

What a magnanimous concession to the people! They may become stockholders when the organization committee accords them the privilege, and on such terms and conditions as that committee shall impose, and on the condition that they shall not participate in the management and control of the bank, but subject themselves to the complete control and domination of the member banks. Great privilege that, is it not, especially when by the terms of the bill they are made—

individually responsible, equally and ratably tracts, debts, and engagements of such banks. \* \* \* for all con-

The exact provision of the bill relating to the right of stockholders to vote is as follows:

Stock not held by member banks shall not be entitled to voting power in the hands of its holders, but the voting power thereon shall be vested in and be exercised solely by the class C directors of the Federal reserve bank in which said stock may be held, and who shall be designated as "voting trustees." The voting power on said public stock shall be limited to one vote for each \$15,000 par value thereof, fractional amounts not to be considered. The voting trustees shall exercise the same powers as member banks in voting for class A and class B directors.

There may be some comfort to the private stockholders in the fact that class C of the board of directors is made their voting trustees, and that the members of that class are appointed by the reserve board. But that would seem to be small con-solution when it is considered that at least two out of the three class C members must by the terms of the bill be bankers of "tested experience," and who would naturally sympathize and act with the member banks as against private stockholders.

It is quite evident that the regional banks are intended and expected to be money makers and not mere protectors of the public welfare against the money powers. The bill provides:

After all necessary expenses of a Federal reserve bank have been paid or provided for the stockholders shall be entitled to receive an annual dividend of 6 per cent on the paid-in capital stock, which dividend shall be cumulative. One-half of the net earnings, after the aforesaid dividend claims have been fully met, shall be paid into a surplus fund until such fund shall amount to 40 per cent of the paid-in capital stock of such bank, and of the remaining one-half 50 per cent shall be paid to the United States as a franchise tax and 50 per cent shall be paid to the United States as a trustee for the benefit of depositors in falled national banks, the money to be kept in and losses from failures to be paid from it as a depositors' insurance fund under a division of the Treasury to be constituted and managed under such regulations as may be prescribed by the Secretary of the Treasury.

Six per cent to stockholders, to begin with, shows that beneficence is subordinated to profits. But it is understood that this new system of money-making will, over and above this liberal dividend to stockholders, create a fund of 40 per cent of the paid-in capital stock and leave a handsome balance to the Government as a franchise tax and a depositor's insurance fund.

Talk about trusts and combinations inimical to the public This bill lays the foundation for one of the greatest welfare! trusts this country has ever known. It provides for the accumulation of millions of dollars in the hands and under the control of the banks of the country, without any efficient or adequate control over the use of this vast sum of money. I say without adequate control. What control over these new banks is given by the bill? Is it any greater or more efficient than the control the Government now has over the national banks the control the Government how has over the national banks existing under the present banking system through the Treasury Department? No; it is no better. In my judgment, it will not be as good or effective. The bill, after vesting complete and plenary power in the member banks to the exclusion of the Government and private stockholders, provides for a Federal reserve board consisting of seven members, including the Secretary of the Treasury, to be appointed by the President.

The powers of the board are specifically defined as follows:

tary of the Treasury, to be appointed by the President.

The powers of the board are specifically defined as follows:

(a) To examine at its discretion the accounts, books, and affairs of each Federal reserve bank and of each member bank and to require such statements and reports as it may deem necessary. The said board shall publish once each week a statement showing the condition of each Federal reserve banks and a consolidated statement for all Federal reserve banks. Such statements shall show in detail the assets and liabilities of the Federal reserve banks, single and combined, and shall furnish full information regarding the character of the money held as reserve, and the amount, nature, and maturities of the paper and other investments owned or held by Federal reserve banks.

(b) To permit or require Federal reserve banks to rediscount the discounted paper of other Federal reserve banks at rates of interest to be fixed each week or oftener by the Federal reserve board.

(c) To suspend for a period not exceeding 30 days, and from time to time to renew such suspension for periods not exceeding 15 days, any reserve requirement specified in this act: Provided, That it shall establish a graduated tax upon the amounts by which the reserve requirements of this act may be permitted to fall below the level hereinafter specified, such tax to be uniform in its application to all Federal reserve banks and to member banks required to keep the same reserves.

(d) To supervise and regulate through the bureau under the charge of the Comptroller of the Currency the issue and retirement of Federal reserve notes, and to prescribe rules and regulations under which such notes may be delivered by the comptroller to the Federal reserve agents applying therefor.

(e) To add to the number of cities classified as reserve and central reserve banks, the cause of such removal to be forthwith communicated in writing by the Federal reserve banks in central reserve banks, the cause of such removal to be forthwith communicated in writin

suspension.

(i) To require bonds of Federal reserve agents, perform the duties, functions, or services specified or implied in this act, and to make all rules and regulations necessary to enable said board effectively to perform the same.

perform the same.

(i) To exercise general supervision over said Federal reserve banks.

(k) To authorize member banks to use, as reserves, Federal reserve notes, or bank notes based on United States bonds, to the extent that said board may find necessary.

(i) To grant by special permit to national banks applying therefor, when not in contravention of State law, the right to act as trustee, executor, administrator, or registrar of stocks and bonds under such rules and regulations as the said board may prescribe.

A Federal advisory council is also provided for. This council is selected by the Federal reserve banks, controlled by the mem-The powers and duties of the Advisory Council are ber banks. thus defined:

The Federal advisory council shall have power, by itself or through its officers, (1) to confer directly with the Federal reserve board on general business conditions; (2) to make oral or written representations concerning matters within the jurisdiction of said board; (3) to call for information and to make recommendations in regard to discount rates, rediscount business, note issues, reserve conditions in the various dis-

tricts, the purchase and sale of gold or securities by reserve banks, open-market operations by said banks, and the general affairs of the open-market operations reserve banking system.

The powers of both the reserve board and the advisory council are, as will be seen, quite general in their scope and have but little to do with the practical, everyday business and operation of the reserve banks except the one giving the reserve board general supervision over the banks. These powers are in no sense more specific in any material respect or more effective than the supervision and control given now to the Secretary of the Treasury and Comptroller of the Currency over national banks. The extension of the powers of the Treasury Department over the reserve banks would have been just as effective, and probably more so, because it would be direct governmental control, which is much to be preferred and would be far less expensive. board is made up, in its active and executive forces, of bankers who are only bound to resign as officers of banks and surrender their stock to render them eligible to membership on the board.

Mr. President, we are proposing by this bill to establish a new and additional banking system, to be controlled absolutely by the banks organized under the old system. It will cost millions of dollars every year in additional high salaries, that, in the end, in one way or another, the people must pay. If this additional tax on the business of the country could bring any protection or advantage to the people who must ultimately bear this enormous added burden, it might be borne willingly and with resignation. But, sir, in my judgment the bill, if it becomes a law,

will have no such beneficial effect.

I do not feel myself competent to judge of the good or bad effects of the provisions of the bill relating to the currency. But the purpose of such provisions, if beneficial, do not call for any such elaborate and complicated banking and currency scheme as this, adding, as it does, all these additional banks, with the enormous sum of money they are to cost. In my judgment banking legislation or legislation intended to regulate the management of banks might much better be wholly separated from legisla-tion relating to the currency. But, as I have said, I am not disposed to enter upon this phase of the subject. I leave it to Senators better informed on that branch of it than I am. fact, other provisions of the bill are so manifestly indefensible that to me the consideration of its provisions that I have not assumed to pass upon are not of much consequence.

Mr. President, public sentiment is demanding banking and currency legislation. Much of it is, I have no doubt, manufactured and uneducated sentiment. The Democratic Party has yielded to this sentiment to the extent of formulating the bill I have been discussing. The masses of the people will accept it as a compliance with the public demand. It will go to the country as such. But, sir, this should not satisfy the leaders of that great party in this body. They should stand firmly for the right kind of banking and currency legislation and insist that none

other shall be enacted.

I can not allow myself to be led by public sentiment to support a bill in such form as to betray rather than protect the public interests. I will very gladly support any bill that carries the purpose and is reasonably calculated to serve and protect those interests, but this bill is not of that kind. It may serve the Democratic administration temporarily, until thoughtful people come to realize what it really is, but no longer. It will, I believe, benefit no one but banks and bankers and big business generally. It will certainly not help the competing small business or the whole people. It is sincerely to be hoped that the dominant party will see its way to remodel the bill and make it what the public welfare demands.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Nebraska [Mr. HITCHCOCK].

Mr. WEEKS. Mr. President, two or three days ago the senior Senator from Missouri [Mr. STONE] and the Senator from Oklahoma [Mr. Owen] made some reference to certain national bankers and national banks. I have not any brief to speak for any individual in such connection, and yet I should like, if the Senator from Missouri were here, to call to his attention the relation which pertains between the national bankers in the country, other bankers in the country, and the reserve city bankers against whom the charges were made.

It is not a difficult matter to make charges against the reserve city bankers, because there are comparatively few of them, and an insinuation has been abroad in the land that they were taking advantage of their position to make unreasonable and im-The real fact is that the closest relations obtain between the bank's customers and the bank itself.

The banker advises his depositor and his borrower about con-

so far as he can, to aid the borrower or depositor of his bank in his operations, so that his customer may make more money than he could under other conditions; and it is not a fair statement to say that because a banker advises his borrower that conditions are not satisfactory and suggests to him caution in his operations the banker wants to break down the condition of business or to discourage business activity. The banker, under such conditions, is simply advising those in some degree dependent on him of business conditions as he sees them, and he would not be doing his duty if he did not take such a course.

For instance, suppose half a dozen of the banker's customers come into the bank to-day and make their annual statements or their semiannual statements, showing the condition of their business, and suppose in every case that those borrowers of the bank showed that they had not made money during the previous six months or that they were losing money during the previous six months, would the banker be justified in loaning them as much money as he had done before? Would he not be a wise banker if he said to them, "Evidently business conditions are not satisfactory from your standpoint and you had better go slowly or you may get into trouble"? That is what any banker who had the interests of his customers at heart would say, not only on their account, but on his own account as well, because if a banker is going to loan money to those who are losing money in the ordinary conduct of their business, sooner or later his bank and his stockholders are going to get into trouble as a result of it, and the banker himself will be a discredited man. Therefore when Senators say, even if they have the evidence to that effect, that because bankers are advising people to go slowly and curtail their operations to some degree, it is not any evidence that bankers are combined together to discourage business or to break down business, but it is an indication that bankers are, as they always have been, conservative in their judgments and wish to proceed along conservative lines.

The same relation which obtains between the bank's customer and the banker himself obtains to a similar degree between the country bank and the banker in reserve cities. For instance, the country banker very often is located in a community where his deposits are greater than are the demands of that particular community. We have had brought to our attention specific cases where perhaps not more than 10 or 15 per cent of the deposits of a bank were required by the local merchants or manufacturers of that particular town or business community. Under those circumstances the banker must loan his money to some outside borrower. That is one of the reasons why the demand comes, from western banks especially. that a certain part of their money may be loaned on farm mortgages, the farms being somewhat remote possibly from the location of the bank, because they must either loan in that way-and they are doing it now either directly or by indirect processes-or they must buy commercial paper through the ordinary channels of trade; that is, through note brokers who are dealing in commercial paper.

Under those circumstances, not being familiar frequently with the credit of the makers of the notes which the note brokers have to sell and being dependent upon commercial statements handed to them when the notes are sold to them, they take the natural course and go to their reserve city bank, where a credit department is maintained at an expense which would not be possible in the case of a small bank in a small community, and get the benefit of the judgment of the reserve bank, as well as of the note broker and of the commercial agencies, which they consult very frequently—perhaps more frequently than we know—and they are saved from loss under those circumstances.

Again, they obtain the advice of their reserve banks in various other matters. For instance, they buy and sell their Government bonds to their reserve banks and they increase their circulation or retire it by notifying their reserve banks what they wish to do, and, unless they are discouraged from doing so, the actual operation is conducted by the reserve bank or by the reserve banker. In more ways than I could enumerate the operations of the country banks are dependent to a considerable extent on the advice and judgment of the bankers in the large communities.

Who is the banker in the large community? He has been referred to here pretty severely by the senior Senator from Missouri [Mr. Stone], who has been quoted by the Senator from Nebraska to-day. He has been referred to pretty severely by the Senator from Oklahoma, though I think he was not referred to by the Senator from Nebraska in that connection. however, to call to the attention of the Senate a comment made by the Senator from Oklahoma relating to certain classes of ditions as he sees them, and about which very generally he knows more than does the customer of the bank. He attempts, by the Senator from Oklahoma relating to certain classes of bankers or certain bankers without mentioning their names, because I wish to connect this statement with the method proposed by the Owen faction of the committee to control the reserve banks.

The Senator from Oklahoma said the other night something like this:

We are establishing the individual freedom of the individual bank.

I think nobody has ever doubted that the individual bank in this country had individual freedom. In fact, we are all of us boasting, every time we have referred to it, of the independence of our banking system and of our disposition to maintain an independent banking system. So far as I know, and I think so far as anyone knows, there is absolute independence to-day in our banking system.

He goes on to say:

We are enabling the individual bank to perform its function without fear or a quivering cowardice that dares not go against the secret word that passes out from New York all along the line that "there are going to be tight times." We have heard that deadly whisper too many times in this country; that secret, sinister, cowardly whisper, "There are going to be tight times"; "watch out," "watch out," "watch out."

Well, what would you expect the reserve city banker who has the deposits of country bankers to say to the country banker when the country banker asks him what the conditions are likely to be? If, in his judgment, he thought there were going to be hard times, or if he thought money was going to be higher, or if he thought business was going to fall off so that money eventually would be easier, do you not think the reserve city banker ought to answer truthfully and honestly just what he thinks? Is it not possible that frequently he must say to his correspondents: "Why, yes; I would have a care, because I think there is overexpansion all over the country and there has got to be liquidation. If I were in your place I would look after my reserves and I would not overload, and I would be unusually careful for that reason." Why, of course that is what the reserve city banker would say; and if he did not do it, he would not be performing his proper function.

do it, he would not be performing his proper function.

Now, let us take some of the reserve city bankers who are at the head of large institutions. Who are they? Why, almost without exception they are men who have come up from the ranks.

They have gone into the banks as boys, and have learned the banking business from the ground up, just as most men learn any business if they are going to be successful in it. They have become the heads of these great institutions because the owners of the institutions recognized in them competency, experience, and business capacity. Otherwise, they would not be at the head of anything.

Take the case of the president of the National City Bank of New York. He was born somewhere out in the West, I do not know where, and drifted East. He became an Assistant Secretary of the Treasury and later the vice president of the National City Bank and later its president. Does anybody suppose the owners of that bank, who have \$50,000,000 invested in its capital and surplus and who are represented by the directors, would have elected Mr. Vanderlip president of the bank unless they had thought he was a competent man to manage the bank's affairs? They would have been a lot of lunatics if they had taken any such course unless convinced of its wisdom. They selected him because he seemed to be the most available man to hold the position at the time he was elected.

You may take the same conditions in almost any other reserve bank in the country, and you will find that the men who have come to the front, and who are now managing the great central banks in the United States, are men who were born in the

country and have made their own way.

Almost invariably our bankers are competent men to-day. We have a much stronger force of banking men in the United States to-day than we had 25 years ago, when men did not take up banking as a profession to such a degree as they do now, but drifted into it after they had had some experience, some success, in some other business affairs. Then, very frequently, they were not first-class bank men as professional men. Now we have in this country, I think, as good bank men as there are anywhere in the world. They are the very men who have made their way, and who should be praised instead of condemned, not only on the floor of the Senate of the United States but everywhere else. To say that they are not good men, that they are bad men, is simply saying that such men are representing the interests which have been placed in their care in a malign way. To use the expression used by the Senator from Oklahoma is a sinister way to refer to men without offering any proof which would establish the fact that they are bad men.

Mr. OWEN. Mr. President, I did not exactly understand the reference of the Senator.

Mr. WEEKS. I am sorry the Senator was not in his seat to hear what I had to say. If there is anything in the remarks I make which is any reflection at all upon the Senator from Oklahoma, he knows quite well that I shall be prepared to make amends on the floor of the Senate in a public way and a proper way. I read an extract from the Senator's speech the other night, and I was commenting on that extract.

If what the Senator from Oklahoma has said about bankers is true, and if what the Senator from Missouri has said about bankers is true, then they, as advocates of a system which is going to turn the reserve banks of the country over to those men, are taking a step which from any standpoint is not justi-It is true, of course, that the big bank has no more votes than the small bank in electing the directors of class A and class B to the boards of directors of the reserve banks. They have exactly the same weight. Everybody who knows anything about it knows, however, that many if not most of the country banks are going to consult with their reserve bank correspondents. and are going to say to the reserve bank men: "Who is the best qualified man in this whole region to occupy that place?" They are going to be influenced-I want to repeat that wordthey are going to be influenced, and properly influenced, by the reply they get from their reserve correspondents. Very largely the very men who are being reflected upon by Senators on the floor of the Senate are going to have to do with the election of the directors of the reserve banks; and it will be well for the reserve banks and well for the country that they do have that influence in electing these directors, because we shall be very much more likely to get first-class men in that way than we otherwise would. But if the comments which have been made reflecting on these men are justified in any degree, then the greatest care should be used in turning over to them the management of the reserve banks, because not only are they going to elect, six of the nine directors, but of the other directors, two of them in class C, one is to be, under the provisions of the bill proposed by the Senator from Oklahoma, a man of "tested banking experience." That is, one of the Government appointees is to be a man of tested banking experience, and he is to be the Federal reserve agent at the reserve bank and the chairman of the board. Another one of the two is to be the vice chairman of the board, and he also is to be a man of tested banking experience

So, if this policy is carried out, we are going to have three bank men elected by the member banks. We are going to have the chairman of the board and the vice chairman of the board men of tested banking experience. We are going to have three men representing agricultural, manufacturing, or other interests, elected also by the banks. In other words, as far as the banking element is concerned, we are going to have eight out of the nine directors on that board practically bank men or elected by the banks.

Personally, I have not any such feeling about bankers as the Senators to whom I have referred. There are improper, impure, dishonest men in the banking profession, as there are in all professions; but if they were to select every man on the reserve board I would have no fear that in most cases competent men would be selected. Yet, on the other hand, I have not any fear that if they select four men and the President of the United States appoints five men there will be good management of the reserve banks. Certainly this will be so if ordinary care is used in the selection of the five men. Of course, I did not mean that the President would directly select these men, because it is proposed in this measure that these men shall be appointed by the reserve board; but I am assuming all the time that the President is to do his duty and is going to select the biggest, broadest, best men in the country as members of the reserve board, who will put men of that grade on guard in charge of the reserve banks.

As long as the Senator from Oklahoma is present. I wish to make one comment about the method of procedure in disposing of the amendment which the Senator from Nebraska [Mr. Hitchcock] offered to section 2, and that is his motion to lay on the table.

Of course, when that motion is made, it is not debatable, and therefore I had no opportunity to say then what I should have liked to say about this form of procedure. We are now comparing the House bill with the Hitchcock amendments in the propositions which are before the Senate. It is a question whether the Senate prefers the House bill itself or whether it prefers the amendment which has been prepared by the section of the committee represented by the Senator from Nebraska. By laying an amendment on the table, no comparison is obtained. There is no judgment expressed by the Senate as to whether we prefer the House bill or the Hitchcock amendment, but simply

the roughshod, steam-roller process, having the votes, disposing

of an amendment by laying it on the table.

In my judgment it is a bad procedure. I hope the Senator from Oklahoma, in the powerful position which he now holds, with an assured majority behind him, will give the Senate an opportunity to express its judgment as to whether the House bill section should be accepted as preferable to the Hitchcock amendment section or vice versa. That seems to me to be the fair and reasonable method of procedure. I am saying it now, because, as I said, I shall not have an opportunity to say it when the Senator makes a motion, as he may, to-night, to lay an amendment on the table.

Mr. OWEN. Mr. President, the reason that motion was made was because there were so many things involved in the section. Take the present section 4, for instance. It does not confine itself to five directors named by the Government and four named by the banks. It involves also the method of selecting the directors. It involves also the capitalization, which is changed from three millions to six millions. It involves the proposal that the Federal reserve board shall authorize these banks to begin business instead of the organization committee, and it makes a number of other changes.

Mr. WEEKS. The Senator is quite correct in that.
Mr. OWEN. There are so many changes in it—

Mr. WEEKS. And yet I should like to have an opportunity of seeing whether or not the majority in this Chamber are going to use their individual judgment in connection with voting on any part of this bill. I will be perfectly frank with the Senator. If it were a question between the substitute which the Senator has offered and the amendments which will be offered by the Senator from Nebraska, that would be a different proposition; but I should like to have a vote by Senators who have been listening to this debate, to assure us that we have not been wasting our time, but that there is a preference as to some of the amendments which will be offered by the Senator from Nebraska to certain sections of the House bill as it came to the Senate last June.

Mr. OWEN. I did not think the Senate was being precluded from expressing its opinion by laying such an amendment on the table. It is, in effect, simply a declaration that the Senate does not wish to pursue the policy of perfecting the bill in There are innumerable smaller amendments which would be necessary to perfect the House bill along those lines. I thought it was only a test on the part of those who preferred certain principles which were in the Hitchcock amendment. By moving to lay it on the table the test would be made and the Senate in that way would express its wishes in regard

to the matter

Mr. WEEKS. I wish to urge the Senator from Oklahoma to take the other course to-night and give the Senate an opportunity to express its preference, without having to express its disapproval of an amendment which may be offered by the Senator from Nebraska or anyone else. If a motion is made to lay on the table, I do not see how any other conclusion can be reached than that a disapproval of that amendment is expressed, as compared with something that may be substituted later on.

Mr. WILLIAMS. That is what we intend to do. Mr. WEEKS. I yield the floor now, Mr. President.

Mr. BRANDEGEE. Mr. President, I wish to call the attention of the Senator from Massachusetts to page 61 in the bill of the print of December 1, where it provides, in line 15, that United States bonds bought by a Federal reserve bank against which there are no outstanding national-bank notes may be exchanged at the Treasury for one-year gold notes. I wish to ask him whether that should not also apply to member banks.

Suppose a member bank has bonds on which it has not issued any circulation. Why should it not have an equal privilege with the reserve bank to exchange its bonds for gold notes at the

Treasury

Mr. WEEKS. I think that exchange should be carried on through the reserve bank. It would be a very simple thing for the member bank to have that done by the reserve bank author-

Mr. BRANDEGEE. If the Senator will pardon me, on the previous page, page 60, there is a provision that a member bank, when it wants to get rid of its bonds upon which it has circulation, may do so by making application, and the Federal reserve bank is bound then to take them off its hands. I am talking about bonds which might be owned by a member bank upon which it has no outstanding circulation. This seems to give the reserve board the privilege of getting gold notes from the Treasury in exchange for the bonds it may have, but it does not seem to furnish any opportunity for the member bank to get a market for its bonds. I am not at all sure that I am right about it,

but I noticed the provision was not there, and I wondered why it should not be there, to treat the member bank on the same basis as the reserve bank.

Mr. WEEKS. Let me call the Senator's attention to the fact that if very many banks attempted to do that at one and the same time, they might retire their bond-secured circulation and exchange their bonds for one-year notes, thereby contracting the circulation and producing a serious condition by so doing. I am not sure it would be wise to permit that to be done in a wholesale way; but if it were to be done in a limited way I do not see any objection to it.

#### RECESS.

The VICE PRESIDENT. The hour of 6 o'clock having arrived, the Senate stands in recess until 8 o'clock p. m.

The Senate thereupon (at 6 o'clock p. m.) took a recess until 8 o'clock p. m.

## EVENING SESSION.

The Senate reassembled at 8 o'clock p. m.

BANKING AND CURRENCY.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to estab lish a more effective supervision of banking in the United States,

and for other purposes.

Mr. BRISTOW. Mr. President, I suggest the absence of a

quorum

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	Myers	Sheppard
Bankhead	Gronna	Nelson	Sherman
Brady	Hitchcock	Norris	Shields
Brandegee	Hollis	O'Gorman	Simmons
Bristow	James	Oliver	Smith, Ga.
Bryan	Johnson	Overman	Smith, Md.
Burton	Kenyon	Owen	Smith, S. C.
Chamberlain	Kern	Page	Sterling
Chilton	Lane	Pittman	Stone
Clarke, Ark.	Lea	Ransdell	Tillman
Colt	Lewis	Reed	Townsend
Cummins	McCumber	Robinson	Walsh
Dillingham	McLean	Saulsbury	Warren
du Pont	Martine, N. J.	Shafroth	Works

Mr. WARREN. I desire to state that the Senator from New Hampshire [Mr. Gallinger] is detained from the Chamber.

The VICE PRESIDENT. Fifty-six Senators have answered to the roll call. There is a quorum present. The question is on the amendment proposed by the Senator from Nebraska [Mr. HITCHCOCK ]

Mr. OWEN. Mr. President, upon Saturday last the senior Senator from New York [Mr. Root], speaking to an amendment which he proposed to the pending bill, resurrected from the cerements of the grave the free-silver issue of 1896 and alleged in substance that the pending bill involved the same "false economic theories" to which he referred, using the following terms:

Yet, Mr. President, I am convinced that his economic theories

Referring to Mr. Bryan-

Referring to Mr. Bryan—

I am convinced that his economic theories are false, and, if put into effect, would be most injurious to our country.

Those theories have been twice expressly repudiated by the people of the country. Twice those specific theories, the same theories of finance, make their appearance in this bill; and, as a matter of course, we ought to assume that any central reserve board appointed to carry out the terms of the bill will be appointed under the same dominant, commanding, and irresistible influence.

Mr. President, a central reserve board appointed under the influence of the same power that put into this bill the present sixteenth section will be bound, if they are honest and true and faithful, to proceed in accordance with the theories that our people rejected in 1896 and 1900. They must. The authors of the bill are bound in good faith to appoint men who are in sympathy with them to carry it out; and the men in sympathy with them will have in good faith to carry out this bill under the belief that it is best for the people of the country that the Government of the United States shall furnish unlimited money to the people of the United States.

I say that this bill presents the financial heresy twice repudiated by the people of the United States. I say that the central reserve board appointed under this bill will have to represent that very heresy. If this bill passes as it stands, America stands to lose all we saved when Grant vetoed the inflation bill, all we saved when Grover Cleveland abolished the silver purchase, all we saved when we elected McKinley, all the Republicans, all the gold Democrats saved when they helped in the repudiation of the vital principle which has been put into this bill.

The country has become so deadened by the assaults of some, so wearled of discussion, so confused and dazed by complicated figures, that this vital and fateful reversal of the American policy is proceeding with but little attention. But unless all our history of human experience and all the p

Mr. President, the very distinguished position occupied by the senior Senator from New York compels some response to a statement of this character. This deliverance from the distinguished Senator was not upon the spur of the moment. was prepared in advance. The public press was prepared to receive it. It was exploited from one end of the country to Therefore it becomes the more necessary to give it the other. some immediate, direct answer.

I shall not detain the Senate long in making an answer. An answer is easy. The answer can be made in a manner that will

convince the judgment of any impartial juror.

What are the two subjects which the Senator holds up to us as the basis of prospective inflation? The first is that these Federal reserve notes, which are made an obligation of the United States, comprise a dangerous commitment of the credit of the Government, that these notes are just as unsound as the Senator believes the so-called heresies of 1896 were unsound. Indeed, the Senator calls these notes "greenbacks." He says:

That, sir, is to my view a plain, simple enlargement of the national currency of the United States. It is authority for the increase, practically, of what we call greenbacks. The notes—

Referring to the Federal reserve notes-

will be obligations of the Government of the United States, pure and simple.

Therefore the Senator calls these Federal reserve notes What is a greenback? It is the note issued in 1862 under the authority of the Government against its general credit without any reserve, without any other security than the good faith of the Government. Those notes were issued at a time when the Government of the United States was in great distress. Those notes were believed by the people of that day to have served a very valuable and useful purpose in protecting the Government of the United States. Three hundred and the Government of the United States. Three hundred and forty-six million dollars of them remain yet in circulation, absorbed by the people as till money, found almost altogether in the pockets of the people or as reserves in the banks, and very, very rarely being offered for exchange for gold, never offered to the extent of reducing the \$150,000,000 of reserves set apart to keep those notes at par with gold. But those notes which are called greenbacks had originally no security behind them except the general credit of the Government.

Now let us look at these notes which the distinguished senior Senator from New York says are the same as greenbacks, and let us judge the accuracy of his statements and of his arguments in the light of what this bill declares with regard to these Federal reserve notes. Have they any other security behind them than the general credit of the Federal Government? Senator from New Hampshire [Mr. Hollis] only a few days ago enumerated 12 different lines of security behind each and every one of those notes. I shall enumerate them again, in order to refresh the memory of the Senate, and to remind the country that the declaration by the senior Senator from New York that these notes are the same as greenbacks has no justifi-

What are these securities? First, before one of these Federal reserve notes can be issued the citizen who desires this currency, who needs this currency, who can not obtain other currency from his member bank, must apply to the member bank for currency, must put up with the member bank his negotiable paper of a qualified class based upon actual commercial transactions, representing actual commerce, and this commercial bill must not exceed 90 days in maturity, and must be acceptable to the member bank. That is security No. 1.

The probability of that security not meeting its obligation is about one in ten thousand, because the chance of a citizen who receives the money from his member bank upon his note, upon a note which the member bank is willing to indorse, failing within 90 days is not one in ten thousand. So, before the Government of the United States can lose by the issuance of a Federal reserve note on a commercial bill of that kind, this trusted citizen

must fail.

What more? There is another security behind that note. The member bank that indorsed that commercial bill of the citizen must also fail within the same 90 days before that Federal reserve note would fall back upon other lines of security against which it is emitted. The probability of a member bank in good standing which is extended accommodation by the Federal reserve bank falling within 90 days is as one chance out of twenty-five thousand, and the probability of these two chances occurring within the same 90 days is in the ratio of probability of 10,000 multiplied by 25,000, or one chance in two hundred and fifty million.

I concede that that one chance in 250,000,000 ought to be protected, but those two lines of safeguard against those notes are

abundantly sufficient. If there were no other safeguard it would be sufficient, but those Federal reserve notes are further secured as a third line of fortification by the stock of the member bank in the Federal reserve bank. It is safeguarded by a fourth line of fortification by the reserves of the member bank in the Federal reserve bank on deposit there. These Federal reserve notes are secured by a fifth line of fortification—the double liability of the stockholders of the member bank; these Federal reserve notes are secured by a sixth line of fortification, and that is the 333 per cent gold reserve put up expressly to safeguard these notes; these Federal reserve notes are secured further by a seventh line of fortification—the surplus and earnings of the Fed-ral reserve bank; these Federal reserve notes are secured by an eighth line of fortification-the first lien upon all the assets of the Federal reserve bank; these Federal reserve notes are secured by a ninth line of fortification-the double liability of the member banks belonging to the Federal reserve bank; and these Federal reserve notes are secured by a tenth line of fortification-the double liability of the stockholders of the member banks of the Federal reserve bank.

Mr. President, these notes, protected in these various ways, ought not to be compared with the "greenback," which has behind it only the Government credit, although with this great Republic, representing \$125,000,000.000 of property, representing the strongest and most virile Republic the world has ever seen, representing the most stable form of government the world has ever seen, the credit of the United States alone has proved

sufficient to make the "greenback" as good as gold.

These Federal reserve notes are, however, finally, further secured by the taxing power of the United States, and in that respect alone do they compare with the "greenback." But outside of the Government's obligation, outside of the duty of the United States to keep them at par with gold under the act of March 14, 1900, these notes, as I have shown, have behind them 10 different lines of fortifications outside the Government obligation. The first two securities for these no es—the individual credit of the man who submits the commercial bill and of the member bank who indorses that bill-have been found sufficient in other countries, as in Germany, which emits legaltender notes against commercial bills; they have been found sufficient also in France, that has the right to issue legal-tender notes against commercial bills taken by the Bank of France for discount

Mr. President, there is the answer to the first great basis of alleged inflation pointed out by the senior Senator from New The second alleged basis of inflation has just York [Mr. Root]. as little foundation. The second objection made by the senior Senator from New York is that these notes will be emitted to anybody who can make a commercial bill; that there is no check whatever upon the unlimited issue under this proposed act of Congress. Let us see whether there is any limitation. There are a number of limitations. The first limitation to which I wish to call attention, and the most important limitation, is that there can be and there will be none of these Federal reserve bank notes issued until some citizen applies to his member bank and finds that the ordinary currency which he ought to be able to get from that bank has been exhausted and he needs currency—not bank credit; there is a vast difference—he must need currency. He oust need currency for his cotton pickers; he must need currercy to put in his wallet and go out among the people and pay that currency out of his pocketbook to people who do not want bank checks. No citizen will make application for currency for such a purpose until there is a dearth of currency not furnished by the ordinary supplies of currency which we now have in circulation among the people and among the banks.

But there is another second safeguard. Not only must the citizen want this currency, but he must then get the consent of the member banks to apply for this currency, because unless the member bank applies for the currency there is no means by which it can be emitted, since this currency is emitted solely and exclusively to the member banks. That is safeguard No. 2. The citizen must want it; the member bank must agree to apply for it; and, the third safeguard, the Federal reserve bank must have exhausted its supply of currency before it will ask, and then does ask the Federal reserve agent for currency necessary to meet this commercial demand. There is safeguard No. 3 the citizen, first; the member bank, second; the reserve bank, third. There is a fourth-

Mr. BRANDEGEE. Mr. President—
The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from Connecticut?

Mr. OWEN. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. Do I understand the Senator to claim that the application and need of the citizen for additional currency is a safeguard against the issuance of it?

Mr. OWEN. The Senator doubtless heard what the Senator from Oklahoma said, and that was what he said.

Now, Mr. President, I prefer not to be interrupted in this argument, because it destroys the coherency of my statement. Mr. BRANDEGEE. I was trying to clarify a part of the

coherency of the statement, if it could be clarified.

Mr. OWEN. The Senator from Oklahoma will endeavor to do that for himself. It is impossible to make a coherent argument if a series of cross-questions lead the speaker away from the subject matter entered into, and the Senate is daily a witness to that fact. I will be glad to answer any questions as soon as I have presented the argument. I do not wish to be inconsiderate of the Senator, nor certainly not discourteous in any way, but I am desirous of presenting this argument.

I say that the citizen must, first, apply; I say that the member bank must, second, consent; I say the Federal reserve bank must, third, consent; and then I say there is a fourth obstacle in the way of getting these Federal reserve notes—the Federal reserve agent representing the people of the United States, representing the public interest, representing the public welfare, must also

consent.

There is another (fifth) safeguard. When the Federal reserve agent consents, the Federal reserve bank must put up 100 per cent in good commercial bills based on actual commercial transactions and 333 per cent in gold. That is another (sixth) obstruction to the issue of these notes, that these commercial bills will be falling due in less than 90 days and the currency must be Not a single one of the commercial bills put up can repaid. have a maturity longer than 90 days. Within those 90 days every dollar of that commercial paper falls due and must be paid back in cash. Before the member bank can be allowed to renew these bills and keep that money outstanding it must again get the consent of the Federal reserve bank, and the Federal reserve bank must again get the consent of the Federal reserve agent to put other bills in lieu of those bills which are maturing and are being paid in cash with a view to returning the Federal reserve notes or an equal volume of cash into the vaults of the Federal reserve agent, where they retire from circulation just as much as if they were canceled, macerated, and physically destroyed. They can only be emitted again under the original conditions which justified their emission under the provisions of this act as an original proposition.

But there is still another, a sixth, security against the infla-tion of these notes. The Federal reserve board, if all of these things concur, is given authority and direction under this bill to control the issue of these notes. The Federal reserve board

may refuse to allow these notes to go out.

There is still another, seventh, safeguard in this bill against the inflation of these notes. The Federal reserve board has the right to impose an interest charge upon the use of these notes in addition to the interest charge fixed by the Federal reserve bank upon a loan extended to a member bank,

But there is still another, eighth, safeguard, and that is the Federal reserve board is charged with the duty of finally determining the rate of interest which may be charged by the Federal reserve bank in extending loans to member banks, which includes the loan of these very Federal reserve notes.

That is not the only safeguard. The Federal reserve board, under the structure of this bill, charged, as it is, from the beginning to the end of this bill with safeguarding American finance. safeguarding American commerce, in providing for the stability of our financial, commercial, and industrial affairs, has been given the complete supervisory control over this system. It is charged with the duty of obtaining a stability in our financial affairs, and it is only possible to conceive that they would not discharge their duty by conceiving at the same time that the men put at the head of the greatest financial establishment in the whole world would prove to be unfaithful to that trust

More than that, we have a further safeguard against inflation in the power of the President of the United States, charged under his oath of office with the faithful administration of the laws and charged with the duty of seeing that the Federal reserve board and the Secretary of the Treasury, who is the chairman of the board, shall perform their functions faithfully

and efficiently.

But the Senator from New York, ignoring these obvious considerations, ignoring the carefully prepared provisions in this bill safeguarding the validity of these notes first and safeguarding the undue expansion of these notes second, goes further and makes another charge, which is equally unfounded, unreasonable, and unjust. In speaking of the Bank of Commerce of New York, because he happens to be somewhat familiar with it, he says:

with it, he says:

The Bank of Commerce has something over \$100,000,000 of deposits—call it \$100,000,000. Under the present law it has to keep 25 per cent of reserves—that is, \$25,000,000—locked up in the vault, it can not use it. If it does, the comptroller comes after the bank. Under this the reserve is reduced to \$18,000,000. That releases \$7,000,000. That one bank adds \$7,000,000 to the available currency of the country. But that is not all. Of the remaining \$18,000,000 of reserve that it has to keep it only has to keep six-eighteenths in its vaults, and it has to put five-eighteenths into the regional bank. I think that is it. The difference between six-eighteenths in the vault and five-eighteenths it has to put in the regional bank it can either keep in the bank or put in the vault. It is fair enough to assume that approximately one-half will go into the vaults and one-half into the bank, because that is permitted and that would be naturel; but that half—that is to say. 9 per cent—that \$9,000,000 which will go into the regional bank will not be locked up, but 65 per cent of it can be locked up in its vaults is going to be set free by the operation of this bill and added to the available live currency of the country.

I have not taken the trouble to figure it out—

Says the distinguished senior Senator from New York—

Says the distinguished senior Senator from New Yorkbecause it is not important.

A very remarkable observation, coming from a matured and thoughtful statesman of high rank and dignity, making a pronunciamento upon this bill. "It is not important," says the Senator from New York, to ascertain the facts with regard to these reserves, although the chairman of this committee thought it sufficiently important to present the matter in great detail in his report to the Senate—a report which, obviously, the dis-tinguished Senator from New York has not thought it worth while to read or observe.

I have on numerous occasions on the floor of the Senate urged Senators to look at these figures, showing the exact effects upon the reserves in the country banks, in the reservecity banks, and in the central reserve-city banks. It has been figured out with infinite pains. It was printed for the us- of the Senate on November 22, and the chairman of the committee has repeatedly called attention to it; but the Senator from New York does not think it "important." He has not made any figures himself and has not taken the trouble to read the report of the chairman of the committee, obviously, and then he

criticizes the bill in this harri, severe manner.

The chairman showed, and had the figures verified by the Treasury Department, that under this bill as first reported, granting that the S.ate banks came in, there would be a deficit of reserve money under the reserve requirements of the State banks of \$239,000,600. Yet the Senator, without examination, advises the country and the civilized world that we are letting loose a flood of live money to cause a period of gigantic inflation, to be followed by a hideous panic that will shake the world to its foundations, and that there will come tumbling back about our ears four or five or six or seven thousand millions of American securities, taking out our gold by wholesale and leaving us in a condition of overwhelming commercial, financial, and industrial disaster.

Why, Mr. President, the very fact that American securities are held abroad to the extent of thousands of millions of dollars, placed in Europe by the most reliable banking houses in Europe, vouched for to their clientage as sound and safe securities, makes Europe just as anxious to preserve stable conditions in the financial life of America as to maintain stable conditions in the financial life of Europe. In the panic of 1907, when there was the most gigantic slump in stocks and bonds that we have ever seen, when the interest rates ran up to 125 per cent per annum, disgracing this country in the eyes of the world, nevertheless, even under such conditions, instead of the gold leaving the United States, the United States was able to draw gold from Europe on a vast scale, to make amends for the hoarding of money in New York by men some of whom I believe to have hoarded money for the criminal purpose of breaking the stock. market.

That is not to be charged against any class of men. It is not to be charged against the bankers. It was ruinous to the bankers. There are, however, individuals in New York who use bankers as they use pawns on the chessboard. There are men there who regard bankers in New York, big bankers, as nothing but their servants, their hired men, to carry out the policy which they see fit to inaugurate.

They have played that game the last time in America. This bill takes out of their hands the power to control the financial, commercial, and industrial fabric of this Republic. They never will be able to repeat that act, nor can there be made any disturbance of credits now by the loud cry of the senior Senator from New York, charging this bill with containing the "free-silver heresy," as he calls it; charging the bill with providing Federal reserve notes which, he alleges, are a menace to the credit of the United States, when in truth there never has been

in the history of the world a note secured by such abundant security as this note; charging the bill with being an inflation measure, when there is every safeguard against inflation that human ingenuity can put around it, save one, and that one the senior Senator from New York has put in his proposed amendment—a limitation beyond which, no matter what the exigency, this country shall not have relief. That maximum he puts at \$450,000,000, although it is a matter of common knowledge that the people of the United States in 1907 manufactured \$500,-000,000 of currency in the form of clearing-house certificates, in the form of cashiers' checks, in the form of pay checks, and not one dollar was lost by it.

When we first drew this bill we put in a limitation of \$500,-000,000. We were then admonished by the bankers of the country that it was an unwise thing to put such a limitation in the measure, because they said justly-no man could foresee what exigency might arise on some great occasion—that this was a growing country, an expanding country, and that which was reasonable to-day might not be reasonable to-morrow. We yielded to the best advice we were able to get in the world upon this question. The advice was sound and just, and no resurrection of the Aldrich bill or of its provisions in this respect should justify anyone in changing this bill in that particular.

The Aldrich bill had the strange vice, the unspeakable vice, the shameful vice, of putting in its body a proposal to give the credit system of this country into the control of private hands. Those who have urged the Aldrich bill upon us are not qualified now to advise us, contrary to the facts and contrary to the truth, as to how we shall write this bill in the interest of the American people. We represent the people of this country. We are sent here, by their direction, to give them relief against the insidious forces that have combined until 100 men now hold in their hands the control of twenty-two thousand millions of property, as shown by the Pujo report.

Mr. President, I did not intend to detain the Senate. I have felt obliged, however, as the chairman of the committee, to reply to the unfair, unjust, unreasonable strictures which have been heaped upon this bill by the senior Senator from New York, so that the Record at least might show that the Democrats on this committee and the Republicans on this committee-because the committee are unanimous in that respect, I believe-have not failed in the performance of their duty to the Senate or their

duty to the country.

Mr. WILLIAMS. Mr. President, before the Senator takes his seat; I was so unfortunate as not to hear the Senator from New York and so unfortunate as not to have had time to read what he said. If the newspapers report him correctly, however, he said that when the time came to protect the gold of the country the United States Treasury would be left stripped of its gold and helpless, because everything in the Treasury would have been sent to these reserve banks.

Is there anything in this bill that takes out of the United States Treasury \$150,000,000 of gold to protect the greenbacks?

Mr. OWEN. There is not.

Mr. WILLIAMS. Is there anything in the bill which takes out of the Treasury of the United States the amount of gold, which is over \$1,000,000,000, held there to protect the gold certificates?

Mr. OWEN. There is not. There are eleven hundred millions of gold in the Treasury behind the gold certificates.

Mr. WILLIAMS. So that if the Senator from New York thought—if the newspapers reported him correctly; I neither heard him nor read his speech—that the Treasury would be left stripped of gold, he was mistaken by something like \$1,250,000,000?

I will advise the Senator that there are about Mr. OWEN. \$1,700,000,000 still left in the trust fund, outside of the general

Mr. WILLIAMS. That is still worse than I thought; but there are one hundred and fifty millions to protect the greenbacks?

Mr. OWEN. There are.

Mr. WILLIAMS. And nearly twelve hundred millions to protect the gold certificates-eleven hundred and some odd millions?

There are, and four hundred millions of silver. Mr. WILLIAMS. Let us, for the nonce, leave the silver out. In addition to that, there is a redemption fund which is not touched, and several other things. So it is not true that the Treasury of the United States will be stripped of all its garments of gold and left helpless, like a widow in mourning, to meet the combined assaults of the civilized world?

Mr. OWEN. It is not,

Mr. SHAFROTH. Mr. President, I will say further to the

the bill which requires the banks to keep in the United States Treasury a gold reserve not limited to 5 per cent, but subject to the demand of the Federal reserve board to any extent; and no matter what demands are made upon this reserve through the Federal reserve notes the banks are bound to supply that

Mr. WILLIAMS. That is 331 per cent? Mr. SHAFROTH. Thirty-three and a third per cent, and

they are obliged to replenish it continually.

Mr. WILLIAMS. Mr. President, I had nursed the fond delusion or illusion, whichever it may be, that I was not going to open my mouth upon this particular question, but the cathedra utterances of the Senator from New York, the high place he occupies, the national and international reputation he has, and all that, will lead me to a few, perhaps unnecessary. observations.

It is absolutely wonderful what wreck in a sound brain can be wrought by a presidential bee. [Laughter.] tor from New York is a man of remarkable native ability, a man of still more remarkable intellectual and social culture, and a great lawyer. An ex-President of the United States, Mr. Roosevelt, said of him that he had Cabinet ministers whom he could trust implicitly to take care of wars, or of international affairs, or of agriculture, but that he had one man, ELIHU ROOT, who could take care of everything, all things put together. [Laughter.]

That was before the Chicago convention. Mr JAMES Mr. WILLIAMS. Another ex-President put equal trust in him; and he has recently been awarded the Nobel peace prizejust why, I never have been able completely to satisfy myself. [Laughter.] Then, whenever he makes a speech in the Senate of the United States, that part of the press of the United States which is plutocratic sends it out simultaneously with the speech, or a little bit prior to the delivery of the speech, and it is heralded abroad as an epoch-making thing in the history of the United States.

I am very fond of the senior Senator from New York. believe in his intellect, I believe in his cleanness, I believe in his culture, but not free of the blunders that are committed in the name of the Presidency. There is in him as in others the wreck that is left in the trace of a presidential bee. Immediately after this speech, Andrew Carnegie pronounced-and he also is in the habit of pronouncing things ex cathedra-him to be by long odds the ablest elder in the church, and that he ought to be the next President of the United States. Then the senior Senator from New Hampshire [Mr. Gallinger] comes to the front with an interview in which he agrees with the great Scotchman-the Laird of Skiboo.

Mr. President, there are some things in connection with what the Senator from New York said that strike me as rather peculiar for a man of his intellect-native intellect, trained intellect, cultured intellect, honored intellect, honored by great men, nationally and internationally-peculiarly far fetched for a great ex-Secretary of War and a great ex-secretary of peace. [Laughter.] I mean a great ex-Secretary of War and a great ex-Secretary of State. Excuse me, but the present Secretary of State is such a secretary of peace that I get the two things confused now and then.

The Senator from New York says that there is great danger to the Government in this note that we are going to issue; that it will leave the Treasury stripped. My question to the Senator from Oklahoma [Mr. Owen] and his reply answer that,

Now, there has been a good deal of quarreling here and debate as to whether this proposed reserve note is a Government note or a bank note. The plain answer is that it is both. The bank is primarily liable, and then the Federal Government sees to it that the bank issues the right sort of note, that it is printed in such a way that it can not be counterfeited or duplicated or multiplied. The bank is the maker of the note; the Federal Government is the indorser or guarantor of the note. Thus you have, then, a note both of the bank and of the Govern-

How does the note get out? How can there be too many of them issued, if there shall be too many of them issued? In the first place, an individual must go to a member bank and borrow money that he does want or that he can not pay. In the second place, that member bank must carry that paper with the indorsements upon it, at least two of them, and it must itself run in debt by indorsing the paper which is allegedly unsound. If the paper is sound, if the paper is good, if it is bottomed upon an actual commercial transaction, it will be paid at the end of the 90 days. If the paper is unsound and is not good, the member bank acquainted with the maker and the indorser or with the drawer and the acceptor ought to know it. It car-Senator from Mississippi that there is a provision contained in ries that paper to the reserve bank, and then it has to do what?

It has to go to the reserve agent. Who is he? He is an officer of the Government. He is a member of the directory of that bank. Who are the directory? The directory are nine, and six out of the nine are nominees of the banks themselves. So a member bank, with an unsound piece of paper which it nevertheless is willing to indorse, must be willing to put itself in debt—mark you, in debt—because it owes for every note it gets, and it must repay it, must get the representatives of all the banks and of the Government to pronounce it sound, to accept it. Then the reserve board, representing the Government and the general interest, must approve of the transaction. This is greenbackism. Bryanism, free silverism! Horrid thought! Distressful nightmare!

That transaction must be indorsed by a board consisting of six representatives of all the other banks, and they are interested in seeing that no particular bank shall inflate the currency at their expense. So much for that. Yet the Senator from New York says—if the papers report him right, and they generally report him literally—that anybody who can make a piece of commercial paper will be entitled to an issue of currency of the Federal Government under this bill. If he had said anybody who could make a piece of "good commercial paper," he still would not have been quite accurate, but he would have been more nearly so.

One other thing. He goes out of his way to talk about the immense power of this Federal reserve board. The Federal reserve board, if you will read this bill, has not the power to initiate or to compel an inflation of any description. I am glad to see that the Senator from New York is now in his seat. There is no power vested in the Federal reserve board to initiate, to compel, or to consummate any inflation whatsoever. There is a power vested in the reserve board to compel contraction when it thinks that credits have been unduly expanded, either by raising the interest rate or by refusing its approval to the issue of the paper currency by the reserve banks.

Now, then, as to the reserves of gold under this bill. The bill requires a reserve of 33½ per cent. That is a great restraint on inflation. Senators, I ask your attention to a few historical facts. The old Bank of Louisiana required a reserve of 33½ per cent against all demand liabilities; that is, whether notes or deposits. That bank maintained its notes at par in gold when the notes of this great Federal Government were at a discount and when the notes of the Confederacy were at three times as much discount. Soldiers in both armies sought the Bank of Louisiana notes, and the sole protection was a reserve of 33½ per cent against all demand liabilities. It maintained its notes at par in the midst of the Civil War, demoralization, industrial and of every other sort, until Gen. Ben Butler looted the bank. It was only a State bank, and necessarily of State-limited resources.

That is not all. The Reichsbank, of Germany, is required by law to keep only a reserve of 33½ per cent, and it is not required to be kept in gold.

It is required to be kept in gold or in the notes of the German Imperial Governmen, or in the notes of other banks in Germany. This reserve required here, provided it is a working reserve—and this bill makes it a working reserve—is amply sufficient, because it is a minimum reserve.

The Senator from New York, if the newspapers reported his speech properly, dwelt upon the fact that the great European banks kept higher reserves as a practical fact. In the first place, the reserve in this bill is a minimum reserve and these banks are not compelled to keep it down to the minimum. In the next place, the banks abroad, while they keep a high gold reserve, do not keep it for banking and commercial purposes. Nobody knows that better than the Senator from New York. The Bank of England not only keeps reserves for itself but it keeps reserves for all the joint-stock banks in Great Britain on deposit. The Bank of France not only keeps reserves for itself and its branches, but it keeps the reserves of the Crédit Mobilier and the Crédit Lyonnais and all the other banks in France.

That is one reason why they keep unduly high reserves. Nobody knows better than the Senator from New York that the main reason is not even a reason appertaining to commerce and banking within or outside of themselves. The Reichsbank and the Bank of France keep these reserves for war purposes. The Senator from New York knows it, and we all know it. The Bank of France has now something like eighty-odd per cent of reserves, and fifty-odd per cent of those reserves are in gold. The German Empire has heaped up a fund now in its war chest at Spandau of a great many millions; I at this moment can not recall the amount. The Reichsbank is keeping another war chest ready for Germany. Here lately when Germany got a little obstreperous down in Morocco and seemed to want a little bit of war it was found that war could not be carried on in the

twentieth century simply because somebody wanted it, that it had to be financed, and when the Emperor came to consider that he found out he could not get the money from the Reichsbank nor from other parts of the world. Thereupon they had a great meeting, and it was determined that there must be some change in the constitution of the Imperial Bank of Germany. Some changes were made. Amongst others, they made the notes a legal tender which up to that time had never been legal tender, and it was reported—whether true or not I do not know—that the Emperor said, "This is the last time I shall ever find myself unprepared financially when the honor of Germany is at stake." Of course I do not agree that the honor of Germany was at stake. It was the foolish schoolboy notion of honor and glory and all that.

Then the bank began to pile up a higher gold reserve than ever. For banking purposes? To protect the notes of the Reichsbank? To protect its depositors? To protect the industries and the agriculture of Germany? No; but to have Germany on a war footing as far as finances were concerned.

footing as far as finances were concerned.

That is not all. Go to a peace country. The reserve required in the Bank of Belgium is 33½ per cent. She has no trouble about keeping her gold.

By the way, there is a great deal of superstition about this thing of keeping gold. Gold is like water, except that water seeks the lowest level and gold seeks the highest level. Gold not only will go, but it ought to go, wherever it is needed to carry on the business of the world. You are not impoverished when gold leaves you. Gold is not a sentient sort of thing. Moreover, if sentient, it would not be idiotic. It serves as the instrument of men's commerce to do men's work, and it goes wherever it is needed to do men's work. It goes to the highest market, and it will continue to go there, and you can not prevent it by any number of laws that you may enact.

Nor is it a misfortune that it should go whenever it ought to go. One of the bad things about modern finance is that there has been originated a lot of efforts to do by indirection what the old Spanish monarchy sought to do by direction. It put a direct tax upon the exportation of gold and made Spaniards as poor as church mice in consequence. Men are attempting all over the civilized world now to retain all the gold that they can keep, whether their business needs it or whether it does not. As the Senator from Colorado [Mr. Shafroth] said the other day, one bank raises a discount to hold the gold, across the channel another raises it to get it back, and a little farther back in the interior another raises it to get its share, when if they would leave it to the free trade of commerce the gold would go where it was needed and where it would do the most good, and help the people whom it left as well as the people to whom it went.

Now, having said that much, I do not want to take my seat without saying a little more in connection with what I regard as some of the defects of this bill. I think that provision of the bill which permits a Federal reserve bank under certain circumstances within the discretion of the board of control-that is, the reserve board-to keep its own notes as a reserve against its own notes is wrong. I appreciate the argument that is made, undeniably, irrefragably, by the Senator from Oklahoma [Mr. OWEN], that at this moment there would be a deficit of some \$200,000,000 in the amount needed for these reserves. urged, and I still urge, and I hope that a further conference, either here or between the conference of the two Houses, may limit this provision to the first two years of the life of this bill, when the difficulty will be over and that requirement will no longer be necessary. I hope that that amendment will be engrafted upon the bill either here or in conference between the

I hope another thing. This bill provides that when one of these Federal reserve notes is carried to the United States Treasury and is redeemed there, virtually paid, it shall be sent to the bank of issue. I hope that the bill will be so amended that, instead of being sent indefinitely to the bank of issue, it will be sent to the reserve agent at the bank of issue, and that he will be compelled to impound that note in his portfolio and keep it there, without reissuance, until a new loan is contracted upon the same conditions as the first one,

If I had my own way, I would have each note as it came back to the bank of issue destroyed, macerated, canceled; but if it is impounded and kept by this representative of the Government, the reserve agent, in his portfolio, not to be reissued unless it is reissued upon the same conditions that it was originally issued, it is substantially a new note, and some expense of printing perhaps is saved.

I hope that amendment will be made to the bill. I have urged it, and I have never seen any good reason against it.

There is another point. There ought to be somewhere in any bill that is passed a provision automatically contracting the notes, withdrawing them from circulation. Some gentlemen object to the word "contracting" no matter where you use it. There ought to be a provision automatically withdrawing that note when the need for the note had ceased. I think no provision was ever adopted better than that which characterizes the Reichsbank when, at a certain stage of the proceedings, the notes are taxed.

One of the men who appeared at the Academy of Political Sciences-I have forgotten now who he was: I was not present; I never met him, but I read what he wrote afterwards-made a suggestion which I think is a very good one. You fix a reserve of 33\frac{1}{3} per cent. He suggested that wherever the reserve fell as much as 21 per cent below the minimum there should be a tax of 11 per cent. Thirty-three and one-third per cent-take it at 33 for easy calculation—bring it down 2½ per cent and that would be 30½ per cent, and there should be a tax of 14 per cent. Then when you went to 24 per cent more it would bring it down to 28 per cent. Whenever it fell 24 per cent there should be a tax of 3 per cent. Then when it fell 2½ per cent more it would bring it down to 25½, and there would be a 41 per cent tax. Then if it fell still lower, bringing it down to 23 per cent, there would be 4½ plus 1½, which would be 6 per cent, and down the line.

I do not think that is necessary to this bill, because the board of control, the reserve board, is given the option of raising the rate of interest wherever it thinks it is necessary, and it will, of course, think it necessary whenever it will stop undue in-flation; but I would rather have an automatic process, because this board is to be named by the President and to be consented to by the Senate, and I know that this system will not be in operation long if the people want more money-and they are always wanting it-before a pressure will be brought to bear upon every Senator in this Chamber to use his influence with the reserve board in order to get them not to contract or in order to get them to consent to a further expansion.

With those defects, as I regard them-my party colleagues do not so regard them up to this good day; I hope they may see the matter as I do later on—but with those defects this is absolutely the best banking and currency bill that was ever presented to the Congress of the United States in the entire history of the American people. You may respond by saying that that is not saying much, and I do not know that it is saying too much, but it is saying that much at any rate, and it

The wonderful thing about all this to me is that I can not find a fundamental difference, a difference of principle, between the bill advocated by the Senator from Nebraska [Mr. HITCHcock] and the bill reported here by the Senator from Oklahoma [Mr. Owen]. I find very many reasons of administration and of expediency that recommend to my mind the bill offered by the Senator from Oklahoma as infinitely preferable, but there is not a question of principle, there is not a question of fundamental basis of any theory at stake between the two bills.

Mr. HITCHCOCK. Mr. President—

The VICE PRESIDENT. Does the Senator from Mississippi

yield to the Senator from Nebraska?

Mr. WILLIAMS. Certainly.

Mr. HITCHCOCK. Does not the Senator from Mississippi think there is a fundamental difference between having a public utility like a reserve bank controlled by the banking interest or controlled by the Government?

Mr. WILLIAMS. Is that the question? Mr. HITCHCOCK. That is one.

Mr. WILLIAMS. That assumes that this is nothing but a public utility. It is both a public utility and an association of banks in a banking association for mutual protection and for mutual insurance, and the money which is put up-the premium which is paid for the mutual insurance—is paid by the banks in the shape of their reserves. The amount of money handled by one of these reserve banks will be something like eight or nine times as much as the mere capital of the banks. this system the capital of the bank under the Owen bill will be about \$3,000,000 and the amount of money handled by one of these banks will be about \$36,000,000, which is twelve times as much, and the balance of that is put up in the shape of deposits, in the shape of reserves by the bank. If this were purely a public utility, like the post office, or something of that sort, there would be relevancy in the question asked by the Senator from Nebraska, but it is partly a public utility and it is partly an association for mutual insurance.

Where did this idea come from? Like nearly every other good idea in this world, it comes from evolution. What is the Amer-

ican evolution from which it comes? It is the clearance-house associations of the United States. We never have had a panic or a great financial trouble but what the clearance-house association had to step into the breach and put their paper out contrary to law as a mutual insurance paper, all standing to-gether, doing teamwork, the protection of each being the protection of all. This bill, for the most part, is merely putting into legal shape that which hitherto has been illegally done. that extent it is a banking proposition chiefly concerning banks. In fact, Senators, in the proper sense these reserve banks, or, rather, in the ordinary sense, these reserve banks, are not banks They are combinations of banks for the purpose of consolidating, concentrating, and rendering mobile the reserves of the banks, and for the further purpose of doing away with the pyramiding of the reserves which now exists and which is a source of great and constant danger.

This does not destroy the member bank; it does not destroy the common sense of the officers of the member bank; it does not render them idiots and insane; it does not put them in a position where they want to go out and borrow money which they do not need, and where they want to indorse notes and paper which is not good. All that is left as a substratum of the system. The Senator from Oklahoma narrated very clearly and very concisely 12 or 13 lines—I have forgotten which—of entrenchment and of fortification for the protection of these notes. He neglected to mention one more, which is the thirteenth or the fourteenth, whichever it may be; that is, the fact that when one of these reserve banks receives the note of another reserve bank, it is made its business not to pay it out over the counter, but to send it back to the bank of issue. All the history of banking and currency in this country affirms the fact that the greatest security for the interconvertibility of bank notes and gold is the fact of daily and constant redemption of the bank notes in gold at the bank of issue.

Mr. HITCHCOCK. Mr. President—
Mr. WILLIAMS. This note must go back to the bank of issue under the bill as it now stands; it goes back to the bank indefinitely, and there is a question as to whether the bank can not reissue it. It ought to go back to the Federal reserve agent of the bank and be put in his portfolio.

Mr. HITCHCOCK. Mr. President—
The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Nebraska?

Mr. WILLIAMS. I do.

Mr. HITCHCOCK. I think the statement made by the Senator from Mississippi is entirely correct; and I want to ask him what use is there in providing that the few other reserve banks shall immediately send to their original place of issue the reserve notes which they receive, if you allow the 10,000 member banks of the institution to impound those notes in their vaults and keep them there, thus allowing the gold to escape?

Mr. WILLIAMS. Well, in the first place, that is what I should call a non sequitur. I do not see how the phrase "allow-

ing the gold to escape" has anything to do with the proposition.

Mr. HITCHCOCK. Mr. President, it is the experience of the world that, unless you provide that gold shall be held in the reserves, the gold will not be held there and will be subject to be withdrawn out of the country. If you permit these 10,000 member banks to use as their reserves the notes issued by the reserve banks, you release the gold. The only way to keep the gold is to keep the reserves. Every country in the world, every central bank in the world has striven to keep gold. Germany has been in the midst of a great struggle to get gold from the people, to impound it in her banks, and certainly the Senator's own argument leads up to the point that if it is important for the other reserve banks to return those notes to the place of issue, it is ten thousand times more important to require the member banks to do so.

Mr. WILLIAMS. The Senator from Nebraska forgets the portfolio, and the portfolio is the keystone of the arch of this entire system. He seems to think that, unless that identical note goes back there, we are in a bad position. Providing something of equivalent value to the note comes back, it does not make a bit of difference whether or not the note comes back. Then the member banks may keep the note indefinitely, and do no harm. Here is a member bank that goes in and deposits a portfolio and becomes entitled to \$100,000 of note issue. The paper in the portfolio has not over 90 days to run. As the papers in the portfolio fall due, they are either paid or they are exchanged for gold or for new paper which, in the opinion of the Federal reserve agent, is equally good.

Whenever one of the pieces of paper in that portfolio is taken out and returned to the bank to which the loan in reserve notes

gold certificates or greenbacks in order to take the place of the paper taken out. That establishes a constant interconvertibility of commercial paper and of Federal reserve notes; and the minute a bank finds, owing to a slack loan market, that it is not to its profit to keep the loan out, that bank immediately brings in enough of its redundant currency and takes up its paper left with the Federal reserve bank. It does not make any difference whether the form of the redundant currency which it brings in is gold certificates or greenbacks or gold or Federal reserve bank notes; but whatever it brings in, this end of contraction to fit business is accomplished. The bank will not borrow money unless it needs currency, and the minute that it does not need currency bad enough to pay the interest which the Federal reserve board has prescribed for currency, at that time, that minute, it will come back and take its paper out of the Federal reserve bank and will deposit lawful money in its stead.

So much for that. There is nothing new about that; there is nothing new in this bill. I should be afraid of it if there were. There is not a provision in it that is not drawn from the Scottish bank system or the Canadian bank system or the imperial bank system of Germany or the old Suffolk bank system here.

The Senator from Nebraska seems to think that all the gold in a country must be impounded in reserves or else you are in a bad fix. Senators, I want to say that, in my judgment, the poorest issue banking system on the surface of this earth, or one of the poorest, to-day is that of England, and that yet the best financial system in the world, in spite of the bad banking arrangements, so far as the Bank of England is concerned, is to be found in England. What is the bank-note system of England? An absolute fiat issue of notes on £18,000,000. True, it is issued against eighteen millions of public debt of that Empire; but it is a debt that nobody thinks will ever be redeemed, and which, as a matter of fact, will never be paid. Then, outside of that, the bank can issue notes only when it puts a dollar of gold for a dollar of notes. No elasticity in either horn of that dilemma, What makes Great Britain, notwithstanding this, the great goldconserving country of the world? First, the Bank of England must at any time buy gold for its paper at a fixed mint price, and, in the second place, and more than that, there is not a bank note in Great Britain less than £5-\$25.

What is the consequence? The farmer, the mechanic, and the retail dealer must keep as till money gold and silver in constant circulation. It can not leave England. Why? Because the constant daily requirements of trade keep it there, and there is nothing to take its place. The elasticity of England's system

Mr. WILLIAMS. I shall not make any apology to the Senate, but I shall make an apology to this side of the Chamber. I have been constantly assuring my colleagues in the cloakroom, for the last three or four days, that "my system was plumb full of the last three or four days, that "my system was plumb full of an odd, volcanic desire to erupt in connection with some of the arguments being made, but that I was not going to erupt." Yet, in spite of a cool, deliberate purpose, founded upon reason and a desire not to take the time of 90,000,000 people who are waiting for the conclusion of this debate and the passage of this bill, I have erupted. I do not know that I have erupted to any particularly useful purpose; but I have at least the consolation that usefulness is relative, not absolute, and I doubt if a word has been said by others or me upon the floor of the Senate which has changed the preconceived opinion of a single Senator.

There is a general idea that Senators come here and learn about great public questions, serving apprenticeship at the expense of the people, taking a sort of kindergarten course. I do not suppose there is a Senator within the sound of my voice who has not for 12 years had his mind made up on all fundamental questions of banking and currency. I take it that Sen-

is in the fact that its business is done with coin and checks and bills of exchange and acceptances and clearances.

That calls to my mind another defect in this bill, which I hope will be remedied here or in conference. We ought not to permit \$1, \$2, and \$5 reserve-note bills to be issued. Instead of the \$1 and \$2 bills there ought to circulate in this country 25-cent and 50-cent silver pieces as pocket change and till money for retail dealers. There ought not to be \$5.000. till money for retail dealers. There ought not to be a \$5 note issued under this bill, but instead the half eagle in gold or gold certificate. Gold ought to go out into everyday circulation as well as you can make it go. You can not rob England of her coin, because coin can not leave a country unless there is something to take its place. When the Bank of England wants gold it can go out in the markets of London and Liver-pool and Manchester and Birmingham and get it. It is there to be gotten; it has not been driven out by paper; it has not been driven into bank reserves by paper; it sthere doing the work of the people every day. The Senator from Nebraska is horribly mistaken if he thinks that the chief use of gold in this world is that it shall be impounded in banks solely as a basis

Now, Mr. President, I am going to ask permission to publish in connection with my remarks as relevant to a part of them and at the end of what I have to say a table of the currency trust fund, the general fund, and the gold-reserve fund of the United States taken from the daily statement of the United States Treasury at the close of business December 13, 1913. There is a general impression somehow or other among men-I do not know how it got abroad-that the United States Government and the United States people and the business of the United States are suffering from a dearth of gold. It is so far from being true that precisely the opposite is true.

The United States has more gold to-day than any country in the world, either in the Treasury or in reserve in the banks or in circulation, and every statement from the Treasurer is a demonstration of that fact, as this last statement is a demonstration of it. It would be in constant circulation, in your pocket, and in my pocket, but for the fact that we have crowded it out by paper bills, and that it is much more convenient to carry the gold certificate or other paper than it is to carry a gold coin.

Mr. President, I ask that the statement to which I have re-

ferred may be inserted in the RECORD.

The VICE PRESIDENT. Is there objection? The Chair hears none, and that order is made.

The statement referred to is as follows:

Outstanding certificates: Gold certificates outstanding Silver certificates outstanding Treasury notes outstanding	491, 260, 000, 00
Total outstanding certificates General fund liabilities and balance: Total liabilities, as above Balance in general fund, as above.  Gold reserve	165, 373, 412, 10
Total net balances	266, 325, 000. 38
	2, 043, 605, 381, 48

ators do not come here for the purpose of serving an apprenticeship in a school at the expense of the people, but that they came here in the beginning of their respective terms somewhat prepared to grapple with the great problems with which they are confronted. The consequence is that the most of our debating, when we are confronted with a worn subject like this, is just useless. It is talking here for the purpose of consumption in the country, and for the purpose of the effect it may have elsewhere. I have not had even that excuse. I just felt tempted by the Senator from New York—he tempted me and I fell—and that is the only excuse I have at all.

Mr. BRISTOW. Mr. President, I do not intend to occupy

any great length of time, and what remarks I have to make I intend to make upon the amendment that is pending.

I was amused and amazed at the vehement denunciation made by the Senator from Oklahoma of the Wall Street influences that he says have with such sinister motives controlled the finances of the country. His manner was so tragic when he declared that the day of their dominion was past, when before the Senate adjourns to-night he will cast his vote in favor of maintaining the powers that they have-no; of handing over to

them, under legal forms, greater powers than they have or could

obtain under the present law.

The Senator stands upon this floor and denounces with violent vehemence the trusts and combinations that control the credit of the country, and then drafts a bill that gives them the legal forms of law to perpetuate, if they see fit, a trust which controls credit. He denounced the Aldrich bill with equal vehemence and tragic manner, yet he has taken out of the Aldrich bill and incorporated into his bill its central thought—that is, that these reserve banks should be banks owned by the banks and controlled by the banks and run in the interest of the banks. The astounding thing is that the chairman of the Committee on Banking and Currency of the United States Senate can think that the American people do not see through the subterfuge of this bill. It is the embodiment of hypocrisy so far as dealing with the trusts or a monopoly is concerned.

I respect the gentlemen who stand for the Aldrich bill. They have never practiced any hypocrisy about it. They openly say what they are for. They believe in the kind of bill which was introduced and recommended by the Monetary Commission. They do not undertake to denounce a method and then vote for its

I am not going to take up any great length of time; but I could not let this opportunity pass; the provocation was too great for me to sit here hour after hour and listen to such pretenses as I have listened to here to-night from the chairman of the committee. I wanted to let him, the Senate, and the country understand what kind of a bill this is. I intend that the CONGRESSIONAL RECORD shall carry my views as to the amendment which is now pending. Its defeat will be to give the banks of the country the control of the regional banks which control the credit of the Nation, and which will provide a legal organization, a monopoly of credit; and this plan has been worked out by the men who have with the greatest vehemence for months denounced all such combinations and trusts

Mr. OWEN. Mr. President, I move to lay on the table the amendment offered by the Senator from Nebraska [Mr. HITCH-

COCKI.

Mr. BRISTOW. On that I call for the yeas and nays.

The year and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CHIL/TON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. Jackson], and therefore withhold my vote. If he were present he would vote "nay" and I should vote "yea."

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson].

I transfer that pair to the junior Senator from Maine [Mr. Bur-LEIGH] and will vote. I vote "nay."

Mr. MARTINE of New Jersey (when his name was called).

I have a pair with the senior Senator from Idaho [Mr. Borah]. Were I entitled to vote, I should vote "yea."

Mr. NELSON (when his name was called). I have a general pair with the senior Senator from Georgia [Mr. Bacon]. I transfer that pair to the senior Senator from Utah [Mr. Smoor] and will vote. I vote "nay."

Mr. O'GORMAN (when his name was called). I am paired

with the senior Senator from New Hampshire [Mr. Gallinger]. If I were at liberty to vote, I should vote "yea." Under the circumstances, I will withhold my vote.

Mr. ASHURST (when the name of Mr. SMITH of Arizona was called). My colleague [Mr. SMITH of Arizona] is unavoidably detained. He is paired with the senior Senator from New Mexico [Mr. Fall]. If he were present, he would vote "yea."

Mr. SMITH of Georgia (when his name was called). I am

paired with the senior Senator from Massachusetts [Mr. Longe]. I transfer that pair to the senior Senator from Colorado [Mr.

THOMAS] and will vote. I vote "yea."

Mr. STERLING (when his name was called). I am paired with the senator Senator from Louisiana [Mr. Thornton]. I transfer that pair to the junior Senator from New Mexico [Mr.

CATRON] and will vote. I vote "nay."

Mr. STONE (when his name was called). I have a standing pair with the senior Senator from Wyoming [Mr. Clark]. If I were at liberty to vote, I should vote "yea." Without knowing cartainly I think I am arefule. ing certainly, I think I can safely say that the Senator from Wyoming, if present, would vote "nay."

Mr. SWANSON (when his name was called). I have a pair for to-night with the senior Senator from Washington [Mr. Jones]. I transfer that pair to the junior Se homa [Mr. Gore] and will vote. I vote "yea." I transfer that pair to the junior Senator from Okla-

The roll call was concluded.

Mr. OVERMAN (after having voted in the affirmative). inquire whether the senior Senator from California [Mr. Perkins] has voted?

The VICE PRESIDENT. He has not.

Mr. OVERMAN. I have a general pair with that Senator, and therefore withdraw my vote.

Mr. TOWNSEND. The senior Senator from Washington [Mr. Jones] is absent on official business. He is paired, as I understand, with the junior Senator from Oklahoma [Mr. Gore]. Mr. WARREN. The senior Senator from New Hampshire

[Mr. GALLINGER] is unavoidably detained. He is paired with the junior Senator from New York [Mr. O'GORMAN].

Mr. BANKHEAD. I am paired with the junior Senator from West Virginia [Mr. Goff]. If he were present, I should vote yea."

Mr. WORKS. The senior Senator from California [Mr. Per-KINS] is unavoidably absent.

The result was announced-yeas 36, nays 35-as follows: YEAS-36.

Ashurst Bryan Chamberlain	Kern Lea Lewis	Ransdell Reed Robinson	Smith, Ga. Smith, Md. Smith, S. C.

So the motion to lay Mr. HITCHCOCK's amendment on the

table was agreed to.

Mr. HITCHCOCK. Mr. President, omitting now some less important amendments, I offer as an amendment to the House bill, section 7 of the bill reported by myself, beginning on page 19, and I ask that it be read.

The VICE PRESIDENT. The amendment will be read.

The Secretary. Strike out section 7 as printed in the House text, beginning at line 15, on page 12, and in lieu insert section 7 as printed in the text of the amendment offered by the Senator from Nebraska [Mr. HITCHCOCK] November 25, beginning on page 24, line 8, as follows:

on page 24, line 8, as follows:

SEC. 7. That after the payment of all necessary expenses and taxes, including its share of the expenses of the Federal reserve board, the stockholders of each Federal reserve bank shall be entitled to receive an annual dividend of 5 per cent on the paid-in capital stock, which dividend shall be cumulative. Net earnings over and above expenses and the aforesaid dividend shall be applied as follows: Twenty-five per cent of such net earnings to be carried to a surplus fund until such fund shall amount to 20 per cent of the paid-in capital stock of such reserve bank, and 37½ per cent of said net earnings shall be set aside in a trust fund to be known as the depositors' insurance fund and shall be used for the payment of the depositors of insolvent member banks under rules and regulations made by the board. When, in the judgment of the board, there has been accumulated in such depositors' insurance fund a sufficient sum fully to insure the payment of the depositors of insolvent member banks, the board shall have power to suspend the setting aside and accumulation of the said 37½ per cent of such earnings, and thereafter such 37½ per cent of such earnings shall be paid to the United States, except that in the event the depositors' insurance fund is depleted by the payment of depositors of insolvent member banks such fund shall be replenished by again setting aside such 37½ per cent of the earnings, or so much thereof as, in the judgment of the board, may be necessary. The remaining net earnings shall be applied to the purchase, at par, with accrued interest, of the 2 per cent bonds of the United States, asid bonds then to be retired; or if such bonds can not be so purchased, said amount shall be applied to the purchase of other interest-bearing obligations of the United States, which obligations shall thereupon be retired.

Also, in the House text, lines 19 and 20 of the same section,

Also, in the House text, lines 19 and 20 of the same section, the Senator from Nebraska [Mr. HITCHCOCK] proposed to strike out the words "held by member banks" and insert the words "and the income derived therefrom," so as to read:

Every Federal reserve bank incorporated under the terms of this act and the capital stock therein and the income derived therefrom shall be exempt from Federal, State, and local taxation, except in respect to taxes upon real estate.

The VICE PRESIDENT. The question is on the amendment

proposed by the Senator from Nebraska.

Mr. NORRIS. I should like to suggest to my colleague an amendment. I believe he will be willing to accept it. That part of my colleague's amendment providing for setting aside a certain per cent of the earnings of these banks for the purpose of paying depositors in member banks that have failed makes no provision in regard to the subrogation of the board in case they use this money in the payment of the claims of depositors. It seems to me that that provision, to be workable, ought to provide that in case they do make such payment they should be subrogated to the rights of the depositors and have the right to receive what would otherwise go to depositors, and that such amount should be returned to the fund out of which the original payment was made.

I send to the desk and ask to have read an amendment to the amendment, which I think will cover the particular provision

that I believe ought to be strengthened.

The VICE PRESIDENT. The amendment to the amendment will be read.

The SECRETARY. After line 21, on page 24, add the following:

Whenever said board out of said fund shall pay any amounts due to depositors of insolvent member banks, said board shall be subrogated to all the rights of said depositors, and in the settlement of the affairs of any such bank all dividends that would have been due to such depositors shall be paid to said board, and the same shall be by it paid into and become a part of said depositors' insurance fund.

The VICE PRESIDENT. The question is on agreeing to the

amendment to the amendment.

Mr. HITCHCOCK. Unless there is some objection on the part of other members of the section of the committee for whom I report this bill I shall be glad to accept the amendment offered by my colleague. It is within the spirit of the provision, of course.

Mr. BRISTOW. May I ask that the amendment to the amendment be read again. My attention was diverted.
The VICE PRESIDENT. It will be again read.

The Secretary again read the amendment to the amendment. The VICE PRESIDENT. The question is on agreeing to the

amendment of the Senator from Nebraska as modified.

Mr. CLAPP. Mr. President, it had not been my purpose to say anything on this bill, because I had partly determined that, while I would discuss the methods by which it was being passed, yet I would not discuss the terms of a measure to what, in the terminology of the court room, we would designate as a packed jury. But occurrences have taken place here to-day which impel me to forego that partially formed reso lution and to make some remarks.

At about 4 o'clock this afternoon an amendment was proposed to this bill that proposed to change not only the form of the bill but goes to the very fundamental question whether the American people, after a century and a quarter, are to be coerced by the banking interests of this country or whether

the American people shall assert their independence.

After less than five hours' discussion upon that vital and fundamental question, it was moved to table that amendment and stop the discussion of that question in the American Senate. It is true that question in a measure was involved in the general proposition embraced in the original substitute offered by the Senator from Nebraska [Mr. HITCHCOCK], but in that substitute were many other questions upon which there might justly be a difference of opinion. The concrete question whether we were to be cowed by the declaration, made on this floor, that this proceeding would fail unless we listened to the dictation of the bankers, did not become a concrete question, disassociated from other questions, until the amendment offered by the Senator from Nebraska at about 4 o'clock this afternoon came before the Senate.

I am not one of those who have constantly declaimed against the banks of this country, but I am one of those who recognize that in legislation and in the formulating of political policies we have to recognize the limitations and the extremes of human nature, the extreme of good in human nature and the extreme of bad in human nature. We should legislate with a recognition

of that limitation in view.

Mr. President, personally I agree with the Senator from Kansas [Mr. Bristow]. It has been, in my judgment, a mistake to throw this country into hysteria with this proposed legislation, I believe that a few simple concrete amendments to the existing law would have met the necessities of the hour. But it was seen fit, after rushing a tariff bill through Congress and throwing the country into one hysteria, to throw the country into another, with a long, complex, top-heavy, mingled currency and banking proposition, when they should never have been merged

But, Mr. President, one of the reasons assigned for that was that the credits of the country were being manipulated, not only possibly, but it has been asserted here on the floor that they have in fact been manipulated, in the interest of a few and whenever it was necessary to crush rival business organizations

or tentative competitive organizations.

Recognizing the frailty of human nature and not making this applicable any more to bankers than to anyone else, I am very

much inclined to believe that the men who have controlled the great credit system of this country have used their power in their own interest against the public, and not only against the public as a whole, but against rival, competitive institutions and propositions for the development of business in this country. I shall waste no time in support of that, because that declaration has come of late so often from the Democratic side of this Chamber.

Now, one of the excuses offered for bringing in this legislation has been that very condition. The Senator from Nebraska [Mr. HITCHCOCK] this afternoon related his own experience. It has been the experience of many a man during the last few years. When hundreds, and I might say thousands, of men have told me of their own experience where their convictions have been sought to be throttled by the banks of their communities, where their free expression and free activities were sought to be throttled by the banks of their communities either withdrawing credits or threatening them with withdrawal of credits, I can believe it, because it accords with one phase of human nature, and a bad and vicious phase.

Now, starting with that as a reason for this legislation, what do we find? First, a proposition here to create a system of institutions, miscalled banks, because they are not in the true sense banks, institutions calculated to relieve that condition alleged to be for the purpose of gathering the power to rediscount paper in such a way as to break down the monopoly that has existed in banking circles in the control of the credits of this

And yet at the first step, at the threshold of this proposition, it is proposed by the proponents of this measure to create those agencies through the very instrumentalities that we are seeking to control, instead of letting the people subscribe to the stock

of these associations.

This is followed by the proposition to place the control of these associations in the hands of the very men whose monopoly we are seeking to break down and destroy. that the question of putting these associations in the hands of the Government has been raised we have been calmly told that "that would not accord with our plan," the plan of the proponents of this measure. Must everything, then, be sacrificed to a plan without a defense of the plan itself? There has not been made on this floor a single defense of the plan of the banks taking the stock of these associations. But when we have questioned the wisdom of placing the control of these associations in the hands of men from whose control we are seeking to release the public, then we are met with the answer that if we have them subscribe the stock they must have the control. That is arguing in a circle. It is no answer to the question.

But, Mr. President, to-day with more emphasis than heretofore we have been told that in order that the banks may submit to the organization of these reserve associations it is necessary to allow the banks to control them, and that unless we allow the banks to control these reserve associations, miscalled banks, because they are not banks, the banks of the country will not go into this plan, and consequently the plan will fail. In other go into this plan, and consequently the plan will fail. words, we find here a monopoly so powerful that, in order to deal with it at all, we must allow it to dictate the terms.

We complain in this country that there is growing a spirit of Is it to be wondered at when on the floor of the American Senate, representing free government after 125 years of experience, it is declared that the banking interests of the country must be allowed to dictate the terms of a banking law or else we can not succeed with a banking policy? I can not understand it. It may be, Mr. President, that I have been unduly moved in this matter, but I do not understand how Senators can stand here, with the history of a century behind them, and calmly tolerate the proposition that, with the vast resources of this country, we can not have a system of relief unless we submit in the plan itself to the dictation of the very power from which we are trying to escape. I do not impugn the motives of the men who sustain this position. I believe that the men are honest in their views upon this question, but I can not for the life of me understand their position. If it is true that we have so fallen under the power of the banking system of this country that we have to consult them as to the remedy from that power itself, the sooner we abdicate the better, or else, as the alternative, the sooner we throw down the gauntlet the better.

I realize that we stand to-day in our industrial relations in a position of tremor; I realize that there is a shutting down; I realize that shutting down means misery; it means suffering; but by the token of the sacrifice of men who laid down their lives we are cowards if we do not dare along commercial and industrial lines to battle for the freedom and the liberty of the people of this country.

I do not believe, my Democratic brethren, that you realize the import of what has been declared to-day as the reason for submitting to this tyranny, seeking to escape from that tyranny, and yet admitting that the only avenue of escape is one to be laid down by the power from which we seek to escape. Of what stuff are we made that we tamely submit to such dictation as that? To what pass has the great party that has proclaimed itself the party of the people come that it submits to such dictation as that?

I can speak with some freedom on this question, for I think I am not any longer accused, at least, of being partisan in my political views. Two members of that party voted for the last amendment proposed by the Senator from Nebraska [Mr. Hrrchcock]. Am I to believe, is the Senate to believe, that in all that great array upon the other side of this Chamber there was no other man who believed that a blow should be struck here for the independence of the American people from their present financial condition except those two? It can only be due to the slavery of the cancus.

Talk about party loyalty and party solidarity. Who constitutes a political party? Because a President and a handful of one party happen to hold to a view, is a man to be branded as a traitor because he does not submit to their views upon a question so vital and fundamental as is this question of who shall control these so-called banks?

Mr. President, for one, I can not understand how a man who has attained to the importance and dignity of a seat in this American Senate can refer to any man on earth as the titular the doth is party. We had once a man who declared himself the titular head of his party. He met a fate that, in my humble judgment, will be the fate of any man who declares himself greater than the millions of voters who compose a party organization. I think at this point I will refer to a Senator who has gone before us. When the declaration from a President that he was the titular head of the party was first heard in a message to the Senate some years ago, a Senator, the former great Senator from Iowa, Mr. Dolliver, said to me: "There are sad days in store for our party when a man talks about his being the titular head of the party.

Gaining nothing by experience, drawing no lesson from the fate of the man who as President insisted that his will was the law of millions of voters, our Democratic friends are now pursuing the same identical course, and we have heard to-day on the floor of the Senate the declaration, carrying with it the assumption that the declaration of one man was the party voice. My Democratic friends, for one, I had hoped that when the returns showed not that you had a majority of the voters, but that in the fortunes of political war you were to be installed in power, there would be some progress, some advance; and yet during the tariff debate and during this discussion when any criticism has been made as to your policy, time and again the answer has been, "Why, you folk did the same thing."

I want to warn my Democratic friends, although I am not

oversolicitous, of course, for their success, nor do I hold any brief for them, that you can not retain the confidence of the American people by simply saying that you are no worse than the political organization which the American people discred-You have got to have some other capital if you are going to have the confidence of the American people. Yet, here is a great measure, designed to relieve the American people from the thraldom of the control of bank credits by bankers, and instead of submitting that measure to the broad equation of the representatives of 48 States the assertion is made that because a Senator differs upon a fundamental principle he is no longer loyal to the party. You would put party loyalty above the public welfare.

Mr. HITCHCOCK. Mr. President—
The VICE PRESIDENT. Does the Senator from Minnesota

yield to the Senator from Nebraska?

Mr. CLAPP. I yield to the Senator.

Mr. HITCHCOCK. Is it not also somewhat remarkable that this attitude in favor of having the banking interests of the country control these new banking public utilities should come within a few months after an investigation by a committee of the House of Representatives had revealed the fact that in the great banking centers of the country there has grown up such an interlocking of directors in the banks and trust companies of those cities that they have come practically under the domination of a single combination, so that banks not in the combination are compelled to bow to it and take its dictation in matters of policy-I say is it not remarkable that, after all the revelations secured by this industrious committee of the House of Representatives, disclosing this condition in the banking centers, there seems to be a willingness to intrust to them the control of these reserve banks which are to be created?

Mr. CLAPP. Why. Mr. President, if a man had said six months ago that the men who to-day are defending the placing of the control of these reserve banks, so called, in the hands of the banks themselves would have favored such a plan, he would have been characterized as insane and would have been charged with unfairly defaming his political opponents. Remarkable!

What is it that to-day we are led to believe the President is considering following this bank proposition? We are told that the next thing on the program is to devise some means of dealing with the trusts of this country. Everybody knows that the American people to-day are studying that problem from one ocean to the other; everybody knows, if the President goes on with anything like a semblance of the program he has foreshadowed, that that, if not the next, will be among the first of the great problems he will take up.

As for the Pujo investigation and hearings on the trust question, the experience of the people of this country did not even require the Pujo investigation-

Mr. NELSON. Mr. President, will the Senator yield to me? The VICE PRESIDENT. Does the Senator from Minnesota yield to his colleague?

Mr. CLAPP. Certainly.

Mr. NELSON. I desire to call the Senator's attention to the fact that the Pujo committee showed that the headquarters of the Money Trust and interlocking directorates was in New It is inevitable, if any regional banks are estab-York City. lished, that there will be one established in New York City; and can the Senator tell me or can any Senator tell me why those same bankers will not control and manage that regional bank in New York City with as much facility as they have heretofore controlled financial affairs in that city?

Mr. CLAPP. I-

Mr. LEWIS. May I ask the senior Senator from Minnesota a question?

Mr. CLAPP. Certainly.
Mr. LEWIS. I ask if the Hitchcock bill, with its provision for four regional banks, should obtain, does the Senator from Minnesota fancy that one of the banks would be located in New York City?

Mr. NELSON. We propose to put the control of the regional bank in New York City in the Government, giving the Government the majority of the board of directors. While you propose to give the banks six out of nine of the directors of the reserve bank there, we propose to give the bankers only four out of nine; that is the difference.

Mr. LEWIS. In response to my friend from Minnesota, may I ask would not your bank, with four directors elected by the bankers in New York City, still be subject to the same atmosphere and have its funds under the same organization and control as in the case of the present national banks in New York City, which are under the Government?

Mr. NELSON. Not if we have a Federal reserve board ap-

pointed by the Government.

Mr. LEWIS. I beg pardon of the Senator from Minnesota for taking so much time. I only wanted to show that there was no discrimination in the matter.

Mr. CLAPP. I will deal with that in a moment. I want to say that any system must of necessity involve the weaknesses of human nature; but if there is nothing gained by the use of the dividing line between the direct interest itself and the effort of the American people to get away from that force through the obligation of men selected by the Government, then why not turn over the regulation of railroad rates to the railroad managers instead of to a commission? One of these so-called banks will not only be in the city of New York and its officers named by Wall Street, but there is not a Senator here to-night who does not know that the ramifications of that Wall Street force reach to every city in America. It has been practically impossible for years to launch any great enterprise in the country that conflicted with the purpose and will of that Wall Street force and influence. Has it not been declared on this floor on the Democratic side for years that we could not get away from its influence even in politics? Do we not know that its ramifications reach every town and village in this land? doubts it, let him engage in the work that some of us have been engaged in in the last two or three years. Young men, brave and courageous, inspired by a desire to serve their country, have been called down and told that their business is being jeopardized by their independence.

It will be hard enough under any circumstances to get away from this power that sends its tentacles into every hamlet in America, but we can at least declare our independence. at least try to get away from them by removing the appointing power from Wall Street itself.

We have been told here in one breath that some of these bankers, such as the president of the National City Bank of New York, favor the people's subscription, and then we are told in the very next breath that we must let the banks name a majority of the directors or the banks will not come into the plan. You will have to take one horn or the other of that dilemma. Driven to the last resort, the defense of this plan of allowing the banks to name the directors has been that the banks will not come in otherwise, and it will be a failure unless we let them dictate the terms of the bill itself.

Mr. SHIVELY. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Indiana?

Mr. CLAPP. With pleasure.

Mr. SHIVELY. Did not the author of the amendment of which the Senator has just been speaking say on the floor of the Senate that the stock in the regional banks would not be an attractive proposition to the banks that were expected to go into the system, because the banks that were expected to go into the system can earn on their stock 12, 15, or 18 per cent? Did he not say that for this reason it would not be at all attractive to the banks, but that as an investment it would be attractive to the public; in other words, that it is too poor to attract the banks, but just good enough to attract the public?

Mr. HITCHCOCK. Mr. President-

Mr. CLAPP. I do not know whether he did or not; but the defense of the proposition to place these boards in the control of the banks is that the banks will hold back and this bill will fail unless we allow them to dictate its terms. That defense has finally been made upon the floor of the Senate.

Mr. SHIVELY. There has been no evidence presented here that the banks desire that this should be a stock proposition

Mr. CLAPP. Then have the Democratic Senators who have said that unless the banks nominate or appoint the directors they will not come in been giving their own pipe dream as to the reason why we should turn this system over to the banks?

Mr. SHIVELY. If the Senator please, of course the banks which are expected to be member banks are now owned by private individual stockholders, just as the Senator would have the regional bank. Such would not be, according to the Sena-tor's theory, a publicly owned bank, would it? Had you your way and were the amendment proposed by the Senator from Nebraska adopted, you do not hold that the regional bank thus

constituted would be a publicly owned bank?

Mr. CLAPP. The amendment offered this afternoon by the Senator from Nebraska [Mr. HITCHCOCK] would not make the regional so-called bank—I dislike to call it a bank, for it is not a bank, but let us call it that—a publicly owned bank; but we tried to make it a publicly owned bank. We believe the time has come in this country, in view of the use of credit by the great banks, when the American people should not only declare their independence, but should maintain it by the creation of a dis-count association with their own capital, and control the dis-

count association.

I do not mean by that that because men were appointed by the Government they would be absolutely removed from all temptation or that the system would be perfect. I recognize the frailty of human nature. I do say, however, that in every place in the history of our country, where we have attempted to regulate and control, we have taken the control out of the direct hands of the power we sought to control and have placed it in the hands of men appointed for the purpose of controlling. We did that with railroad rates. What kind of railroad rates do you think we would get if the railroads made the rates? It is true that it is said that the railroads have their influence and all that, but nobody would think for a moment for that reason of turning back the control of railroad rates to railroad managers

Mr. SHAFROTH. Mr. President, will the Senator from Min-

nesota yield to me?

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Colorado?

Certainly; with pleasure. Mr. CLAPP.

Mr. SHAFROTH. I should like to ask the Senator, if the national-bank act had provided that the board of directors of every national bank should consist of five men appointed by the Government, with no interest in the bank or in the funds of the bank, and four men who were stockholders of the bank, whether ever would have been a national bank organized in the

Mr. CLAPP. That reminds me that once I picked up a schoolbook and saw that one of the questions in it was, "What would have happened if Braddock had not been defeated?" [Laughter.] Of course, nobody knows.

Mr. SHAFROTH. Yes: the Senator knows. He knows that there would not have been a national bank organized.

Mr. CLAPP. No; I do not know any such thing. that men put millions into railroads, knowing that the Interstate Commere Commission is here to regulate their rates. I know that these men put their money into the banks, knowing that Congress could any day repeal, alter, or amend their char-I know that men went into the national banking system and have put millions of their reserves into the control of banks in which they had no more voice than the Senator from Colorado has

Mr. SHAFROTH. Yes; but that was not an investment of their money. I will ask the Senator another question: Would he put his money into a national bank if the law were that five of the directors of the national bank should be appointed by the Government and four by the people who put in the money?

Mr. CLAPP. The trouble is that the Senator is so preposterous in his proposition. My experience has been in trying to get money out of banks, not putting money in. [Laughter.] If I had money to invest, however, I should not hesitate to invest it in that way when the investment was to be controlled by men who had but one possible motive, and the money was absolutely divorced from any possibility of the wreckage of the bank.

If we should let the public subscribe, as we ought to, the only money in the banks that would not come into this plan would be the reserves which we already control. That is the trouble. Every time we plead here for Government control we are told, "Why, you can not have that, because, forsooth, our plan is that the banks shall subscribe instead of the people subscrib-If you were strong enough to drive through a Democratic conference the proposition of letting the Government control, you would also have been strong enough to drive through the same conference the proposition that the people might subscribe for the stock.

I do not care, however, if the banks would not come in. If it is necessary in order to give the American people relief from the condition of monopoly of credits that it is claimed this bill is going to meet, then if the banks would not come in I would devise a system by which the American public could handle the matter and discount paper without any reference to the banks. It is better not to clothe the banks with any more power. If in escaping from one tyranny we go to a greater tyranny, the sooner we stop trying to escape the better for all concerned.

The existing banks will not patronize the reserve banks under your plan except when it is advisable to rediscount their paper, and I would trust their coming there to rediscount their paper no matter who owns the bank. If a bank to-day finds itself obliged to rediscount its paper, it does not seek to do it in a bank that it controls. It is glad and willing to find any bank

that will rediscount its paper.

We are overfrightened over this subject. We have allowed a spirit of fear to dominate us in this matter. I tell you in all calmness and all candor that in planting yourselves upon the theory that you are trying to escape from monopoly you recognize the power of the monopoly to the extent of allowing it to dictate the avenue of escape. I, for one, say it is illogical. The admission that the American Congress, backed by the resources of the American people, is not strong enough to devise a reserve system here independently of whether the banks like it or not is a declaration that is not calculated to create confidence in the spirit of American institutions.

Mr. BRISTOW. Mr. President-The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Kansas?

Mr. CLAPP. With pleasure. Mr. BRISTOW. If it will not disturb the Senator, I should like to ask him a question. He says that some of our friends are becoming frightened at the menace of the banks refusing to go in. Did it ever occur to the Senator that there might be a perfect understanding between those who are promoting the plan to permit the banks to run this organization and the banks that want to run it?

Mr. CLAPP. Well, I think outside there doubtless is. I would not say "aye" to anything that could be construed as suggesting a motive of that kind in the minds of the Senators here who are defending the so-called Owen bill. I do not understand that that is what the Senator meant, however.

Mr. BRISTOW. No; I do not know where the mysterious influence is that dominates and controls this matter just as the great combinations desire it. I do not know where it is, but believe it is controlling and dominating the formation of this bill in harmony with its purposes.

Mr. CLAPP. There is no doubt that it is controlling it. It

may be, as alleged by our brethren across the aisle, that it is

controlling it through fear, but what I complain of is the American Senate standing and admitting that with all our strength and resources we can not devise a remedy for an evil except to adopt the remedy dictated by the evil from which we seek to flee. It is illogical and unnatural, and when the American people come to understand it I do not believe they will approve it.

Mr. OWEN. Mr. President, would the Senator object to a

question?

Mr. CLAPP. Not at all.

Mr. OWEN. Does not the Senator know that the plan of popular ownership of this stock was presented first in a vigorous way and taken under advisement by certain members of the committee because of the argument submitted by Mr. Vanderlip, of the National City Bank of New York, the Rockefeller bank?

Mr. CLAPP. I do not know what moved the minds of the committee; but long before Mr. Vanderlip ever appeared before the committee, possibly before he ever entered a bank as an officer, the American people were discussing, thinking, and looking forward to the day when the American people would have a direct voice in the finances of this country.

If the suggestion of the Senator is true, then what becomes of the argument advanced here time and time again by those defending the Senator's bill that they had to adopt this plan of letting the banks control the regional banks in order to

placate the banks themselves?

Mr. OWEN. Mr. President, the value of the suggestion was that "We do fear the Greeks when they come bearing gifts."
Mr. CLAPP. Mr. President, I echo that—"We do fear the Greeks when they come bearing gifts." When men who for years have been recognized as the champions of the people in this country come here with a bill of this character, proposing to consolidate the reserves instead of separating and dividing them, and then place the consolidated reserves in the hands of the banks themselves, I echo the sentiment of the Senator from Oklahoma: "Beware the Greeks when they come bearing gifts.

Mr. WEEKS. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Massachusetts?

Mr. CLAPP. Certainly. Mr. WEEKS. The question asked by the Senator from Oklahoma conveyed, I think, an impression which is hardly justified. It seemed to convey to the Senator from Minnesota the impression that the first suggestion that the stock of the regional banks and the control of the regional banks should be in the hands of the people-the Government-rather than the banks, came from Mr. Vanderlip, the president of the National City Bank.

Mr. CLAPP. I beg the Senator's pardon. It did not make that impression on my mind, because I advocated it for years before I ever heard of Mr. Vanderlip.

Mr. WEEKS. I did not want to have it make that impression, because the very first day the committee gave hearings, long before the tariff bill passed, Mr. Festus J. Wade, president of the Merchants' Trust Co. of St. Louis, was a witness before the committee, and was asked by one of the members of the committee about popular ownership of the stock, and he said that he would be very glad, so far as he was concerned—and he was selected to represent the Chicago conference—to have the stock offered to the public; that the banks did not want it.

Mr. CLAPP. Then there is nothing in the claim of our Democratic friends that they have to do this in order to placate the

banks. Is that so?

Mr. WEEKS. There never was anything in it.

Mr. CLAPP. Then what excuse is there for it? That is the only reason I have heard assigned for it.

Mr. OWEN. Only this, if the Senator please—only this: At present the credit system is in the hands of these great institutions. Unless we can establish a system that will give inde-pendence to the small banks through Government supervision of the reserves and the control of this system, then the banks not coming in the old system will go on and the opportunity to create a market for stocks and bonds, the opportunity to create a panic in New York under the old system, will still remain as a means by which to profit.

Mr. CLAPP. I can not allow that remark to pass unchallenged, and there is only a moment left. The Senator has suggested in that remark that you are freeing the banks and putting them under a Government-supervised control-

Mr. OWEN. Yes. Mr. CLAPP. When the very feature of the measure which the Senator champions, and which we are fighting, does not put it under Government control, but puts it in the hands of a

board consisting of three Government appointees and six bank appointees

Mr. OWEN. With the right to remove every one of the directors in the hands of the Federal reserve board-

Mr. CLAPP. Then who appoints their successors, except the banks themselves?

Mr. OWEN (continuing). With the right to fix the rate of interest, and with the right to control the issuance of elastic currency. Having the right to remove every one of the six directors, and having three representatives of the Government on guard at all times at every board meeting, in the management of the bank, there is every reason to believe that the Government will exercise a wise supervisory control.

Mr. CLAPP. Just one moment more, while I point to that

charming picture of three controlling six. [Applause.]

Mr. HITCHCOCK. Before the Senator takes his seat, I desire to inform him that some three or four months before Mr. Vanderlip visited Washington with his suggestion-to be specific, on the 26th day of June of the present year-the Senator from Oklahoma, himself also a director in a national bank, made this suggestion:

If the subscription by the banks is made merely permissive, then the stock books should be opened to the public, and I believe this would be a wise adjustment of the objection and would popularize the Federal reserve system.

Mr. OWEN. But the subscription is not made permissive. It is made compulsory

The VICE PRESIDENT. The hour of 11 o'clock having arrived the Senate stands adjourned until 10 o'clock a. m. to-morrow.

The Senate thereupon (at 11 o'clock p. m.) adjourned until to-morrow, Tuesday, December 16, 1913, at 10 o'clock a. m.

## HOUSE OF REPRESENTATIVES.

Monday, December 15, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou, who hast been our dwelling place in all generations, a very present help in trouble, continue Thy ministrations unto us; clarify our vision, strengthen our hearts, and make straight our paths, that we may be true lovers of our homes and our country, since the life of the one depends on the life of the He who loves and serves his home best loves and serves his country best. Fit us for every new condition and make us alive to every policy which promises the betterment of mankind, that as progressive beings we may follow on to larger life and nobler service. In His Spirit. Amen.

The Journal of the proceedings of Friday, December 12, 1913.

was read and approved.

# CHANGE OF REFERENCE-HARLEM SHIP CANAL.

Mr. FERRIS. Mr. Speaker, the bill (H. R. 9828) for the cession to the State of New York, in exchange for the lands required for the project approved by Congress March 4, 1913. of certain lands in the bed of the Harlem Ship Canal, heretofore ceded to the United States, free of cost, and now to be abandoned for the more direct channel, appears on the face of the title to be a public-land bill, whereas in fact it is not. The bill should go to the Committee on Rivers and Harbors. I therefore ask unanimous consent that reference of the bill be changed from the Committee on the Public Lands to the Committee on Rivers

The SPEAKER. The gentleman from Oklahoma, chairman of the Committee on the Public Lands, asks unanimous consent that the bill H. R. 9828 be taken from the Committee on the Public Lands and referred to the Committee on Rivers and Harbors. Is there objection?

There was no objection, and it was so ordered.

#### RESIGNATION FROM COMMITTEE.

The SPEAKER laid before the House the following communication:

WASHINGTON, D. C., December 11, 1913.

Hon. Champ Clark, Speaker House of Representatives.

DEAR Mr. SPEAKER: I hereby tender my resignation as a member of the Committee on Invalid Pensions, and respectfully request the ac-ceptance of the same to take effect immediately. Very respectfully,

JOHN H. STEPHENS.

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

CALENDAR FOR UNANIMOUS CONSENT.

The SPEAKER. The Clerk will call the Calendar for Unanimous Consent.

#### QUARANTINE FACILITIES AT PORTLAND, ME.

The first business on the Calendar for Unanimous Consent was the bill (H. R. 4618) to increase the limit of cost for increase of quarantine facilities at the port of Portland, Me.

The SPEAKER. Is there objection?
Mr. FOSTER. Mr. Speaker, I desire to reserve the right to object.

Mr. HINDS. Mr. Speaker, I ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

Mr. FOSTER. Mr. Speaker, I reserve the right to object

for a few minutes, until we may have some information in respect to the bill.

The SPEAKER. The gentleman from Illinois reserves the right to object, and the Clerk will report the bill.

The Clerk rend as follows:

Be it enacted, etc., That the limit of cost for increased quarantine facilities at the port of Portland, Me., authorized by the act approved August 24, 1912, is hereby increased by the additional sum of \$23,620.

Mr. HINDS. Mr. Speaker, I ask unanimous consent to have read th. letter of the Secretary of the Treasury.

The SPEAKER. Without objection, it will be read.

There was no objection, and the Clerk read as follows:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, July 14, 1913.

Washington, July 11, 1913.

CHAIRMAN COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE,

House of Representatives.

Sir: I have to make the following reply to your letter of July 7, transmitting, with request for the views of the department, a copy of bill H. R. 4618, "To increase the limit of cost for increased quarantine facilities at the port of Portland, Me."

The department is cognizant of the fact that the amount specified in this bill is intended to supplement the appropriation of \$43,880, which was made by Congress in the deficiency act of August 26, 1912, to provide detention barracks at the Portland (Me.) quarantine station. The last-named amount contemplated the construction of ordinary or nonfire-proof buildings, the additional amount specified in bill H. R. 4618 being for the purpose of rendering these detention barracks fireproof.

The department approves of increasing the appropriation for the barracks at the Portland quarantine station, for the reason that fireproof buildings are not only desirable for humanitarian purposes, but are economical in the long run in that it is believed they will last much longer and require far less expenditure for repairs than would be the case with nonfireproof structures.

Respectfully,

W. G. McAddoo,

Secretary.

Secretary.

Mr. Speaker, what I would like to know with reference to this bill is this: As I read the bill it is proposed to construct for \$43,000 a building 130 feet long by 37 feet wide, with a wing 30 feet by 40 feet, for the accommodation of 500 immigrants who may be unfortunately quarantined at that port. I thought possibly the gentleman from Maine [Mr. HINDS] or the gentleman from Georgia [Mr. ADAMSON] would be able to give us some information as to the kind of building it is proposed to construct with the \$43,000 which has now been appropriated and what addition it is proposed to make with the additional amount. I observe that the department heads speak of the necessity for accommodations for a good many of these immigrants, sometimes as high as 1,600 having been landed there or being on vessels that have stopped there on which there were cases of quarantinable diseases

This additional appropriation does not furnish any additional space, as I understand, but it is giving some additional money for what they say is to make this a near fireproof building. Now, I would like to know what changes are proposed to be made in the building as authorized now and in the future if

this appropriation is allowed?

Mr. ADAMSON. Mr. Speaker, I will ask the gentleman from Wisconsin [Mr. Esch], who reported the bill, to reply to the

gentleman from Illinois.

Mr. ESCH. Mr. Speaker, this appropriation is for the purpose of constructing an additional building. The capacity of the present building is, I think, only for 42 immigrants and is wholly inadequate in consequence of the importance of this port. The original or preliminary plan, on which the original appropriation of \$43,000 was based, contemplated a nonfireproof construction, a building with a basement and one story in the dimensions that the gentleman from Illinois has given already. It is found that such a building could have been built for the original appropriation of \$43,000, as given in the deficiency act of August, 1912, but the department finds that it would be more advisable to make it of concrete construction, so as to fireproof The fact that 500 people must be housed there and that the exigencies of business might require that number to be housed caused the department to send this recommendation to us. The fact is that this building is to be built on a small, rocky island

3 miles away from the city of Portland, so that there can be no fire protection from the city itself; hence the necessity of making this building fireproof in the first instance; and they say that if fireproofed it will ultimately lead to an economy in the

Mr. FOSTER. Now, what material is it proposed to build this building out of without this additional appropriation?

Mr. ESCH. Without the additional appropriation it will be a frame structure. It is to be built upon the solid rock, and they will have to blast the foundation; possibly the foundation itself will be made of stone and the superstructure of some form of concrete. The gentleman is an expert in matters medical and sanitary and knows that a fireproof structure built of concrete or stone can be kept in a sanitary condition much more readily and easily than the ordinary frame structure.

Mr. FOSTER. That is what I was getting at. This report

does not give the information.

Mr. ESCH. That is the fact.

Mr. FOSTER. Whether it be a frame building there or other character of building, this does not increase the size of the building as I understand?

Mr. ESCH. No; it does not. The additional appropriation does not go to increase the size of the structure, but to make it fireproof.

Mr. FOSTER. Only with this additional amount they would build it of concrete?

Mr. ESCH. Exactly; and in that way it will ultimately prove an economy, not to say anything about increasing the safety to the immigrants. There is necessity for these quarantine barracks to be constructed because of the increased importance of Portland as a port of entry for five or six of the great trans-Atlantic lines. Only last year there were 26,000 immigrants who were investigated.

Mr. FOSTER. I agree with the gentleman that a superstructure of this kind where they are liable to have patients who are confined to their beds ought to have some fireproof protection in the way of a building.

Mr. ESCH. All they have now in the way of a hospital equipment is a small building with seven beds,

Mr. FOSTER. They only have one with seven beds?

Mr. ESCH. Yes; so it is absolutely necessary to do something in this regard which will ultimately lead to economy on the part of the Government.

Mr. FOSTER. I have no objection. Mr. Speaker, I withdraw any objection.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The gentleman from Maine [Mr. HINDS] asks unanimous consent to consider this bill in the House as in Committee of the Whole House on the state of the Union. there objection? [After a pause.] The Chair hears none.

The bill was ordered to be engrossed and read a third time,

was read the third time, and passed.

On motion of Mr. HINDS, a motion to reconsider the vote by which the bill was passed was laid on the table.

#### ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 10081. An act to make the tenure of the office of the major general commandant of the Marine Corpe for a term of four years.

ANCHORAGE IN NAVIGABLE WATERS OF THE UNITED STATES.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 7212) relating to the anchorage of vessels in navigable waters of the United States.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 7212) relating to the anchorage of vessels in navigable waters of the United States.

The SPEAKER. Is there objection?

Mr. STAFFORD. Reserving the right to object-

Mr. MANN. Mr. Speaker, reserving the right to object, I ask to have the bill and amendments reported.

The SPEAKER. The Clerk will report the bill and amend-

The Clerk read as follows:

A bill (H. R. 7212) relating to the anchorage of vessels in navigable waters of the United States.

Be it enacted, etc., That the Secretary of Commerce is hereby authorized, empowered, and directed to define and establish anchorage grounds for vessels in harbors, rivers, bays, and other navigable waters of the United States, wherever maritime and commercial interests shall show to the satisfaction of said Secretary that such anchorage grounds are required for safe navigation, and to adopt suitable rules and regulations in relation thereto, and to take all necessary measures for the proper enforcement of such rules and regulations.

SEC. 2. That in the event of the violation of any such rules and regulations by the owner, master, or person in charge of any vessel, such owner, master, or person in charge of such vessel shall be liable to a penalty of \$100; and the said vessel may be holden for the payment of such penalty and may be seized and proceeded against summarily by libel for the recovery of the same in any United States district court for the district within which such vessel may be and in the name of the officer designated by the Secretary of Commerce.

Also, the following committee amendments were read:

Page 1, line 5, after the word "in," insert the word "improved."
Tage 1, line 5, strike out the word "rivers" and insert the word
"and"
Page 1, lines 5 and 6, strike out the words "and other navigable
waters."

waters."
Page 1, line 6, after the words "United States," insert the words "except as otherwise provided by law."
Page 1, line 7, after the word "shall," insert the words "request action by said Secretary, and."
Page 1, line 7, strike out the word "the" and insert in lieu thereof the word "his."
Page 1, lines 7 and 8, strike out the words "of said Secretary."

The SPEAKER. The Clerk will read the report. The Clerk read a portion of the report, as follows:

Report to accompany H. R. 7212.

The Committee on Interstate and Foreign Commerce, to whom was referred the bill (H. R. 7212) relating to anchorage of vessels in navigable waters of the United States, having considered the same, report thereon with amendments and as so amended recommend that it pass.

Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. Does the gentleman in charge of the bill ask to have the report read?

Mr. ADAMSON. I did not. The SPEAKER. The Chair was of the opinion that the gentleman from Illinois asked it Mr. MANN. That is what I thought.

The SPEAKER. We will omit the further reading of the report. Is there objection to the consideration of this bill?

Mr. MANN. Mr. Speaker, reserving the right to object, is it the gentleman's intention to ask the House to agree to the committee amendment?

Mr. ADAMSON. Yes.

Mr. MANN. Under the existing laws the Secretary has this authority in New York Harbor and in the Chicago Harbor.
Mr. ADAMSON. There are several local laws on the subject,

and the object is to pass a general law that can be applied without an act of Congress whenever, on application of the maritime and commercial interests at the several ports, the Secretary may, in his discretion, deem it wise to do so.

Mr. MANN. Of course it now requires a special law in each

case, according to the rules and regulations.

Mr. ADAMSON. Yes, sir.

Mr. MANN. Has the gentleman any idea whether this law

would be availed of soon if it should pass?

Mr. ADAMSON. I have been advised that in one or two places there is difficulty. One is down at Hampton Roads. I do not remember all the others, but there are two or three of them. In places where navigation is liable to be congested it may be desirable to take this action, and it merely saves coming to Congress each time.

Mr. MANN. Does the gentleman think it would be sufficient if the law authorized the Secretary of Commerce, in his discretion, to define these anchorage grounds? Suppose an application is made to the Secretary, and he thinks there is no justification for establishing anchorage grounds in some place, and that while the establishment of the anchorage ground would, in fact, possibly be a convenience, navigation would be inconvenienced generally, and would it not be sufficient to leave it to his discretion to establish such anchorage grounds?

Mr. ADAMSON. Does not the gentleman think the effect of this language would leave it in his discretion? They must show to his satisfaction before he is directed to do it. The language

of the bill provides

Mr. MANN. It does not leave it to his discretion. It says if it is to the interest of the navigation interests. There might be only one vessel that came into port, and to establish anchorage grounds might be very inconvenient for the rest of the people.

Mr. ADAMSON. Mr. Speaker, I confess that the idea the gentleman is expressing is exactly what was in the mind of the committee, and it does seem to me the language of the bill leaves the subject in about that situation. If they show to his satisfaction that it ought to be done, he is directed to do it.

Mr. MANN. It would be that way if the bill read "authorized and empowered," without authorizing, empowering, and directing him

Mr. ADAMSON. Then you would like to eliminate the word "directed"?

Mr. MANN. I think it would be safer to do that.

Mr. ADAMSON. I am perfectly willing to do that. Mr. STAFFORD. Mr. Speaker, reserving the right to object, do I understand, under the proposed authority, the Secretary of Commerce would have power to regulate the anchorage of

vessels in inner harbors?

I am thinking of the harbor at my home city, Milwaukee. We have a roadstead there in the inner harbor, where vessels are anchored in the winter season in large numbers. The local municipal government takes charge of the regulation of the anchorage of these vessels, and I do not see any reason why we should delegate that authority to the National Government. I am asking the question with the purpose of inquiring whether, under the phraseology as suggested by the committee, the words "improved harbors" would include improved inner harbors? would include improved inner harbors?

Mr. ADAMSON. Mr. Speaker, answering the inquiry of the gentleman from Wisconsin [Mr. Stafford], I think it is sufficiently the stafford of the

ciently clear that the Secretary can not do it at all unless he is requested so to do by the local authorities.

Mr. STAFFORD. Well, there may be some local association composed of two or three members that would request it, and yet it might be contrary to the maritime interest of Milwaukee or other cities, and I do not think it is wise to have so large a power vested in the Secretary down here without reference to local conditions. We control them there without impediment to local navigation. I am seeking to inquire whether this legislation would extend to improved inner harbors.

Mr. ADAMSON. The gentleman will note that we have stricken out the word "rivers." We do not propose to deal with rivers on the idea that they are inland. I think the purpose of the bill is to cover the ocean and its arms-the harbors that are frequented by commerce; harbors and bays that are

improved by the Government.

Mr. STEVENS of Minnesota. Mr. Speaker, let me ask the gentleman a question right there? Did not the committee have

this in mind-

Mr. ADAMSON. I was going to ask the gentleman to let me finish my statement. The suggestion of the gentleman from Wisconsin [Mr. Stafford] is that a few persons might make an application at variance with the general wish and interest of the community. I do not think we could assume that the Secretary of the Department of Commerce would be misled in a case of that sort. He would surely find out what were the maritime and commercial interests of that place before he

would act. Now I will yield to the gentleman from Minnesota.

Mr. STEVENS of Minnesota. Did not the committee have this in mind, that wherever the United States has made expenditures for the benefit of commerce in such cases; wherever the local authorities, commercial or municipal, or whatever they may be, think that the United States should control and regulate the anchorage in places improved by our own Government, in such cases the Secretary of Commerce is authorized to make regula-

Mr. ADAMSON. I think undoubtedly that was the purpose of the committee.

Mr. STAFFORD. But the National Government has authority over the harbor at Milwaukee and other interior waters that are navigable, even if the Government has not expended any money whatever for their improvement.

Mr. STEVENS of Minnesota. Mr. Speaker, if the gentleman

will read the bill he will notice that that has been stricken out

by the committee

Mr. STAFFORD. I have read the bill; and even taking it as it stands, the language "improved rivers and harbors," when construed by the courts, will be construed as it now stands and not as originally framed by the committee, and I am asking the chairman whether, under the phraseology "improved rivers and harbors and bays," it will be subject to the construction I have instanced?

Mr. ADAMSON. If the gentleman will tell me what connec-

tion his inner harbor has I may be able to answer more clearly.

Mr. STAFFORD. The inner harbor is a landlocked harbor adjacent to Lake Michigan, only a quarter of a mile from the harbor entrance; a large roadstead formed by the washing up of sand dunes years ago forming an island, and it is a favorable anchorage for large lake steamers that go into winter quarters there. It is largely utilized in winter by these steamers and there might be some that would complain as to the anchorage of these vessels, whereas the local authorities are absolutely con-

tent with the existing conditions.

Mr. ADAMSON. I think, Mr. Speaker, that the gentleman need have no apprehension in view of the amendment I am going to offer, at the suggestion of the gentleman from Illinois [Mr. Mann], that the Secretary will not be directed at all, but only empowered to act whenever the local commercial and

maritime interests request him to do it.

Mr. MANN. I would like to ask the gentleman one more question, if I may.

Mr. ADAMSON. Certainly.

How will these orders be enforced, if made? Mr. MANN. I know theoretically how they will be enforced. The collector of customs will do it with revenue-cutter vessels. not preliminary, is it, to asking for an appropriation for additional revenue cutters for the enforcement of these regulations?

Mr. ADAMSON. No; it is not preliminary to that. Whatever request has been made for that has been made for some time past, and the vessels to be authorized and built will be used

for other purposes

Mr. SPARKMAN. Mr. Speaker, I should like to ask the gentleman a question.

Mr. ADAMSON. Certainly. Mr. SPARKMAN. This function has been performed hereto-

fore by the Secretary of War, has it not?

Mr. ADAMSON. No, sir. The Secretary of War is empowered by special act to fix harbor lines in special cases.

Mr. SPARKMAN. I understand. I think in some instances the Secretary of War has been authorized. I think at one time

he was authorized by the river and harbor bill.

Mr. ADAMSON. There is no conflict between departments about this. It is mainly in the interest of vessels of commerce.

Mr. SPARKMAN. I am not disposed to question the right of the Secretary of Commerce to do this work, because the Secretary of War probably has nothing to do with anything except the improvement of a river or a harbor.

Mr. ADAMSON. We have thrown the necessary safeguards around this. It only applies where you have spent money for

the improvement of harbors.

Mr. SPARKMAN. Another question. In many Statespossibly in all the maritime States—we have harbor masters who have control of the anchoring of vessels in harbors, in the inner harbor and very likely in the outer harbor, within the jurisdiction of the States; and all the harbors are within the jurisdiction of the States. Would not this interfere with the

functions and duties of the harbor master under existing law?

Mr. ADAMSON. I think not. These grounds are only fixed on the request of the local authorities and interests, and they do nothing but fix the limits; and, as I understand it, fixing anchorage limits means providing a place to put vessels out of the way of commerce while they are waiting, riding at anchor. It has nothing to do with the other management and superintendence of the vessels themselves, but simply fixes the lines of the harbor waters.

Mr. SPARKMAN. That duty, however, has been performed by the harbor masters in my State, and I suppose in all the States. Mr. ADAMSON. Nothing can be done under the provisions

of this bill except upon an application from those people. It can not be done arbitrarily.

Mr. SPARKMAN. It seems to me it is not definite as to what local interest shall make this request. It says:

Except as otherwise provided by law, wherever maritime and commercial interests shall request action by said Secretary and show to his satisfaction that such anchorage grounds are required for safe naviga-

Now, there are commercial interests and "commercial interests" in all harbors, and a few of those interests might desire it and the majority might not desire it. And yet, unless you limit that in some way or prescribe the extent of these interests that shall make this request, it seems to me you are going to enact a law here that will infringe very considerably upon

the powers and duties of these harbor masters. Mr. ADAMSON. I will say to the gentleman that I do not think an application from partial interests or from conflicting interests would come within the purview of this condition, that the Secretary of Commerce can only act at all upon the request of the maritime and commercial interests, which words are to be given their general and usual signification. This would mean that the commercial and maritime interests of a particular port requested that these grounds be fixed. When that is done, then this bill, as we propose to amend it, will give him

done, then this bill, as we propose to amend it, will give mim discretion to act and fix these lines, and not otherwise.

Mr. SPARKMAN. The amendment you suggest, by giving discretionary power to the Secretary of Commerce—

Mr. ADAMSON. He can not act at all until requested.

Mr. SPARKMAN. That will not necessarily infringe upon the powers and duties of these officials in every case. Still I am afraid it might in some cases.

Mr. ADAMSON. He can not do anything at all until they re-

Mr. DRISCOLL. The words "anchorage grounds" would not apply to a short channel. They would be two different and separate items.

Mr. ADAMSON. I do not think he would ever fix an anchor-

age ground in a short channel.

Mr. DRISCOLL. I am thinking of my home town, where the anchorage ground is probably within 400 or 500 feet of a channel where all the commerce passes, and at the present time there is litigation going on over the widening of that channel. Now, if they should construe that to mean mooring or tying of boats and anchorage at the same time, that would leave it to the Secretary of War to make that improvement without going to the Committee on Rivers and Harbors.

Mr. ADAMSON. He does not make any improvement at all.

Mr. DRISCOLL. He orders— Mr. ADAMSON. The Secretary of War and the Committee on Rivers and Harbors has jurisdiction of making all improvements.

Mr. DRISCOLL. Yes. Mr. ADAMSON. This bill does not authorize the Secretary of Commerce to take jurisdiction at all until the maritime and commercial interests at a port request him to do it. Then he uses his discretion as to whether he will do it or not.

Mr. DRISCOLL. He has that power if 'his bill passes.
Mr. ADAMSON. If it is asked for, and not unless they request it and show to his satisfaction that it should be done.

The SPEAKER. Is there objection to the present consider-tion of the bill? [After a pause.] The Chair hears none. ation of the bill? This bill is on the Union Calendar.

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that

the bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Georgia asks unanimous consent that the bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the bill for amendment. The Clerk read the bill for amendment.

Mr. ADAMSON. Mr. Speaker, I ask that the committee amendments be considered in gross.

The SPEAKER. The question is on the committee amend-

The committee amendments were considered and agreed to. Mr. ADAMSON. Mr. Speaker, I now move that in line 4, page 1, the words "and directed" be stricken out and the word "and" inserted in line 3 after the word "authorized."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Amend, line 4, page 1, by striking out the words "and directed" and insert after the word "authorized," in line 3, the word "and."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read third time, was read the third time, and passed.

On motion of Mr. Adamson, a motion to reconsider the vote whereby the bill was passed was laid on the table.

PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE.

The SPEAKER. The Clerk will report the next bill on the Calendar for Unanimous Consent.

The Clerk read as follows:

A bill (H. R. 6827) to amend an act entitled "An act to change the name of the Public Health and Marine-Hospital Service to the Public Health Service, to increase the pay of officers of sald service, and for other purposes," approved August 14, 1912.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. MANN. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Georgia if he will not ask to have this bill passed over, as I want to make some examination in relation to it?

Mr. ADAMSON. I will if it is the desire of the gentleman from Illinois. Does the gentleman wish to have it passed for

the day?

Mr. MANN. Yes. Mr. ADAMSON. Mr. Speaker, I ask unanimous consent that this bill be passed for the day without prejudice.

The SPEAKER. The gentleman from Georgia asks unanimous consent that this bill be passed for the day without prejudice. Is there objection?

There was no objection.

DISPOSITION OF EFFECTS OF DECEASED PATIENTS OF PUBLIC HEALTH SERVICE.

The SPEAKER. The Clerk will report the next bill on the Calendar for Unanimous Consent.

The Clerk read as follows:

A bill (H. R. 6202) providing for the disposition of effects of deceased patients of the Public Health Service and of certain deceased officers and men connected with the Army.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. STAFFORD. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Georgia if under this bill the United States, through the Auditor of the Treasury, is to become the administrator of estates of certain deceased

Mr. ADAMSON. I do not think such an inference is logical from the language of the bill. The department has an accumulation of large quantities of the effects of these people who die, and the effects are going to waste. They can not be properly preserved. Nobody claims them. The department would be glad to turn them over to a duly constituted administrator, or persons entitled to them, but they fill up much space and deteriorate in value. The proposition is that after a certain length of time they dely be a second or the second of the length of time they shall be sold and the money kept in lieu of the property to answer any legal claims that may be made by the interested parties.

Mr. STAFFORD. The bill says:

Ar. STARBOAD. The bill says:

The proceeds of such sales, together with any money effects of the deceased, shall be deposited in the Treasury in trust for the legal claimants, to be paid to them on the certificate of the Auditor for the Treasury Department, who shall act as conservator of these estates, with authority to indorse all bills of exchange, promissory notes, and other evidences of indebtedness due to such estates, and to take such steps as may be necessary for their collection.

That language, while clear, gave to me a somewhat ambiguous idea as to the powers of the auditor under the provision.

Mr. MANN. Will the gentleman from Wisconsin yield?

Mr. STAFFORD. Gladly.

Mr. MANN. The bill only applies to cases where there are unclaimed effects. The local authorities have the right to appoint an administrator under the bill to claim the effects; but if no one does, and the effects are not claimed, then they are turned over, under this bill, to the auditor, and if there are promissory notes or bills of exchange he collects them. But there is no interference with the authorities as to the appoint-

ment of an administrator.

Mr. STAFFORD. Will the gentleman explain what the auditor would do under this language authorizing him to indorse

bills of exchange and promissory notes?

Mr. MANN. An officer or enlisted man who dies might have a promissory note or a bill of exchange in his possession. They may not desire to have an administrator appointed. There may be no one who makes the application to be appointed administrator, or asks for administration. In those cases these effects are turned over to the War Department. Of course the language was put in out of excess of precaution, for probably a case of that kind would not arise once in a thousand times.

Mr. ADAMSON. I will say to the gentleman from Wisconsin that that can only refer to such paper as may incidentally be connected with the effects in question. There is no purpose to

go into general administration,

Mr. STAFFORD. But under the reading of the bill the auditor would act as administrator of the deceased estate. It might be inconsequential, but the auditor would aet as administrator where the public administrator would not see fit to take jurisdiction of the effects of the decensed.

Mr. MANN. Of course the language of the bill says "con-servator," but in fact it would amount to acting as adminis-

trator as to the effects turned over to the auditor.

Mr. ADAMSON. Does it not merely amount to making him a trustee?

Mr. MANN. That is undoubtedly what it amounts to.
Mr. COX. Mr. Speaker, what is done with these effects after they are turned over to the Treasury of the United States?

What is done with them now? Mr. MANN.

What has been done with them in the past? Mr. COX.

Mr. MANN. There are a lot of them up there in the Treasury Building now, and there have been for years. They have not been disposed of.

Mr. COX. That is what I want to know. Is there any law now which fixes the time when estates of this kind revert back to the Treasury of the United States and become public funds, or are the effects always held in trust for the heirs?

Mr. MANN. I think there is no law on the subject.
Mr. COX. Does the gentleman understand that up to this time whatever estates may be there are held in trust permanently, forever, for the heirs that may come up?
Mr. MANN. Until somebody calls for them.

ADAMSON. If the gentleman from Illinois will permit, this bill has no reference to estates. It has reference to effects which are in the possession and custody of the department, and merely permits the conversion of those effects into cash, because the cash is more readily and safely held for the owner than the effects.

I think the gentleman is clearly right, but I Mr. COX. wanted to get information on whether or not there would ever come a time when this money, in the event it was not claimed by the representatives of the deceased person, would revert to the Treasury of the United States?

Mr. ADAMSON. I do not believe the Government will ever plead the statute of limitation on a thing of that sort. If it does, I shall leave the country and reside elsewhere.

Mr. COX. I do not think it ought to myself, but I wanted to

Mr. MONTAGUE. Mr. Speaker, I suggest to the gentleman that there is always a legal claimant. If there is no personal representative, the property would escheat to the State of which the deceased was a resident.

Mr. COX. That is the rule in the States, but whether it is

the rule in the United States, I do not know.

Mr. WILLIS. Mr. Speaker, I desire to invite the attention of the chairman of the committee to the language used in lines 3, 4, and 5 of the bill:

That unclaimed effects of deceased patients of the Public Health Service, seamen of merchant vessels of the United States, consisting of fewelry or other articles, etc.

As the gentleman well knows, there are patients cared for by the Public Health and Marine-Hospital Service who are not seamen of merchant vessels. Does the gentleman think this bill, if passed, will be limited in its application to the seamen of merchant vessels, or will it take in all of the patients of the Marine-Hospital Service?

Mr. ADAMSON. Mr. Speaker, the bill, I will state to the gentleman, was drawn not with reference to the patients, but to the effects which were troubling the department. We wrote the

bill to cover what we had in hand.

Mr. WILLIS. Let me state a specific case. We understand that under certain circumstances sailors from the naval vessels of the United States may be cared for in this service. Suppose one of those sailors should die, leaving unclaimed effects, will this bill apply to those effects or not?

Mr. ADAMSON. I will answer that, like all we Yankees answer questions, by asking another. If the gentleman knows of sufficient cases of that sort actually existing to make it necessary to include them in this bill, it is up to the gentleman to

offer an amendment to include them.

Mr. WILLIS. I do know, as the gentleman knows, that there are many cases where there are sailors from the naval vessels of the United States

Mr. ADAMSON. But that is not the question. The question is, Is there any property up here in the departments that has been left by them?

Mr. WILLIS. We have no right to assume there will never

be any property belonging to such persons.

Mr. ADAMSON. We hardly ever anticipate trouble and legislate in advance of what is indicated by the actual facts, unless

we may reasonably apprehend it to be necessary.

Mr. WILLIS. I understood that was the purpose of this legislation-to care for those cases, not only as they exist now, but as they shall come up hereafter. We do not want to make a special law to apply to cases that now exist, and leave it to future legislation to care for the cases that may arise to-morrow.

I suggest to the gentleman whether it would not be advisable to strike out the language in line 4, "seamen of merchant vessels of the United States," and that will make it general and

apply to all patients.

Mr. ADAMSON. I will say to the gentleman the main purpose of this bill, and the moving purpose, is to dispose of the Mr. ADAMSON. I effects that are now on hand in the way that ought to be preserved, and while doing that it is reasonable to provide for what is likely to happen like that in the future. If the gentleman makes the motion he suggests, I will not oppose it.

Mr. WILLIS. I will make it. Mr. CULLOP. Will the gentleman yield for a question?

Mr. ADAMSON. I will.

Mr. CULLOP. Is there any provision in this bill specifying the period which shall elapse between the death of the party and the sale made by the Government? If not, there should be, in order to prevent abuse of the authority vested by it.

Mr. ADAMSON. I think it is two years.

Mr. CULLOP. I have looked over the bill, and I have not

observed anything of that kind; if not, I suggest an amendment of that kind be made to it so that the sale would not take place immediately, but give the claimants an opportunity to present their claims for the effects and to prevent sacrifice of

property.

Mr. FOWLER. Mr. Speaker, will the gentleman yield?

Mr. ADAMSON. Certainly.

Mr. FOWLER. On the point just raised by the gentleman from Indiana, I have been making inquiry as to section 2 and as to the extent of provisions made—
Mr. ADAMSON. If the gentleman from Illinois will allow

me to complete my answer to the gentleman from Indiana-

Mr. FOWLER.

Mr. FOWLER. Certainly. Mr. ADAMSON. The gentleman will find the proviso at the top of page 2:

Provided, That application for the effects shall not have been made by the legal claimants within two years after their receipt.

Mr. FOWLER. Section 2 provides for property of another class.

Mr. ADAMSON. What line? Mr. FOWLER. Line 11.

That unclaimed effects of deceased officers and enlisted men of the Army and civilians employed in connection with the Army or under the War Department which they have heretofore or may hereafter be received at the Treasury Department may be sold by order of the Secretary of the Treasury and the expenses of such sale paid out of the proceeds thereof.

Mr. ADAMSON. Will the gentleman read a little further? Mr. FOWLER (reading):

Provided, That application for the effects shall not have been made by the legal claimants within two years after their receipt.

Mr. ADAMSON. The provision is made in both cases.
Mr. FOWLER. Is it intended no sale shall be made in either one of the cases until after the expiration of two years? Mr. ADAMSON. From the time the property is received by the department

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and the Clerk will read the bill for amendment.

The Clerk read as follows:

The Clerk read as follows:

Be it enacted, etc., That unclaimed effects of deceased patients of the Public Health Service, seamen of merchant vessels of the United States, consisting of jewelry or other articles, shall be delivered to a collector or surveyor of customs of the district in which the death of the patient occurred, and for the protection of the estates of these persons the Secretary of the Treasury may order such effects to be sold and pay the expenses of such sale out of the proceeds: Provided, That application for the effects shall not have been made by the legal claimants within two years after their receipt. The proceeds of such sales, together with any money effects of the deceased, shall be deposited in the Treasury in trust for the legal claimants, to be paid to them on the certificate of the Auditor for the Treasury Department, who shall act as conservator of these estates, with authority to indorse all bills of exchange, promissory notes, and other evidences of indebtedness due to such estates, and to take such steps as may be necessary for their collection.

Mr. WILLIS, Mr. Speaker—

Mr. WILLIS. Mr. Speaker.

Mr. ADAMSON. Mr. Speaker, I yield to the gentleman from Ohio.

Mr. WILLIS. Will not the gentleman move to make that amendment in lines 4 and 5? It seems to me that the language "seamen of merchant vessels of the United States, consisting of jewelry and other aricles" ought to be stricken out to accomplish the purpose the gentleman has in mind. is no reason why jewelry should be mentioned especially. There

Mr. ADAMSON. I do not think it will hurt the bill at all to

strike it out.

Mr. WILLIS. Will the gentleman make the motion?
Mr. ADAMSON. Will the gentleman from Ohio make it?
Mr. WILLIS. Mr. Speaker, I move to amend by striking out, in lines 4 and 5, the words:

Seamen of merchant vessels of the United States, consisting of jewelry or other articles.

So that it will read:

That unclaimed effects of deceased patients of the Public Health Service shall be delivered to a collector-

And so forth.

Mr. ADAMSON. I have no objection to that amendment.
Mr. STAFFORD. Mr. Speaker, will the gentleman yield?
As I understand the purpose of this bill, it is to limit it to persons employed by the Government in two different branches of the service.

Mr. ADAMSON. I think so. The Public Health Service is a

very important branch of the Government.

Mr. STAFFORD. The gentleman does not want to extend the provisions of this bill to persons who are outside of the Government service?

Mr. ADAMSON. I do not think it treats of any of them. Our law prescribes what patients may be admitted.

Mr. STAFFORD. Well, the amendment offered by the gen-

tleman from Ohio will accomplish that.

Mr. WILLIS. Not at all. The effect of the amendment will not accomplish what the gentleman suggests, because these people who are treated at this hospital are seamen upon merchant vessels and in certain cases sailors from the regular naval vessels of the United States, and it does not apply to

the general public at all. I will say to the gentleman from Wisconsin it will not change the meaning of this bill as he fears it will.

The SPEAKER. The Clerk will report the amendment of-fered by the gentleman from Ohio [Mr. Willis]. Mr. GORMAN. Mr. Speaker, I would like to be permitted to ask the gentleman from Georgia [Mr. Adamson] a question. The SPEAKER. Will the gentleman from Georgia yield to the gentleman from Illinois?

Mr. ADAMSON. Yes.
Mr. GORMAN. From my very hurried reading of this b!!l,
I do not see anything as to the administrator taking charge of the effects. In the gentleman's opinion, will the passage of this bill interfere with the rights of the administrator?

Mr. ADAMSON. Not in the least. It will convert the effects of the person into cash and will hold it for the administrator,

executor, or what not.

Mr. CULLOP. That only applies to the unclaimed effects of such man?

Mr. ADAMSON. Yes.

Mr. CULLOP. In such a case as suggested by the gentleman from Illinois this bill would not operate in that case. It would in such a case have no application, but the personal representatives or legal heirs would have the right to take the property and administer upon it.

Mr. ADAMSON. The gentleman is correct about that. there is a contest for the ownership, of course, the trustee would

continue his trust until the contest was decided.

Mr. CULLOP. Certainly.

The SPEAKER. The Clerk will report the amendment offered by the gentleman from Ohio [Mr. Willis].

The Clerk read as follows:

Page 1, lines 4 and 5, strike out the words "seamen of merchant vessels of the United States, consisting of jewelry and other articles."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.
The SPEAKER. The Clerk will read.

The Clerk completed the reading of the bill, as follows:

The Clerk completed the reading of the bill, as follows:

SEC. 2. That unclaimed effects of deceased officers and enlisted men of the Army and civilian employees of the War Department which have heretofore or may hereafter be received at the Treasury Department may be sold by order of the Secretary of the Treasury and the expenses of such sale paid out of the proceeds thereof: Provided, That application for the effects shall not have been made by the legal claimants within two years after their receipt. The net proceeds of such sales, together with any money effects of the deceased, shall be deposited in the Treasury in trust for the legal claimants, to be paid to them on the certificate of the Auditor for the War Department, who shall act as conservator of these estates, with authority to indorse all checks, notes, bills of exchange, and other evidences of indebtedness due to such estates, and to take such steps as may be necessary for their collection.

The following committee amendment was read:

The following committee amendment was read:

Page 2, lines 12 and 13, strike out the words "civilian employees of" and insert the words "civilians employed in connection with the Army or under," so that the lines will read:

"That unclaimed effects of deceased officers and enlisted men of the Army and civilians employed in connection with the Army or under the War Department," etc.

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. Adamson, the motion to reconsider the vote by which the bill was passed was laid on the table.

AIDS TO NAVIGATION, LIGHTHOUSE SERVICE.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 7206) to amend an act entitled "An act to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes," approved March 4, 1913.

The SPEAKER. Is there objection to the consideration of the bill?

Mr. FITZGERALD. Mr. Speaker, reserving the right to object, will the gentleman from Georgia [Mr. Adamson] explain

the necessity for the increased limit of cost?

Mr. ADAMSON. Mr. Speaker, I ask unanimous consent, in answer to the question of the gentleman from New York [Mr. FITZGERALD], that the report, which gives the letter from the Acting Secretary of Commerce, be read. They clearly set out the necessity for this legislation.

The SPEAKER. The Clerk will read the report.

The Clerk read as follows:

Report to accompany H. R. 7206.

The Committee on Interstate and Foreign Commerce, to whom was referred the bill (H. R. 7206) to amend an act entitled "An act to authorize aids to navigation and for other works in the Lighthouse

Service, and for other purposes," approved March 4, 1913, having considered the same, report thereon with amendments, and as so amended recommend that it pass.

The bill as amended has the approval of the Department of Commerce, as will appear by the letter attached, and which is made a part of this

report.

Amend the bill as follows:
Page 1, line 5, strike out the word "for."

Amend the title so as to read:
"To amend an act entitled 'An act to authorize aids to navigation and other works in the Lighthouse Service, and for other purposes,' approved March 4, 1913."

DEPARTMENT OF COMMERCE, Washington, August 9, 1913.

My Dear Congressman: I have to acknowledge receipt of your letter of August 5, inclosing, with request for the views of this department thereon, a copy of House bill 7206, Sixty-third Congress, first session, "To amend an act entitled 'An act to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposs,' approved March 4, 1913."

The act of March 4, 1913 (37 Stat., 1017), authorized the construction of a tender for general lighthouse service at \$250,000, but a more seaworthy vessel with greater carrying capacity is now deemed necessary for the desired service. No appropriation for this object has as yet been made. A full statement setting forth the necessity for providing this tender at a cost of \$325,000 is printed at page 27 of House Document SS, Sixty-third Congress, first session (Supplemental Estimates), to which attention is invited.

It is recommended that the bill submitted be amended as follows:

Line 2 of title, and line 5, page 1, strike out the word "for"; line 7, page 1, strike out the words "and Labor."

Subject to these three amendments it is recommended that the bill be passed.

Very truly, yours,

Albert Lee Thurman,

Acting Secretary.

Acting Secretary.

Hon. W. C. Adamson, Chairman Committee on Interstate and Foreign Commerce, House of Representatives.

The statement referred to in the above letter is herewith attached. Total amount to be appropriated under each head of appropriation. DEPARTMENT OF COMMERCE.

LIGHTHOUSE ESTABLISHMENT.

[Lighthouses, beacons, fog signals, light vessels, and other works under the Lighthouse Service.]

Lighthouses, beacons, fog signals, light vessels, and other works under the Lighthouse Service.]

Lighthouse tender, general service, and the amount authorized for this purpose by the act approved March 4, 1913 (37 Stats., 1017), is hereby increased by the sum of \$75,000 (act Mar. 4, 1913, vol. 37, p. 1017, sec. 1), \$325,000.

Note: On May 20, 1912, the lighthouse tender Armeria struck a rock off Cape Hinchinbrook, Alaska, and was totally lost. This tender was the largest in the Lighthouse Service and the only one regularly assigned for service in Alaskan waters. The loss of this tender has seriously crippled the available tender force, and a new tender should take its place as soon as possible. The lighthouse work is constantly increasing on account of the increase of shipping and demand for aids to navigation. It is proposed to use the new tender for general lighthouse service as required, and also for the purpose of transporting supplies to the Pribilof Islands in Bering Sea for use in the Alaska sealing industry and for use in Alaskan waters in connection with the work of other branches of the Government, as far as may be desirable and practicable. A large seaworthy vessel is essential for this work because the vessel must carry supplies to distant points and must be able to make voyages of considerable length across portions of the north Pacific Ocean. The vessel must be of slightly greater draft and carrying capacity than the tender Armeria, which was lost, in order to transport the necessary quantities of coal, supplies, and construction materials. It is important that the proposed vessel should be so designed as to be protected against loss.

For the Past-three years and also this year the department has been

quantities of coal, supplies, and construction materials. It is important that the proposed vessel should be so designed as to be protected against loss.

For the past three years and also this year the department has been compelled to charter an appropriate vessel to carry supplies to the PribHof Islands for the use of the native inhabitants there who are wards of the Government, and bring back scalskins. The charter of a suitable vessel, exclusive of the coal used on the vessel, amounts to \$150 a day, and including the coal has caused an annual charge on appropriations of this department of from \$20,000 to \$23,000 per annum.

If the lighthouse tender authorized to be constructed under the act of March 4, 1913, above referred to, can be enlarged so as to provide the cargo space necessary to carry the supplies, which enlargement can be made if the amount to be expended for the tender is increased by \$75,000, that vessel could be used for the purpose of transporting the supplies to the islands, at a considerable saving to the Government.

Calculating the increased cost of operating a larger vessel over the cost of operation of the vessel originally proposed to be constructed, which it is estimated will be about \$7,000 per annum, there remains a net saving of approximately \$13,000 per annum, or 17 per cent on the investment of \$75,000 necessary to carry out this plan. However, the larger tender will not be used during the entire year, and probably a saving of \$2,000 per annum will be made in operating costs during the time the tender is laid up during the winter months. This will increase the profit to the Government on the investment of the additional \$75,000 to approximately 20 per cent. Since the department has been administering the fur-seal service on the Pribliof Islands there has been but one vessel on the Pacific zoast which was available for charter for the taking of the supplies of the islands. Should the vessel receive an annual charter or get a charter at more favorable terms during the time the depar

Cost of charter of steamer Homer for use in transporting supplies to the fur-seal islands:

DETAILED ESTIMATE.

Navy tugs built on Pacific coast under 10-hour day cost \$198.35 per ton, and two new revenue cutters built under 8-hour law cost \$215.51 per ton. On account of the additional hull required for cargo space, without any appreciable increase in machinery, it is believed the cost of the proposed vessel may be estimated at \$150 per ton. The maximum displacement of the Armeria was about 1.800 tons, which in the proposed vessel is to be increased to about 2,000 tons.

Windlass	6, 000

Total . The act of March 4, 1913 (Public, No. 453), authorized the construction of a tender for general service at \$250,000, but a more seaworthy vessel with greater carrying capacity, as explained above, is now deemed necessary for the desired service. No appropriation for this object has yet been made.

Mr. ADAMSON. Mr. Speaker, I will ask the gentleman from New York [Mr. Fitzgerald] if the reading answers his question?

Mr. FITZGERALD. That gives me the information I desire, and I will say to the gentleman that if after his investigation he is convinced that the building of this larger vessel will result in the economies pointed out by the Secretary of Commerce, I should be very glad to see the economies put into effect and that

amount of money saved.

Mr. ADAMSON. Mr. Speaker, the idea that controlled the committee was that it would be greatly to the advantage of the Government in point of economy to enlarge this authoriza-tion, not only because it could be utilized to carry all its supplies into that far-away country, but it would dispense with chartering vessels, and besides we would not encounter the difficulty often met with of not being able to secure any vessel at all. Very often on the Pacific coast we can not get the kind of vessel we want, and in the long run the cost of chartering the vessel would amply repay for this additional authorization for building this seaworthy ship. It would answer all purposes,

and a smaller ship will not.

Mr. MANN. Mr. Speaker, reserving the right to object, will the gentleman yield for a question?

Mr. ADAMSON. Certainly.
Mr. MANN. As I understand, there are just two reasons given for the larger vessel. One of them is in order that we may have a transport for supplies to the Pribilo? Islands and the second is in order to have a transport for fur seals from the Pribilof Islands

I did not state the first reason because I Mr. ADAMSON. thought it was self-evident that we would need for that service a stronger and larger vessel.

Mr. MANN. Are there any other reasons than those stated for a larger vessel-to transfer supplies to and fur seals from the islands?

Mr. ADAMSON. We need it for general purposes. In a general way, a strong, seaworthy vessel is needed.

Mr. MANN. You already have an authorization for the construction of a \$250,000 vessel for that purpose.

Mr. ADAMSON. That is right. Mr. MANN. As I understand this recommendation, a larger vessel is needed in order to transfer fur seals from the Pribilof Islands and supplies to the islands. Is there any other work that a larger vessel is needed for?

Mr. ADAMSON. It is thought that a larger and stronger vessel would be better for the service required in those waters.

Mr. MANN. Does the department say that anywhere?

Mr. ADAMSON. I think it does.

Mr. MANN. I have not been able to find it in the recommendations of the department.

Mr. ADAMSON. I think it is either in that report or somewhere else.

Mr. MANN. I have read it carefully and do not find it.
Mr. ADAMSON. Sometimes I read other things and get my
authorities mixed; but I have read it somewhere, coming from a competent authority.

Mr. MANN. I think the gentleman has read somewhere that this vessel is needed in order to transport coal and seals. in view of the fact that Congress has passed a law prohibiting the killing of any seals on the islands except for meat for food for the natives

Mr. ADAMSON. I do not think it is intended that this ves-

sel shall be used in killing seals.

Mr. MANN. It is to transport furs, if the gentleman will permit. They do not need this vessel for the transportation of furs for several years to come. The sealskins will not have to

be transported.

Now, the gentleman is aware also of the fact that on Wednesday next we have before us as the unfinished business of the House a bill to authorize the construction of a railroad in Alaska for the purpose of providing railroad transportation from the Pacific coast to the Yukon River, passing through the Alaskan coal fields. Will there be any need for this vessel to transport coal from California or Washington or Oregon after we have tapped the Alaskan coal fields by means of this railroad that will take the coal to the Yukon River, so that from the Yukon River it can be carried down conveniently to the Pribilof Islands?

Mr. ADAMSON. I have read in the Bible that some time the world is going to end and some of us will go to heaven. But we do not desire to defer the improvement of the Lighthouse

Service for that event. [Laughter.]

Mr. MANN. It is to be hoped not, and it is not a great strain on the imagination to think that some time my friend from Georgia will reach that haven of rest, and I would not have him act here so as that he would never get the chance. [Laugh-

Mr. ADAMSON. I would be greatly disappointed and the peace and immortal pleasure I would enjoy there would be less joyful to me if I did not see the gentleman from Illinois there also and hear him occasionally, even though he might object to the heavenly proceedings, [Laughter.] Mr. MANN. I do not know whether the gentleman will see

me there or not, but I hope he will not arrive first.

Mr. ADAMSON. I have traveled with the gentleman for many years and would like for us to enter the portals of glory together.

Mr. MANN. And I have enjoyed traveling with the gentle-But I repeat that if this railroad in Alaska is built coal can be supplied to the Pribilof Islands from the Alaskan coal fields, and a vessel of this large size will not be necessary

Mr. ADAMSON. If the gentleman will yield, I would like to make a little further answer to his question. I am not prophet enough to know what this House will do with the bill the gentleman mentions, or what will be done with it after that how long it will take to build that proposed railroad if the bill ever becomes a law. But my opinion is that we can make good use of a lighthouse vessel for many years before the realization he describes is had, and if it is to be done we shall need aids to navigation more after we get that railroad than we have needed them before. It is to be hoped that this ship, when built, will last until we get that railroad.

The SPEAKER. Is there objection?

Mr. MANN. I object.
The SPEAKER. The gentleman from Illinois [Mr. MANN] objects, and the bill will be stricken from the Calendar for Unanimous Consent. The Clerk will report the next one.

### DISTRICT OF COLUMBIA APPROPRIATION BILL

Mr. PAGE of North Carolina, from the Committee on Appropriations, reported the bill (H. R. 10523) making appropriations for the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes, which was read a first and second time, referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report, ordered to be printed. (H. Rept. 136.)

Mr. MANN. Mr. Speaker, I reserve all points of order.

Mr. PAGE of North Carolina. Mr. Speaker, I desire to give notice at this time that on to-morrow I shall move to take up

the bill for consideration.

The SPEAKER. The gentleman from North Carolina [Mr. Page] reports the District of Columbia appropriation bill, which is ordered printed and referred to the Committee of the Whole House on the state of the Union, and he further notifies the House that on to-morrow, as early as possible, he will call it up for consideration. The gentleman from Illinois [Mr. Mann] reserves all points of order.

#### LABORATORIES FOR BUREAU OF MINES, PITTSBURGH, PA.

The next business on the Calendar for Unanimous Consent was the bill (S. 2689) amending an act entitled "An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion used in reaching vessels. What is the difference between Los

of public buildings, to authorize the purchase of sites for public buildings, and for other purposes," approved March 4, 1913.

The bill was read by title.

The SPEAKER. Is there objection?

There was no objection.

Mr. ASHBROOK. I ask unanimous consent that this bill be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Ohio asks unanimous consent that this bill be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the bill by amendment.

The Clerk read as follows:

The Clerk read as follows:

Be it enacted, etc., That section 26 of the act approved March 4, 1913, which authorizes the Secretary of the Treasury to enter into a contract or contracts for the erection of fireproof laboratories for the Bureau of Mines in the city of Pittsburgh, Pa., etc., is hereby amended so as to authorize the Secretary of the Treasury, in his discretion, to accept and expend, in addition to the limit of cost therein fixed, such funds as may be received by contribution from the State of Penusylvania, or from other sources, for the purpose of enlarging, by purchase, condemnation, or otherwise, and improving the site authorized to be acquired for said Bureau of Mines, or for other work contemplated by said legislation: Provided, That the acceptance of such contributions and the improvements made therewith shall involve the United States in no expenditure in excess of the limit of cost heretofore fixed.

Mr. ADAIR. Mr. Speaker, I understand that this bill im-

Mr. ADAIR. Mr. Speaker, I understand that this bill imposes no additional expense on the Government of the United

Mr. ASHBROOK. None whatever.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

On motion of Mr. ASHBROOK, a motion to reconsider the last vote was laid on the table.

LAUNCH FOR CUSTOMS SERVICE, LOS ANGELES, CAL.

The next business on the Calendar for Unanimous Consent was the bill (H. R. 24) for the purchase or construction of a launch for the customs service at and in the vicinity of Los Angeles, Cal.

The bill was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized to purchase or have constructed for the customs service a suitable launch, of such motive power as may be determined by the Secretary of the Treasury, for the use at and in the vicinity of Los Angeles, Cal., and the cost thereof shall not exceed the sum of \$10,000

With the following committee amendments:

Page 1, line 7, after the word "of" insert "the port of."
Strike out all after "\$10.000," in line 8, page 1, and insert:
"Provided, That the Secretary of the Treasury may use said launch at any other customs port in the United States as the exigencies of the service may require."

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I should like to ask a question. My recollection is that under the law the Treasury Department has authority to build customs launches costing not more than \$5,000 each.

Mr. ADAMSON. Mr. Speaker, I will ask the gentleman from Minnesota [Mr. Stevens], who reported this bill, to take

charge of it.

Mr. STEVENS of Minnesota. That is true; but I think this is an exceptional case, which I think can be better described by the gentleman from California [Mr. STEPHENS], so I yield to him to answer that question.

Mr. STEPHENS of California. Mr. Speaker, this bill or a similar one has been passed on and recommended by the Treasury Department in each of the last four Congresses. It is recommended by the present Secretary of the Treasury, and the bill asks for as much as \$10,000, if the same be found advisable.

Mr. MANN. Mr. Speaker, some years ago, when I was a member of the Committee on Interstate and Foreign Commerce, the Treasury Department recommended a steam launch at Galveston, to cost \$25.000, and reiterated the recommendation to the committee. It seemed to me a rather excessive cost. After having a lot of correspondence with the department, I went to the department and asked the assistant secretary who had charge of the matter what the launch would cost. He said, "\$25.000." I said, "You do not know anything about it, of course; send me to the man who does know." And in course of time I reached the man who was supposed to know. He said they had no more need of a customs launch costing \$25,000 there than they had in heaven; and, I believe, finally we appropriated \$10,000 for a customs launch. Since that time they have been asking for \$10,000 customs launches, and they put in that amount as a matter of course.

The fact is, they have authority to build a launch costing not more than \$5,000, which builds a pretty reasonable launch, to be

Angeles port and all the other ports on the Pacific coast and on the Atlantic and Gulf coasts in this respect?

Mr. STEPHENS of California. Mr. Speaker, in reply to the gentleman from Illinois, I want to quote from the letter of the Treasury Department dated March 26, 1909, which says:

The department is of opinion that the service will be greatly benefited if supplied with a vessel or launch such as is provided for in the bill. In fact, the service can not be efficiently administered without such a boat.

I take it that the department would not have continued during four different Congresses to recommend the construction of such a boat if it had believed that a boat to cost \$5,000 would have adequately served the department.

The customs service at Los Angeles has to do with a very considerable coast line. Under the old regime the coast line consisted of about 100 miles, but since July 30 of this year the San Diego district has been merged into the Los Angeles district and the coast line now probably exceeds 200 miles, deed, following all its indentations, it may exceed 250 miles.

Mr. MANN. Does the gentleman understand that this customs

launch will travel up and down the coast line?

Mr. STEPHENS of California. They frequently do.

Mr. MANN. For what purpose?

Mr. STEPHENS of California. For the purpose of investigating certain smuggling reports, and for the purpose also of investigating and looking after violations of the navigation laws and regulations by motor boats.

Mr. MANN. I guess the gentleman will find that the customs launch is mainly devoted to the purpose of landing the customs officials on board incoming boats.

Mr. STEPHENS of California. That is one very important

Mr. MANN. That is about all they do, and if they do that

they can not travel around very much.

Mr. MADDEN. Is it not a fact that this launch only runs from the customhouse dock to the ships to carry papers and messages?

Mr. MANN. I think that is all they are designed for. Sometimes they are used for pleasure excursions.

Mr. MADDEN. They do not have to go to sea. Mr. STEPHENS of California. It is true that the particular purpose for which the launches are used is to board incoming ships. But it is the intent and purpose that this boat shall also be used to look after the motor regulations that the Government

is endeavoring to enforce. Mr. MANN. For many years customs officers at Chicago and the Treasury Department for a time were very insistent that they should have a large customs launch at Chicago or a small revenue cutter. Now, I have endeavored as best I could, to look after the interests of Chicago on the floor of the House, but I never was able to find out what this launch or revenue cutter would be used for unless it was to take lake excursions. As I had never been invited to participate in anything of the kind I saw no necessity for the boat, and it has never yet been provided. I suppose now there is no demand for it at present.

think you can get along with the \$5,000 launch.

Mr. STEPHENS of California. Mr. Speaker, I would be satisfied with a \$5,000 launch if the department thought that was all that was needed, but it asks and recommends one that will cost more money. I believe, after having asked for it and recommended it four times, its request now deserves serious consideration. However, if objection is to be made and it is desired to have the bill go over to the regular call of the committee reporting it, there is no use in further arguing the question at this time. If information and argument is desired now

rather than later, I will be glad to continue.

Mr. FOSTER. Mr. Speaker, I have looked into this matter somewhat, and I became convinced that it is an unnecessary expense to authorize a \$10,000 launch, and I object.

CLAIMS UNDER THE BOWMAN AND TUCKER ACTS.

Mr. GREGG. Mr. Speaker, I offer the following motion, which I send to the Clerk's desk to be read.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Mr. Gargo moves to suspend the rules, discharge the Committee of the Whole House from the further consideration of the bill H. R. 8846, entitled "A bill making appropriations for payment of certain claims in accordance with findings of the Court of Claims, reported under the provisions of the acts approved March 3, 1883, and March 3, 1887, and commonly known as the Bowman and the Tucker Acts, and under the provisions of section No. 151 of the act approved March 3, 1911, commonly known as the "judicial code," and pass the bill, with the following amendments:

monly known as the "judicial code," and pass the bill, with the following amendments:

On page 2, line 4, after the word "claims," insert the following:
"except that claimants under this act receiving compensation for use
and occupancy of property shall not be barred from further prosecution
of claims arising from damage or destruction of the same property."
On page 5 strike out line 25.
On page 6 strike out lines 13 and 14.

On page 7, line 6, strike out the word "Arkaksas" and insert the word arkansas."

"Arkansas."
On page 9, after line 6, insert the following:
"To the legal representatives of Virginia A. Jones, late administratrix of Samuel J. Jones, deceased, late of Jefferson County, \$6,950."
On page 15, after line 4, insert the following:
"To Mary A. Gammon, O. B. Whatley, and D. A. Whitehead sole surviving heirs of Wilson O. B. Whatley, deceased, late of Polk County, \$1,019."

"To Mary A. Gammon, O. B. Whatley, and D. A. Whitehead. sole surviving heirs of Wilson O. B. Whatley, deceased, late of Polk County, \$1,019."

Also the following:
"To Rosa M. Wyatt, of Bryan County, \$5.015."
On page 22, after line 8, insert the following:
"To Lucy C. Lee, administratrix of the estate of Jane T. Lee, deceased, of Mason County, \$915."
On page 22, after line 10, insert the following:
"To Adelaide B. Lindenberger, of Louisville, \$1,100."
On page 24, line 3, strike out the word "Tranghber" and insert in lieu thereof the word "Traughber."
On page 24, after line 13, insert the following:
"To the vestry of Christ Protestant Episcopal Church, of Bcwling Green, \$300."
On page 28, after line 7, insert the following:
"To the heirs or succession of Selzer Bass, deceased, late of West Carroll Parish, \$3,407.50, representing his interest in property taken from him and his coowners."
On page 40, after line 16, insert the following:
"To Antonio Q. Lovell, Rosalie Q. Duncan, Fredrica Q. Ogden, Eliza T. Routh, and Louisa Q. Lovell, deceased, and Eva C. Lovell and Alice Q. Lovell, children and heirs of Louisa Q. Lovell, deceased, or to their legal representatives, the sum of \$13,500."
On page 54, after line 12, insert the following:
"To the deacons of First Presbyterian Church of Newbern, \$3,300."
On page 55, after line 13, insert the following:
"To the consistory of the Trinity German Reformed Church, of Gettysburg, \$70."
On page 67, line 18, after the word "Memphis," insert the following:
"Late surviving partner of the firm of Topp & Vance, consisting of Robertson Topp and William L. Vance, the same being partnership property of the said Topp and Vance."
So that the item will read:
"To George T. and Guy P. Vance, executors of the estate of William L. Vance, deceased, of Memphis, late surviving partner of the firm of Topp & Vance, consisting of Robertson Topp and William L. Vance, the same being partnership property of the said Topp and Vance, \$41,667."
On page 78, after line 25, insert the following:
"To the tru

,210. On page 78, after line 20, insert the following: "To the trustees of Union Presbyterian Church, of Cross Keys, \$100."

The SPEAKER. Is a second demanded?

Mr. MANN. Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it. Mr. MANN. I think the bill has to be read before a second is demanded.

Mr. HEFLIN. Mr. Speaker, I demand a second. I do so for the purpose of asking at this time that I may proceed for 10 minutes

Mr. MANN. The gentleman can not demand a second. He is not entitled to a second. He is not opposed to the bill. The gentleman will not have an opportunity to demand a sec-Part of a motion to suspend the rules is to read the bill.

The SPEAKER. The Chair has sent out for a precedent. Mr. MANN. Oh, it is possible to make a motion to pass the bill without reading but that motion has not been made, and I

take it it will not be done where it is not absolutely necessary.

The SPEAKER. The Chair will hear the gentleman from Illinois on his point of order.

Mr. MANN. I have not made any point of order. I made a parliamentary inquiry. The Speaker asked whether a second was demanded. The reading of the bill is a part of the motion to suspend the rules and pass the bill, unless the motion is

made to pass it without reading.

The SPEAKER. The Chair is inclined to think at first blush that is correct.

Mr. MANN. I can tell the Speaker what the precedent is, because I drew the motion on two different occasions—in the case of the criminal-code bill and the judicial-title bill.

The SPEAKER. The Chair will ask the gentleman this question: Did he draw the motion when this same bill was

passed under suspension of the rules a year or so ago?

Mr. MANN. I prepared the motion in connivance with the gentleman who had charge of the bill.

The SPEAKER. I desire to see that motion.

Mr. FITZGERALD. Mr. Speaker, this bill has never been read in committee or in the House. The uniform practice has been, except under very extraordinary conditions, not to enter-tain a motion to suspend the rules for the passage of a bill without the reading of the bill. The practice of the Chair always has been himself to object if the request is made to dispense with the reading of bills which are called up, because if the bill be not even read the House would very quickly fall into habits that would result in things being passed that never should be passed. Some one ought to have a chance to know what is in the bill that is going to be passed.

Mr. GREGG. Mr. Speaker, I want to state that in the Sixtyfirst Congress in the motion to suspend the rules and pass this bill there was in it a provision that it be passed without reading, but I did not include that in this motion. I do not think that a bill of this importance ought to pass the House without being read to the House.

The SPEAKER. The Chair does not think so either. Mr. GREGG. I did not include that in the motion at all.

Mr. FITZGERALD. Mr. Speaker, in the case referred to by the gentleman from Texas the bill had been under consideration

for a long time. It had practically been read and a filibuster developed against it, and a motion was made to pass it without reading for that reason.

Mr. MANN. Mr. Speaker, my recollection is that it never was passed except by agreement along in the night, after two or three days of filibuster, at 1 or 2 o'clock in the morning.

Mr. GARDNER. Mr. Speaker, will the gentleman from New York yield?

Mr. FITZGERALD. I yield, though I have not the floor.

Mr. GARDNER. Mr. Speaker, I think the facts were these, that an attempt was made to pass that bill by a motion of the gentleman from Alabama [Mr. CLAYTON] in an attempt to overrule the decision of the Chair, and then the Committee on Rules met and reported the rule under which the bill was passed.

Mr. FITZGERALD. I do not recall.

The SPEAKER. The Chair will end the whole matter by stating that, in his judgment, no bill ought to pass this House under any circumstances whatever without being once read, unless the House puts into the motion the same words the gentleman from Illinois talks about. The Chair desires to make this statement in connection with that. This bill was read down to and

ment in connection with that. This bill was read down to and including page 41 and had been adopted up to that point.

Mr. MANN. I think it will be entirely proper, if the Speaker will permit the interruption, for the gentleman from Texas to ask unanimous consent to dispense with the reading of the bill

down to that point.

Mr. GREGG. Mr. Speaker, I ask unanimous consent that the reading of the bill at this time begin where it was left off the other day in Committee of the Whole.

The SPEAKER. The gentleman from Texas asks unanimous consent that the reading begin where it was concluded in Com-

mittee of the Whole. Is there objection?
There was no objection.

The Clerk read the bill.

The SPEAKER. Is a second demanded?

Mr. MANN. Mr. Speaker, I demand a second. Mr. GREGG. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. The gentleman from Texas asks unanimous consent that a second be considered as ordered. Is there objection? [After a pause.] The Chair hears none and the gentleman from Texas and the gentleman from Illinois [Mr. Mann] are recognized for 20 minutes each.

Mr. GREGG. Mr. Speaker, I yield 15 minutes of my time to the gentleman from Alabama [Mr. Heflin].

Mr. MANN. Mr. Speaker, I ask unanimous consent that the gentleman from Alabama may proceed out of order to discuss some other proposition.

The SPEAKER. The gentleman from Illinois asks unanimous consent that the gentleman from Alabama [Mr. HEFLIN] may speak on some subject other than the bill. Is there objection?

[After a pause.] The Chair hears none.

Mr. HEFLIN. Mr. Speaker, I wish to thank my friend the gentleman from Illinois [Mr. Mann] and the Members of this House for the permission that has been granted me to discuss at this time the subject of cotton. There are so many false rumors and inaccuracies and so much misinformation affoat now concerning the cotton crop of 1913 that I wish to submit to the House a few facts and figures that I think will somewhat clear up the atmosphere regarding the cotton situation generally.

Let me it the outset call your attention to the fact that the Bureau of Estimates in the Department of Agriculture has overestimated the cotton crop for the last three years. In 1910 this bureau overestimated the crop 40,000 bales; in 1911, 139,000 bales; and in 1912, 214,000 bales; and in the opinion of many well-informed cotton men it has overestimated the crop this year. But if we should make as much as the bureau has said we would make, 13,677,000 bales, it will not be sufficient to meet the demand.

The cost of cotton production has greatly increased. mule for which the cotton farmer once paid \$90 and \$100 he now pays \$250 and \$300. The cost of everything else that enters into the production of cotton has greatly increased, and the cotton farmer can not realize a living profit on all his labor and investment in the production of cotton unless he receives 15 cents per pound. You have educated us to the price of \$250

and \$300 for mules and we are going to educate you to 15-cent

cotton. [Applause.]
About three or four years ago, when cotton was selling for 15 cents per pound, the Department of Commerce and Labor, in a statement, said:

The rise in the cost of the raw material has been more the result of natural than of artificial causes. There has been a material advance in the prices of practically all commodities, and cotton has shared in this. But—

The statement goes on to say-

in the case of cotton this advance has also been furthered by a constantly broadening demand for this fiber in old as well as in new channels. Cotton is now relied upon in practically all of the textile manufactures, either as a primary or a secondary material, and it is utilized in an increasing number in all other manufacturing industries. The ease and rapidity with which the cotton fiber is trasformed into yarn and its adaptability for all forms of woven fabrics are responsible for the manner in which it has outstripped all other fibers and for its extensive and increasing use.

Mr. Speaker, cotton is being put to more uses to-day than ever before in the history of the world. It is used in the manufacture of and substituted for woolen goods, and is substituted for silk and linen. It is being woven into a fabric so resembling silk that it requires the chemical test to tell the difference. Thousands of bales are used in the manufacture of cement sacks, automobile tops and tires, and material for flying machines or aeroplanes.

European cotton mills have gone on making large contracts to deliver cotton goods, and now they find their supply of old cotton exhausted and a world crop smaller than last year.

John H. McFadden, a large cotton dealer, has just returned from England, and he says that the mills abroad had figured on a 16,000,000-bale crop in the United States.

Now that the crop here will be more than 2,000 000 bales short of that, there is no earthly reason why cotton should not bring 15 cents per pound. [Applause.]

The cotton mills of the world have never consumed so much cotton as they did the year ending August 31 this year, and the

supply of old cotton has not been so small in a decade.

The world's statistics published by the Bureau of the Census show that the world's estimated production of cotton for the year 1912 was 21,457,000 bales, and that the world's estimated consumption of cotton for the same year up to August 31, 1913, was 21,542,000 bales, 85,000 bales more than the crop of 1912.

The cotton mills of America, constituting about one-fifth of the spindles of the world, consumed 500,000 more bales of cotton for the year ending August 31, 1913, than they did last year, and these same mills bought 525,000 more bales of cotton since September 1 this year than last year. We exported more than 200,000 more bales of cotton during the month of September this

year than for the same month last year.

All of these facts tell of the increasing demand and consumption of cotton, of more active spindles, and of the exhausted supply of the old crop. It means that the world will need one and a half millions more bales of American cotton from the crop of 1913 than will ever be produced this year. Last year, according to the report of our Government, there were 140,-996,000 active cotton spindles in the world, and this year there are 143,398,000 active cotton spindles in the world, an increase of active cotton spindles for this year over last year of 2,402,000. The cotton crop of this year, practically all of it, has been gathered and ginned. The ginners' reports that have been published have almost, if not quite, accounted for the crop of 1913. The oldest inhabitants of the cotton belt say that never before did cotton mature so early, and never was the bulk of the crop gathered and ginned so soon in the season.

Mr. Speaker, bear gamblers on the exchange took advantage of this unprecedented condition, and because the first ginners' reports were larger than those last year of the same date they sought to induce the public to believe that a big crop was being made, and, while they knew better themselves, they succeeded in deceiving the public into believing their story, and they and their methods of misrepresentations have been the means of robbing the cotton producers on this crop already of \$10 and

\$15 per bale. [Applause.]

Mr. YOUNG of Texas. Will the Mr. HEFLIN. With pleasure. Will the gentleman yield?

YOUNG of Texas. Is it not a fact that about 65 per cent of our cotton is exported?

Mr. HEFLIN. Yes.

Mr. YOUNG of Texas. Do you think a man is a good American citizen who, on this continent, which has a monopoly of the cotton-raising business, will cry down the price of cotton in this country, where we produce it as a monopoly, in order to benefit the world at large, where they can not produce it? Mr. HEFLIN. I thank the gentleman for his question, and

I quite agree with him.

Mr. Speaker, the fact that cotton matured, opened, and was gathered and ginned earlier than ever before is no evidence of itself that the crop is larger or smaller than usual. So, in order to ascertain approximately what the cotton crop of this year is or will be, as compared with the crop of last year, we must consider the ginners' report of the two crops up to this date, and we must also consider the condition of the cotton fields and compare the amount of cotton remaining in the fields at this time last year with the amount remaining in the fields now.

Let me give you some figures showing how much more rapidly cotton was gathered and ginned early in the season this year

than last.

Take, for instance, a half dozen of the principal cotton-producing counties of my own State, Alabama, and you will readily see how much more rapidly cotton has been gathered and ginned throughout the South this year than last year.

Barbour County, in southern part of the State, by December 1, 1913, had ginned 6,000 more bales than to the same date last

	Dates.
Lowndes County (southern)	4,000
Russell County (southern)	5,000
Calhoun County (northern)	5, 000
Lauderdale County (northern)	6,000
Madison County (northern)	7,000

Louisiana had ginned last year up to September 1, 1,700 bales,

and this year to September 1, 7,000 bales.

Alabama had ginned to September 1, 1912, 12,000 bales, and to September 1, 1913, 44,000 bales.

Up to September 1, 1912, Georgia had ginned 34,000 bales, and to September 1, 1913, 72,000 bales; and so on.

While these earlier reports are much larger than those for last year, the Government figures show that the total amount of cotton ginned last year in all the States up to November 1 was greater than the total amount ginned this year to the same date. To November 1 last year, 8,869,000 bales; to November 1 this year, 8,830,000 bales. Thirty-nine thousand more bales of the crop of 1912 to that date.

Last year frost was late in many of the Southern States and cotton matured and opened after the 1st of November, and at this season of the year the fields in many sections were white

This year the situation is entirely different. Early frost in the cotton-producing States killed the leaves and squares and half-grown bolls and left the stalks bare of foliage, so that the warm sun could reach the bolls, and as a result cotton has opened and has been gathered more rapidly than ever before.

So, Mr. Speaker, the fact that the ginners' report up to December 1 this year shows 200,000 more bales of cotton than to the same date last year must be considered in connection with the further fact that last year at the same time there was a great deal of cotton remaining in the field, whereas the fields are bare now and the cotton has been gathered and ginned. And these facts, considered together, rather indicate a smaller than a larger crop. The indications are that ginners' reports for January and February will be much smaller than last year for the same months.

As late as the 20th of November last year the fields of the South were white with cotton, but by the 20th of November this year the crop had been practically gathered and stock had been turned into the fields. While the cotton crop last year did not mature so early and was not gathered so soon as the crop this year, the Government report shows that even last year by December 13 more than 92 per cent of the entire crop had been ginned. Insect pests of various kinds have injured the crop; too much rain in some sections and too little in other sections have been the means of cutting down the cotton production this year, and early frost in the cotton belt prevented the top crop from maturing. So, Mr. Speaker, all in all, the ginners' reports published to this date have practically told the story of cotton production for the year 1913.

I bring from the cotton fields of Dixie the physical evidence of a gathered crop. Here are stalks bearing bolls that matured several weeks ago. The cotton has been picked and ginned and

reported, and cattle are now roaming the fields.

Here at the top are the unmatured bolls of which I have These leaves and squares and half-grown bolls were all killed by the frost in October. No more growth after Jack Frost lays his cold hand on the sensitive cotton plant.

Bear gamblers are trying to make the public believe that the cotton stalk is still full of open bolls and the fields are still white with the fleecy staple.

These bare stalks with their empty bolls speak for themselves, and they tell the tale of a crop that is made and gathered. As I look upon them I think of the men who prepared the soil, planted the seed, cultivated the plant, and toiled in the heat of

the day to produce the wherewith to be clothed. [Applause.] I think of those whose busy fingers plucked this snowy staple from hundreds of millions of bolls, and in their name and in the name of justice I plead for the passage of a law that will protect them from the pillage and plunder of a merciless band of bear gamblers on the cotton exchange. [Applause.] places in the cotton business the cotton exchange ought to be the place where accurate information about cotton can be had; where the truth of the cotton situation is ascertained and honest dealing is the order of the day.

But instead it has become the hotbed of misinformation, deception, falsehood, and trickery. Instead of helping the producer and aiding in the distribution of the crop and serving the law of supply and demand, it injures the producer, misrepresents the truth about cotton, and hinders the operation of the law of

supply and demand. [Applause.]

And let me say to the cotton exchanges now, that unless they put their houses in order, serve the producer and aid in the distribution of the crop—handle real cotton and deliver real cotton on contracts—their days are numbered. This Congress United States. [Applause.]

The SPEAKER. The gentleman from Illinois [Mr. Mann] is recognized for 30 minutes.

Mr. MANN. Mr. Speaker, it is very refreshing to hear the distinguished gentleman from Alabama [Mr. Heflin] complain about the price of cotton, and insist that owing to the high prices of everything else the southern farmer can not afford to exist unless cotton brings 15 cents a pound. The celebrated and world-wide advertised Underwood tariff bill has not, up to

date, reduced the cost of living, as was promised, and I believe has not greatly increased the price of cotton.

As long as the gentleman from Alabama [Mr. Heflin] has stated to the House that the cotton mills of the South are running night and day, and that the New England mills are running full time, a fact which will be interesting and surprising when brought to the attention of the representatives from New England, I think I shall take occasion in a few days to call the attention of the House to the present situation in the country, both financial and industrial. I shall not detain the House at this time to do that, except to say that owing to the incapacity of Democratic control and legislation the country is now in the midst of a financial and industrial panic, and all over the country men to-day, both in factories and financial institutions, are nearly scared to death.

Now, Mr. Speaker, I yield 10 minutes to the gentleman from Ohio [Mr. Sherwood], and I ask that he may proceed without

regard to the subject under discussion.

The SPEAKER pro tempore (Mr. CULLOP). The gentleman from Ohio [Mr. Sherwood] is recognized for 10 minutes. [Applause.]

Mr. SHERWOOD. Mr. Speaker, I desire to make a few remarks about the resolution reported from the Committee on Education. After due reflection I have concluded that I can not afford to vote for that resolution. I am in favor of the purposes of that resolution, but I find by a casual examination that since 1899 we have had 28 of these commissions, and that the whole amount expended by them has been over \$7,000,000. I think it is time to call a halt on these commissions.

Take the Immigration Commission, which, according to the report given me this morning, spent perhaps between \$800,000 and \$850,000. They brought back a report that could have been obtained by our consuls abroad without the expenditure of a

single additional dollar.

I have examined the items of expenditure by that commission. First, I discover that we paid for carriage hire to the House of Lords. Did we expect any emigrants from the hereditary lords

of Great Britain?

I find an item for carriage hire to visit Westminster Abbey. Did we expect any emigrants from that abbey, the oldest in the world, where rest the remains of 13 of England's Kings and 4 of her sovereign Queens, and where Henry IV "shuffled off," over 500 years ago, in the Jerusalem corner? Did we expect any emigrants from Westminster Abbey?

Then I find a report of an expenditure for carriage hire to the Catacombs of Rome. Did we expect any emigrants from those subterranean caverns that have been silent in death for

over 1,800 years?

Then I find an item, that has been paid, for carriage hire in Constantinople—for joy rides at night in caloric Constantinople. Did they expect any emigrants from there? Did they find any desirable emigrants from the harem of the imperial Sultan? [Laughter.] I find an item for carriage hire from Joppa to Jerusalem, and so on. The Member who had charge of that commission took over with him some 36 of his friends, who were anxious to make the tour of Europe at the expense of the

Government of the United States.

Take your Monetary Commission that spent about \$250,000. It was headed by a very able man, the distinguished Senator from Rhode Island, Mr. Aldrich, but if you examine their report and turn to the Encyclopædia Britannica you can find all the information about the Bank of France, the Bank of England the Island and Island Island land, the Imperial Bank of Germany, and the Bank of Holland

that you will find in that report.

Now, we had a debate all through the spring, all through the summer, all through the autumn, and 15 days in the winter, and how many Members on this floor on either side of the Chamber or at either end of the Capitol ever referred to the report of the Monetary Commission upon which we spent

\$250,000?

I wish I had time to go through the list. I have called upon the Secretary of the Treasury for the exact cost of the Monetary Commission. The following is a list of the various commissions since 1899:

Industrial Commission (tariff and trusts).

Postal Service Commission.
Canadian Commission.
International Prison Commission.
Bering Sea Commission.
Commission on Grants of Land in New Mexico.
California Débris Commission.
Merchant Marine Commission.
Cal Strike Commission.
Extension of Capitol Commission.
International Commission on Navigation.
Printing Investigation Commission.
National Monetary Commission.
Immigration Commission.
Second-class Mail Commission.
Commission on Business Methods in Post Office Department.
Bonding Companies Commission.
St. Johns River Commission.
St. Johns River Commission.
International Waterways Commission.
International Waterways Commission.
International Waterways Commission.
Tariff Board Commission.
Commission on Change of Methods for Transacting Public Business.
Fine Arts Commission.
Lincoln Memorial Commission.
Isthmian Canal Commission.
Canadian Boundary Commission.
Canadian Boundary Commission.
Canadian Boundary Commission.

I have no doubt the President will appoint a very able

I have no doubt the President will appoint a very able commission, if authorized to do so; but he has too much work now. Candidates would be in line for this proposed commission by the hundred-experts in the dead languages; profound students of the pagan classics; scientific economists well up in all matters that have been dead for 10 centuries [laughter]; distinguished students of science and sociology, with Ph. D., LL. D., and D. D.—with as many alphabetical embellishments as there are twirls to a pig's tail. [Laughter.]

Now take the Wood Pulp Commission. I want to call your attention to the fact that that report was carefully and conscientiously prepared and as able a report as ever was prepared by any commission. This commission was authorized on the Republican side, and yet when that report was made to Congress the Ways and Means Committee, as you know, paid no attention to it. Out of the 28 commissions that have been authorized since 1899 only 3 or 4 of the schemes recommended by these commissions have been adopted or enacted into law.

Look over the list of these commissions, generally composed of representative men, and what value has most of them had? have implicit confidence in our Educational Committee. It is made up of high-class scholars, including my distinguished friend from Ohio, President Fess, who has given this matter large attention. He is a classical scholar and an experienced educator and the head of Antioch College, where I learned the most of what little I know. Let that committee make a report to the Congress and prepare a bill, and this House will give more attention to that report than it will to the report of any outside commission, no matter how able, how scientific, how scholarly that commission may be. [Applause.] I thank the House for its attention and the distinguished gentleman from Illinois [Mr. MANN] for awarding me time.

The SPEAKER pro tempore (Mr. Cullor). The gentleman from Illinois has 14 minutes remaining and the gentleman from

Texas 7 minutes remaining.

Mr. MANN. Mr. Speaker, I shall not vote for this bill or for this motion, because it includes a motion that was inserted in Committee of the Whole the other day for the payment of a claim where loyalty was not shown. I think I have proven through the course of a number of years in this House that I have no ill feeling toward the South or men who were in the Confederate Army because of the Civil War. What I say is not on account of a prejudice against the persons who lost their property, but on account of the situation as far as war is concerned. As long as war exists armies will forage on the enemy

where they are able to do it. That was the case in the Civil War to a greater or less extent-undoubtedly greater than anyone wishes had to be done. But it has never been openly contemplated that the Government should pay for all the damage caused by the destruction of property in the South by the northern armies.

First, however, we commenced to pay for property which was used by the Army and taken from so-called loyal citizens of the In the main, probably they were less entitled to consideration than the people who were disloyal, so far as that is concerned, because the people who were loyal in the main were disloyal to their own States, and I expect were in the main loyal, if they were loyal, not because they loved the flag but because they were disgruntled about something else. But we commenced to pay those claims. Then some one secured—I think, through inadvertence—what I consider a somewhat sloppy opinion from the distinguished Supreme Court of the United States, that while all the members of the congregation of a church may have been disloyal, and all the male members may have been in the Confederate Army, yet the church itself was not a personality and could not be disloyal. Then we commenced to allow claims to churches and to lodges and to counties that had courthouses and cities that had city halls, and hospitals, and every form of public building or semipublic building which was, naturally. used and occupied by an invading army in order that it may not be quartered upon the homes of the citizens, giving the preference to these public and semipublic buildings. We now have a bill that is filled with these claims, and they are still coming.

Then we have presented to us the question as to whether we should pay for property that was destroyed by the invading army, and very few, even on that side of the House, when they are located as far north as Washington, will publicly say they favor the payment of those claims. They probably can not very well avoid making a precedent when it comes to voting on some particular claim, and we shall soon be confronted with a proposition of whether we shall pay for churches which were burned, and buildings which were burned, or property which was destroyed. Then, in connection with that, we are confronted now with the proposition of whether we shall pay these claims to persons who were not loyal. The reason why nations did not in the past admit claims of this sort is because when people go to war they take their chances on brute force. If they win, they succeed; if they lose, they have failed. is no way of recompensing, and no nation in the world would think for a moment of recompensing the people of another country which it had defeated in war. But technically, here the Confederate States were not a nation, and it has been declared by the United States that those States were never out of the Hence we have a little different situation from what we would have if we had had a war with some other nation. Yet the impossibility of the Government recompensing for all damages inflicted in the South is just as great as would be the impossibility of Germany returning to France compensation for all of the damages inflicted by Germany in France during the Franco-Prussian War.

Mr. CALLAWAY. Will the gentleman yield for a question?

Mr. MANN. I yield for a question.
Mr. CALLAWAY. Is it not a fact that all civilized nations for a hundred years have paid for all property taken for the

Mr. MANN. It is not the fact.

Mr. MANN. I think that if the gentleman were at all familiar with history he would know it is not the fact.

Mr. CALLAWAY. Did not Wellington do it?

Mr. MANN. I think that if the gentleman were at all familiar with history he would know it is not the fact.

Mr. CALLAWAY. Did not Wellington pay for the private property taken when he invaded France, and did we not have an order demanding that Gen. Scott pay for all private property

he took when he invaded Mexico?

Mr. MANN. We did not. It is not the fact. It has never been the fact that the invading army paid for all private prop-erty it has either taken or destroyed. Of course I know that an army endeavors to buy property or food to a certain extent in the country which it invades, but it never has been and never will be the case that an invading army or the country behind it will pay for all property which is either taken or destroyed. I have no opposition to this bill, except for the fact that it contains this one amendment, which makes the precedent of doing away with the proof of loyalty. If you gentlemen in charge of Congress desire to set that precedent, you, of course, have the right and the power to do it. Whether you will follow up the precedent I do not know, but it is very certain that all the claim agents-and there are a number of them in Washington—will persistently and continuously for years to come cite this Underwood amendment as the precedent, unless as time goes on they have more recent ones to cite. Therefore I do not believe that this bill ought to pass with that amendment

Now, if any gentleman wants the balance of my time, I would be very glad to yield it.

Mr. HAMLIN. Will the gentleman yield me three minutes? Mr. MANN. I will How much time have I remaining?

The SPEAKER. Four minutes.

Mr. SIMS. Mr. Speaker, before the gentleman takes his seat I desire to state that there are other sources of demand for the payment of war claims of a kind which the gentleman omitted to mention. In the States that did not secede are those who insist they were entitled to the protection of the General Government, where the Confederates, for lack of this protection, took or destroyed property. Those parties are already making claims that the Government of the United States owed them such protection and did not give it. That case occurs in Chambersburg, Pa.-

Mr. MANN. And one case in Maryland.

Mr. SIMS. And one place in Maryland. And there are bills before the committee to pay for property used for fortification purposes in the State of Kentucky that were destroyed by the Confederate forces. So the gentleman has not enumerated all the claims that may yet come against us.

Mr. MANN. Oh, no; and there are also the cases where the local people burned bridges and things of that sort to prevent

the Confederate Army advancing.

Mr. UNDERWOOD. Mr. Speaker, before the gentleman uses up all his time and surrenders the floor-I think the time on this side is exhausted-

Mr. GREGG. Mr. Speaker, I promised five minutes to my

friend the gentleman from Tennessee [Mr. Austin]

Mr. MANN. I will yield the gentleman from Alabama five

Mr. UNDERWOOD. I was going to ask unanimous consent for five minutes.

Mr. HAMLIN. I only wanted two or three minutes. Mr. GREGG. I only have three minutes outside of the five. If the gentleman will pardon me, I will yield the balance of my time to the gentleman from Alabama.

Mr. UNDERWOOD. I do not want to cut the gentleman from

Missouri out.

Mr. GREGG. He was not promised time, anyhow. The SPEAKER. The gentleman from Alabama [Mr. Under-

wood] is recognized for three minutes.

Mr. UNDERWOOD. Mr. Speaker, these claims are either right and ought to be paid, or they are wrong and the Government ought never to have paid a dollar of them. Unfortunately for the claimants many just claims have been waiting around the Halls of the Congress for 50 years to be paid. If they were not just claims and had not been waiting here that long, they would not be in this bill. Most of the claims that are in this bill are here by the unanimous report of a committee that represents every section of the Union and both political parties, and it is too late to raise the question—the purely theoretical question—as to whether the people in the South who lost their property by reason of the Army of the United States should be paid these claims or not. As a matter of fact before the smoke from the battle field had cleared away Mr. Lincoln by Executive order had many of this class of claims paid.

The Executive orders are in the departments to-day, I am informed, in which Mr. Lincoln directed that where there was a claim for property used by the Government, such as the occupation of buildings and lands, that there should be no question raised as to the loyalty of the man who was turned out when it was necessary for the Army to take possession of his property. Now, so far as I am concerned, I have always said, and I say now, that the Congress of the United States is not the tribunal in which these claims should be tried. I think the Government would have saved money and I think justice would have been done to many honest claimants if years ago a general statute had been passed fixing the status of these claims and allowing the Court of Claims or some other tribunal absolute power to try cases and dispose of them finally and take them out of the Congress entirely. I think it would be wise to-day if this class of claims were finally referred to the Court of Claims and full power given to the court to consider and act on them finally and render judgment like they do in other cases. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. GREGG. Mr. Speaker, I yield five minutes to the gentleman from Tennessee [Mr. Austin].

Mr. AUSTIN. Mr. Speaker, it is not often I feel justified in criticizing the attitude of the leader of my party on this floor, but I feel it to be my duty on this occasion to resent his statement in reference to the loyalty of the Union people in the Southern States during the Civil War. He stated they had some

pretext or excuse. I want to say to him that the people of east Tennessee who were loyal to the Union had no pretext or excuse except to preserve the Union and save the flag; and I want to say further that it did not cost much to be loyal to the Union in Chicago, but it did cost something to be loyal to the Union in east Tennessee.
Mr. MANN. Will the gentleman permit?

Mr. AUSTIN. Yes.
Mr. MANN. Many of my family were in Kentucky during the entire war, and I know as much about it as the gentleman from Tennessee, but I did not refer to any of those people when stated-

Mr. AUSTIN. I want to say to the gentleman from Illinois that the people in the South who were loyal to the Union were just as true and just as honest and just as sincere in their convictions and their loyalty to the Union as the people of Illinois or Massachusetts or any other State.

Mr. MANN. I have no doubt that is the truth, but that is

not true of all the people who filed these claims.

Mr. AUSTIN. They had no selfish or ulterior purpose. They had no purpose or thought except that of patriotism, and they proved it not only in fighting for the Union, but they proved it by sacrifices that can not be told and have never been printed.

We lived between both Armies, the Southern Army and the Union Army, and thousands of the men of east Tennessee had to leave their homes at night and follow the north star into Kentucky in order to enlist in the Union Army, and they left behind their wives and children in the heart of the enemy's country. They went through indescribable hardships, and there is not money enough in the Treasury of this rich country of ours to pay the men and women of the South who were loval for what they suffered and what they endured in that struggle. And if the gentleman from Illinois [Mr. Mann] has any question in his mind about it, let him consult the men who wore the blue and fought through the Southern States. When they were hungry they found Union people ready and willing and anxious to succor them. I represent a constituency on the floor of this House where the people parted with practically all they had in order to feed and succor men from the North who came there to preserve the Union. Thirty-one thousand men in Tennessee regiments alone proved their unselfish devotion and patriotism to this country by fighting, many of them dying, and all through those mountains to-day are men who carry the evidences of their loyalty and their devotion by wounds and injuries, lost arms and lost legs, and wrecked with disease. And ill does it become the leader of my party to question their loyalty to the Union or their unselfish devotion to the flag and to their Gov-[Applause on the Democratic side.]

This bill contains 1,158 claims, 390 of them from Northern States and Western States that did not join the Confederacy. Thirty States out of 44 States represented in this bill are not in the South and had no part in the southern Confederacy. What else? A Republican President who was a wise and just man, William H. Taft, wrote this to the American Congress in December, 1910:

I invite the attention of Congress to the great number of claims which, at the instance of Congress, have been considered by the Court of Claims and decided to be valid claims against the Government.

ment.

The delay that occurs in the payment of the money due under the claims injures the reputation of the Government as an honest debtor, and I earnestly recommend that those claims which come to the Congress with the judgment and approval of the Court of Claims should be promptly paid.

Something has been said here about a claim put in this bill by the gentleman from Alabama [Mr. Underwood]. It ought to be paid, and I say to the House as a Republican and as a son of a Union man who had to leave his home during those troublesome times that that claim is a just obligation against this Government. Those people took the oath of allegiance, and there is no proof that they did not observe it. That property was taken by the National Government after the war had closed and after the conflict had ended. Why should it not be paid? It would be an honest obligation against any individual, and it is an honest obligation against this Government

that should be met and paid. [Applause.]

Mr. GREGG. Mr. Speaker, I yield the balance of my time to the gentleman from Texas [Mr. Callaway].

The SPEAKER. The gentleman from Texas [Mr. Callaway] is recognized for two minutes.

Mr. CALLAWAY. Mr. Speaker, I just wanted to quote, in support of the question I asked a moment ago of the gentleman from Illinois [Mr. MANN], the following, taken from the Digest of International Law:

In section 6, page 282, volume 7, Digest of International Law, an order was issued by the Duke of Wellington, July 9, 1813, in which he said:

"The rules, therefore, which have been observed hitherto in requiring and taking and giving receipts for supplies from the country are to

be continued in the villages on the French frontier; and the commissaries attached to each of the armies of the several nations will receive the orders from the commander in chief of the army of their nations respecting the mode and period of paying for such supplies."

On October 26, 1846, Gen. Taylor, acknowledging receipt of instructions of Mr. Marcy, Secretary of War, stated that—

"It had been impossible to sustain the Army by forced contributions. The country between the Rio Grande and the Sierra Madre was poor, furnishing only corn and beef. These articles have been obtained by paying for them. The prompt payment in cash had, besides, neutralized much of the unfriendly feeling with which the Americans were regarded, and have contributed greatly to facilitate their operations. Moreover, if their crops were so taken they would have no inducement to plant again."

And the Government ordered him to continue to pay for the supplies they had had theretofore, and furnished to him the cash in order that he might pay for them on the spot, instead of giving receipts for supplies at the time that might be presented after the conflict was over and settled by the Government.

I wanted to recite this to show that the rules of civilized warfare have been for a hundred years that whenever private property is taken for the use of the Army it has been paid for. I want to state that was the order of this Government when the war began between the North and the South, namely, that private property when it was taken for the use of the Army should be either paid for or receipted for, so that it might be settled for after the conflict was over, as follows:

for after the conflict was over, as follows:

If the owner has not fled, the commanding officer will cause receipts to be given, which may serve the spoliated owner to obtain indemnity. (Field General Orders No. 100, Apr. 24, 1863; official records, series 3-111-152.)

Private property may be taken by a military commander for public use, in cases of necessity, or to prevent it from falling into the hands of the enemy, but the necessity must be urgent, such as will admit of no delay, or the danger must be immediate and impending. But in such cases the Government is bound to make full compensation to the owner. (Mitchell v. Harmony, 13 How., 115.)

Where private property is impressed into public use during an emergency, such as a war, a contract is implied on the part of the Government to make compensation to the owner. (United States v. Russell, 13 Wall., 623.)

After the war was over Congress put on the statute books of this country the rule that no man could present a claim to this Government for private property taken for the use of the Army during the Civil War, unless he proved loyalty to the Union

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. GREGG. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. Hamlin] be given three minutes.

The SPEAKER. The gentleman from Texas [Mr. Gregg] asks unanimous consent that the gentleman from Missouri

[Mr. Hamlin] be given three minutes. Is there objection? There was no objection.

Mr. HAMLIN. Mr. Speaker, I do not know that I shall occupy even that much time. I want to say only this: I voted against the Underwood amendment the other day, not because I did not believe it possessed merit but because I felt that it was a bad precedent to set. I felt that these matters ought to be well considered by the committee and none others considered on the floor of the House, and I believe that I was correct about that.

There is a claim that I have been pressed to present for several months; an old war claim which I thought did not possess sufficient merit, and I refused to introduce a bill for its payment and refused to present it. To-day I received a letter from one of those parties, calling my attention to the fact that he knew now that if I would only do it, I could put it on this bill by amendment, calling my attention to the Underwood amend-ment, and saying, "Your excuse will no longer go with me." Then he reminded me very forcibly that he had several brothers and friends living in my district, and intimated that if I did not get busy, they would get busy later on. He referred specifically to the Underwood amendment, and said, "Of course, you can do it if you want to." I felt at the time that the Underwood amendment was adopted that it was a bad precedent, and I feel still that it was a bad precedent. I do not object much to the question of loyalty, but after all we must have a rule.

I have another claim that this committee turned down. The

Court of Claims found that the claim possessed merit, but said that the evidence showed that the parties were not at all times loyal to the Federal Government. The committee turned that claim down, and I notified the people interested that the claim would not go on the bill and would not be passed by this House because of the court's finding in regard to the loyalty of the

claimants.

Now, we should have some certain rule, otherwise it would put some of us in a false attitude. Having these considerations in mind is the reason why I voted against the Underwood amendment the other day. I have great confidence in the judgment of the committee, and feel that the committee should have

considered all these claims and passed upon them carefully, and that after that was done we ought to let the matter rest at that, and let every claim come before the committee and receive a report from the committee, and not add to the bill by illconsidered amendments on the floor of the House. [Applause.]

The SPEAKER. The question is on agreeing to the motion to suspend the rules, discharge the Committee of the Whole, and pass this bill.

The question was taken; and two-thirds voting in favor thereof, the rules were suspended and the bill was passed.

Mr. LLOYD rose.

The SPEAKER. The gentleman from Tennessee [Mr. Moon] will be recognized.

LIMIT OF DEPOSITS IN POSTAL SAVINGS SYSTEM.

Mr. MOON. Mr. Speaker, I move to suspend the rules and pass House bill 7967, Union Calendar No. 40.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 7967) to amend the act approved June 25, 1910, authorizing a postal savings system.

Ing a postal savings system.

Be it enacted, etc., That such part of section 6 of the act approved June 25, 1910, authorizing a system of postal savings depositories, as provides that "no one shall be permitted to deposit more than \$100 in any one calendar month" is hereby repealed, and said act is further amended so as to repeal the proviso in section 7 thereof and insert in lieu of such proviso the following: "Provided, That no interest shall be paid on such part of the balance to the credit of any person as is in excess of \$1,000."

Mr. STAFFORD. Mr. Speaker, I demand a second. The SPEAKER. The gentleman from Wisconsin [Mr. STAF-FORD] demands a second.

Mr. MOON. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from Tennessee [Mr. Moon] asks unanimous consent that a second be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Tennessee [Mr. Moon] has 20 minutes and the gentleman from Wisconsin [Mr. Staf-FORD] has 20.

Mr. MOON. Mr. Speaker, I have but little to say upon this bill, because a few days ago, when we had under consideration here some other bills from the Committee on the Post Office and Post Roads, Members of the House saw proper to discuss this bill most of the time rather than the bills that were then before the House. The Members of the House seemed to be interested in this question, and there has therefore been considerable discussion upon the pending bill.

It is a simple proposition, to raise the limit of the amount of money that can be deposited in any one month in the postal savings banks of the United States. Under the present laws deposits of \$100 and no more can be made by one person in one

calendar month.

The second provision of the bill is that no interest shall be paid on such part of the balance to the credit of any one person as is in excess of \$1,000, repealing a section in the old bill.

It has been found in the administration of this service in the Post Office Department that the limit that has been placed upon deposits operated to the disadvantage of the promotion and utility of that service. There have been many instances where men desired to deposit \$500 or \$1,000, and in some instances as much as \$3,000, and because under the provisions of the law they could not do so they refused to deposit anything.

This institution has been running at a loss. The present total loss to the Government in the operation of the postal savings bank is about \$1,000,000. The department is of the opinion that if this limit is removed and deposits are permitted in greater sums monthly than are now permitted, the deposits will double in a short time. If that turns out to be true, then the interest that the Government is getting in excess of that which it has to pay upon the deposits will, to a very great extent, relieve this deficiency, which the Treasury now has to bear.

Mr. MANN. Will the gentleman yield for a question?
Mr. MOON. I will yield to the gentleman.
Mr. MANN. As I understand, the savings deposits in the postal savings bank now amount to \$30,000,000 or \$33,000,000. Mr. MOON. They are now a little over \$33,000,000, as I am advised.

Mr. MANN. Does the gentleman think that a savings bank with deposits of that amount can not be conducted without a loss to the Government?

Mr. MOON. It has not been up to date.

Mr. MANN. Does the gentleman think, if that is so, that doubling the deposits will enable the institution to be selfsustaining?

Mr. MOON. The view of the department is that if the limit is taken off the amount of deposits this institution will so flourish that after awhile it may be self-sustaining.

Mr. MANN. I never was in favor of a limit on the amount of deposits, but I will say to the gentleman that I do not quite see upon what theory you can conduct a business at a profit if it amounts to \$66,000,000 if it is conducted at a loss when it amounts to \$33,000,000.

Mr. MOON. You get the additional interest.

Mr. MANN. But you have an additional expense.

Mr. MOON. Not necessarily an additional expense, or very If you are getting a profit of one-half of 1 per cent on \$33,000,000, surely your profit will be greater on \$66,000,000. Of course it necessarily follows that in the administration there must be some additional expense, but it would not be proportionate to the gain.

Mr. MANN. If you really get a difference of one-half of 1 per cent on \$33,000,000, I do not see how it is possible for the Government to conduct this business at a loss.

Mr. MOON. It seems very clear to me that the more money on which you draw interest the greater profit you will get from it. A bank doing a business of \$1,000,000 will make more profit than a bank doing a business of \$500,000 with the same force of men.

Mr. MANN. If it was losing money on \$33,000,000, the ordinary bank would lose much more on double the amount.

Mr. MOON. I will state to the gentleman from Illinois that this institution could not have lasted 24 hours if the Government of the United States had not been behind it. A common

bank could not have lasted under such conditions.

I want to remind the gentleman, too, that so far as this whole system is concerned there are many of us who have been opposed to it altogether, and there are many who think it ought to be abolished; but that view was not maintained by the Con-The Congress established this bank, and now all legislation that can be enacted to enable the trustees who are administering this fund to run the institution in such a way as to make it self-sustaining ought to be passed. This is one of the provisions

Mr. GARNER. Will the gentleman yield?

Mr. MOON. In a moment. This is one of the provisions that the department believes will be of great advantage to it and will ultimately recoup what has been lost. It may not make the institution self-sustaining, but it will make it more nearly so than it has been heretofore.

Mr. GARNER. I should like to get the gentleman's viewpoint with reference to each branch of the post office being selfsustaining-whether or not he thinks that each branch of the

department ought to pay its own way?

Mr. MOON. Of course it is impossible for each branch of the postal system to pay its own way. If it pays its way as a

whole, it does well.

Mr. GARNER. Does not the gentleman think that the banking business of the Post Office Department ought to pay its own expenses? Does the gentleman think the people ought to be taxed so that the Government may go into the banking

Mr. MOON. I will say to the gentleman that this institution has been, until covered by a recent order, an independent department under the control of the Postmaster General. It is not properly a part of the postal service of the United States. As the House will recollect, the bill was a measure that was passed really for the purpose of gathering in funds which could not or would not be placed in the common banks of the country by foreigners and others. The Post Office Department could be administered, as it has always been administered, without connection with the postal savings bank. The department had to adopt some instrumentalities to carry out the postal savings bank when imposed on it.

Mr. GARNER. I would like to ask whether or not it is the view of the gentleman from Tennessee that the department should conduct a banking business or any other kind of a business at a loss to the people? Does he think that one set of taxpayers should contribute to help run the business of another set of taxpayers?

Mr. MOON. I will answer the gentleman candidly. not think this institution ought to have been established. But that is not the question; it is not the view I entertain or you entertain on this question now under consideration. The Congress that had the power and jurisdiction had another view, and it believed that it was wise to establish a postal savings system. It has been done; it has been operating obedient to law and losses have occurred; and now it seems to me that it is the part of wisdom to pass all laws that may be possible in connection with the system that will sustain and uphold it and make it profitable.

Mr. GARNER. And this is one step in that direction?
Mr. MOON. This is one step in that direction. Now, Mr. Speaker, I have here a statement furnished by the Third Assistant Postmaster General that gives a good many facts in reference to this service, and the views of the department, and affords reasons why this legislation should be passed. If there be no objection, I will ask the Clerk to read certain parts of it, and then I will place the whole of it in the RECORD.

The SPEAKER. Without objection, the Clerk will read such portions as are indicated by the gentleman from Tennessee.

The Clerk read portions of the paper, which is as follows:

The Clerk read portions of the paper, which is as follows:

The office of the Third Assistant Postmaster General furnishes the following statement to accompany the report on the bill:

"The postal savings service in this country was largely experimental at the outset, so Congress, moving cautiously, placed the above referred to restrictions on deposits. Experience has demonstrated that these restrictions have seriously interfered with the purpose of the service. It was thought by many that heavy withdrawals from solvent banks would follow the installation of postal savings. The thought of the framers of the postal savings act on this point is reflected in the following excerpt from the report on it by the Senate Committee on Post Offices and Post Roads:

"It is the intention to make the rate of interest so low and so to restrict the maximum amount to be received from any one depositor that there will be no incentive to patronize the postal savings bank at the expense of private establishments."

"On June 30, 1913, the postal savings service had standing to the credit of depositors \$33,318,870, and \$2,389,120 of postal savings deposits had been converted into Government bonds, making \$36,207.990 for which the Government is accountable to the public. The files of the Post Office Department show conclusively that this money represents chiefly the hidden savings of timid wage earners, who have implicit confidence in the Government and who will not patronize private savings institutions. It is money that was lost to commercial activities until brought into light and business availability through postal savings. So the fear that the service would occasion heavy withdrawals from the banks has proved utterly unfounded. On the other hand, more than 7,000 banks now hold in excess of \$30,000,000 of postal savings funds—money which would otherwise have been beyond their reach. The sources of postal savings deposits have been so clearly demonstrated that the bankers now freely admit that the service was not temporary but is

show clearly that the handicap on the service was not temporary but is continuous.

"There are no figures available in the Post Office Department that show with certainty how much money has been rejected on account of the restrictions on deposits, but from the best information obtainable the department is convinced that more money has been turned away and thus driven back into hiding and disuse than it has been possible to accept. But aside from this enormous amount that has been actually lost to trade another serious feature is the disheartening effect the limitations have had on our foreign-born citizens, who are the most liberal patrons of the service and who can not understand why the Government will safeguard a portion of their savings and not all of them. Their disappointment often amounts to a secret resentment which makes itself felt among others of their countrymen, thus defeating in a measure the very purpose of the service, namely, to encourage thrift and economy among our people.

"Under the postal-savings act funds accepted from the public must be deposited in qualified banks in the city or locality where they originate, and any solvent bank under National or State supervision may qualify, by furnishing the required security, to receive its proportion of the funds. Therefore every additional dollar of secreted money that may be accepted, if the bill under consideration becomes a law, will be made available for business needs in the very field from which it was withdrawn.

"On June 20 1013, 13,265 persons had maximum accounts aggre-

will be made available for business needs in the very near treat with was withdrawn.

"On June 30, 1913, 13.265 persons had maximum accounts aggregating \$6,632,500, or one-fifth of all the deposits in the postal-savings system. A very large percentage of these depositors are unwilling to purchase Government bonds. They simply want to continue adding to their savings, but the \$500 limitation has practically closed the doors of the post office in their faces. The testimony of postmasters is almost unanimous on the point that if foreigners tender larger amounts than can be accepted they usually refuse to open accounts at all. In instances of rejection they frequently go to the money-order window and purchase foreign orders.

"Following are a few excepts from recent letters from postmasters illustrative of the serious handican on the service which the present limitations on deposits occasion. The files of the Post Office Department contain hundreds of communications reporting similar incidents:

"Newark, N. J., November 20, 1913."

"Newark, N. J., November 20, 1918.

"To-day a French lady deposited \$20, thus completing the \$500 limit. She had a large roll of bills, representing hers and her husband's savings, which she hid away on her person, remarking that they had lost money in banks on several occasions and would not trust them again. She requested to be notified whenever the limit on deposits was removed. Did not care to buy postal-savings bonds, as might some day need the money at short notice. The suggestion was made that her husband open an account, and she left, with the promise to talk the matter over with her husband."

"CLEVELAND, OHIO, November 29, 1913,

"The need of this (removal of restrictions on deposits) is shown by the fact that from September, 1911, to April. 1913, inclusive, over \$182,000 was refused at the main office alone because of the monthly limit of \$100, and during the past six weeks about \$9,000 had to be refused. At one station alone this sum amounted to \$5,000."

"FLINT, MICH., December 3, 1913.

"I was very much impressed with this incident to-day: A foreigner, an Austrian, sold some property for which he received a check for \$700. He lost no time in getting it cashed and brought the money to

the post office for deposit. Of course, we could not accept it, and explained as well as we could that he could only deposit \$100. He seemed to be in a quandry and lingered in the lobby awhile, finally shook his head, and departed. In the afternoon he returned, deposited \$100 and bought \$600 in money orders for Austria and sent it there. He made us understand that he did not consider it safe to have so much money in his house, and it cost him \$6 to send it home for safekeeping."

#### "JOHNSON CITY, TENN., December 9, 1913.

"I strongly recommend the removal of the statutory restriction on the amount of deposits as it now is. This restriction has greatly handicapped the increase of deposits at this office. I have in mind half a dozen or more cases where the applicant refused to make any deposit at all for the reason that he could not deposit all his savings at one time. One party desired to deposit \$300, another had \$500 to deposit, and another had \$1,300. Neither of these applicants deposited anything and we have had other similar cases."

#### "BURRTON, KANS., December 4, 1913.

"I am badly handicapped because of the limit of \$100 per month and a total limit of \$500 to each depositor, and can cite you to one party in particular that wished to deposit \$4,000, and when he found out that there was a limit he made no deposit, and stated that he would not trust it to any other bank either. I have had several cases where people wished to deposit more than the limit, and because they could not deposit all their money refused to have anything to do with it?"

## "WILKES-BARRE, PA., December 5, 1913.

"Wilkes-Barre, Pa., December 5, 1913.

"Since the establishment of the postal-savings system, this office has been compelled to refuse more than 25 deposits ranging from \$500 to \$1,000 in each instance, and about the same number ranging in amounts from \$200 to \$500. If we were not handicapped by the restrictions to which I have alluded, the postal savings of the office would now be near the \$50,000 mark instead of hovering around \$13,000. Fully 00 per cent of the Wilkes-Barre depositors come from the foreign-speaking element, and every time a large deposit is refused the would-be patron goes away with a poor impression of the Government's banking system. I feel that if the restrictions were removed the postal-savings business would be a big success at this office. I wish to add that we do not receive our deposits from those who are accustomed to carrying deposits in the local banks, but from a class of people who, not being acquainted with the excellency of our financial institutions, do not care to trust them and keep their money in some hidden recess of their own homes. They are accustomed to Government savings banks that receive unlimited amounts in their native countries, and look with caution on such an institution in this country that will receive only a limited amount. The day upon which your letter reached me the postal-savings clerk had to turn away a depositor with \$500, and a few days previous one was turned away with \$1,000. These are some of the discouraging features that dampen our enthusiasm when we endeavor to increase our deposits."

## "SAYRE, PA., December 5, 1913.

"We have had two instances where deposits were not made because we could not accept \$1,000, and it would seem that the general growth of this department would be hampered so long as the limit remains where it is now. Why should one man not be allowed to deposit \$1,000 as well as 10 men \$100 each? Why should the man who lacks faith in banks and who has saved \$400 be allowed the protection of the Government any more than the man who has accumulated \$700 in the same length of time?"

"FLORENCE, ALA., December 6, 1913.

"I think the Postal Savings System would be improved if the restriction on the amount of postal savings deposits that may be accepted from one depositor could be removed. At this office we have had several persons who desired to deposit more than \$100 per month and also more than \$500 in total."

## "SAN ANTONIO, TEX., December 3, 1913.

"SAN ANTONIO, Tex., December 8, 1913.

"In regard to making suggestions for the betterment of the postal savings bank, would suggest that the limit of deposits be raised. During the month of November two depositors wished to deposit \$500 each and another wished to deposit \$2,000. In my estimation, he postal savings bank is a much safer depository than cracks and crevices, where mice and cockroaches may nibble the savings of a workingman. In many cases the money deposited at this office has been badly mutilated in this manner."

### "VERSAILLES, KY., December 4, 1913.

"I had a case last month when a lady had several hundred dollars she wanted to deposit for her children and wanted to know if she could deposit it all at one time, and after talking and explaining the matter to her she concluded to deposit the \$100 and deposit the other later; and I had a similar case last year of a lady who wanted to deposit several hundred dollars, and she said unless she could deposit all she would not deposit any."

## "GOODING, IDAHO, December 4, 1913.

"GOODING, IDAMO, December 4, 1912,

"During the two and a half years we have operated the system at this office I would judge that I have turned away as much money as has been actually deposited, because we could not accept more than \$100 in any one month and the total limit of any one person was \$500. I have had during this time a dozen or so different persons ask to deposit all the way from two or three hundred to as much as two thousand at one time. After a time the public came to understand that the limits were \$100 in any one month and a total of \$500 to any one person, and from that time the interest in the Postal Savings System seemed to fall off in this community."

# "PROVIDENCE, R. I., December 4, 1913.

"In regard to the statutory restriction as to the amount which any one person may deposit, there is no question but the present limit has been a great hindrance to the growth of the postal savings system. Many people are turned away every month on account of the restriction, and many will not bother with the postal savings bank on account

of the small limit, and many have expressed great disappointment in the system. A good many have had a few hundred dollars, and in one or two instances several thousand dollars, which they desired to deposit, but would not deposit in the postal savings bank as they desired all their money in one place. In several cases when additional deposits were refused on account of the restrictions the depositors have become very angry and withdrawn what they had already put in—in two instances the depositors stated that they wanted their money in a "real bank," and many have made unfavorable comments on the system when their deposits have been refused. There have been many opportunities to receive \$500 at a deposit, and even as high as \$2,000, and when these deposits were refused the prospective depositors declined to open any account. In the case of the depository recently established at contract station No. 10 of this office, it is believed that many thousand dollars will have to be refused during the year on account of the limited restrictions. The plan of increasing their deposits by the purchase of bonds does not appeal to the majority of the foreign depositors. A very large amount of money is sent out of Providence every year by foreign money orders and through the foreign agents of the different classes of foreigners were permitted to deposit their entire savings in a Government bank."

#### " VICTOR, N. Y., December 6, 1913.

"I certainly believe that this restriction should be taken off, so that a depositor could put in any amount he desired at any time. For not being allowed to do so the growth of the service is handicapped and the very object of the system is practically defeated. Now, for instance, only vesterday this matter came up and we were obliged to turn away a would-be depositor. He came into the office and wanted to deposit \$600, and when informed that we could not accept this amount he insisted, saying that he did not feel safe in putting it in any other bank. We tried to induce him to open an account and we would do the best we could for him, but he would not do this unless we would accept the whole amount, consequently we lost the business."

"Concordia, Kans., December 4, 1913.

"Several of our depositors reached the \$500 limit some months ago and would gladly have continued to deposit had it been allowed—in fact, one has been purchasing money orders as an investment with the money which we could not receive in the postal savings department. Only a few days ago a lady, whose husband was recently killed in the railroad yards at this place, asked permission to make a deposit, but would not do so when we were obliged to decline to accept an opening deposit of \$1,000."

#### "LITTLE ROCK, ARK., December 2, 1913.

"It seems to me that the postal savings service is seriously handicapped by not being permitted to receive larger deposits. This office has on a number of occasions been forced to refuse deposits on money from \$1,000 to \$7,000."

# "BUTTE, MONT., November 22, 1913.

"It is a conservative estimate when I say that during the first 60 days upon the opening of the postal savings bank at this office that we turned down or refused deposits in the aggregate of \$150,000, due to the restrictions of the amount that a person could deposit at one time or in one month, and at the present time there are many inquiries as to the possibility of those restrictions being removed, which, in my judgment, would not only be a step in the right direction, but one that would be most popular with the laboring class of people. Had there been no restriction as to the amount that a person could deposit, since the opening of the Butte postal savings bank, instead of \$410.595 on deposit in this bank at the present time, there would be at least \$2,000,000."

### " LEADVILLE, COLO., October 20, 1913.

"Do away with the limit of deposit as soon as possible, as it injures all and helps no one. The depositor who has \$500 in quits because he must. While he waits till he can apply for a bond he grows indifferent, his interest dies out, he doesn't care, his habits change for the worse."

## "LOUISVILLE, KY., November 8, 1913.

"An Italian women, who had fallen heir to \$5,000, offered the amount for deposit in the postal savings bank, but on account of the limitation did not open an account. On the 6th instant a man offered \$300 and did not open an account because he could not deposit it all."

## " NEW BRITAIN, CONN., November 8, 1913.

"We have had several persons make application to deposit in excess of \$100 at one time. We recently had a patron who had \$200 which he wished to deposit for safekeeping, but he could deposit but \$100. The balance he kept at his home and a few days later his son stole the amount and disappeared. It is also an occasional happening that foreign-born residents in this city receive money from Europe which they wish to deposit."

"ELWOOD, IND., November 12, 1913.

"As stated above, our present deposits in this office are about \$20,000. It could have been \$50,000 if it had not been for the limit monthly. To illustrate, within the past three weeks there have been at least eight people desiring to make large deposits. An old gentleman and is wife came to me with \$1,100, and wanted to deposit it all. They were afraid to keep it at home. Yesterday a man wanted to deposit \$400 to secure bonds in December, and we couldn't take it. Another man last week with \$600. We have a foreign population of about 500 in this city, and while some of them are depositing in the post office those having large amounts are compelled to secure drafts and place the money in New York banks conducted by Greeks or Italians."

# " MONTE VISTA, COLO., November 11, 1913.

"We had one instance where it lost us a deposit of \$800 by one of the inmates of the soldiers' home. We explained to him that we could take \$100 from him each month and that then he could purchase a bond for \$500, and eventually would be able to have it all cared for. His remark was that that was too much red tape; that he wanted Uncle Sam to be his banker, but not with all that trouble to make the deposit."

"COAL CITY, ILL., November 11, 1913.

"Several of our citizens, especially the foreign born, desired to deposit more than the statutory limit. Three Italians at different times desired to make deposits—one was for \$1,500, second for \$1,300, and the third \$1,000, and several others from \$300 to \$500—but was prohibited from accepting by the statutory limit."

"JOLIET, ILL., November 15, 1913.

"This morning a foreigner wished to open an account with \$400. Upon being informed that we could accept but \$100 during a month he asked to be allowed to leave \$200, and as we were unable to accommodate him in this request he purchased foreign money orders amounting to \$400."

ST. PAUL, MINN., November 18, 1913.

"At the St. Paul post office we had many applications from widows who desire to deposit their insurance money, ranging all the way from \$300 to \$2,000. Many others make application to deposit their savings, which are in hiding, running all the way from \$300 to \$1,000 or more. There is no doubt that the deposits would greatly increase in this office if the limitation were removed, as it ought to be to conform to the Canadian limitations."

"NILES, MICH., November 18, 1913.

"I have in mind two cases where this limitation worked a hardship on the depositor and on the bank. A citizen of this place had, for safe-keeping, invested \$700 in money orders. These he afterwards turned in for a Treasury warrant, and he wanted to deposit the amount in our bank. We could only take \$100, but to deposit that amount he would have had to cash the warrant for \$700 and would have had \$600 in cash on his hands—just what he wanted to avoid."

"Boston, Mass., November 14, 1913.

"If the limitation were removed or the maximum increased considerably, with no monthly restriction, experience causes me to believe that amounts of considerable magnitude which are being sent to Italy for deposit with that postal administration would be intrusted to the domestice service."

"SALEM, MASS., November 17, 1913.

"An Italian desired to open a postal savings account and deposit \$900. \* \* \* This is only 1 of some 15 or more instances where this office has had to refuse deposits in excess of the limitations."

"COLQUET, MINN., November 15, 1913.

"Colquer, Minn., November 15, 1913.

"Men in this part of the State of Minnesota who work all winter in the woods and return to town in the spring wish to leave their whole winter's earnings and return to the log drive. Have known of an incidence where a larger amount was refused at our office, and the individual lost same on a drunk and had to draw out to get him out of trouble. It is hard to build up a business when one is compelled to turn men away who are willing to give you business."

"KANSAS CITY, Mo., November 13, 1913.

"Kansas City, Mo., November 13, 1913.

"Will say that about 10 per cent of our depositors tender as an initial deposit an amount in excess of \$100. At least 50 per cent of this number refused to make any deposit at all. Our tellers say that an average of three would-be depositors a day go away with from three to five hundred dollars, for the reason that they refuse to make two, three, or four trips to the post office, entailing loss of time, street-car fare, and other inconvenience. Yesterday a cook tendered \$360. He said he was afraid of the banks, so left \$100, and the other \$260 will be carried around on his person until he is allowed to deposit. The day before a colored laundress offered \$400 for deposit. She left \$100, and no doubt will put the balance in hiding. A day or two before this a man pushed \$500 in the teller's window. When \$400 was given back to him with the explanation of the law, he became angry and demanded the other \$100. These cases are typical of what is occurring daily."

"DUBOIS, PA., August 20, 1913.

"During the second month of operation we were offered nearly \$20,000 in excess of the amount that we could accept, and it has been a frequent occurrence ever since. In the past month we have been offered over \$5,000 by foreigners that could not be accepted on account of this provision."

"SHELBYVILLE, KY., August 21, 1913.

"Mr. Crapster (clerk in charge) tells me that the greatest drawback to the postal savings here is that no one is allowed to deposit more than \$100 per month. He has had a good many persons come to him to deposit from \$200 to \$1,500 at one time. One hundred dollars being the limit per month, they declined to make a deposit, saying it would take too long to get their money on deposit."

"Chattanooga, Tenn., August 29, 1913.

"From the experience of this office, I feel sure that if the postal savings regulation could be so amended as to increase the limit on deposits from \$100 to \$500 a month, we could reasonably expect our deposits to be doubled."

" PORTLAND, OREG., August 22, 1913.

"Portland, Oreg., August 22, 1918.

"We have now over 6,000 depositors, of whom about 350 have reached the \$500 limit and according to the law as it now stands are not permitted to make further deposits, although many of them have bitterly complained at this restriction. We do not doubt but that everyone who has reached the \$500 limit would increase his deposits were he permitted to do so. Some individual customers have brought as high as \$4,500 to deposit and many have brought from \$1,000 to \$2,000. Many foreigners who find that it takes five months to get \$500 into the postal savings bank make an initial deposit of \$100 and buy international money orders, shipping the balance out of this country. Yet at the same time a great many short-sighted bankers are opposed to the postal savings."

" COHOCTON, N. Y., November 21, 1913.

"I have a depositor now that is putting in \$100 each month and would like to deposit about \$1,500. This is money that she received for property sold, and she will not deposit it in any except a postal savings bank, and this also is in hiding and out of circulation, and I can see no good reason why these restrictions should be placed on depositors."

" CAMDEN, N. J., November 24, 1913.

"Camder, N. J., November 24, 1913.

"The \$100 monthly and \$500 total limit is without doubt one of the greatest handicaps the bank has to contend with. Among the many instances illustrative of its inadequacy was a Norwegian who came from one of the country villages about 15 miles from here to deposit \$2,100. When informed we could receive but \$100, he refused to open an account. Many other examples could be cited ranging from \$250 to \$6,000."

"CLINTON, OKLA., November 18, 1913.

"I think the service would be more satisfactory to the public if restrictions as to amounts that may be deposited were removed. A patron just recently tendered \$600 to this office, and because we could only accept \$100 he refused to make any deposit."

"BUFFALO, N. Y., November 25, 1913.

"A serious handicap to the growth of that branch of the service is the statutory restriction on the amount of postal savings deposits that may be accepted from one depositor—\$100 in a calendar month and \$500 in all. There is a large foreign-born population in this city, and, I have no doubt, there is a large amount of money hidden away in homes that would now be in circulation if the restrictions were in a measure removed. Very frequently large amounts are offered here for deposit, and, when the matter is explained, they occasionally make the \$100 deposit; more frequently they leave the office without making any deposit. They can not understand why the Government should encourage thrift up to a certain limit only and then refuse to accept deposits beyond that amount."

"Anadarko, Okla., November 26, 1913.

"ANADARKO, OKLA., November 20, 1915.

"I beg to state that this office has been sadly handicapped during the past six months owing to the restriction on amount of deposit. I now recall the following applications to deposit larger amounts: One of \$3,000, one of \$2,000, one of \$2,500, one just this morning of \$350, the would-be depositor stating that he would probably have \$600 or \$800 per month to deposit. The above applications are probably due in part to the failure of one of the leading banks of the city."

" NEW YORK, N. Y., October 4, 1913.

"Mr. Joseph Elliott, Jr.,
"Superintendent Money Order Service.

"Mr. Joseph Elliott, Jr.,

"Superintendent Money Order Service.

"The Italians are a peculiar people, in so far as money is concerned. They hoard it until they accumulate a large sum and then they buy international money orders with it, payable to the Cassiere Centrale Mo Poste e Telegrafi, Roma, Italy. They generally come to this office on rainy days, when they are idle. Of course they do not all come here, because, as previously stated, the east side bankers get a good deal of their money on account of their attractive fees. A goodly number of them deposit up to the limit, namely, \$100 per month; but most of them come here with wads of bills, stuffed in their bosoms, containing from \$500 to \$3,000, to send to that bank to be placed to their credit. About three months ago two Italians came to this office with a bundle of bills of various denominations, amounting to \$3,600, which they wanted to send to the savings bank in Rome. The bills were so soiled and faded that the cashier thought some of them were counterfeits, but on close inspection were found to be genuine. The men were asked how the bills became so faded and dead looking; they replied that they had kept them buried in the ground. On another occasion a man with domestic money orders amounting to several hundred dollars wanted to cash them and to deposit their total in our postal savings depository. He was told that we could only take \$100 in any one calendar month, and that the limit was \$500. He said it was his practice to save up until he got \$50 and then bought a money order for this amount. He had quite a number of them, and, as he wanted to deposit the whole amount, he sent it to the savings bank at Rome."

"NEW RICHMOND, WIS., November 27, 1913.

"NEW RICHMOND, WIS., November 27, 1913.

"The limit of \$100 deposits in a calendar month and \$500 in all should be by all means removed. We can see no good or useful purpose served by the restrictions, and it has on several occasions prevented us from accepting deposits of larger sums that have been offered. Not long since a prospective depositor wanted to start an account with \$1,200. He was informed of the regulations. It was also suggested that he might open separate accounts in the names of his children or relatives, but it turned out that he was a single man and he had no near relatives in this country. He took the money away, and it was his intention, so he stated, to buy a draft and send the money to Norway, to be banked in his native town."

"The postal savings system is a balance wheel in times of financial disturbances and can be made a much more effective agency in this respect by removing the restrictions now placed on deposits. A few illustrations on the point follow:

"On July 31 postal savings deposits at Youngstown, Ohio, were \$13,556. The average monthly receipts for the preceding three months had been less than \$800. On August 5 the receipts for the day jumped to \$3,526, and in the nine days ending August 15 they were \$11,958, as compared with a little over \$13,000 taken in during the preceding two years. This sudden increase was due to a two days' run on the local bank. The following is from the postmaster's letter dated August 8:

local bank. The following is from the postalesters gust 8:

"'These foreigners brought from \$100 to \$1,400 each for postal savings, and when told they could deposit but \$100 in any one month they, some of them, bought money orders on foreign countries, in amount \$10,000, in three days. \* \* We turned away close to \$30,000 in real cash because of postal savings rules on deposits."

"Ironwood, Mich., with about 12,000 population, was made a savings depository in May, 1911. A bank failure occurred there in June, 1912. The postal savings at Ironwood now aggregate nearly \$150,000, a larger amount than many cities accumulate of ten times the population.

"On October 20, 1913, a bank failed at Lowell, Mass., and during the month there was a net gain in deposits of \$3,373, and in November there was a net gain of \$14,749, as against a gain of \$163 in September. The postmaster wrote under date of November 17:

"In two days we have had one Italian with \$900, one Greek with \$150, one Canadian with \$300, one Greek with \$200, and one Greek with \$1,400, all for deposit. It is estimated that at least \$50,000 has been refused for deposit in this office since October 21 on account of the restrictions covering monthly deposits."

"On June 30 postal savings deposits at McKeesport, Pa., were \$12,402, On July 7 a bank in that city was closed temporarily on account of its close affiliation with a Pittsburgh bank which failed that day. The amount on deposit at the end of July was \$20,398; August, \$29,145; September, \$36,705; October, \$43,248.

"The First-Second National Bank of Pittsburgh, Pa., was closed on July 7, 1913. The postal savings receipts for the week beginning on the day of the failure were \$19,624, a larger sum than had been deposited in an entire month. The postmaster, in commenting on the situation July 17, said:

"'Very many of the depositors wanted to leave large sums, ranging from \$1,000 to \$9,000. Some persons who came to the office when they learned that only \$100 could be accepted clid not open an account. While no record was kept of the amount offered and refused, there is no doubt but what the aggregate was in excess of \$100,000."

"He again wrote the Post Office Department on November 26, in part as follows:

"'It beg to report that the postal saving system in Pittsburgh is no

while no record was kept of the amount direct and reliased, tacks as no doubt but what the aggregate was in excess of \$100.000."

"He again wrote the Post Office Department on November 26, in part as follows:

"I beg to report that the postal saving system in Pittsburgh is no longer an experiment, nor is it neglected by either the people or this office. From the date of its organization here on September 9, 1911, to July 5, 1913, the total deposits were \$134.271. Yesterday the total was \$490.310, a gain of \$266.039 from July 5 to November 25.

"'This increase began with the closing of the First-Second National Bank. The large amount of local advertising given the postal savings system in connection with this closing brought as patrons many persons in no way connected with the First-Second National Bank, many of them who had never before had a deposit.

"If the limit of deposit was taken off, this office would have \$2.000,000 on deposit in six months. Every day sums in excess of \$100 are offered, and almost every day patrons who have reached the maximum for one month attempt to make additional deposits. To-day three persons tried to deposit \$500 each. One of them was induced to open an account at \$100, the other two would not deposit anything when not permitted to deposit all of it. Yesterday a woman appeared with \$2,000, and it was with difficulty that she was induced to take it away with her. These are dally occurrences:

"A run on the United States Trust Co. in Washington, D. C., began about noon on November 21. The newspapers next morning announced that the company had been taken over by the Munsey Trust Co. and that full protection to depositors was insured. The run continued, however, until noon, the closing hour. During the six days prior to the run 30 postal savings accounts were opened in the Washington post office and \$3,413 was received. In five days after the run 147 accounts were opened and \$15,650 was received, and during this period \$24,261 was rejected on account of the monthly limitation.

"The

Mr. MOON. Now, Mr. Speaker, I will yield five minutes to

the gentleman from Indiana [Mr. Cox].

Mr. COX. Mr. Speaker, I was not one of those who was enthusiastically in favor of the bill when it originally became a law, but as the chairman of this important committee has well said that it is now a part of the postal system of this country and if it requires legislation how to make it self-sustaining, I am in favor of that legislation. There is no question on earth but that down to this good hour the system has been run at a loss; that is to say, at a loss as a banker would run his banking business, as a banker would balance his books every night. But you must take into consideration the fact that a system of this kind has been of advantage to the country in bringing more money into circulation, and the fact that there is no way on earth whereby you can get at all the benefits that come as a result of this legislation.

It strikes me, Mr. Speaker, that there is a way out of it to make this business self-sustaining. If I remember, the law creating the postal savings bank system provides that the banks should pay not less than 21 per cent interest on the deposits. Now, I know of no good reason on earth why bankers should not pay at least 3 per cent on these deposits. I endeavored to ascertain from the Post Office Department what effect it would have on the balance of profit and loss in the event that the Government had charged 3 per cent instead of 21 per cent, and

I was unable to get these figures.

Mr. MOON. Will the gentleman from Indiana yield? Mr. COX. With pleasure.

Mr. MOON. The gentleman is right, the rate of interest is 2½ per cent.

Mr. COX. Under the present law?

Mr. MOON. Under the present law. The trustees managing this institution have a right to increase the rate of interest above 21 per cent. That department is contemplating, as I am advised a possible increase of the rate of interest as one of the means by which to remove this deficit along this line, but the situation is such in reference to this matter that it is not deemed advisable to press the department by any legislation to

order this rate of interest increased. A readjustment of this system is going on, and probably it is not wise for Congress to undertake to legislate in regard to it now.

Mr. COX. I quite agree with the gentleman.

Mr. GARNER. Will the gentleman from Indiana yield for a question?

Mr. COX. Certainly.

Mr. GARNER. If I understand the chairman, his intimation was as to what the department was doing; that it was undertaking to make the business self-sustaining.

Mr. MOON. Self-sustaining. Mr. COX. Mr. Speaker, the chairman of the committee has well said that under the original act establishing the postal savings-bank system the authorities have power to increase the rate of interest. I quite agree with him as to the wisdom of Congress at this time not undertaking to compel the department to increase the rate of interest. But, Mr. Speaker, trust companies all over the United States are to-day paying 3 per cent interest on daily deposits, checking accounts; and so forth, and why should not the bankers pay 3 per cent interest on this?

Mr. MADDEN. Will the gentleman yield?

Mr. COX. Yes. Mr. MADDEN. Did the gentleman state that banks were paying 3 per cent interest on checking deposits?

Mr. COX. I said the trust companies.

Mr. MADDEN. On checking accounts the average rate of interest paid is 2 per cent on all above \$1,000, and if you have less than \$200 they charge you \$1 a month for keeping the account.

Mr. COX. I will say to the gentleman that I never did any business with a trust company. They advertise that they are paying 3 per cent interest on daily checking balances. As I said a moment ago, no hardship is placed on the bank, because practically all of them already have on deposit the character of bonds which the Postal Department exacts in order that they may secure postal-savings deposits, and I believe if the Postal Department would require a 3 per cent interest we would soon see a return sufficient to make this institution a paying institu-

The SPEAKER. The time of the gentleman from Indiana has expired.

Mr. STAFFORD. Mr. Speaker, I will ask the Chair to notify me when I have occupied 10 minutes.

In no country where the postal savings system is inaugurated were such restrictions placed on the system as under our existing law. As the letter just read to the House containing an excerpt from the report of the Senate committee confirms, it was the manifest purpose to discourage the deposit of savings funds in these postal savings banks. In no other country is so low a rate of interest as 2 per cent paid to postal savings bank depositors. It is to the shame of this Government that we pay the lowest interest rate to these poor depositors who avail themselves of these depositories because of lack of faith in our existing banking institutions. Even Italy pays more. France and Great Britain pay 21 per cent and Canada pays 3 per cent. Not only was this system discouraged with the low rate of interest paid on these deposits, but it was wet-blanketed in the restriction as to the amount that depositors could put into the banks, not to exceed \$100 in any one calendar month and not to exceed \$500 at any one time. The purpose of this bill is to lift that restriction as to the amount of deposits, enabling anyone to deposit as much as he desires, with deposits in excess of \$1,000 drawing no interest whatsoever. There were few in the Post Office Committee when this system was originally inaugurated who favored the very amendment we have under consideration to-day. For my part I can not under-stand why we should withhold the payment of interest on deposits in excess of \$1,000. If it is proper to pay interest at all, what argument can we advance against paying it on the entire deposit? It is true that in some countries a limit is placed on the amount on which interest will be paid, but in Canada, where the amount is \$3,000, the average deposits run up to as high as \$290 per depositor, whereas in this country the average deposit is only \$102.

Mr. BURKE of South Dakota. Mr. Speaker, will the gentle-

man yield?

Mr. STAFFORD. Certainly.

Mr. BURKE of South Dakota. Will the gentleman tell us how the interest is allowed? Does the money have to remain any length of time before it begins to draw interest?

Mr. STAFFORD. In this country, as in very few others, we Mr. Starford. In this country, as in very lew others, we allow interest provided only that the deposit has remained a full year, and more than one-half of all of the accounts in the postal savings bank are withdrawn during the course of the year. In this past fiscal year there were \$41,000,000 of deposits and \$28,000,000 were withdrawn. And it has been the rule with these deposits that only one-half of them are left the full period to draw interest.

Mr. BARTHOLDT. Mr. Speaker, will the gentleman yield? Mr. STAFFORD. Certainly. Mr. BARTHOLDT. That if a deposit has been in the hands of the Government for 11 months, no interest is paid on it

Mr. STAFFORD. No interest is paid whatever, whereas, as the gentleman well knows, there are many instances of private savings banks where, if the deposits are on deposit for three months, the depositor receives interest. The usual rule is six months. But, seemingly, the Government does everything possible to discourage investment on funds of the poor in these safe depositories.

Considerable emphasis during the discussion has been laid on the expense of this system, that it does not pay; but if the department would exercise the discretion that it has under exising law and charge the banks the same rate of interest which the banks pay to the ordinary depositor for savings funds, it would in a short time equal and exceed the expenses of administration.

The gentleman from Indiana [Mr. Cox] says that at the rate of 3 per cent he is unable to ascertain how much more would result. I have here a computation that shows that there would be \$133,600 additional profit paid to the Government if the money were loaned at 3 per cent instead of 21 per cent. One of the great faults with the existing system, which has led to these enormous expenditures, is that they have been established too recklessly. As I said the other day, they were established at every cross-road post office, so that among the 4,000 fourth-class post offices in the country designated as savings depositories there are 3,000 of them that have no deposits or deposits of only \$1. I direct the attention of the House to the report of the Postmaster General, House Document No. 359, just printed, and if you will turn to the record of the deposits in the various offices in the different States-North Carolina, Wisconsin, Iowa, and some others—you will find in nearly one-half the offices where postal-savings banks have been established that there are no deposits at all or in a large number there is a mere deposit of \$1. Now, it was never intended by the supporters of this proposed system that we should continue these offices at great expense where there was no business to warrant their establishment. The returns show that the expense last year chargeable directly to the establishment of this service was \$296,724. If these minor offices should be discontinued and the expense connected with the administration of those offices eliminated and a little additional interest paid on deposits by the banks, say, from 2½ to 3 per cent, there would be no question but what there would be a proper showing on the right side of the ledger account.

Mr. BURKE of South Dakota. Will the gentleman yield?

Mr. STAFFORD. I will be glad to yield.

Mr. BURKE of South Dakota. Was not a bill passed a few days ago proposing to discontinue the compensation to postmasters in these 4,000 fourth-class offices the gentleman describes?

Mr. STAFFORD. Yes.

Mr. BURKE of South Dakota. Now, I would like to ask the gentleman if he has any statistics as to what per cent of money deposited in savings banks is drawn out before they begin to draw interest as compared with the deposits in the postal sayings banks.

Mr. STAFFORD. Oh, that you could not estimate definitely. For example, these figures that have been returned in this voluminous report of the Postmaster General show that the postal savings bank system has not been availed of to any great extent in those cities and communities where people have faith in existing savings institutions. The savings have increased largely in those centers of foreign population such as home city, and Detroit, Indianapolis, and New York. Philadelphia, where the first savings bank in the history of the Nation was established, in 1816, and where the people have had such firm confidence in the security of those institutions that they have not availed themselves of the postal savings bank system. In those old established institutions like the Philadelphia Savings Fund or the Western Savings Fund of Philadelphia, the people rarely withdraw their accounts until they can obtain the six months computation of interest.

Mr. BURKE of South Dakota. Do the banks pay interest on these postal deposits? That is, after they are deposited in the postal savings bank then I understand they are put in local banks. Do they pay interest, and if so to what extent?

Mr. STAFFORD. The Government receives interest on the average yearly deposit at the rate of 21 per cent. The law says the bank receiving these deposits shall pay not less than

 $2\frac{1}{2}$  per cent, and the department has authority to charge a higher rate.

Mr. BURKE of South Dakota. Has the Government paid out more interest on deposits than it has received from deposits in the bank?

Mr. STAFFORD. It has not; but the cost of administration has been greater than the interest received from the banks after deducting the interest paid the depositors. How much time

have I used, Mr. Speaker?

The SPEAKER. The gentleman has used 10 minutes exactly.

Mr. HAMILTON of Michigan. Will the gentleman permit a question?

Mr. STAFFORD. Certainly.

Mr. HAMILTON of Michigan. What are the principal additional costs of administration? The gentleman has referred to the cost of administration.

Mr. STAFFORD. There is an extra cost of administration occasioned by the clerical force; the administration of this branch of the service is placed at \$388,000—a very extravagant estimate. In the opinion of many of us we think it should be reduced nearly one-half. In conclusion, I wish to say this system is here to stay, and there is no reason why it should not be a paying institution. The department officials have stated they have in the department here a sufficient clerical force to handle twice the amounts of deposits without increasing that force.

Mr. HAMILTON of Michigan. Have we increased the clerical force on the average in the third-class post offices where this

system has been in force?

Mr. STAFFORD. In third-class post offices there are no

Mr. HAMILTON of Michigan. I beg the gentleman's pardon, meant second class.

Mr. STAFFORD. In the second-c'ass offices the clerks perform this work in conjunction with their other duties. Only in the larger first-class offices, like New York, Chicago, Milwaukee, Detroit, San Francisco, is additional clerical force occasioned by the establishment of this system. I now yield, Mr. Speaker, five minutes to the gentleman from Illinois [Mr. Madden], and

reserve the balance of my time.

Mr. MADDEN. Mr. Speaker, this law was primarily enacted not with the expectation of making a lot of money out of it but for the purpose of creating a higher spirit of patriotism in the American people. It was enacted for the purpose of taking money out of hiding and putting it into circulation. It was enacted to accommodate a class of people in our citizenship who were not in the habit of dealing with banks and who had confidence in the Government. It was enacted to obviate the possibility of loss to depositors in private banks that were not under legal control, as had been the case in many instances in every great State in the Union. I was one of the men who was en-thusiastically for the law long before it was enacted, and while it was being enacted, and when it was enacted. I believed then, as I believe now, that it was one of the most beneficent pieces of legislation enacted by the Congress of the United States. I was one of the men who was opposed then to a limitation of the amount to be deposited in any one month or at any time, but a lot of other men did not agree with my opinion. They believed we ought to have a limit placed on the amount that any one man would deposit. They feared it might interfere with the banking system of the country. I had no such fear. It has been shown beyond any question of doubt that a good deal more money would be on deposit in the postal savings bank if there were no limit placed on the amount that could be deposited by any one person.

I congratulate the Postmaster General on the fact that he has discovered the means by which this institution can be popularized, and I am glad that he has recommended the lifting of the limit of the amount that can be placed on deposit. I believe the institution can not only be made self-sustaining, but that it can be made a profitable arm of the Government of the United

I believe when you encourage men that will not place their money on deposit in banks to deposit it with the Government of the United States you encourage them in thrift; that you encourage them in frugality; that you encourage them in the habit of saving and in the habit of investment; and when a man has deposited money for a time, who has never deposited before in one of these institutions, he learns the habit of dealing with money, and he learns to take that money from deposit in the postal savings bank and buy an American bond, and when he buys that bond he becomes a closer observer of how the Government of the United States is conducted. He becomes a better citizen, he becomes more patriotic, and he is an interested observer of events that take place in the Congress of the United States from day to day.

There can be no question about the advisability of the enactment of the bill proposed by this committee, and I feel quite sure that if the law which we propose be enacted, and the limit of the deposits be taken off, that within the next year we will not only have \$33,000,000 on deposit, but we will have \$75,000,000 and more on deposit, and the difference between the present deposits and the amount that I have named will come from the stockings and the bootlegs and the stovepipes, and other places of hiding in the United States and go into the circulation of the commercial life of the country, and thus aid in the increase of prosperity of our people.

You can not do too much to encourage the class of people that we are endeavoring to help by the enactment of such a law. I am glad, and I congratulate, as I said before, the Postmaster General on having recommended to the Congress the lifting of the limit of the amount that to-day can be deposited by any one Why, individual in the postal sayings banks of the Nation. the mere fact of the existence of the postal savings bank is an

insurance policy against danger in any community.

For example, in the case of the United States Trust Co. a few days ago, when we had a run, a great many of the people who drew their money from the United States Trust Co. offered to deposit it with the post-office authorities right here in Washington. What would have become of that if it had been deposited with the post-office authorities? It would have gone back into the commercial life of the Nation by being redeposited in the banks. So as a matter of fact, if people withdraw their money from the banks and place it with the Government, the Government can again redeposit that money with the banks and thus establish the condition that ought to have prevailed before the want of confidence arose that induced the people to draw their money from the banks. This bill will, without doubt, not only make for the certainty of the operation of this postal savings bank institution along lines that will not only prevent loss, but will just as certainly show in the next report of the Postmaster General a profit to the credit of the account of the postal savings bank under the direction of the Post Office Department. [Applause.]

Mr. STAFFORD. Mr. Speaker, how much time have I re-

maining?

The SPEAKER. Four minutes.

Mr. STAFFORD. I yield the balance of my time to the gentleman from Indiana [Mr. ADAIR].

Mr. ADAIR. Mr. Speaker, I do not rise to oppose the bill offered by the chairman of the Committee on the Post Office and Post Roads, but I do rise to state that when postal savings bank legislation was passed a few years ago I doubted at that time the wisdom of the legislation. Although I voted for it at the time, I did not believe then any large amount of money would be deposited in these banks, and time has demonstrated the fact that I was right. I do not believe that if you raise the limit the amount deposited in these banks will be increased to any great extent.

The foreigners, for instance, in the great cities whom you might say have deposited the bulk of the \$30,000,000 in these banks are not concerned as to whether or not it has been a losing proposition for this Government. I believe you have gotten in these banks now practically all the money you will

get, no matter whether you raise the limit or not.

Then as to the contention that was made a few moments ago by my good friend from Indiana [Mr. Cox] that the way to make this business self-supporting is to increase the interest charge to the banks, let me say to you now and here, speaking as one who has had some experience in the banking business that when you undertake to raise the interest to 3 per cent the banks of the country will not want the deposits. Just bear this in mind, that there is a big difference between your going into a bank as an individual and depositing \$10,000 and receiving 3 per cent interest on it and the Government depositing a like amount. The bank can well afford to pay you 3 per cent interest. It may be able to pay you 4 per cent interest, But when this Government deposits \$10,000 in a local bank, that bank must invest a like amount of money in 4 per cent bonds, or in bonds upon which it may realize 4 per cent interest, and put up such bonds as security for the Government So you can readily understand that when a bank is required to invest a like amount of money in 4 per cent bonds there is no profit in the transaction. In my judgment, whenever the department attempts to raise the rate of interest it will find no banks in the country, except those in the extreme West, will accept it.

Already there are banks which refuse to accept these deposits at 2½ per cent.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield?

Mr. ADAIR. Yes.

Mr. STAFFORD. Is the gentleman acquainted with the fact that the average rate of interest on deposits in New York City is more than 3 per cent, something more nearly 4 per cent on the average?

Mr. ADAIR. That may be true; but they can take that money and loan it on real estate and realize 5 per cent or 6 per cent on it. But if you are required to take out of a bank a like amount and invest it in 4 per cent bonds, any man who can add 2 and 2 together can understand that there is no profit

to the bank in accepting the deposit.

I do not believe, Mr. Speaker, that this bill will materially increase the deposits in these banks. I did not believe at the time that there was any real necessity for these banks, and time has demonstrated, as I said before, that they have been a losing proposition. But I shall not oppose this bill. We have these banks. They are here, and they must be operated, whether they lose money to the Government or not, and I am perfectly willing that the limit shall be raised in order, if possible, that the banks may get enough business to be self-supporting. But you can rest assured they will never get it by raising the interest rate.

The SPEAKER. The time of the gentleman from Indiana has expired. All time has expired, and the question is on the motion to discharge the Committee of the Whole House on the state of the Union from the further consideration of this bill, to suspend the rules, and pass the bill.

The question was taken; and, two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

#### TRANSPORTATION OF MAIL BY AEROPLANES.

Mr. FINLEY. Mr. Speaker, I move to discharge the Committee of the Whole House on the state of the Union from the further consideration of the bill H. R. 3393, to suspend the rules, and pass the bill.

The SPEAKER. The Clerk will report the bill,

The Clerk read as follows:

A bill (H. R. 3393) to authorize the carrying of mail by aeroplane or by any other similar device.

Be it enacted, etc., That the Postmaster General is hereby authorized to enter into contracts for carrying the mail by aeroplane or by any other similar device when in his opinion the efficiency, dispatch, or general interest of the service will be promoted thereby, and when he deems it advisable may advertise for proposals therefor.

The SPEAKER. Is a second demanded?

Mr. MANN. I demand a second.

The SPEAKER. The gentleman from Illinois demands a

Mr. FINLEY. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. The gentleman from South Carolina asks unanimous consent that a second be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The gentleman from South Carolina has 20 minutes and the gentleman from Illinois 20 minutes.

Mr. FINLEY. Mr. Speaker, in the recommendations made to Congress this year by the Postmaster General was one asking for an appropriation of \$50,000 to make a trial, or an experiment, in carrying mails by aeroplane service. I can assure the House that no more than that is expected this year and no more than that amount will be appropriated. I think I can promise that.

Of course, this is a service that will never become general in the conduct of the Post Office Department, but there are sections of this country where, in the opinion of many people who are well informed, such a service can be undertaken and thereby the efficiency of the Post Office Department added to, and firstclass mail, at least, transported economically in the manner provided in this bill. There are arid sections of the country. It is also claimed that at certain seasons of the year the mails can be carried expeditiously and probably economically in parts of the Territory of Alaska in this way—not in all parts of that Territory, but in certain parts. There is, I believe, one case where from a point in the State of Idaho to a point in the State of Nevada mails are now transported by mule trains a distance of something like 700 miles, that being the shortest practicable trail, because of mountains, canyons, and obstructions of that character, whereas, as the crow flies the distance is only about 100 miles or a little more. In other words, instead of carrying the mail 700 miles by mule train, an aeroplane would make the trip in two hours and return the same day, giving both dispatch and return of mail.

As I stated before, it is not expected or intended that this service shall become general; but in a great country like this,

with a vast area such as the United States has, it is entirely within the bounds of reason to suppose, and it is a fact, that there are certain sections of the country where the star-route service is poor; service lacking in efficiency and economy. The purpose of this bill is to try out the aeroplane service in such localities. If it proves a failure, then no further steps will be taken in this respect; but if it is a success, then we will have an actual demonstration, we will have facts, we will have something on which to base our actions in the future.

While the United States was the pioneer in aeroplane development, while the Wright brothers were the first to fly a heavier-than-air machine, yet the United States is not keeping up with the progress of other nations. So far as I know, the French people are now ahead. They have made the greatest progress, and I believe a flight of 500 miles has been made across the widest part of the Mediterranean Sea. Not only that, but they are using the aeroplane service for transporting mails in the Desert of Sahara, which, as we all know, is an arid region like some sections we have in the United States

Mr. Speaker, this is a short explanation of the bill, and I think we ought to try out this proposition. It will not be a waste of money. It will be money well spent. I hope that the bill will go through without opposition,

I reserve the remainder of my time.

Mr. HAMLIN. Will the gentleman yield for a question?
Mr. FINLEY. Certainly.
Mr. HAMLIN. Do you provide also for parcel post by aero-

Mr. FINLEY. That is not mentioned in the bill, but I take it the Postmaster General, in the exercise of his discretion, if he finds it feasible to carry small parcels, will include them.

Mr. HAMLIN. He would have to carry them up to 50 pounds weight, would be not?

Mr. FINLEY. No; not at all. Mr. HAMLIN. Would it necessitate a special mail agent or clerk to go with the machine?

Mr. FINLEY. I think it would necessitate the employment of some one who was an expert in navigating the air.

Mr. HAMLIN. As a matter of fact the gentleman does not

believe the scheme is at all feasible, does he?

Mr. FINLEY. Well, yes; in some localities I think it is. I have stated that the service will never be general; but in the arid regions, and in parts of Alaska, and in places like the one I have mentioned, where the distance traveled is now 700 miles and the air-line distance is only 100 miles, it may very well be tried; and there may be places in the State of Missouri. I do not know about that.

Mr. HAMLIN. In the place the gentleman speaks of there are not 700 people in the whole 700 miles, are there? Seriously speaking, if this law should be placed on the statute books would we not simply fool away a whole lot of money for no good

Mr. FINLEY. I do not think so. I think this \$50,000 will be well spent, and I think the gentleman will change his mind if he will read the recommendation of the Postmaster General and the hearings before the Post Office Committee.

Mr. HAMLIN. Of course, I can understand that the Post Office Department would like the authority to do all these things and to try all these experiments, but I think my opinion is not far different from that of the gentleman when I say I believe it would be an expenditure of a good deal of money for no real benefit.

Mr. FINLEY. That same argument has been made in every instance where a new departure has been made in the postal service.

Mr. HAMILTON of Michigan. Will the gentleman yield?

Mr. FINLEY. With pleasure.

Mr. HAMILTON of Michigan. The gentleman from South Carolina is an expert in aerial transportation, and I want to ask the gentleman if there are any places now where the mails are being carried by aeroplanes?

Mr. FINLEY. The French have a partial service, not a complete one, in some sections in the dominion of France.

Mr. HAMILTON of Michigan. Can the gentleman state what the service is and between what places?

Mr. FINLEY. In the Desert of Sahara, North Africa. I do not think the service is complete, but mail is carried by aero-

Mr. HAMILTON of Michigan. It is safer than by camel? Mr. FINLEY. I would not pass judgment on that, although I should say that between the kick of a camel and a fall from an aeroplane there would not be much difference in the result.

Mr. SWITZER. Will the gentleman yield? Mr. FINLEY. Yes.

Mr. SWITZER. Does the gentleman think it would obviate the construction of railroads in Alaska?

Mr. FINLEY. I want to say to the gentleman that I understand that we will come to that bridge a little later, and I have not my bridge shoes on now as to that proposition.

Mr. MURRAY of Oklahoma. Will the gentleman from South Carolina yield?

Mr. FINLEY. I will. Mr. MURRAY of Oklahoma. I understand this proposition is to keep pace with the times?

Mr. FINLEY. That is one reason.
Mr. MURRAY of Oklahoma. Along with the spineless cactus, the metherless chicken, the seedless raisin, the wireless telegraphy you want a trackless travel? [Laughter.]

Mr. FINLEY. A way through the air.
Mr. MANN. Mr. Speaker, I am a friend to aviation, as is also the author of this bill, the gentleman from Ohio [Mr. SHARP]. I believe that we two have been heard on the subject oftener than anybody else in the House. I had the honor to first offer the amendment which went into the Army appropriation bill providing for the purchase of a number of airships. There is now on the calendar, just reported from the Committee on Military Affairs, a bill to create an aviation division in the Signal Corps of the Army, with 60 officers to be attached to it and a number of enlisted men.

In addition to this considerable expenditure which we will make in the Army for aviation, experimental in the main probably, teaching officers and enlisted men how to manage airships, we are spending quite a sum of money for aerial navigation in the Navy; not enough, in my judgment, in either case.

There has been talk of some kind of a laboratory to be constructed by the Government, either under the Smithsonian Institution or under some other branch of the Government service. I believe in all these things. I am perfectly willing, as far as I am concerned, to spend a considerable amount of money in experimenting with air navigation; but what will come out of this that is good I fail to see. The gentleman from South Carolina [Mr. Finley], for many years one of the able and distinguished members of the Committee on Post Offices, suggests that there is a place out in Idaho where you can fly across the tops of the mountains and save 600 miles, stating that if you fly as a crow flies-and the fact is a crow can not fly there at all, and neither can the airship—it would be but 100 miles. Nobody has ever tried to fly over mountains that high, and they will not for a long time to come.

If it were practicable to fly over these mountains and save 650 out of 750 miles, it would be easy to construct a road there. The other case mentioned by the distinguished gentleman where you could use an aeroplane for carrying the mails is up in Alaska, where they can save about the same amount of space. One has, indeed, yet to discover a method by which a man flies an airship at night with the thermometer at 70° below zero.

There is no way of housing the man in to protect him,
Mr. SHARP. Will the gentleman permit an interruption?
Mr. MANN. Yes.
Mr. SHARP. Does not the gentleman from Illinois know that all through the summer months in Alaska, instead of flying by night, we have 20 hours of daylight?

Mr. MANN. I hope the gentleman from Ohio will not inter-

rupt me to ask such a foolish question.

Mr. SHARP. Then he does not have to fly by night. Mr. MANN. You have to fly at night a part of the year, and you can not make a contract there or anywhere else for carrying the mail during one-half of the year, the hard half, by dog team and then let the airship take it during the easy period, even if that were practicable, which I doubt. Yet that was the proposition. It will not do any good as an experiment. But what might it do? Here is an unlimited authority for the Post Office Department to let contracts for the carrying of mail by aeroplane.

The gentleman from South Carolina [Mr. FINLEY] said he could promise there would be only \$50,000 appropriated, but no one can promise that. No one in this House can promise how much Congress will appropriate for a specific purpose when there is no limit on the authorization, or, if he does, such a promise is of little value. The gentleman may control what the Committee on the Post Office and Post Roads would do, though I do not think he would claim he would have that control; but there is another body besides the committee, and that is the House, and there is another body besides the House before an appropriation bill becomes a law. This authority might not be exercised for years. It might be. It is no good as an experiment. We ought to experiment in the War Department and in the Navy Department with the laboratory, if we have one, or, if the Post Office Department wants to experiment, I am perfectly willing that they should have the money to do it with.

Mr. COX. Mr. Speaker, will the gentleman yield? Mr. MANN. Certainly.

Mr. COX. I want to make this statement. Since the bill was introduced, I think since the bill has been placed on the calendar, I have had letters from probably five or six concerns engaged in the manufacture of aeroplanes, insisting, begging, and pleading that this bill become a law, showing a very active interest in the manufacture in this kind of air craft.

Mr. MANN. I have no doubt about that. Mr. FOWLER. Mr. Speaker, will the gentleman yield?

Mr. MANN. Certainly.

Mr. FOWLER. I desire to inquire if the gentleman has investigated as to what success other countries have had in carrying mail by flying machines? I understand that France has such a mail.

Mr. MANN. The report says that France carries some mail by aeroplanes in France and some across the Sahara Desert with great regularity. I submit that that does not mean very much, and I venture to say that there is no place in the world to-day where mail is regularly carried by aeroplane-in the Sahara Desert or anywhere else.

Mr. FOWLER. I will ask the gentleman if he does not think if flying is successful that the mail may be carried over mountainous country much more easily that way than by land?

Mr. MANN. I really have a good deal of doubt about carrying mail over the mountainous country by aeroplane up to date. As we all know, the danger in flying aeroplanes is in the changing currents of the air. Those are much worse in the air over mountains than in the level country. Aviators are very careful about going over mountains and watercourses wherever they fly.

FOWLER. If success could be obtained by this means, would it not be a great advance and benefit to the people of the

mountainous countries?

Mr. MANN. I have no doubt whatever, as I have said before on the floor of this House, that the time will come—probably not so very distant in the future—when it will be possible to so construct aeroplanes and put them together that there will be no danger, as there is at present, of the machine falling to the ground. I have no doubt of that at all. I do not think that will be helped by this proposition in the slightest degree.

Mr. FOWLER. Does not the gentleman think we might learn

a good deal by experimenting in this way?

Mr. MANN. If the Post Office Department wants to take some money and experiment, I am willing to give it to them, or to anyone else in the Government service for that purpose. But that is not what this is, and the only effect that this can have is to let a high-priced contract to some contractor who is building aeroplanes, and then when a man who is running a flying machine is killed they will come to us and ask us out of sympathy, because the man was doing it for the benefit of the service, to pay his widow a large sum of money and put her on a pension for the balance of her life, or, if he is injured, they will say that we ought to pay him a large sum of money. We are already proposing to increase by 75 per cent the pay of a portion of the military officers engaged in aviation. I think they are entitled to it, but you can not carry this mail in that way. There is no need or demand for this as an experiment. Some one in a moment of dream, after eating mince pie, suggested to my distinguished and worthy friend from Ohio [Mr. Sharp] that this would be a good thing. I am willing to join him in any proper experimentation of aviation, but I am unwilling to commit the Government to this kind of proposition which seems to me can do no possible good and may do harm.

Mr. GORMAN. Mr. Speaker, will the gentleman yield?

Mr. MANN. Certainly.

Mr. GORMAN. Does not the gentleman think that in addition to the danger that accompanies the use of this machine to the occupants of the machine the use of them in carrying the mail is an unfair means because of the lack of safety for the people who have mail to deliver? Is it not unfair to expect the people who pay for mail transportation to be obliged to make use of such uncertain methods?

Mr. MANN. I think if this method was to be applied at the places that have been named a large share of the mail would be left on the Rocky Mountains, and that the rest in Alaska would be scattered over the snowy slopes. How much time have

I remaining?

The SPEAKER. The gentleman has used 11 minutes.

Mr. MANN. I yield five minutes to the gentleman from Minnesota [Mr. Steenerson].

Mr. STEENERSON. Mr. Speaker, I regret to disagree with my distinguished friend from Illinois on the advisability of enacting this bill into law. I am in favor of this bill. I believe

it is a good bill. The objections made by the distinguished gentleman from Illinois seem to me to be rather captious. For instance, he says that you can not carry mail by aeroplane in Alaska in wintertime, because it is 70 degrees below zero. Now, that is true only of certain places in Alaska. The places where it is contemplated to carry mail are along the coast, and it is not so cold there. It is not near as cold as it is in some of our Northern States, on account of the proximity of the ocean. It is only extremely cold when you get far into the interior of Alaska; and even if it were as cold as stated, the aeroplane would not be in the air very long each trip. It would be feasible for a man to be exposed to that kind of weather for a few hours, in which time he could travel several hundred miles. It seems to me that this House ought to have some confidence in the men charged with the duty of studying postal affairs, the department officials who appeared before the Committee on the Post Office and Post Roads, who were unanimously in favor of this proposition. Gen. Stewart, the Second Assistant Postmaster General, has been in the service for a great many years and in charge of the transportation of the mails, and he stated in the hearings that he favored this proposition and that he thought it was practical in a great many instances to carry the mail by aeroplane.

Mr. COX. Will the gentleman yield for a question?

Mr. STEENERSON. Certainly.

Mr. COX. Did the gentleman state the committee was unanimous in reporting this bill?

Mr. STEENERSON. How is that?

Mr. COX. Did the gentleman make the statement that the committee was unanimous in reporting the bill?

Mr. STEENERSON. Not that I know of. I would not state anything about what position members of the committee took. I stated that Gen. Stewart favored the bill at the hearings.

Mr. TREADWAY. The gentleman stated the department

officials all favored it. Mr. STEENERSON. I stated the department officials who appeared before the committee were unanimous. of course, disclose the attitude of members of the committee. Now, the statement has been ridiculed that the French Government is transporting mail "very" regularly. I do not know why that word "very" is put in there, but the fact is that mail has been for nearly a year transported regularly across the desert of Sahara, and those people would not have had a mail service at all if it had not been for the aeroplane. These department officials who have made a study of the subject are in favor of trying this experiment. I am very glad to hear the gentleman from South Carolina [Mr. Finley], a member of the committee, state that he believes the Post Office Committee will favor the appropriation of the money estimated for this The Book of Estimates shows that the department estimates \$50,000 for this service for experiment of carrying mail by aeroplane. It is an experiment, it is true, but there is sufficient reason why we should enter upon it. Why should the other departments of the Government, like the Army and Navy, have a monopoly of this experimentation? There is no service so important as the mail, and I believe that we can do no better than to pass this bill and make an appropriation asked for. The Post Office Department is rendering a great service. They have requested this, and they believe that it is practical and in some instances that it will save a great deal of money. Stewart stated in the hearings that it would probably be a contract service. If so, the contracts will not be let unless the department finds it advantageous. I earnestly hope that the bill will receive favorable consideration. I will insert extracts from the hearings before the Post Office Committee on the bill.

AEROPLANE MAIL SERVICE.

AEROPLANE MAIL SERVICE.

Mr. FINLEY. I see here where you ask for airships.
The Chairman. Are there any more questions on this item? If not, we will proceed with the airships.
Mr. FINLEY. I see here that new legislation is recommended by the department for experimental aerial mail service by aeroplane or other devices (submitted). And the Postmaster General is authorized to provide such service, in his discretion, without advertisement therefor. Estimate for 1915, \$50,000.
What information has the department as to the probable use of that appropriation by the way of adding to the efficiency of the mail service?
Mr. Stewart, I should like to keep abreast of the development of aeroplane service throughout the world. France has established one of two aerial routes; Spain is now following sult; France has carried the mails across parts of the Sahara Desert for some time past in aeroplanes.
The Chairman. For what purpose would you use such service in the United States?
Mr. Stewart. We could use it in the Western States, in the mountainous and the arid regions.
The Chairman. Across the Rockies?
Mr. Stewart. Yes, sir. I think that where the route by wagon or trail is circuitous and difficult there are times when we could use this service advantageously.
Mr. Steenerson. How about Alaska?

Mr. Stewart. There are places in Alaska where I think it could be developed. I have made inquiry of people who have come down from Alaska, with whom I have talked concerning the mail service recently, and I find some difference of opinion as to its availability there; but I think I could find some places where we could use it to advantage. I should like to keep abreast of the development throughout the world, and I should like to see the Post Office Department put in the front rank. The War Department and the Navy Department have received encouragement from Congress.

Mr. Reilly. If you should institute this aerial mall service, what is your idea about supplying the aerial carriers? Would you supply them from the classified list or by draft?

Mr. Stewart. I think if we opened that to competition we would have more applicants than we could use. I have already had applications from railway mail clerks to enter the aero mail service.

Mr. Steenerson. I have one volunteer in my district.

Mr. Griest. Would it come under the civil service?

Mr. Stewart. Yes, if we supplied the operators; but I think we would have a contract service.

Mr. Steenerson. Do you think it might result in saving in other expenses?

Mr. Stewart. I think it would in some of these continue that I

expenses?
Mr. Stewart. I think it would in some of those sections that I

Mr. STEWART. I think it would in some of those sections that i spoke of.

Mr. STEWARTSON. In those places where you can not carry the mail on account of obstructions or floods you could get mail service where you otherwise could not?

Mr. STEWART. Yes, sir. I have now a case in mind.

Mr. FINLEY. Have you any information as to the cost of such machines as you would probably use? You spoke of it in connection with the operating, but I mean without the operating.

Mr. STEWART. No, sir. I have not any figures at hand as to the cost of the machine itself.

The SPEAKER. The time of the gentleman has expired.

Mr. MANN. Does the gentleman from South Carolina yield

Mr. FINLEY. I believe I have nine minutes. I wish to yield to the author of the bill, and several other gentlemen have requested time from me. I can yield five minutes to the gentleman from Ohio [Mr. SHARP].

Mr. SHARP. Mr. Speaker, I wish to make this explanation and appeal to the generosity of the House. I was not aware that this bill, of which I am the author, was to be brought up by the gentleman from South Carolina [Mr. FINLEY] to-day. only learned it on my way over to the House. I am going to take the liberty to ask unanimous consent that when I take the floor I may have time to conclude my remarks. It is too important a matter to discuss in five minutes' time.

Mr. MANN. I would suggest to the gentleman that he ask the gentleman from South Carolina [Mr. FINLEY] to withdraw

his motion.

Mr. SHARP. That will come later.
Mr. MANN. No; that would have to come now.
Mr. SHARP. I have not made my formal request yet. But I will ask the gentleman, if that is necessary, to withdraw his

Mr. FINLEY. How much time would the gentleman like? Mr. MANN. Mr. Speaker, if the gentleman will pardon me, the vocational educational bill was put over until Friday, the other day, and then it was put over until to-day, and if it should go over until to-morrow it would conflict with the District appropriation bill, and the chances are it would not be reached again for a month. I am not interested in it—

Mr. FOSTER. Does the gentleman think we would be able to pass that bill to-night?

Mr. MANN. I think it would come to a vote.
Mr. FOSTER. I think not. It is nearly 5 o'clock now.
Mr. MANN. There is nothing left but the vote.

Mr. MANN.

Mr. FOSTER. There are amendments.
Mr. FINLEY. Mr. Speaker, if it is in order I would like to to ask

Mr. MANN. How much time does the gentleman from Ohio [Mr. SHARP] want?

Mr. SHARP. If I could have 20 minutes I would appreciate very much.

Mr. MANN. That would be 15 minutes more on a side. I ask unanimous consent that the time be extended 15 minutes on a

Mr. FINLEY. That is agreeable.

The SPEAKER. The gentleman from Illinois [Mr. Mann] asks unanimous consent that the time be extended 15 minutes on a side. Is there objection?

Mr. RUCKER. Reserving the right to object, I want to ask

the gentleman from Georgia [Mr. HUGHES] if he wants to take up that bill that was under consideration a few days ago.

Mr. HUGHES of Georgia. I would like to do so.

Mr. MANN. Your committee will be reached before long on the call. I have tried my best to help the gentleman out.

Mr. HUGHES of Georgia. I know you have, and I appreciate very much. I think it would take but a short while—Mr. MANN. I fully agree with the gentleman, but the indi-

cations are that the gentleman will not be able to pass his bill to-night anyhow.

Mr. HUGHES of Georgia. We were under the impression that we could pass it to-night. I think nearly all the debate has been had upon the bill that is desired. I would like very much to have it passed to-night.

Mr. MANN. That can come up later. Maybe we can stay

here and dispose of it. It may take but a moment. Mr. HUGHES of Georgia. I think it will take but a very

short while.

The SPEAKER. Is there objection to the extension of the debate on this bill to 15 minutes on a side? [After a pause.] The Chair hears none, and the gentleman from Ohio [Mr. SHARP] is recognized for 20 minutes.

Mr. SHARP. Mr. Speaker, 10 years ago day after to-morrow two young men, brothers, hailing from my State, after having made months and months of trials and tests, found that they could accomplish that which had been the dream of the ages. They found after these experiments that they were enabled, down at Kitty Hawk, in North Carolina, to propel a heavier than air machine 60 seconds in the air after several tests had been made on that day. The art of navigating the air progressed so rapidly that within a few years after that time, as most of us remember-and I was one of the 20.000 people who saw the exhibition of their flights over at Fort Myer-they were able to comply with the requirements of Gen. Allen, of the Signal Corps, and fly 1 hour in the air with a machine, carrying two passengers, in all aggregating in weight some 1,400 or 1,500 pounds, at a speed of 40 miles an hour.

That was four years ago. So great and rapid has been the progress of aviation during these four years that to-day aviators in European countries are flying from 500 to 1,300 miles at a single flight, ascending in some instances upward of 19,000 feet, and with the ability, demonstrated time and time again, of

carrying from 5 to 12 passengers in their flight.

The gentleman from Illinois [Mr. Mann] is usually very careful in his statements, and I pay to him now the compliment that probably he knows more about legislation that has been passed during the past decade than any other Member in the House. He is generally very well informed. But I am sure that upon this subject—and I say it in no offensive sense—he does not seem to know what he is talking about. Evidently he has not kept track of the developments in this field of exploitation.

The other evening I was at a meeting at which our distinguished Speaker, Mr. Clark, spoke. He mentioned the fact in the course of his remarks that he had a constituentthink now living in his district in Missouri-who had anticipated Alexander Graham Bell by four or five years in the invention of the telephone. He actually did invent a telephone that carried a message, but it was only for a short distance. He abandoned his efforts with the thought that it was only a toy, that it never would amount to much, and that that was the end of its sphere of usefulness.

Had the Wright brothers been actuated by that same shortsighted policy and come to the conclusion that after all, with all their efforts, following the experiments and investigations of such men as Bell and Langley along the same line, they had invented only a toy that could skip over the ground and perhaps cross a river, we might still be back where we were 10 years ago. But they had a prophetic vision, and they went on making their improvements, until to-day the navigation of the air is a tremendous actuality. It is not experimental. future sphere of usefulness is as certain as that of the telegraph and the telephone.

Why, the arguments of the gentleman from Illinois [Mr. Mann] remind me of the objections that were made to the possibility of crossing the Atlantic Ocean under steam power. They could well go along in the deadly parallel column, one as absurdly ridiculous as the other. I make the prediction now on this floor that long before another 10 years have rolled around there will be seen the same absurdity, in the light of the events of that day, attaching to the arguments of the gentleman from Illinois that we came long ago to see in the reasoning of those skeptics who thought that crossing the Atlantic Ocean some 60 or 70 years ago under steam power was an impossibility

The gentleman from Illinois speaks of the lack of feasibility of delivering mail by aeroplane in Alaska. Why, on many occasions aviators have safely crossed the Alps, very much higher in elevation than the mountains of Alaska, and they will probably be called upon in the future to cross Alaska time and Does the gentleman know that on this very dayand not to-day only, but every day in the year-in Europe there are thousands of flights made of from 10 to 1,000 miles without accidents? We have no such exhibitions here, because we are far behind the aviators of Europe, although to the credit of American genius it must be said that we first invented the art of flying. They have risen to the occasion over there, and in recent years there have been appropriated by the French, the English, and the German Governments as much as \$4,000,000 in a single year for experimenting in the navigation of the air for war purposes. We have done very little development work by Government aid on this side of the water, because every single effort, in so far as carrying the mails is concerned, that has been made in this House to get appropriations for aviation, has been met with the objection that there is no law for it; that it is new legislation. It was to remedy that difficulty that I intro-

The gentleman from Illinois errs again in thinking that some of these aviators by their arguments have inspired me with the practicability of carrying the mail by aeroplane. such inspiration as that. When I stood during that hour over at Fort Myer and saw those men glide around the field with the rapidity and ease of the swiftest birds of the air, without any seeming exertion lifting nearly a ton of weight, it did not take very much to convince me, as I think it did not take much to many other witnesses of that flight, of the tremendous possibilities that would open up for aerial navigation.

Now, I have not asked for a dollar's appropriation in this bill. My only object in asking for the enactment of this measure, gentlemen, is to allow the Postmaster General, at his discretion, as the time may come, to put its provisions into actual operation. If you prefer to say experiment, all right, but I would not say that. This is not alone the view of the Postmaster General of to-day. It is with the same purpose, it is the same request that was made by the former Postmaster General. I think it was made four or five years ago; and Second Assistant Postmaster General Stewart has been persistent in coming before this committee, attending the hearings, and stating why this appropriation should be made for this purpose. The object of this bill is only to authorize it, so that the Postmaster General may enter into those contracts, if it seems advisable to do so.

In the limited time I have I can not enter into a full discussion of what may follow from the enactment of this measure; but we never will make any progress in aviation, we never will begin to catch up with the procession on the other side of the water, if we follow the argument of the gentleman from Illinois [Mr. Mann] and say, because it is not an approved, absolute, established success to-day, therefore it should never be encouraged. That argument would have prevented the plying of the first steamships across the Atlantic and upon any of our rivers.

There have been great advances in navigation during recent years, but in the half century or more of steam navigation, in the remarkable development of our great railway locomotives, there has been no greater progress than in the navigation of the air in this one decade.

Do these skilled men know nothing about what they are talking? Do those who have petitioned Congress to enact this legislation, who have studied these problems seriously, know nothing at all about the subject? Does the gentleman from Illinois [Mr. MANN] know a great deal more about their business than they know?

Let me cite a single instance which I discussed with the Second Assistant Postmaster General the other day. I have verified the information, and it is true, that to-day our Government is carrying mail, not up in Alaska, but from a point in Idaho down to northern Nevada, which is transported 700 long miles, occupying 10 days. It goes partly by rail and partly by mule team. Yet aviators stand ready to enter into a contract with this Government to deliver that mail in two hours, because it is only 100 miles from one point to the other as the crow flies.

This does not mean that the Government is going to build an aeroplane factory. It does not follow that the Government is going at present to build its own aeroplanes; but I know from talks with the department that it is only for the purpose of hiring skilled aviators to enter into a contract and to give bond, the same as the railway companies have to give bond, to furnish this kind of transportation.

I would like to have the time to outline the many benefits that may come through the development of aeronautics, not alone through carrying the mail, but in many other ways. We have appropriated money from our Public Treasury for intensive agricultural experiments, for perfecting the accuracy of the work of our Weather Bureau, which we all must recognize as having some direct or indirect bearing upon our material wealth and advancement; but who shall stand here to-day and undertake to limit the scientific knowledge that may come from explorations of meteorological conditions so

greatly facilitated by this new invention?

I do not think I have the reputation—I hope not—of being a

to the study of the possibilities of the further development of this industry, and it seems to my mind as clear a proposition as we have ever been called upon to vote for. This bill calls for no money from the Treasury as has been stated. It seems clear, to my mind, that the argument is all on one side. I

would dislike very much— Mr. FITZGERALD. Will the gentleman yield for a question?

Mr. SHARP. Certainly; I will be glad to.
Mr. FITZGERALD. Is the gentleman serious when he states that this does not mean an expenditure of money? not it the very purpose of passing this bill to enable the Post

Office appropriation bill to carry an appropriation?

Mr. SHARP. I will qualify my statement by saying that as far as this measure is concerned it calls for no appropriation. I think the gentleman will agree with me when I say that the Postmaster General may not expend any money under this bill, assuming that it is enacted into law; of course, without there is first such authority, there can be no appropriation of money for

Mr. FITZGERALD. Is it not a fact that the Post Office Department has submitted an estimate of \$50,000 for experimental work in aeronautics?

Mr. SHARP. Yes.

Mr. FITZGERALD. Such an item would not be in order on the Post Office appropriation bill if the committee reported it; but if this bill is enacted into law it will make in order an appropriation of \$50,000; and I will ask the gentleman if the Post Office Committee is not ready to make that recommenda-tion if it can be done in accordance with the rules of the House?

Mr. SHARP. I can not say as to the latter part of it, because I do not know. I can only say that I hope the gentleman's conclusion is absolutely correct.

Mr. FITZGERALD. It seems to be logical.

I hope the gentleman is correct. If out of an appropriation of \$305,000,000 for the Post Office Department for the ensuing year we can not appropriate \$50,000 to put into effect a system that has been demonstrated to be absolutely feasible on the other side of the Atlantic, then I think we are away behind the times and recreant to our duty. The gentleman from Illinois questioned the statement of the gentleman from South Carolina as to the accuracy of matter contained in the report. I want to say to the gentleman that French aeronauts are carrying the mail to-day across the Sahara Desert, and they have established and are now carrying aerial mail from Paris down to the Mediterranean coast, a distance of 400 miles, to catch the outgoing steamers.

It was only three months ago that a famous French aviator, Roland Garros, starting from the northern coast of the Mediterranean Sea, made a single flight of 500 miles over to the French possessions in northern Africa. I read with great interest his story of that flight. After he had gone halfway across, he became enveloped in the clouds and his machine stopped for a moment. He was speculating as to whether he could go on and safely continue his flight. He whirled around, lowered himself sufficiently to see where he was, and seeing that his ma-chine had resumed its regular operation, he started again with-out alighting and finished his 500 miles at the rate of over 50 miles an hour.

Garros said there has been much talk about crossing the Atlantic Ocean in an aeroplane. He said that he covered the distance of 500 miles in a single flight-greater than the distance from North Scotland to Iceland, and as great as from Iceland to Newfoundland, and nearly as great as from Newfoundland down to the north Atlantic coast—thereby showing that he could cross the Atlantic Ocean without making more than three landings. That such journeys will be regularly made by aeroplane or similar air craft within a few years no one abreast of the times seriously doubts.

There is no question about it; there is no doubt in my mind to-day but that we should authorize this kind of mail delivery. We have not a rattle-brained man as a Postmaster General; we have not that kind of men in that department. Certainly no one would accuse Mr. Stewart of being such. He is about the most conservative and methodical official there, and he has advocated this plan for three or four years. Put it in execution, and let us not send word to the surviving brother, when his admirers next Wednesday celebrate the tenth anniversary of his achievement—let us not send the news that, though its practicability has been demonstrated everywhere else, even in the smallest of countries, yet in the land of its discovery the American Congress would not recognize it, nay, could not see its utility as anything beyond a freakish invention.

Let me say in conclusion that it is not in any sense of the word from a personal pride that I have sought the enactment visionary upon any subject; but I have given considerable time of this measure into law. I would have been glad to have had some other Member introduce it if he could have carried it through to success, but I have taken such an interest in the whole subject that I do want to see the American people, through their Representatives in Congress, rise to the occasion. Let us be progressive, as the message from the Postmaster General suggests, and meet the situation, so important to the cause of aeronautics, that is knocking at our doors for admission. [Applause.] I thank you, gentlemen.

Mr. MANN. Mr. Speaker, I yield five minutes to the gentle-man from Indiana [Mr. Cox].

Mr. COX. Mr. Speaker, I want to make a brief statement to the House, being a member of the Committee on the Post Office and Post Roads, why I oppose this bill. I must confess that I do not know when this bill was reported out of committee. have done my best to be present at all times and have been there unless it was some morning when I may have gotten there a few moments late. Had I been in the committee when the bill was reported I should have opposed it to the extent of making a minority report against it, if necessary.

I was present when Postmaster General Stewart was there and asked for the appropriation. I opposed the appropriation at the time he asked for it, and, if I remember correctly, he

asked for an appropriation of \$50,000.

Now, Mr. Speaker, from whence comes this demand for this legislation? Where does it come from; where is the power that is now being brought to bear to force this kind of legislation through this House? Does it come from the men that support the mails of the country? Is there any demand coming from the people who write letters, postal cards, who send newspapers, who send second, third, and fourth class mail through the post offices? Does the demand come from that class of people for this kind of legislation? I failed to hear that demand develop before a post-office committee. I failed to hear Postmaster General Stewart say that the demands were coming to him from all sections of the country as to legislation of this kind, from the people who use the mails,
Mr. SHARP. Will the gentleman yield for a question?
Mr. COX. I will.

Mr. SHARP. Has not Postmaster General Stewart time and again come before the gentleman's committee and told that committee why he did want it—to cover some of these western points?

Mr. COX. Mr. Speaker, I disagree with the statement of the Postmaster General; but, as I stated to the gentleman from Illinois [Mr. Mann] a moment ago, since this bill was put on the calendar I have received letters from three or four or five of the manufacturers of aeronautic machines asking me to support this bill. I ask the gentlemen on the floor of this House if it is right, if it is fair, if that is the source whence this demand comes, for us to appropriate money that belongs to the people to demonstrate the ability of aeronautic machines to carry the mails? In my judgment, no.

Mr. STEENERSON. Does the gentleman think that is any

argument against the passage of this bill?

Mr. COX. I do. Let the manufacturers of aeronautic machines demonstrate it themselves and not ask the people to pay the bill. Read this bill. What does it provide?

That the Postmaster General is hereby authorized to enter into contracts for carrying mail by aeroplanes.

Under that provision, in my judgment, there is authority broad enough to justify and empower the Postmaster General to manufacture aeronautic machines if he desires to. If the language carried in the bill is not broad enough for that purpose, then it unquestionably is broad enough to enable the Postmaster General to buy and operate the machines. comes the demand? How many men on the floor of this House have been requested by letters or otherwise from their con-

stituents who use the mail to vote for this bill?

I undertake to say, Mr. Speaker, that the number is exceedingly small. With railroad trains to-day carrying mail at the rate of 60 miles an hour, is not that fast enough to distribute the mail to the remotest corners of the country? But they say it is needed to carry the mail up in Alaska. Read the last Post Office appropriation bill, read the Post Office appropriation bills for the last number of years. The Congress of the United States has abundantly provided for the carrying of mail in Alaska under any and all conditions, and no request comes from Alaska for the inauguration of this kind of service. There is no request except that of the Postmaster General, through his representative, the Second Assistant. The gentleman from Illinois [Mr. Mann] was criticized by my friend from Ohio [Mr. Sharp], but he hit a very vital point. Suppose this becomes a law, do not be deceived in the proposition. Do not be deceived in this little bill that my friend from Ohio says is a very small matter. You will be called upon to vote an appropriation |

here for the Lord only knows how much, and that is not all you would be called upon to vote in a very short period of time.

Mr. SHARP. Mr. Speaker, will the gentleman yield for a question?

Mr. COX. Yes; for a question.

Mr. SHARP. Does the gentleman think the Postmaster General will call upon this Congress for any considerable amount

until its feasibility has been demonstrated?

Mr. COX. Oh, I do not know. If the Post Office Committee were to grant everything that the Postmaster General and his assistants want, we would bankrupt the Nation. I am not in favor of giving to the heads of departments everything they want. Simply because a Cabinet officer writes that he is in favor of a measure is to me no evidence whatever that we have to grant his request.

The SPEAKER. The time of the gentleman from Indiana

has expired.

Mr. MANN. Mr. Speaker, I yield the gentleman three minutes more.

Mr. COX. Mr. Speaker, discussing what the gentleman from Illinois touched upon a few moments ago, up until, I think, the Sixty-first Congress we had paid to the heirs of railway postal clerks killed on duty \$1,000. It was on the motion of the gentleman from Illinois that that was increased from \$1,000 to \$2,000, and I am not quarreling about that; but watch the appropriations. You have seen the appropriations under that item double, and double in the very last few years. You enact this into law, and what will likely be the result? It is broad enough to enable the Postmaster General to buy these air craft. If he is able to buy one with the money thus appropriated, he is then able to put a railway postal clerk or any other employee of the Government in the operation of one of these machines. The moment he is injured or killed, as the gentleman from Illinois well said, then we will be called upon to increase the appropriation. I do not know that if the exigencies of the occasion arose I would oppose it, but I would go back to the proposition I made a moment ago. Whence comes this demand? It certainly does not come from the great moving mass of the people of this country who use the mail. At least, I have not received any requests coming from that class of people asking for this kind of legislation, and I doubt if any other person has. have abundantly provided for the carrying of mail in this country, and we have abundantly previded for the carrying of mail in all the arid and semiarid countries of the land. Aye, we have abundantly provided for carrying the mails under any and all conditions in the United States and all of its possessions. The very moment you put this upon the statute books, gentlemen, that very moment you furnish a basic law that appropriations must follow as a matter of necessity. Well, I would oppose even appropriating \$50,000 for experimental purposes to enable the Postmaster General to try this out, but if the Post Office Committee desires to put that item in the bill and the House desires and sees fit to permit it to remain as an experimental matter, without a basic law on which to rest it, but simply to try it out, I do not know that I would have such serious objection to it. But the very moment that it is written upon the statute books as the law of the land, from that moment on we are going to be called upon to make appropriations every year for this item, and more and more for this item each year. In addition to that, we will be called upon to make appropria-tions for the killing, injuring, and wounding of employees carrying the mail in air craft.

Mr. SHARP. Will the gentleman yield for a question?

Mr. COX. Yes.

Mr. SHARP. If it proves to be a feasible thing and a just arrangement, is there any objection?

Mr. COX. Oh, there is no necessity for it, there is no demand

for it whatever, when the people are getting their mail at the rate of 60 miles an hour. That is not all. A proposition now before the committee is to buy the postal telegraphs, and in the name of common sense where are we going to stop?

The SPEAKER. The time of the gentleman has expired. The gentleman from Illinois has 11 minutes and the gentleman

from South Carolina 6.

Mr. FINLEY. I will ask the gentleman from Illinois to use his time.

Mr. MANN. I yield five minutes to the gentleman from New

York [Mr. Fitzgerald]. Mr. FITZGERALD. Mr. Speaker, I know whence some of the agitation for this legislation comes. The Kirkham Aeroplane & Motor Co., Janney-Steinmetz & Co., of Philadelphia; the Sloane Aeroplane Co., of New York; the Wright Co., of Dayton, Ohio; and the Aero Club of America are all very anxious that this bill should be passed by the 17th day of December, in order to commemorate the tenth anniversary of the first flight of a

heavier-than-air machine in the United States under the control of the Wright brothers.

Speaker, I was somewhat astounded to learn that the Post Office Department had been urging legislation of this character for four or five years. In 1909, only four years ago, a contract was made by the Board of Ordnance and Fortification out of their authority to experiment with a fund of \$100,000 for the perfecting of weapons of war with the Wright brothers, of Dayton, Ohio. The contract, as I recall, provided for the furnishing of an aeroplane to the Government at a cost of \$25,000.

The conditions required that the machine should remain in air at least 45 minutes, that it should attain a speed of some 50 miles an hour, that it should remain in the air with one passenger for 15 minutes, and that it should make a trip of 5 miles across country and return without alighting. Those of us who were present in this city in the summer of 1900 may Those of recall that the Wright brothers, the greatest of all manufacturers and developers of heavier-than-air aeroplanes, spent between five and six weeks at Fort Myer practicing and testing their machine before they risked these apparently simple tests; yet it seems even that before such simple tests as those indicated could be made the Post Office Department was seriously urging an appropriation for such service. The truth is, Mr. Speaker, that this recommendation probably is not more than two years old. Two or three years ago at Belmont Park, on Long Island, there was what might be termed an "aeroplane meet" or an "aviation meet." Noted aviators from all over the world met there and entered a series of contests. Among the visitors who journeyed to Belmont Park was the Postmaster General of the last administration. Some one induced him to make a trip around the aviation field with one of the expert aviators, and he was taken aloft for a few hundred feet, encircled the field, and then safely landed. Then to demonstrate how useful the aeroplane might be in the postal service a letter or a note was written, I think signed by himself, and sent by aeroplane from Belmont Park to Garden City, a few miles away, to some person there, and a reply was penned and sent back. The result was that at the following session there was a recommendation from the Postmaster General for an appropriation for carrying mails under contract by aeroplane. On this same occasion, Mr. Speaker, within two or three years, a prize of \$10,000 was offered to the aviator who would fly from Belmont. Park around the Statue of Liberty in New York Harbor and return to Belmont Park without alighting, a total distance of about 30 miles. For a number of days a number of aviators, the most expert men in the world, made attempts to make this

On one Sunday two of them started, and Bleriot was successful. He crossed the city, circled the Statue of Liberty, and got back safely to Belmont Park. Another aviator also made the trip. Of all of those gathered there but two of them were able to make it. It was considered dangerous to travel 30 miles and return because of the pockets in the air found in

traversing over the great city.

The SPEAKER. The time of the gentleman from New York [Mr. Fitzgerald] has expired.

Mr. MANN. Mr. Speaker, I yield to the gentleman five min-

utes more.

Mr. FITZGERALD. This shows, Mr. Speaker, that aviation has not been developed in this country to a stage where it has become practicable to utilize it seriously for the purpose of carrying the mails.

Mr. SHARP. Will the gentleman yield there for a question?

Mr. FITZGERALD. I yield to the gentleman.

Mr. SHARP. I do not want to take much of your time. Mr. FITZGERALD. I hope the gentleman will not. He had 20 minutes himself.

Mr. SHARP. Does not the gentleman know that up to the present time there are a thousand flights a day made by those

machines in Europe?

Mr. FITZGERALD. Mr. Speaker, I shall come right down to This is a commercial proposition. Those most vitally interested in this proposition are the aeroplane manufacturers who have been endeavoring to secure governmental assistance in one way or the other. Not having secured it from one committee a few years ago, they now come to the Committee on the Post Office and Post Roads. To show this I shall read this

THE KIRKHAM AEROPLANE & MOTOR Co. (INC.), Savona, N. Y., December 19, 1913.

Hon. J. J. FITZGEBALD,

House of Representatives, Washington, D. C.

DEAR SIR: We understand that there is a bill now in Congress authorizing the Postmaster General to enter into contracts for carrying mail by aeroplane or by any other similar devices, and we earnestly solicit your support of this bill.

You no doubt know that the first flight in an aeroplane was made by the Wright brothers in America just 10 years ago. Since then, however, America has made little progress in aviation as compared with the foreign countries, due to the fact that the industry here has not had the support of the Government. What progress has been made has been through individual efforts, and it is through the efforts of these few individuals that America has been able to hold her standing in systems. aviation.

They forget that Prof. Langley, of the Smithsonian Institu-tion, was the man who originated the idea of navigating the air with a heavier-than-air machine, and over \$50,000 of Government funds were expended by him out of the money at the disposal of the Board of Ordnance and Fortification before the Wright brothers were able to fly.

The letter further says:

With a little assistance from the Government America could become the leading nation in aviation. The aeroplane is now here commercially. This is well shown by the wonderful work which is being done with it in Europe. The same can be done here. All we ask is an opportunity to demonstrate it. Will you give us that opportunity by supporting the bill in question? Whatever you may be able to do along this line will be greatly appreciated.

The Army appropriation bill has been carrying \$125,000 available for aviation purposes. The naval appropriation has been carrying \$10,000 for experimental purposes. The officers detailed to this work received 35 per cent additional compensation because of the extremely hazardous character of the occupation in which they are engaged. I saw it stated recently that despite the fact that \$125,000 for the last two years, if I recall correctly, has been made available in the Army appropriation bill, the Army has not a single aeroplane which is now considered up to date, and that most of the accidents which occur, resulting in the death of the enterprising young officers assigned to that work, are due to the fact that the aeroplanes of the Army are obsolete.

Mr. SHARP. I am glad the gentleman has mentioned that

fact.

Mr. FITZGERALD. I decline to yield at present. tioned that fact because I thought it would please the House to know it, or that perhaps it would furnish some information. I have only a few minutes remaining and I hope I shall not

be interrupted.

It is proper, Mr. Speaker, that the Government through the proper channels should place at the disposal of the proper officials money for the conduct of experiments along scientific lines for purposes that may be beneficial to the people or to the Government. But I believe it is the utmost folly seriously to argue that an appropriation of \$50,000 would enable the Post Office Department to make a contract that would provide for the carrying of the mails in Alaska by aeroplane or for the carrying of mails by aeroplane in the arid regions-over the great desert portions of our country. Several attempts have been made in the last year or so by aviators to fly across the Isthmus of Pan-ama. One of them finally succeeded in doing it. It was found to be so extremely hazardous a task that the canal authorities have prohibited further attempts in that direction. Why should we seriously discuss the utilization of aeroplanes for such a purpose as carrying the mails at this time in the development of these machines?

The SPEAKER. The time of the gentleman from New York

has again expired.

Mr. FINLEY. Mr. Speaker, how much time has the gentleman from Illinois remaining?

The SPEAKER. The gentleman from Illinois [Mr. MANN] has one minute and the gentleman from South Carolina [Mr. FINLEY] has six minutes.

Mr. FINLEY. I yield to the gentleman from Illinois [Mr. FOWLER] two minutes.

Mr. FOWLER. Mr. Speaker, as there are only six minutes' time left, I do not desire to take any time. I will be glad if the gentleman from South Carolina [Mr. FINLEY] would use the time.

Mr. FINLEY. Mr. Speaker, will the gentleman from Illinois [Mr. Mann] use his one minute? Does the gentleman care to

use it?

Mr. MANN. Mr. Speaker, again reiterating the statement that I am a friend of aviation, notwithstanding what the gen-tleman from Ohio [Mr. Sharp] has said, I am not in favor of this bill, and nobody will ever get any good out of it unless it be some manufacturer of flying machines who can not sell them to somebody else.

We are willing to spend money for experimentation work in aviation, but that is not what this bill provides for; and if the Democratic Party or Congress is going to have any idea whatever of economy you can not afford to waste money in this way.

[Applause.]

Mr. FINLEY. Mr. Speaker, I have listened to the arguments against this bill, and they may be summed up briefly. But before I commence would the gentleman from Ohio [Mr. WILLIS] like two minutes?

Mr. WILLIS. I would.
Mr. FINLEY. Then, Mr. Speaker, I yield two minutes to the gentleman from Ohio [Mr. Willis].

The SPEAKER. The gentleman from Ohio [Mr. Willis] is

recognized for two minutes.

Mr. WILLIS. Mr. Speaker, I recognize the fact that in two minutes 4t is not possible to discuss the merits of this bill. I simply want to say, in reply to what the gentleman from New York [Mr. FITZGERALD] has said, that the reason why we have not been able to make satisfactory progress in aeroplane construction in this country is because we have had to import the engines that are used on these machines from foreign countries. The Government has not given the encouragement to aviation that has been given elsewhere, and consequently this country has not been able to make the progress that has been made in Germany and France. The committee in its report, at page 2, indicates what the French Government has been doing. report states:

report states:

. We believe the carrying of mail and light packages by aeroplane has passed beyond the experimental stage. As a matter of fact, mail is now being carried by the French Government not only in France but across the Sahara Desert with great regularity. The results have so pleased the minister of finance that he is planning to extend the service as rapidly as the demand will warrant.

It was Roland Garros who, less than 90 days ago, in a single continuous flight in his 80-horsepower monoplane, crossed the Mediterranean Sea at its widest point, covering a distance of approximately 500 miles at the rate of more than 60 miles an hour. This feat fairly illustrates the development of aviation within the past three or four years, since which time Bieriot startled the world by making a flight from the shores of France across the Channel, a distance of 21 miles, landing on English soil.

The one point I want to make particularly is this: According

The one point I want to make particularly is this: According to the statement of the gentleman from New York [Mr. Firz-GERALD] we are spending \$125,000 in the War Department for the encouragement of aviation. We are spending \$10,000 a year in the Navy Department for the encouragement of aviation. We are spending, all told, \$135,000 per year for the encouragement of aviation for the purposes of war; and yet when a bill is brought in here which proposes to enable the Postmaster General to establish better postal facilities and give some encouragement to the development of the aeroplane as a messenger of peace, we are told that the Government can not afford it, though it is admitted that this bill does not carry a single dollar of appropriation.

On this point the committee say:

On this point the committee say:

Indeed, though to the United States belongs the signal honor of making the first flight in machines heavier than air, as well as the invention of the hydroaeroplane which navigates both the air and water, we have been badly distanced in this field of enterprise by every other civilized nation. While it may be urged that the unsettled conditions abroad have been responsible for the military needs for this new kind of warfare, yet there still remains a field in which the United States can, with great benefit to our people, exploit this new enterprise.

It would seem that no better opportunity could be offered for bringing about this result than by putting it into practical service in the transportation of mails, which system can be inaugurated under the provisions of this bill whenever the Postmaster General deems its use to be advantageous and economical.

Mr. Speaker it seems to me that this great House of Represent

Mr. Speaker, it seems to me that this great House of Representatives can ill afford to take the position before the people of this country and before the people of the world that here in the United States, which witnessed the birth of the flying machine, we do not propose to give it any encouragement whatever except for purposes of war. It should be the handmaiden of peace and progress, not simply a death engine of war and destruction.

Now, there is another thing to which I wish to refer. The gentleman from Indiana [Mr. Cox] says that there is not any demand for this from his people. I should like to know whether or not any demand was received from his people for the encouragement of the development of the electric telegraph. Is Congress to sit here and wait until some one tells it to take

a forward step?

The gentleman has undertaken to frighten the House by reading letters here to the effect that certain manufacturers of aeroplanes are in favor of the passage of this bill. I do not care if they are. I am in favor of the passage of the bill, not because of that fact, but in spite of it. It is no argument at all to say that the people who are getting the mail have not been writing to the gentleman from Indiana asking that he vote for this bill. Very likely not. But he is a Representative of the people, and is supposed to know what is going on in this country and in the world. He is supposed to keep abreast of the times. I believe if he does that, he will support this bill.

The SPEAKER. The time of the gentleman from Ohio has

expired.

Mr. FINLEY. Mr. Speaker, I was about to say I have listened to the arguments against this bill, and it occurs to me

that they may be summed up briefly in this way: That carrying the mail by aeroplane in this country, no matter what has been done in other countries, notably in France, to illustrate, has not been tried out, and until it is tried out and proven to be a success it should not be undertaken. Encouragement of it ought not to be given until it has been tried and proven. is about the sum and substance of the argument against this bill. I have listened very carefully to what the gentleman from Indiana [Mr. Cox] said. He said he was not present at the committee meeting when this bill was ordered to be reported; but I can say to him that I was not there myself. was some 20 or 30 minutes late that morning, being necessarily When I arrived I found I had been delegated to detained. report the bill.

So that, after listening to the arguments of the gentleman from Indiana [Mr. Cox], I am bound to say he reminds me of the man who believed that good things came from him. On one occasion he was in company and some topic was under discussion, and the question was asked, "Can any good thing come out of Nazareth?" He said, "No. How can it? I never was in Nazareth in my life."

Mr. Speaker, the arguments against this bill simply amount to this, that it has not been proven to be a success in the United States; and when we point to other countries and say that it has been a success there, that makes no difference in the minds of some people.

Why should there be opposition to this bill? No more money will be spent than is absolutely necessary. Does anybody believe the Post Office Department will ever ask for more money than can be economically expended for the betterment of the postal service? Does anybody believe that Congress will ever appropriate more money than is necessary for these purposes? I do not, and I do not think there is anybody in this House who does believe that.

So, Mr. Speaker, we have here a proposition that is simply a repetition of what has been said time and again. Why, when Columbus wished the means to make his trial trip of discovery he was argued down for years. It has been the same way with every great invention. When it was first proposed they said it was impracticable; that it could not be done. I say that I am sure this will never be a general service.

The gentleman from Illinois [Mr. MANN] says he believes the time will come when by the linking of two or three airships together they will be of some service. I ask him how he is ever going to do that unless Congress authorizes a start to be made and something to be done in the way of a beginning? Why should gentlemen stand in the way of progress? I think I have about as good a reputation for economy and for old-line, yard-wide Democracy as anybody in this House. I take second place to nobody in that, and I am in favor of trying this proposition in certain localities which are recommended by the Postmaster General and by the Second Assistant Postmaster General. I have stated before, and I do not mind stating again, that I believe the Second Assistant Postmaster General is the ablest all-round postal official this Government has had in its service in the past 15 years. I believe this plan is practicable in some places, and I much prefer to take the judgment of Joseph Stewart, the Second Assistant Postmaster General of the United States, and other postal officials, including the Post-master General, than to take the views of the gentleman from Illinois [Mr. Mann] or the views of the gentleman from New York [Mr. Fitzgerald]. I think I am safer in taking the judgment of those officials about a matter concerning which they have informed themselves.

So, Mr. Speaker, I hope this bill will pass.

The SPEAKER. The time of the gentleman has expired. All time has expired. The question is on discharging the Committee of the Whole House on the state of the Union from further consideration of this bill, suspending the rules, and passing the bill.

Mr. COX. Mr. Speaker, I make the point that there is no

quorum present.

SEVERAL MEMBERS. No! no!

Mr. COX. I will withdraw the point for the time being. The question was taken; and on a division, demanded by Mr. Finley, there were—ayes 28, noes 54.

Accordingly the motion to suspend the rules and pass the bill was rejected.

DISTRIBUTION OF THE PRESIDENT'S MESSAGE.

Mr. UNDERWOOD. Mr. Speaker, I desire to make a privi-leged report (H. Rept. 141) from the Ways and Means Committee. I report back House resolution 340, distributing the President's message.

Mr. MANN. A parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. MANN. That resolution was reported back several days ago, and was on the calendar for three or four days, and I was going to ask how it got off the calendar.

Mr. UNDERWOOD. I will say to the gentleman that it was

Mr. MANN. I can not help whether it was a mistake or not. It was reported back by dropping it into the basket, and was printed. I do not know any authority in the Clerk of the House

to throw it out and strike it off the calendar.

Mr. UNDERWOOD. I will state to the gentleman from Illinois that I prepared the resolution and the report at the same time and by mistake dropped the report in the box with the resolution, and they were both printed at the same time. The clerk at the Speaker's table called my attention to the fact, and I told him then of the mistake, and he said it would be corrected.

Mr. MANN. I do not see by what authority. Here is the

resolution, House resolution 340:

Mr. Underwood, from the Committee on Ways and Means, reported the following resolution, which was referred to the House Calendar—

The wrong calendar by the way-

and ordered to be printed.

Now, by what authority does the gentleman report the same resolution over again—House resolution 340—and by what authority did the clerk take it off the calendar after it had been

on the calendar for four days?

Mr. UNDERWOOD. I will state to the gentleman from Illinois that I did not report the resolution; that it was not reported back. The Ways and Means Committee never had a meeting on the resolution until this morning, and it got upon the calendar by mistake. I assume that the gentleman from Illinois does not desire to keep a resolution on the calendar that really was not reported back.

Mr. MANN. Of course, if the statement of the Clerk in the

report is a mistake I do not care anything about it.

Mr. UNDERWOOD. I explained how the mistake occurred. Mr. MANN. That was not an explanation. If the gentleman from Alabama deposited in the basket the report that was printed and the resolution that was printed, it is too late for him to say that he did not report the resolution.

Mr. UNDERWOOD. Mr. Speaker, I did not-Mr. MANN. Who put the information on the report which

Mr. UNDERWOOD. If the gentleman from Illinois will be

quiet for a moment, I will explain.

Mr. MANN. I do not take that very kindly from the gentle-

Mr. UNDERWOOD. I was trying to explain to the gentleman, but he kept on talking.

Mr. MANN. The gentleman made a statement-

Mr. UNDERWOOD. I did not mean anything offensive.

Mr. MANN. The gentleman was a little offensive. Mr. UNDERWOOD. Then I apologize. I never mean to be offensive to anybody, and least of all to the gentleman from

Mr. MANN. Well, the gentleman knows that that is all off.

[Laughter.]

Mr. UNDERWOOD. Mr. Speaker, when the President's message was referred to the Ways and Means Committee I prepared a resolution for the distribution of the message, and a report at the same time, which is usual. It is a perfunctory matter, as the gentleman from Illinois knows. I introduced the resolution in the box, so that it would go back to the committee, that it might have the printed resolution before it when we got to it, which is usual. By mistake I left the report which I had prepared with the resolution in the box.

Mr. MANN. If the gentleman will pardon me, I understood that, and I was not criticizing the gentleman from Alabama; I was trying to ascertain by what authority the Clerk of the House, after the Journal had been approved showing the resolution reported from the committee and that it was on the calendar, had it stricken out without saying ah, yes, or no to

anybody

Mr. UNDERWOOD. I think largely by my authority. He came and asked if I had reported back such a resolution, and I said no, and then I discovered that by my own mistake I had left the report which I intended to lay before the Ways and

Means Committee attached to the typewritten bill.

Mr. MANN. Mr. Speaker, I would suggest to the gentleman that before he reports the resolution back he ask unanimous consent to correct the Journal so as to show that it is not already reported. The Journal of the House, which has been approved, shows that this resolution was reported from the Committee on Ways and Means by the gentleman from Alabama and placed on the calendar.

Mr. UNDERWOOD. I will say to the gentleman that I did not know the Journal did show it, because I thought that it was called to my attention on the same day that it was dropped in

Mr. MANN. It was on the calendar up to to-day. It was on

the calendar Friday, Thursday, and last Wednesday.
Mr. UNDERWOOD. Mr. Speaker, I desire to inquire if the Journal shows that the resolution was reported; and if so, I ask unanimous consent that it be corrected.

The SPEAKER. The Journal is in the Journal clerk's room. Mr. UNDERWOOD. Then, Mr. Speaker, I will not delay the House, but I will ask unanimous consent that if the Journal does show that this resolution was reported that it be corrected.

Mr. MANN. The Journal does show it, and also the RECORD

shows it on page 537.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the Journal be corrected in that regard. Is there objection?

There was no objection.

Mr. UNDERWOOD. I also ask, Mr. Speaker, that the permanent Record be corrected in accordance with the fact.

The SPEAKER. Is there objection to the request of the gentleman from Alabama? [After a pause.] The Chair hears none. The resolution and report will go to the Committee of the Whole House on the state of the Union.

#### IMMIGRATION.

Mr. BURNETT. Mr. Speaker, I have reported, by the instruction of the Committee on Immigration and Naturalization, House bill 6060. The committee directed me to ask unanimous consent that three days be given to the minority to file minority views.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the minority of the Committee on Immigration and Naturalization may have three days in which to file

minority views. Is there objection?

There was no objection.

Mr. DONOVAN. Mr. Speaker, reserving the right to object, I do not think the gentleman ought to bring the matter up in the absence of the Member from New York.

The SPEAKER. But he has already brought it in, and it has

been referred.

#### VOCATIONAL EDUCATION.

Mr. HUGHES of Georgia. Mr. Speaker, I know the House is weary from many long hours of hard work, but I hope that it will be considerate enough to remain in session a little while longer in order that we might get through with the consideration of Senate joint resolution No. 5, respecting vocational education. I therefore move that the House resolve itself into the Committee of the Whole House for the further consideration of that resolution.
Mr. FOSTER. Mr. Speaker, I make the point of order that

there is no quorum present.

The SPEAKER. The Chair will count. [After counting.] Eighty-nine Members present; not a quorum.

# ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 50 minutes p. m.) the House adjourned until to-morrow, Tuesday, December 16, 1913, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and con-clusion in the case of Julia O'Brien, widow of Peter O'Brien, deceased, v. The United States (H. Doc. No. 475); to the Committee on War Claims and ordered to be printed.

2. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion in the case of Arren Bray v. The United States (H. Doc. No. 476); to the Committee on War Claims and ordered to be

printed.

3. A letter from the assistant clerk of the Court of Claims transmitting a certified copy of the findings of fact and conclusion in the case of Martha E. Adamson, administratrix 63 Gideon F. Mann, deceased, v. The United States (H. Doc. No. 477); to the Committee on War Claims and ordered to be printed.

4. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the president of the Board of Commissioners of the District of Columbia, submitting an amendment to the estimate of appropriation for construction of suburban roads, District of Columbia, for the fiscal year ending June 30, 1915 (H. Doc. No. 478); to the Committee on Appropriations and ordered to be printed.

5. A letter from the Secretary of Agriculture, transmitting a report of documents received and distributed during the year 1913 (H. Doc. No. 479); to the Committee on Expenditures in the Department of Agriculture and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. IGOE, from the Committee on the District of Columbia, to which was referred the bill (H. R. 10308) to provide for the construction and repair of sidewalks in the District of Columbia, and for the assessment and payment of the cost thereof, reported the same with amendment, accompanied by a report (No. 135), which said bill and report were referred to the Committee of the Whole House on the state of the Union,

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the Senate resolution (S. J. Res. 74) appropriating money for the payment of certain claims on account of labor, supplies, materials, and cash furnished in the construction of the Corbett tunnel, reported the same without amendment, accompanied by a report (No. 134), which said reso-lution and report were referred to the Committee of the Whole

House on the state of the Union. Mr. TAYLOR of Colorado, from the Committee on the Public Lands, to which was referred the bill (H. R. 1651) to authorize the issuance of absolute and unqualified patents to public lands in certain cases, reported the same with amendment, accompanied by a report (No. 138), which said bill and report were referred to the Committee of the Whole House on the state of

the Union.

Mr. ADAMSON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 6204) to promote the efficiency of the Public Health Service, reported the same without amendment, accompanied by a report (No. 139), which said bill and report were referred to the Committee of the Whole House on the state of the Union,

Mr. TAYLOR of Colorado, from the Committee on the Public Lands, to which was referred the bill (H. R. 1657) to authorize the allowance of second homestead and desert entries, reported the same with amendment, accompanied by a report (No. 137), which said bill and report were referred to the House Calendar

Mr. BURNETT, from the Committee on Immigration and Naturalization, to which was referred the bill (H. R. 6060) to regulate the immigration of aliens to and the residence of aliens in the United States, reported the same with amendment, accompanied by a report (No. 140), which said bill and report were referred to the House Calendar.

#### REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. BURKE of South Dakota, from the Committee on Indian Affairs, to which was referred the bill (H. R. 6939) to reimburse Edward B. Kelley for moneys expended while superintendent of the Rosebud Indian Agency in South Dakota, reported the same with amendment, accompanied by a report (No. 133), which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. STEPHENS of Texas: A bill (H. R. 10505) authorizing the Secretary of the Interior to cause allotments to be made to Indians belonging and having tribal rights on the Morongo Indian Reservation; to the Committee on Indian Affairs.

By Mr. ESCH: A bill (H. R. 10506) to provide for a site and public building at Reedsburg, Wis.; to the Committee on Public

Buildings and Grounds.

By Mr. KINKAID of Nebraska: A bill (H. R. 10507) to authorize the Secretary of the Interior to acquire and dispose of private lands in connection with the operations under the reclamation act; to the Committee on Irrigation of Arid Lands. By Mr. FERGUSSON: A bill (H. R. 10508) authorizing the

Secretary of the Interior to grant further extensions of time within which to make proof on desert-land entries in the county of San Juan, State of New Mexico; to the Committee on the Public Lands.

By Mr. TAYLOR of New York: A bill (H. R. 10509) providing for the resurvey of the harbor of Echo Bay (New Rochelle), N. Y., and a report thereon; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 10510) providing for a resurvey of Mamaroneck Harbor, N. Y., and a report thereon; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 10511) providing for the completion of the Port Chester Harbor (N. Y.) improvement; to the Committee on Rivers and Harbors.

By Mr. BRUCKNER: A bill (H. R. 10512) providing for the completion of the Harlem River Ship Canal in New York City; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 10513) providing for the completion of the Bronx River (New York City) improvement; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 10514) providing for the deepening and widening of the Bronx Kills, in the city of New York, creating a direct channel between Long Island Sound and the Harlem River; to the Committee on Rivers and Harbors.

By Mr. CULLOP: A bill (H. R. 10515) granting increased pay to rural letter carriers; to the Committee on the Post Office and

Post Roads.

By Mr. DUPRÉ: A bill (H. R. 10516) authorizing a preliminary examination and survey of Bayou Barataria, La., and connecting waters to Barataria Bay; to the Committee on Rivers and Harbors.

By Mr. CULLOP: A bill (H. R. 10517) for the prevention and eradication of hog cholera; to the Committee on Agriculture.

By Mr. STEVENS of New Hampshire: A bill (H. R. 10518) to promote the safety of employees and passengers on railroads engaged in interstate or foreign commerce; to the Committee on Interstate and Foreign Commerce.

By Mr. McGILLICUDDY: A bill (H. R. 10519) to increase the limit of cost of the United States post-office building at Camden, Me.; to the Committee on Public Buildings and

Grounds.

By Mr. J. R. KNOWLAND: A bill (H. R. 10520) securing and confirming to the adjoining landowners the titles acquired by adverse possession to certain lands within the grant heretofore made by the United States of parts of its public lands to the Central Pacific Railroad Co. of California for railroad right of way; to the Committee on the Public Lands.

By Mr. SAUNDERS: A bill (H. R. 10521) to provide for the construction, maintenance, and improvement of rural post roads through the cooperation and joint action of the National Government and the several States in which such rural post roads may

be established; to the Committee on Roads.

By Mr. TEN EYCK: A bill (H. R. 10522) to establish in the Department of Agriculture a bureau to be known as the bureau of highways, and to provide national aid in the construction, improvement, and maintenance of public highways in each State and Territory, and to provide funds for the same; to the Committee on Roads.

By Mr. PAGE of North Carolina: A bill (H. R. 10523) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes; committed to the Committee of the Whole House on the state of the Union and ordered to be

printed.

By Mr. NEELY of West Virginia: A bill (H. R. 10524) providing for the appointment of a board for the purpose of selecting a suitable site for a naval armor plant in the Ohio Valley, in or near the city of Moundsville, in the county of Marshall and State of West Virginia, and to submit a report of the cost and availability of said plant; to the Committee on Naval

By Mr. SELDOMRIDGE: A bill (H. R. 10525) appropriating \$10,000 to be used by the Forest Service in the construction of a public road through a portion of the Medicine Bow Forest Reserve, in Larimer County, State of Colorado; to the Commit-

tee on Agriculture

Also, a bill (H. R. 10526) to authorize the cities of Colorado Springs and Manitou, in the State of Colorado, to purchase certain lands for the protection of the source of their water supply; to the Committee on the Public Lands.

Also, a bill (H. R. 10527) making appropriation for the purchase of a site and the erection of a public building thereon in the city of Loveland, county of Larimer, State of Colorado; to the Committee on Public Buildings and Grounds.

By Mr. CONNOLLY of Iowa: A bill (H. R. 10528) to provide

for the erection of a public building at Waverly, Iowa; to the Committee on Public Buildings and Grounds. By Mr. MOSS of West Virginia: A bill (H. R. 10529) declaring all highways in the several States used for the purpose of transporting rural mail to be post roads, for the establishment of rural route and post roads and the improvement and maintenance of existing rural route and post roads under Federal authority, and creating a bureau of public post roads; to the Committee on Roads.

By Mr. CULLOP: A bill (H. R. 10530) for the compensation of rural letter carriers; to the Committee on the Post Office and

Post Roads.

By Mr. GOODWIN of Arkansas: A bill (H. R. 10531) making an appropriation for continuing improvement on the Ouachita and Black Rivers, Ark. and La., and for maintenance of same; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 10532) making an appropriation for continuing improvement on the Ouachita River, Ark. and La., and authorizing the construction of locks and dams Nos. 5 and 9;

to the Committee on Rivers and Harbors,

By Mr. HAWLEY: A bill (H. R. 10533) directing the Secretary of War to pay to the Oregon State Board of Fish and Game Commissioners certain moneys, and for other purposes; to the

Committee on Appropriations.

By Mr. KENT: A bill (H. R. 10534) to authorize a survey of Petaluma Creek, Cal.; to the Committee on Rivers and Harbors.

By Mr. HAWLEY: A bill (H. R. 10535) to amend an act entitled "An act to amend sections 2291 and 2297 of the Revised Statutes of the United States relating to homesteads"; to the Committee on the Public Lands.

Also, a bill (H. R. 10536) amending the act approved May 11, 1912, entitled "An act granting pensions to certain enlisted men, soldiers and officers who served in the Civil War and the War with Mexico"; to the Committee on Invalid Pensions.

By Mr. HILL: A bill (H. R. 10537) to reapportion and rearrange the judicial districts of Illinois, and for other purposes;

to the Committee on the Judiciary.

Also, a bill (H. R. 10538) authorizing the Secretary of the Interior to make monthly settlements to all persons borne on the pension rolls; to the Committee on Invalid Pensions.

By Mr. KENT: A bill (H. R. 10539) for the improvement of grazing on the public lands of the United States and to regulate the same, and for other purposes; to the Committee on the Public Lands.

By Mr. WATKINS: A bill (H. R. 10540) providing for the eradication of the cotton boll weevil; to the Committee on Agriculture.

By Mr. CARLIN (by request): A bill (H. R. 10541) to acquire the manuscript of Charles Chaillé Long containing an account of the unveiling of the McClellan statue; to the Com-

mittee on the Library.

By Mr. STEPHENS of Texas: A bill (H. R. 10542) providing

for the segregation and apportionment of Indian tribal property, and for other purposes; to the Committee on Indian Affairs.

By Mr. KAHN: A bill (H. R. 10543) for the establishment and construction of a coal depot, including underwater storage plant for the use of the United States Navy on the Bay of San Francisco, Cal.; to the Committee on Naval Affairs.

By Mr. ADAMSON: A bill (H. R. 10544) to amend an act entitled "An act to regulate commerce," approved February 4, 1887, as heretofore amended, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MONDELL: A bill (H. R. 10545) making an appropriation for continuing the work of road and bridge construction on the Wind River Reservation in Wyoming; to the Committee on Indian Affairs.

Also, a bill (H. R. 10546) making an appropriation for the reconstruction of a part of the military road between Fort Washakie and Jacksons Hole in Wyoming; to the Committee on Military Affairs.

Also, a bill (H. R. 10547) making an appropriation providing for repairs to buildings on the Wind River Reservation in

Wyoming; to the Committee on Indian Affairs.

By Mr. WICKERSHAM: A bill (H. R. 10548) to authorize the purchase of certain lands in the District of Alaska; to the Committee on the Public Lands.

By Mr. STEENERSON: A bill (H. R. 10549) making an appropriation for the improvement of Baudette Harbor and River in Minnesota; to the Committee on Rivers and Harbors.

By Mr. McDERMOTT: A bill (H. R. 10550) providing for the regulation, identification, and registration of automobiles engaged in interstate commerce, for the licensing of the operators thereof, for cooperation between the States and the Federal Government in such purposes, and for distributing the revenues arising hereunder between the States and the Federal Govern-

ment; to the Committee on Interstate and Foreign Commerce. By Mr. CLARK of Florida: A bill (H. R. 10551) to prescribe the method for banks to compute interest on loans and prescrib-

ing punishment for its violation; to the Committee on Banking and Currency

Also, a bill (H. R. 10552) to limit the value of buildings used by banks for banking purposes and providing punishment for its violation; to the Committee on Banking and Currency.

By Mr. AIKEN: A bill (H. R. 10553) to provide for refunding to lawful claimants the proceeds of the cotton tax unlawfully collected; to the Committee on War Claims.

Also, a bill (H. R. 10554) to increase the compensation of carriers on rural free-delivery mail routes; to the Committee on the Post Office and Post Roads.

Also, a bill (H. R. 10555) to amend sections 1 and 105 of the Judicial Code to provide for the appointment of a district judge, district attorney, and marshal for the western district of South Carolina, and for other purposes; to the Committee on the

Judiciary.
By Mr. FRANCIS: A bill (H. R. 10556) to authorize the donation of certain unused and obsolete guns now at Chickamauga Park, Ga., to the village of Toronto, Ohio, for its park; to the Committee on Military Affairs.

By Mr. MOON: A bill (H. R. 10557) to provide for the erection of a public building at Pikeville, Tenn.; to the Committee

on Public Buildings and Grounds.

By Mr. DAVENPORT: A bill (H. R. 10558) to construct a sanitarium or hospital for the restricted Indians of the Creek and Seminole Tribes in that portion of Oklahoma formerly occupied by said Creek and Seminole Tribes and making an appropriation therefor; to the Committee on Indian Affairs.

Also, a bill (H. R. 10559) to construct a sanitarium or hospital for the restricted Indians of the Cherokee Tribe of Indians and the Confederated Tribes in northeast Oklahoma and making an appropriation therefor; to the Committee on Indian

By Mr. CURRY: A bill (H. R. 10560) requiring telegraph companies to capitalize and punctuate certain telegraph messages in a specified manner; to the Committee on Interstate and Foreign Commerce.

By Mr. FOSTER: A bill (H. R. 10590) authorizing the Secretary of War to deliver two mounted bronze cannon on carriages to McIlwain Post, Grand Army of the Republic, Vandalia, Ill.; to the Committee on Military Affairs.

By Mr. CLAYTON: Resolution (H. Res. 348) authorizing the Committee on the Judiciary to expend certain money, for purposes stated in House resolution 486, passed April 5, 1912; to

the Committee on Accounts.

By Mr. HARRISON: Joint resolution (H. J. Res. 170) authorizing and requesting the President of the United States to invite the Governments of Great Britain and other countries to appoint representatives to join representatives of the United States to consider the question of eliminating the gambling features in agricultural and food products on the exchanges in such countries; to the Committee on Foreign Affairs.

By Mr. MOORE: Joint resolution (H. J. Res. 171) providing for the appointment of a commission to consider the need of and to report a plan for the revision of the navigation laws of the United States; to the Committee on the Merchant Marine

and Fisheries.

By Mr. MOSS of West Virginia: Joint resolution (H. J. Res. 172) directing the Secretary of War to investigate and report to Congress at the earliest practicable time the advisability of the establishment of wireless telegraph stations along the Ohio River; to the Committee on Military Affairs.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ADAIR: A bill (H. R. 10561) granting a pension to James A. Stephen; to the Committee on Pensions.

Also, a bill (H. R. 10562) granting a pension to Mary J. Smith; to the Committee on Invalid Pensions.

By Mr. AIKEN: A bill (H. R. 10563) for the relief of Mrs. D. Corbin; to the Committee on Claims.

Also, a bill (H. R. 10564) for the relief of Mary S. Corbin: to the Committee on Claims.

Also, a bill (H. R. 10565) granting a pension to Henrietta Abney; to the Committee on Pensions.

Also, a bill (H. R. 10566) granting a pension to Medicus F.

Day; to the Committee on Pensions.

By Mr. ASHBROOK: A bill (H. R. 10567) granting an increase of pension to Nesbitt L. Brown; to the Committee on Pensions.

Also, a bill (H. R. 10568) granting a pension to Kathering Rodgers; to the Committee on Invalid Pensions.

By Mr. BOOHER: A bill (H. R. 10569) granting an increase of pension to James Button; to the Committee on Invalid Pensions.

By Mr. BYRNS of Tennessee: A bill (H. R. 10570) for the relief of the city of Nashville, Tenn.; to the Committee on War Claims.

Also, a bill (H. R. 10571) for the relief of Davidson County, Tenn.; to the Committee on War Claims.

By Mr. CALDER: A bill (H. R. 10572) granting a pension to Elsie A. Owen; to the Committee on Invalid Pensions.

By Mr. CAMPBELL: A bill (H. R. 10573) granting an increase of pension to Henry B. Miller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10574) granting an increase of pension to Millard F. De Geer; to the Committee on Pensions.

By Mr. CARLIN: A bill (H. R. 10575) granting a pension to

Nancy Martin; to the Committee on Pensions.

Also, a bill (H. R. 10576) granting a pension to Mary A. Slattery; to the Committee on Pensions.

By Mr. CASEY: A bill (H. R. 10577) granting an increase of pension to John N. Eddinger; to the Committee on Invalid Pensions.

By Mr. CLAYTON: A bill (H. R. 10578) for the relief of Dr. J. W. Stokes; to the Committee on War Claims.

By Mr. COPLEY: A bill (H. R. 10579) granting an increase of pension to Catharine A. Hawkins; to the Committee on Invalid Pensions.

By Mr. CULLOP: A bill (H. R. 10580) granting an increase of pension to Albert M. Patrick; to the Committee on Invalid Pensions.

By Mr. DOOLITTLE: A bill (H. R. 10581) for the relief of Patrick H. Wheat; to the Committee on Military Affairs.

By Mr. FERGUSSON: A bill (H. R. 10582) granting a pension to Jose de J. Romero; to the Committee on Pensions,

Also, a bill (H. R. 10583) granting a pension to Anna Pearce; to the Committee on Pensions.

Also, a bill (H. R. 10584) for the relief of the heirs of Francisco Barela; to the Committee on War Claims.

Also, a bill (H. R. 10585) for the relief of the heirs of Bonifacio Coca, deceased; to the Committee on War Claims.

By Mr. FERRIS: A bill (H. R. 10586) to remove the charge of desertion from the record of George W. Riley; to the Committee on Military Affairs.

By Mr. FIELDS: A bill (H. R. 10587) granting an increase of pension to Montville Cooksey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10588) granting an increase of pension to Major L. Middleton; to the Committee on Invalid Pensions.

By Mr. FORDNEY: A bill (H. R. 10589) granting a pension to George W. Graves; to the Committee on Invalid Pensions.

Mr. REED. I desire to state that my colleague [Mr. Stone] is necessarily absent from the Senate and will probably be unable to attend to-day's session. I make the announcement now, to stand for the day.

Mr. KERN. The Senator from Colorado [Mr. Thomas] is

detained from the Senate on account of illness. I will let this

announcement stand for the day.

Mr. RANSDELL. The Senator from Louisiana [Mr. Thornton] is unavoidably absent. I ask that this announcement may stand for the day.

Mr. TOWNSEND. I desire to announce that the senior Sena-

tor from Washington [Mr. Jones] is absent from the Senate on

important business.

Mr. WEEKS. I wish to announce that my colleague [Mr. Lodge] is absent on account of illness, and to have this an-

nouncement stand for the day.

The VICE PRESIDENT. Fifty-six Senators have answered to the roll call. There is a quorum present.

MEAT PRODUCTION IN THE UNITED STATES.

Mr. CLAPP. Mr. President, I am going to ask for the printing in the RECORD of the document I send to the desk. I am not much given to putting extraneous matter in the RECORD, but I believe it relates to a matter of vital importance and that it should be published and distributed to some extent. There are a great many people who will see it in the RECORD who would not see it otherwise. It is a statement of the Bureau of the Census, Department of Commerce, relating to slaughter of animals from 1899 to 1909, a period of 10 years.

We all know that the production of animals during that time has decreased to a vast extent against a great increase of population, but this table shows that the average slaughter kept pace with the increase of population, 21.7 per cent, but the slaughter of hogs reached only an increase of 10.7 per cent.

What I wish to put before the Senate, in the hope that it may go to the country as a warning, is the fact that while the slaughter of beef cattle increased 46.9 per cent the slaughter of calves increased 183.4 per cent. I think it is time the American people began to wake up to the problem of food consumption and production as affected by this overwhelming increase in the slaughter of calves. Already we are contemplating legislation on the subject. I do not touch upon that, for I do not know how far we could go in that direction; but it did seem to me that it might warrant a place in the RECORD, that, so far as the RECORD comes under the observation of the public, this over-whelming increase in the slaughter of calves might be brought

to the attention of the American people.

The VICE PRESIDENT. Is there objection to the request

of the Senator from Minnesota?

Mr. BURTON. I should like to ask by what bureau or person the table was prepared.

Mr. CLAPP. The Bureau of the Census, in the Department of Commerce.

Mr. BURTON. It is supplemental to their report contained in the last census report?

Mr. CLAPP. Certainly.

Mr. BURTON. And brings the figures down to date?

Mr. CLAPP. Yes.
Mr. BURTON. I recognize, Mr. President, the great importance of having statistics on this subject. The trouble has been the inaccuracy of many statements given out to the public. Four or five years ago certain figures were prepared which seemed to show that the number of cattle had kept pace with population and gave no indication which would justify an increase in price. The more recent figures, however, have more correctly described the situation.

I should like to know how long these figures were in prepara-

tion and to what extent we can rely on them.

Mr. CLAPP. I accept them as sent out by the bureau, to be released to the press on the 15th of this month, that period having elapsed.

While I am on my feet, in line with what the Senator has said I wish to state that the decrease in stock has simply been terrific in view of the increase of population. In the State of

Iowa last year, according to the best figures I have obtained, the number of milch cows decreased 56,000, and in the State of Missouri 22,000. The States of Minnesota, North Dakota, and South Dakota gained a little—Minnesota, 22,000; North Dakota, 18,000; South Dakota, 6,000—but the best figures obtainable today, so far as I can judge of the accuracy of the figures, shows a total decrease last year of cattle of a million and a quarter.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

#### MEAT PRODUCTION IN THE UNITED STATES.

DEPARTMENT OF COMMERCE, BUREAU OF THE CENSUS, WASHINGTON, D. C., December 15, 1913.

Washington, D. C., December 15, 1913.

The increase in the number of animals slaughtered for food in the United States and the production of dressed meat therefrom was almost identically the same as the increase in population during the decade 1809-1909, according to a statement issued by Director W. J. Harris, of the Bureau of the Census, Department of Commerce.

The supply or production of dressed meat per capita in this country as reported by the slaughtering establishments varied hardly a pound when comparing the figures for 1909 with those for 1899, but the cost of the animals on the hoof which were slaughtered increased 75.5 per cent and the value of the dressed meat 73.8 per cent during that period.

The average production per capita of dressed meat in the United States in 1909 was 105 pounds, as compared with 106 pounds in 1899, if the figures returned only by the slaughtering establishments for beef, veal, mutton, and pork are taken into consideration; but the production or supply was 107 pounds per capita for both 1909 and 1899, if the total production of all dressed meats is considered.

The figures for meat production as returned by the slaughtering establishments only are employed in order that comparisons may be made between the years 1909 and 1899. These figures include about 65 per cent, or two-thirds, of the grand total for animals slaughtered and for the total production of dressed meat.

ANIMALS SLAUGHTERED.

#### ANIMALS SLAUGHTERED.

The total number of animals slaughtered for food in the United States in 1909 and in 1899 reported by establishments engaged in that

industry was as follows:

Beeves.—8,114,900 for 1909, as compared with 5,525,800 in 1899, an increase of 46.9 per cent.

Calves.—2,504,700 in 1909 and 883,900 in 1899, an increase of 183.4

Calves.—2,504,700 in 1909 and 883,900 in 1899, an increase of 183.4 per cent.

Sheep and Jambs.—12,255,500 in 1909 and 9,110,200 in 1899, an increase of 34.5 per cent.

Hogs.—33,870,600 in 1909 and 30,595,500 in 1899, an increase of 10.7 per cent.

These figures of the total number of animals slaughtered in the United States for the years 1909 and 1899 include only those reported by the establishments engaged in the slaughtering and ment-packing industry. The total number of all animals killed, however, including those slaughtered on farms and in retail slaughterhouses, is given as 88.358.815, so that the number reported by the packing and slaughtering establishments is approximately 65 per cent, or two-thirds, of the total number slaughtered.

The average weight on the hoof of the beeves slaughtered was 1.019

total number slaughtered.

The average weight on the hoof of the beeves slaughtered was 1.019 pounds in 1909 and 1,069 pounds in 1899; of the calves the average weight was 168 pounds in 1909 and 141 pounds in 1899; of the sheep and lambs, 81 pounds in 1909 and 84 pounds in 1899; of the hogs, 202 pounds in 1909 and 218 pounds in 1899.

The total cost to the slaughtering establishments of these animals killed for food was \$1,20,287,784 in 1909 and \$685,310,099 in 1899, an increase of \$517,517,685, or 75.5 per cent. In the slaughtering industry the cost of the materials formed a larger proportion (91.3 per cent) of the total expenses than in most other industries, owing to the fact that the processes of manufacture are comparatively simple and inexpensive.

#### PRODUCTION OF DRESSED MEAT.

The total production of dressed meats in the United States reported by slaughtering establishments to the census was as follows:

Beef.—4,335,674,800 pounds in 1909 and 3,055,242,000 pounds in 1899, an increase of 41.9 per cent.

Veal.—252,997,100 pounds in 1909 and 84,548,100 pounds in 1899, an increase of 199.2 per cent.

Mutton.—495,458,000 pounds in 1909 and 400,812,000 pounds in 1899, an increase of 23.6 per cent.

Pork.—4,377,127,200 pounds in 1909 and 4,360,706,000 pounds in 1899, an increase of 0.2 he per cent.

The grand total weight of dressed meats, including "All other" fresh meats, in 1909 was 9,719,065,600 pounds and in 1899, 7,981,695,000 pounds, an increase of 21.7 per cent, or almost identically the same as the increase in the population of the United States for the same period. These figures show a decrease for the decade in the average dressed weight of the beeves, hogs, sheep, and lambs. The average dressed weight of the beeves, hogs, sheep, and lambs. The average dressed weight of the total value of this meat production was \$1,370,567,100 in 1909, as compared with \$788,367,600 in 1899, an increase of \$582,199,500, or 73.8 per cent.

## CENTRAL HIGH SCHOOL BUILDING (S. DOC. NO. 329).

The VICE PRESIDENT laid before the Senate a communication from the Commissioners of the District of Columbia, transmitting, in response to a resolution of the 3d ultimo, certain information relative to the expenditure of the available appropriation of \$1,200,000 in the erection of a central high school at Eleventh and Clifton Streets NW., in the city of Washington, etc., which was referred to the Committee on the District of Columbia and ordered to be printed.

# ADMINISTRATION OF THE LAND LAWS (S. DOC. NO. 331).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, in response to a resolution of the 6th instant, certain information relative to the cost and expenses of administering the land laws of the United States for the fiscal years 1908, 1909, 1910, 1911, and 1912, respectively, which was ordered to lie on the table and be printed.

#### MEAT INSPECTION (S. DOC. NO. 330).

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of Agriculture, transmitting, in response to a resolution of the 8th instant, certain information relative to stamps, marks, or signs placed upon imported meats before they are offered for sale in the markets of the United States. The communication is accompanied by certain documents. The Chair is unable to state whether they should or should not be printed. They will be referred with the communication to the Committee on Agriculture and Forestry for the present without printing. The communication will be printed, but not the accompanying documents, until further order.

#### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 2689) amending an act entitled "An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes," approved March 4, 1913.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the

H. R. 4618. An act to increase the limit of cost for increased quarantine facilities at the port of Portland, Me.;

H. R. 7212. An act relating to the anchorage of vessels in navigable waters of the United States;

H. R. 7967. An act to amend the act approved June 25, 1910,

authorizing a postal savings system;
H. R. 6202. An act providing for the disposition of effects of deceased patients of the Public Health Service and of certain deceased officers and men connected with the Army; and

H. R. 8846. An act making appropriation for payment of certain claims in accordance with findings of the Court of Claims, reported under the provisions of the acts approved March 3, 1883, and March 3, 1887, and commonly known as the Bowman and the Tucker Acts, and under the provisions of section No. 151 of the act approved March 3, 1911, commonly known as the Judicial Code.

#### ENROLLED BILL SIGNED.

The message further announced that the Speaker of the House had signed the enrolled bill (H. R. 10081) to make the tenure of the office of the Major General Commandant of the Marine Corps for a term of four years, and it was thereupon signed by the Vice President.

# PETITIONS AND MEMORIALS.

Mr. FLETCHER. I present a resolution adopted by the Board of Trade of Tampa, Fla., which I ask may lie on the table and be printed in the RECORD.

There being no objection, the resolution was ordered to lie on the table and to be printed in the RECORD, as follows:

on the table and to be printed in the Record, as follows:
Whereas the so-called La Follette seamen's bill, S. 136, now before
Congress and about to be passed, has been thoroughly studied and
found in many of its aspects detrimental to shipping interests of
this port and the United States at large; and
Whereas if the shipowners are compelled to abide by the provisions of
this bill, freight rates must necessarily be advanced in order to be
able to meet the additional expenses; and
Whereas that the bill, which is being known to promote the welfare of
American seamen in the merchant marine of the United States and
safety of lives at sea, only applies to saliors and not to officers and
engineer department of steamers; and
Whereas we consider the officers and engineer department of steamers
are of a greater importance in the promotion of safety at sea: Therefore be it

Resolved, That this board take exceptions to the many provisions of

fore be it

Resolved, That this board take exceptions to the many provisions of
this bill and strongly protest against the enactment of same as it now
stands; and be it further

Resolved, That a copy of this resolution be sent to the honorable
Speaker of the House, to the chairman of Committee on the Merchant
Marine and Fisheries, and to each of our Representatives in Congress,
respectfully requesting them to use all their good efforts in defeating its
nassays.

Passage.
Passed by the Tampa Board of Trade at its general meeting this the 12th day of December, 1913.

F. C. Bowyer, President,

# L. P. DICKIE, Secretary.

Mr. FLETCHER. I present a memorial signed by sundry citizens, assembled as delegates, of Martel, Tampa, Lakeland, and other cities in the State of Florida, which I ask may be printed in the RECORD, omitting the names, and that it be referred to the Committee on the District of Columbia.

There being no objection, the memorial was referred to the Committee on the District of Columbia and ordered to be printed in the RECORD, omitting the signatures, as follows.

PETITION TO CONGRESS.

To the honorable the Senate and House of Representatives of the United States:

Believing—

(1) In the separation of church and state;

(2) That Congress is prohibited by the first amendment to the Constitution from enacting any law enforcing the observance of any religious institution, or looking toward a union of church and state or of religion and civil government;

(3) That any such legislation is opposed to the best interests of both church and state; and

(4) That the first step in this direction is a dangerous step and should be opposed by every lover of liberty;

We, the adult residents of the State of Florida, assembled as delegates, carnestly petition your honorable body not to pass the Sunday-observance bill (S. 752) entitled "A bill for the proper observance of Sunday as a day of rest in the District of Columbia" (introduced in the Senate by Mr. Johnston of Alabama Apr. 12, 1913. Now pending. For full text of bill see other side) or any other like religious measure. Full text of proposed Sunday-observance law now pending in United State Senate.

Mr. Johnston of Alabama introduced the following bill, which was read twice and referred to the Committee on the District of Columbia:

A bill (S. 752) for the proper observance of Sunday as a day of rest in the District of Columbia.

A bill (S. 752) for the proper observance of Sunday as a day of rest in the District of Columbia.

Be it enacted, etc., That from and after the passage of this act it shall be unlawful in the District of Columbia for any person to labor or to employ any person to labor or to pursue any trade or worldly business on the first day of the week, commonly called Sunday, except in works of necessity or charity, and except also newspaper publishers and their employees, and except also public-service corporations and their employees in the necessary supplying of service to the people of the District. In works of necessity or charity is included whatever is needed for the good order and health of the community. It shall be unlawful for any person, partnership, firm, corporation, or municipality, or any of their agents, directors, or officers, to require or permit any employees to work on the said day, excepting in household service, unless within the next succeeding 6 days during a period of 24 consecutive hours he or it shall neither require nor permit such employee to work in his or its employ.

Any person who shall violate the provisions of this act shall, on conviction thereof, be punished by a fine of not less than \$10 nor more than \$50 for the first offense, and for each subsequet offense by a fine of not less than \$25 nor more than \$100, and by imprisonment in the jail of the District of Columbia for a period of not less than one month nor more than three months, in the discretion of the court.

Sec. 2. That all prosecutions for violations of this act shall be in the police court of the District of Columbia and in the name of the District of Columbia.

This proposed Legislation is unconstitutional, un-american, un-american, un-american.

of Columbia.

THIS PROPOSED LEGISLATION IS UNCONSTITUTIONAL, UN-AMERICAN, UN-JUST, AND UNNECESSARY.

Jesus Christ: "Render to Cæsar the things that are Cæsar's, and to God the things that are God's. (Mark 12: 17.)

United States Constitution: "Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof." (First amendment.)

U. S. Grant: "Keep the state and the church forever separate." (Speech at Des Moines, Iowa, 1875.)

United States Senate: "Our Government is a civil and not a religious institution." "The proper object of government is to protect all persons in the enjoyment of their religious as well as their civil rights, and not to determine for any whether they shall esteem one day above another or esteem all days allke holy." (Sunday Mail Report, 1829.)

Mr. FLETCHER. I present resolutions adopted at the fifth

Mr. FLETCHER. I present resolutions adopted at the fifth annual convention of the Federation of Jewish Farmers of America, held in New York City, November 16, 1913. I do not think it is necessary to have the resolutions read, but I should like to have them printed in the RECORD.

There being no objection, the resolutions were referred to the Committee on Agriculture and Forestry and ordered to be

printed in the RECORD, as follows:

Resolved, That we, the members of the Federation of Jewish Farmers of America, in convention assembled, most heartily extend our thanks to the President of the United States for his efforts in behalf of the country's agriculture and that we memorialize the Congress of the United States to give its earliest consideration to this most important

question;

Resolved, That a copy of these resolutions, together with the third annual report of the Jewish Farmers' Cooperative Credit Unions be forwarded to the President and members of his Cabinet, to all the Members of Congress, and to the governors of all the States in the Union; and be it further

Resolved, That the thanks of this convention be tendered to the Jewish Agricultural and Industrial Aid Society for its many educational activities for the benefit of the Jewish farmers in this country and for pointing to the solution of the pressing problem of rural credit.

Mr. PERKINS presented a petition of the council of the city of Richmond, Cal., praying for the enactment of legislation providing for the control of the flood waters of the Sacramento River, which was referred to the Committee on Commerce.

He also presented a petition of the Chamber of Commerce of Oakland, Cal., praying for the enactment of legislation authorizing the Treasury Department to employ within certain limitations such outside architects as may be required to permit the erection without unnecessary delay of buildings for which appropriations have been made, etc., which was referred to the Committee on Public Buildings and Grounds.

Mr. COLT presented petitions of sundry citizens of Providence, R. I., praying for the enactment of legislation granting relief to persons who served in the United States Military Telegraph Corps during the Civil War, which were referred to the

Committee on Pensions.

Mr. BURLEIGH presented resolutions adopted by Local Branch No. 143, National Association of Civil Service Employees, of Portland, Me., praying for the enactment of legislation providing for the retirement of superannuated employees of the civil service, which were referred to the Committee on Civil Service and Retrenchment.

Mr. PENROSE presented a petition of sundry citizens of Philadelphia, Pa., and a petition of Charles O. Kinney and 33 other citizens of Philadelphia, Pa., praying for the enactment of legislation granting relief to members of the United States Military Telegraph Corps who served in the Civil War, which were referred to the Committee on Pensions.

Mr. SMITH of Michigan presented a memorial of the Detroit Hotel Association of Michigan, remonstrating against the passage of the so-called La Follette seamen's bill, which was

ordered to lie on the table.

#### EDIZ HOOK LIGHTHOUSE RESERVATION, WASH.

Mr. MYERS. I am directed by the Committee on Public Lands, to which was referred the bill (S. 3454) authorizing the Secretary of Commerce to lease to the city of Port Angeles, Wash., certain property, to report it with an amendment, and I submit a report (No. 141) thereon. I call the attention of the Senator from Washington [Mr. Poindexter] to the fact that the report recommends an amendment suggested by the Department of Commerce.

Mr. POINDEXTER. I ask unanimous consent for the immediate consideration of the bill.

The VICE PRESIDENT. The Senator from Washington asks unanimous consent for the present consideration of the bill. The Secretary will read, for the information of the Senate, the substitute reported by the committee.

The Secretary read the amendment reported by the Committee on Public Lands, which was to strike out all after the enacting clause and to insert:

on Public Lands, which was to strike out all after the enacting clause and to insert:

That the Secretary of Commerce is hereby authorized, directed, and empowered to lease and demise to the city of Port Angeles, State of Washington, all of that tract of land reserved for lighthouse purposes by presidential order of February 10, 1908, and bounded on the southwest by suburban lots Nos. 135 and 147, as shown by the plats of Port Angeles town site, State of Washington, approved by the United States surveyor general of the State of Washington on November 4, 1863, and September 12, 1892, together with out lots Nos. 1, 2, 3, 4, 5, 6, and such portion of out lot No. 7 (all in township 31 north, range 6 west, Willamette meridian), of the Ediz Hook or False Dungeness Lighthouse Reservation, Wash., as may be required to give a frontage of 2 statute miles measured in a northerly and easterly direction along the westerly and northerly boundary of said reservation, beginning from a point on high-water mark opposite the northwesterly corner of lot 147 of the said Port Angeles town site; also, the tide lands on the Strait of Fuca and on Port Angeles Harbor abutting on those portions of the Ediz Hook Lighthouse Reservation heretofore described, for and during the full period of 99 years, for its use, except as hereinafter specified: Provided, That in said lease it shall be stipulated that the Government of the United States may at any time during the term thereof go upon said reservation and establish and maintain post lights or such other aids to navigation as it may deem proper at any points on the reservation affected by this lease, and shall have access thereto and a sufficient right of way thereon at all times: Provided further, That no excavations other than excavations for foundations for building purposes shall be made and no soil or other material forming the spit shall be removed from the lighthouse reservation, and that the buildings to be erected on the said premises shall not obstruct or interfere with any lights

house Reservation not covered by this lease may be laid out as may be directed by the Secretary of Commerce.

SEC. 3. That there shall be a stipulation in said lease that all charges levied or to be levied on said premises during such term shall be at the expense of the city of Port Angeles, and no claim shall arise against the United States because of this lease or the termination thereof.

SEC. 4. That the said lease shall further provide that the Secretary of Commerce may at any time during the said period of 99 years, at his discretion, terminate and cancel said lease in case said city of Port Angeles shall fall to construct and maintain in good condition the roadway herein provided for or neglect to pave same as hereinbefore provided for, or shall excavate on said lighthouse reservation for any purposes other than for building purposes, or shall take or remove therefrom soil or other material belonging to the lighthouse reservation, or shall in any way interfere with the right of the United States to establish and maintain post lights as specified above, or fail to observe other provisions stipulated in said lease on its part to be kept and performed. It shall also be stipulated in said lease that all improvements made upon said lighthouse reservation by the said city of Port Angeles, and all buildings and other structures erected thereon by said city of Port Angeles under the terms of said lease, shall, upon the termination of said lease, in natural term or by cancellation of the same, be and become the property of the Government of the United States unless said improvements and buildings and other structures erected thereon shall be removed within six months from the date of the expiration of the lease; and that in event said structures shall be removed by said lease, the premises shall be restored to the same condition as before their erection.

SEC. 5. That the Secretary of Commerce may include in said lease any other provisions or stipulations which in his judgment may be deemed necessary to protect t

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the

Whole, proceeded to consider the bill.

Mr. BRANDEGEE. Mr. President, I should like to have some kind of a statement in regard to this matter or to have

the report read, if it is not long. If the report is long, however, I should rather have a short verbal statement.

Mr. POINDEXTER. Mr. President, the report is not long. It consists of a letter from the Secretary of Commerce, in which he states that the department, which, I suppose, is guided by the states that the department, which, I suppose, is guided by the advice of the Lighthouse Board, for whose uses this reservation is made, has no objection to the bill.

I will state further that the existing law already authorizes the lease by the Government of unoccupied lands on reservations such as this for a period of five years, but it has been ascertained from experience that short terms of leases are not available for any practical use, so it was desired to obtain a lease in this instance for 99 years of land which is unoccupied and has always been unoccupied, and unless it is leased in some such way it will probably continue indefinitely to be unoccupied. That is the situation. It is a small town, lying between the waters of the Strait of San Juan de Fuca and the Olympic Mountains. The quantity of land is very limited, and it is desired for the establishment of manufacturing industries. The lease, as embodied in the substitute read by the Secretary, states in specific terms that the city shall build and maintain a macadam roadway from the public highway to the lighthouse, which is situated at one point on the reservation. I think those are the essential features of the proposition.

Mr. BRANDEGEE. What is the total area of the land

involved?

Mr. POINDEXTER. Something like 86 acres. Mr. BRANDEGEE. It is 2 miles long?

Mr. POINDEXTER. Yes; a long, narrow strip.
Mr. BRANDEGEE. I make no objection to the bill, but I

think a lease of 99 years is equivalent to a fee.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SAULSBURY

A bill (S. 3715) directing the Secretary of War to purchase or condemn the Chesapeake & Delaware Canal; to the Committee on Commerce.

By Mr. MARTINE of New Jersey:

A bill (S. 3716) granting an increase of pension to Newton C. Dealing (with accompanying papers); to the Committee on Pensions.

By Mr. COLT:

bill (S. 3717) granting a pension to Corella C. Bowers (with accompanying papers);

A bill (S. 3718) granting an increase of pension to Maria L.

Johnson (with accompanying papers); and

A bill (S. 3719) granting a pension to Lottie I. Brown (with accompanying papers); to the Committee on Pensions.

By Mr. WORKS:

A bill (S. 3720) securing and confirming to the adjoining landowners the titles acquired by adverse possession to certain lands within the grant heretofore made by the United States of parts of its public lands to the Central Pacific Railroad Co. of California for railroad right of way; to the Committee on Public Lands.

By Mr. STERLING:

A bill (S. 3721) granting a pension to Charles H. Haring; to the Committee on Pensions.

By Mr. CHAMBERLAIN:

A bill (S. 3722) to place the name of James Otis Ladd upon the unlimited retired list of the Army; to the Committee on Military Affairs

By Mr. PENROSE:

A bill (S. 3723) granting an increase of pension to Dallas Bumbaugh;

A bill (S. 3724) granting an increase of pension to Mary A.

A bill (S. 3725) granting a pension to Emma C. Young;

A bill (S. 3726) granting an increase of pension to Laura V. Tegethoff;

A bill (S. 3727) granting an increase of pension to Mary B. Keller:

A bill (S. 3728) granting a pension to James Mullin; A bill (S. 3729) granting a pension to Ernestine Waggoner; A bill (S. 3730) granting an increase of pension to Wesley A.

A bill (S. 3731) granting an increase of pension to Isaiah Coplin:

A bill (S. 3732) granting a pension to Harry Hines, alias Harry Hinton (with accompanying papers):

A bill (S. 3733) granting an increase of pension to Daniel J. Smeyres (with accompanying papers); and

A bill (S. 3734) granting an increase of pension to Thomas F. Wilson (with accompanying paper); to the Committee on Pen-

A bill (S. 3735) for the relief of Mary Cairney; to the Committee on Claims.

A bill (S. 3736) to provide for the acquisition of additional land adjoining the present post-office site at Hanover, Pa.; to the Committee on Public Buildings and Grounds.

A bill (S. 3737) to grant an honorable discharge to George W. Hopkins:

A bill (S. 3738) to correct the military record of Edward M. Warren; and

A bill (S. 3739) to correct the military record of Daniel C. Graeber; to the Committee on Military Affairs.

By Mr. SMITH of Michigan:

A bill (S. 3740) granting an increase of pension to John P.

Miller; and

A bill (S. 3741) granting an increase of pension to Sarah M. White (with accompanying papers); to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 3742) to authorize the Hudson River Connecting Railroad Corporation to construct a bridge across the Hudson River, in the State of New York (with accompanying paper); to the Committee on Commerce.

By Mr. JOHNSON: A bill (S. 3743) to remove the charge of desertion from the record of James L. Pierce; to the Committee on Military Affairs.

A bill (S. 3744) granting a pension to Charles W. Spencer; A bill (S. 3745) granting a pension to Fred Lajoie; A bill (S. 3746) granting an increase of pension to Joseph

A. Libby

A bill (S. 3747) granting an increase of pension to Mary L. Stone:

A bill (S. 3748) granting a pension to Melissa J. Chandler (with accompanying paper);

A bill (S. 3749) granting an increase of pension to Charles E. Sawtelle; and

A bill (S. 3750) granting a pension to Lovina J. Reeves (with accompanying papers); to the Committee on Pensions.

## AMENDMENT TO BANKING AND CURRENCY BILL.

Mr. BURTON submitted an amendment intended to be proposed by him to the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes; which was ordered to lie on the table and be printed.

#### FARM CREDITS.

Mr. CLAPP. Mr. President, I ask leave to lay before the Senate another document. I am a great believer in the maxim that God helps him who helps himself, although I recognize that the time has come when the American Congress ought to take up the question of a system of farm credits. But until that is done, and as an encouragement perhaps to others, I am going to ask to have printed in the RECORD the third annual report of the Jewish Farmers' Cooperative Credit Unions, showing the success of the effort of those people to establish credit unions among farmers upon their own responsibility. The figures given are not large. It has been running only a little while, but it does show the remarkable success which has attended the efforts of those who sought in the first instance to help themselves

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

Third annual report of the Jewish Farmers' Cooperative Credit Unions, organized by the Jewish Agricultural and Industrial Aid Society.

The Jewish Farmers' Cooperative Credit Unions—the first and so far the only cooperative agricultural credit banks on American soil—were created by the Jewish Agricultural and Industrial Aid Society.

#### LAND CREDIT.

This society is an offshoot of the Baron de Hirsch Foundation, which came into existence in 1890. From its very inception the Baron de Hirsch fund, among its other activities, made loans to Jewish farmers. Ten years later the Jewish Agricultural and Industrial Ald Society was incorporated, specially to look after the agricultural end of the Baron de Hirsch fund work. All agricultural matters were then turned over to the newly organized society. It can therefore be said that the Jewish Agricultural and Industrial Aid Society, together with the loans made by its parent organization, has been engaged in the land credit business close to 24 years. The land credit system of that society is, accordingly, the oldest extant in the United States.

With the exception of the manner of raising its funds, the land credit system of the Jewish Agricultural Society is not unlike that of the Crédit Foncier and other corporate land credit institutions of the type prevailing on the European Continent. Loans are secured by real estate mortgage and are repayable by amortization in moderate annual installments. The interest rate is 4 per cent. Although the funds of the Agricultural Aid Society are limited to a stated annual income and its operations are confined to a special class, its work shows the possibilities of land credit and its adaptability to American conditions. In the 14 years the society has been in existence it has granted 2,800 loans aggregating about \$1,800,000. These loans were made to 2,500 Jewish farmers in 31 States and in Canada. The operations of that society thus embrace a much larger territory than those of all the land credit banks in Continental Europe taken together.

#### COOPERATIVE CREDIT.

The cooperative credit system of that society is a direct outgrowth of its land credit system. The need of short-time personal credit by the American farmer was long recognized by those at the head of the society. But with a clientele scattered over practically the entire country, direct extension of personal credit was not deemed practicable.

Accordingly as early as 1907 serious consideration was given to the question of relieving the situation by the adoption of one of the European cooperative systems. But progess was not very rapid. The wealth of literature which is now at everybody's command was wanting then, and it was necessary to go to original sources for information. Legislation on the subject, too, was nonexistent, and it was a question whether such associations could be legally organized. In 1909 the society was prepared to attack the problem definitely, and it was then and there decided to organize these credit unions as unincorporated or voluntary associations. Meanwhile the spirit of cooperation was growing among the Jewish farmers and the groundwork was being laid for these credit unions through the organization of many local Jewish farmers' associations and their federation into the Federation of Jewish Farmers of America.

PIONEER CREDIT UNIONS.

#### PIONEER CREDIT UNIONS.

The first credit union commenced business in May, 1911; 3 were organized that year, 5 in 1912, and 9 in 1913, making a total of 17 in operation. Eight of these are located in New York, five in New Jersey, and four in Connecticut. Each of them raised \$500 or more from the sale of shares to members, and the aid society loaned them each \$1,000 with which to begin operations. The form of organization of these credit unions is similar to that of the Raiffelsen bauks—after which most cooperative credit institutions the world over are patterned—in so far as that system could be adapted to American conditions and to the peculiar needs of the situation.

The following table contains a report of the operations and financial statement of these credit unions for September 30, 1913. As will be observed, they have an aggregate membership of 517 and a capital of \$9,165. They have been in operation for periods averaging a little over 13 months, during which time they loaned out \$73,624.66, about eight times their capital. Their net profits amount to \$1,317.93; that is, at the rate of 13½ per cent per annum on their capital.

Table showing the operations of the Jewish Farmers' Cooperative Credit Unions since their organization.

[Compiled by the Jewish Agricultural and Industrial Aid Society.]

Mr. CLAPP. I also ask to have printed in the RECORD in connection with this subject resolutions adopted by the fifth annual convention of the Federation of Jewish Farmers of America, held in New York City, November 16 to 19, 1913.

There being no objection, the resolutions were ordered to be

printed in the RECORD, as follows: Resolutions adopted by the fifth annual convention of the Federation of Jewish Farmers of America, held in New York City, November 16 to 19, 1913.

to 19, 1913.

Whereas agriculture in the United States has long been handicapped because of the lack of adequate rural-credit facilities, both land credit and personal credit;

Whereas it has come to be generally recognized that the inauguration of proper systems of both kinds of rural-credit will be of inestimable benefit not only to the farmers, who are the producers of our foodstuffs, but also to the urban population—the consumers;

Whereas the land-credit system, which was inaugurated by the Baron de Hirsch Fund in 1890 and carried on by it until 1900 and since then by the Jewish Agricultural and Industrial Aid Society, its subsidiary, has proved to be an incalculable blessing to the Jewish farmers in this country and demonstrated the possibilities of land credit in the United States;

Whereas the system of cooperative credit introduced into the United States by the Jewish Agricultural and Industrial Aid Society and the 17 agricultural credit unions organized by that society have proved the usefulness and adaptability of this form of credit to American agriculture; and Whereas the President of the United States has in his first annual message directed the attention of Congress to the need of the early enactment of proper laws to deal adequately with the subject: Therefore be it

Resolved, That we, the members of the Federation of Jewish Farmers of America, in convention assembled, most heartily extend our thanks to the President of the United States for his efforts in behalf of the country's agriculture, and that we memorialize the Congress of the United States to give its earliest consideration to this most important

question.

Resolved, That a copy of these resolutions, together with the third annual report of the Jewish Farmers' Cooperative Credit Unions, be forwarded to the President and members of his Cabinet, to all the Members of Congress, and to the governors of all the States in the Union; and be it further

Resolved, That the thanks of this convention be tendered to the Jewish Agricultural and Industrial Aid Society for its many educational activities for the benefit of the Jewish farmers in this country and for pointing to the solution of the pressing problem of rural credit,

ADDRESS BY SENATOR SUTHERLAND (S. DOC. NO. 328).

Mr. GALLINGER. Mr. President, I ask unanimous consent that an address delivered by the Senator from Utah [Mr. SUTHERLAND] at the annual dinner of the Pennsylvania Society, New York, on the 13th of December, 1913, be printed as a Senate document

Mr. WILLIAMS. Mr. President, I inquire to what does the

address relate?

Mr. GALLINGER. It is an address delivered by the Senator from Utah [Mr. SUTHERLAND] at the annual dinner of the Pennsylvania Society, held three days ago in New York, en-titled "The Law and the People." I ask that it may be printed as a Senate document.

Mr. WILLIAMS. I have no objection.
Mr. OWEN. Mr. President, I shall make no objection to the printing of the speech of the Senator from Utah, although I have not seen it, and although I do not doubt that it is a criticism of the processes of popular government; but I wish to call attention to the consent which is being given, so that Senators who object to the doctrine of popular government may not object when speeches in favor of those proposals may be asked to be printed as Senate documents.

Mr. GALLINGER. I think, Mr. President, the Senator will recall the fact that we have always been very generous in printing the documents the Senator has presented.

Mr. OWEN. I think the Senator from New Hampshire has been, but other Senators sometimes have not been.

Mr. GALLINGER. I have never objected, I assure the Sena-

tor, and probably never shall.

Mr. FLETCHER. Mr. President, I wish to say this much for the committee. I make no objection to this request, because there is precedent for it, and I have no doubt it is a splendid address and well worthy of being distributed as a public document; but there is this to be said about this matter of printing: There is a Committee on Printing in the Senate, charged with certain duties and responsibilities, and I believe these matters ought to be referred to that committee. Before we get in the way of giving unanimous consent to every request for printing that is made, we ought to reflect and let the application go to the committee to be passed upon.

There is a rule, furthermore—and I do not know but that it has a higher sanction than that—a law that requires every application to print a document to be accompanied with an estimate of its cost; and that ought to be observed. I desire to give notice now that I am going to ask hereafter that these matters shall all go to the appropriate committee. I think that is the proper course. The committee has not heretofore delayed acting on such requests, but has promptly reported on matters

which have been referred to it.

Mr. GALLINGER. I think, Mr. President, if that were the rule, it would be a very good one. I think that in 22 years I have asked for but two documents to be printed, and this is the second one. I feel sure it ought not to be objected to. The cost, I apprehend, will be about \$10, perhaps; I should not think it would be more.

Mr. FLETCHER. I do not wish the Senator to understand that I am finding the slightest fault with him or his request.

am not going to object at all.

Mr. GALLINGER. I understand that. Mr. FLETCHER. I simply desire to make a place somewhere where we can give notice that if objection to such requests is made hereafter it will be in pursuance of our idea that these matters ought to go to the committee.

Mr. GALLINGER. I think the Senator is right in taking that

The VICE PRESIDENT. There is a proposed amendment to the rule, which will come up one of these days, in connection with which the whole matter can be discussed. Is there objection to the request of the Senator from New Hampshire [Mr. GALLINGER]? The Chair hears none, and the address will be printed as a public document.

ADDRESS BY W. D. BOYCE.

Mr. FLETCHER. I ask to have printed as a public document an extract from an address delivered by W. D. Boyce, of an extract from an address delivered by W. D. Boyce, of Chicago, at the Southern Commercial Congress meeting at Mobile, October 28, 1913, on the subject "How to make the Panama Canal pay." I ask that the document be referred to the Committee on Printing for action.

The VICE PRESIDENT. Without objection the request of the Senator from Florida is complied with.

HOUSE BILLS REFERRED.

H. R. 4618. An act to increase the limit of cost for increased quarantine facilities at the port of Portland, Me., was read twice by its title and referred to the Committee on Public Buildings and Grounds.

H. R. 6202. An act providing for the disposition of effects of deceased patients of the Public Health Service and of certain deceased officers and men connected with the Army was read twice by its title and referred to the Committee on Public Health and National Quarantine.

H. R. 7212. An act relating to the anchorage of vessels in navigable waters of the United States was read twice by its

title and referred to the Committee on Commerce.

H. R. 7967. An act to amend an act approved June 25, 1910, authorizing a postal savings system was read twice by its title and referred to the Committee on Post Offices and Post Roads.

H. R. 8846. An act making appropriation for payment of certain claims in accordance with findings of the Court of Claims, reported under the provisions of the acts approved March 3. 1883, and March 3, 1887, and commonly known as the Bowman and the Tucker Acts, and under the provisions of section 151 of the act approved March 3, 1911, commonly known as the Judicial Code, was read twice by its title and referred to the Committee on Claims.

#### BANKING AND CURRENCY.

Mr. OWEN. I move that the Senate proceed to the consideration of House bill 7837.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

The VICE PRESIDENT. The pending question is on the

amendment proposed by the Senator from Nebraska [Mr. Hitch-

Mr. BRISTOW obtained the floor.
Mr. WILLIAMS. Mr. President—
The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Mississippi?

Mr. BRISTOW. I do. Mr. WILLIAMS. I ask the Senator to yield long enough that may have read at the desk a telegram which I have received. The VICE PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

CANTON, MISS., December 14, 1913.

Senator John Sharp Williams, Washington, D. C.:

We earnestly request your support for bank control of regional banks in preference to Hitchcock's amendment for Government control. Do not think it just to require banks to subscribe for stock and have no control over investment; do not believe banks of State will join Federal reserve associations with absolute Government control.

FIRST NATIONAL BANK.

Mr. BRISTOW. Mr. President, the amendment relative to the matter referred to in the telegram just read has already been acted on. A few months ago, when the consideration of the currency bill was first begun by the Senate committee, we had a storm of protests from certain bankers against the Government control of this system, and certain Senators rose in the Senate and with great indignation denounced the bankers because they wanted to control a system which was being organized, in a sense, to regulate them; but it seems that the attitude of those Senators has entirely changed, and now they are in favor of the banks controlling the institutions which are to be created and have very drastic regulatory powers over such banks. I think the suggestion made by the Senator from Minnesota [Mr. Clapp] last night that the proposed trust legislation doubtless will provide for a trade commission and give the trusts a majority of the members of such commission was quite apropos. But that is a little aside from what I rose to discuss,

The amendment that is now under consideration relates to the earnings of these banks. The difference between the amendment suggested by the chairman of the committee and that suggested by the Senator from Nebraska [Mr. HITCHCOCK] consists in a difference in the dividends from earnings and a slight difference in the distribution of the profits. Our amendments provide for a 5 per cent dividend, while the amendment submitted by the Senator from Oklahoma provides for a 6 per cent dividend. We provide for a surplus fund of 20 per cent of the capital, while the amendment of the chairman provides for a surplus fund of 40 per cent of the capital. After such dividends have been paid and such surplus has been provided the remainder is divided into two parts by both amendments.

Under the Hitchcock bill, one part goes to take up the 2 per cent bonds of the United States Government. Under the Owen bill, it is declared a franchise tax for the purpose of reducing the bonded indebtedness. The other half of the profits, in both bills, goes to create a guaranty fund or an insurance fund for depositors of member banks.

The effectiveness of the Hitchcock amendment will appeal to anyone who will examine the bills as being a great deal better, so far as the insurance of depositors goes. First, under the plan submitted by the chairman, there are to be organized from 8 to 12 regional banks. If there should be 12 or 8 I do not believe they will all pay dividends, for, in my opinion, some of them will not be successful. The large regional banks, located in the populous centers of the country, will probably earn profits, pay dividends, and provide a surplus; but in the case of the banks located in the sparsely settled regions, where the capitalization will be small, the expenses will be approximately as large as in the others and the business very much less. Therefore I doubt very much-indeed, I do not believe, though it is a question of opinion, of course, and can not be demonstratedthat the smaller regional banks will ever pay the dividends. In case they do not pay dividends, of course the provision relating to the guaranty or insurance of deposits is useless. So, under that provision, in my opinion, you will have the depositors of the member banks of one region with some insurance while the depositors of member banks in another region will have none.

First, there has to be a 6 per cent dividend on the stock; second, there has to be an accumulation of a surplus of 40 per cent before any insurance fund can accumulate. For that reason I think the provision of the chairman will be a delusion and a snare so far as concerns the depositors in the member banks in half the country at least. Under our provision, with only four regional banks, it would be entirely different.

In discussing the question of depositors' insurance I regret to say that my controversy now is with the Senators on this side of the Chamber. While the division of the committee headed by the chairman refused to incorporate in their bill this provision, its justice and desirability and the demand throughout the country for such legislation were so manifest that the Democratic caucus did not care to resist its adoption, and therefore they have incorporated this measure in an ineffective form into their bill. While it is ineffective, I am glad they incorporated such a provision, because it recognizes the principle of depositors' insurance, and so far it is good.

A good deal has been said about the speech delivered by the senior Senator from New York [Mr. Root] on December 13. He will have to defend himself from the very vigorous and violent attacks that have been made by distinguished Senators who, it is alleged, have been profound students of this great, complicated, and intricate question for many years—a very interesting news item that has recently appeared in some of the journals. I leave it for him, however, to discuss these complicated and profound questions with abler statesmen than I. In a number of respects I do not agree with his position as outlined in the speech he made, but there is one feature of his very able and forcible address with which I do agree, and that is that the bill as framed by the Owen branch of the committee opens wide the opportunity for inflation of the currency.

That is as simple as any problem in primary mathematics can be. First, it preserves all of the currency we now have, including the national-bank notes, aggregating something near \$750,000,000. So there will be no contraction if the system works, if it is ever established, because the regional banks are required under the law to maintain the national-bank note circulation. In addition to that, provision is made for another kind of currency, the regional-bank notes, which are based upon assets with a gold reserve of 33½ per cent.

Every dollar of that currency that is issued is an addition to our circulation. Last night the chairman of the committee erected a great defense against inflation, composed of 10 or 15 or 20 impregnable breastworks of some kind. I think the first one of these insurmountable defenses against inflation was that you had to create in the minds of men a desire for more money, and it was said that the creation of such desire for money was the first defense. That is rather interesting to me, because I have not met many men who had all they wanted and who were not willing to acquire more if they could get it; but I shall not go into that subject. If large quantities of the regional notes should be issued, if there should be a demand for loans, if there should be active speculation anywhere, so that men thought they could borrow money easily and make money fast by doing it, there would be inflation, of course. Anybody who has any intelligence knows that. It does not need any argument.

I object, however, to one provision in the Senator's amendment, and that is where he places an arbitrary limitation on the amount of circulation we can have.

The Hitchcock bill provides that the national-bank notes shall be retired at the rate of not less than \$50,000,000 a year. In their place are to be issued the regional-bank notes, and they will go out as the demands of business require. The amount of

circulation under the Hitchcock provision depends upon the gold reserve, which is fixed at 45 per cent. That is a little larger reserve than we have behind our greenbacks at present. With the retiring of the national-bank notes the place they have filled in the financial and business affairs of the country is to be filled by the substitution for them of the regional notes; so that in time, as the years go by, one currency will take the place of the other.

I do not agree with the Senator from New York that there ought to be a fixed maximum limit in the law as to the amount of circulation we should have, any more than I believe there should be a fixed minimum limit as to the amount we should have. The gold reserve is the barometer which should regulate that matter; and we thought 45 per cent, judging from our experience in the past and from the conditions at present, would be a wise regulator. When the regional bank does not have 45 per cent reserve in gold, the tax is put on the reduced reserve, and that tax is transferred by our provision to the member banks that borrow the money from the regional bank. So as the reserve grows smaller the tax goes up, which serves to raise the interest rate and keep down speculation. In that manner the reserve requirement regulates the amount of currency without the arbitrary act of the law or of any executive board.

I believe that is very much more desirable. I may have something more to say upon that subject when we get to that question. I just wanted to make these remarks and then go to a brief discussion of the subject of deposits insurance.

There I must differ most radically with some of my colleagues; and I am taking the time of the Senate more than I would take it otherwise if it had not happened that it was upon my motion that this provision was incorporated in the bill. I am proud of the fact that I took the initiative in this legislation. If, ultimately, it is incorporated into the banking laws of the United States, I shall feel that I have rendered no greater service to the people of this Nation than to have had some small part in securing the incorporation of such a provision in the statutes of our country.

I will read from the speech of the Senator from New York [Mr. Root] on December 13. In speaking of depositors' insurance, he says:

The serious side of it is that this is giving the credit of the United States to every speculator, every promoter, every blackguard, who is able to scrape together \$25,000 and take out a national-bank charter. It makes no difference under such a provision whether the men who manage the bank have been known from their youth up in the community as men of honor and probity or whether they are the shifty driftwood of accident. Depositors may intrust their money to the speculator with the same confidence with which they intrust their money to the sound and conservative banker, because if the bank that has used its deposits in promoting all sorts of wildcat enterprises fails, the Government of the United States is going to take the money out of the pocket of the conservative banker and pay the debt. It is a premium on indifference to honesty and soundness in business. It is a premium on speculation and disregard of all rules of business soundness and morality. It is an invitation to every adventurer in the world to come into the national-bank system and get the indorsement of the United States upon all the moneys he comes to owe for his schemes.

I regret that the Senator from New York, with his great ability and wide learning, did not investigate the bank-insurance laws of the different States before he delivered such an utterance, because if he had he never would have made the statement. I am going to read some of the provisions from the Kansas bank depositors' guaranty law, and I invite the attention of the Senator from New York and of any Senator who has any doubts as to the wisdom of such a policy to what I shall read. I want the Senator from New York particularly to observe how utterly misleading such a statement is in the light of the experience of States where laws are now in actual operation providing for the insurance of bank deposits.

I will just read extracts, but they will give the gist of the entire law:

SECTION 1. Any incorporated State bank doing business in this State under the general banking laws of Kansas, having a paid-up and unimpaired surplus fund equal to 10 per cent of its capital, and any bank which may after the passage of this act be authorized to do business in this State, and which shall have been actively engaged in the business of banking for at least one year, and having such surplus fund, is hereby authorized and empowered to participate in the assessments and benefits and to be governed by the regulations of the bank depositors' guaranty fund of the State of Kansas hereinafter provided for.

No bank can become a member of this insurance association, for that is what it is, until it has a paid-up capital and surplus of 10 per cent and has been in operation for a year.

Again, section 2:

Before receiving such certificate from the bank commissioner-

Which is the certificate that it is a member of this association—I read again:

SEC, 2. Before receiving such certificate from the bank commissioner each bank entitled to the same according to section 1 of this act shall, as an evidence of good faith, deposit, and shall at all times maintain

with the State treasurer—subject to the order of the bank commissioner when countersigned by the auditor of State—United States bonds, Kansas State bonds, or the bonds of any county, township, school district, board of education, or city within the State of Kansas to the amount of \$500 for every \$100,000 or fraction thereof of its average deposits eligible to guaranty—less its capital and surplus—as shown by its last four published statements:

It has to put up bonds with the State treasurer in the amount of \$500 for each \$100,000 deposited as a security for the payment of the assessments that are hereinafter provided.

Again, section 3:

Again, section 3:

Sec. 3. The bank commissioner shall, during the month of January of each year, make assessments of one-twentieth of 1 per cent of the average guaranteed deposits, less capital and surplus, of each bank—the minimum assessment in any case to be \$20—until the cash fund accumulated and placed to the credit of the bank depositors' guaranty fund shall be approximately \$500,000 over and above the cash deposited in lieu of bonds, when he shall discontinue such assessments. Should such fund become depleted the bank commissioner shall make such additional assessments from time to time as may become necessary to maintain the same: Provided, That not more than five such assessments of one-twentieth of 1 per cent each shall be made in any one calendar year.

One-twentieth of 1 per cent per annum is the assessment made upon the banks within our State as the premium upon this insurance. This law has now been in operation something over four years. This one-twentieth of 1 per cent has resulted in the accumulation in the State treasury in this trust fund of more than \$100,000, and in addition to this there are the bonds of \$500 for each \$100,000 deposited that are in the banks of the association, the association now having almost 600 banks in it. So there is in the fund now \$100,000 in cash in addition to the bonds that have been put up as security for the addi-

tional assessments as they are required.

I may say that the loss of depositors in the banks of the United States during the last four years, as near as can be ascertained, amounts only to about one-fiftieth of 1 per cent of the entire amount of deposits. So one-twentieth of 1 per cent of the deposits is an ample assessment, and it would be only in most extraordinary circumstances that an additional assessment would ever have to be made. Within a comparatively short time the half million dollars will have been accumulated, and then the assessment will, of course, cease until that fund shall be depleted.

I continue reading the law. I want to call the attention of the Senator from New York especially to this language, and I should like the attention of all Senators who are interested in

Sec. 4. When any bank shall be found to be insolvent by the bank commissioner, he shall take charge of such bank, as provided by law, and proceed to wind up its affairs; and he shall at the earliest moment issue to each depositor a certificate upon proof of claim, bearing 6 per cent interest per annum, upon which dividends shall be entered when paid, except where a contract rate exists on the deposit, in which case the certificate shall bear interest at the contract rate.

That is, when a bank belonging to this association in our State fails the bank commissioner takes charge of it. He ascertains what is due to the depositors. He then issues a recertificate of indebtedness, which certificate bears 6 per cent interest, if the deposits are there without interest. If they are time deposits that draw interest, then the certificate bears the same rate as was provided in the contract with the bank,

Mr. GALLINGER. It is an association exclusively of State

Mr. BRISTOW. No. National banks can belong to it. The comptroller some years ago, however, held for some technical reason—I do not know what it was—the national banks could not join the association. So the national banks in our State, in order to protect themselves and put themselves on an equal footing with the State banks, have organized a mutual in-surance company of their own. There are only something over 200 national banks in the State, but the officers of many of the national banks are affiliated with State banks, and there are now about 350 banks in this insurance corporation, and the State association has a membership of approximately 600.

Mr. KENYON. I understood the Senator to say that the

membership is about 600.

Mr. BRISTOW. Approximately 600; the exact number I do

not know.

Mr. KENYON. How many State banks are outside of the association?

Mr. BRISTOW. There are several hundred that have not joined.

Mr. KENYON. Is it true or not that the State banks have increased largely in number since the enactment of the law?

Mr. BRISTOW. The State banks have increased in number,

but I do not know that we could say they have increased since the enactment of this law. The State banks have been increasing rapidly all over the West.

Mr. KENYON. Yes; that is undoubtedly true.
Mr. BRISTOW. They have increased very rapidly in our
tate. This law may have influenced the increase to some extent, but I think there is a general increase.

Mr. KENYON. I am very much interested in the Senator's argument. My mind is absolutely open on this proposition.

Mr. BRISTOW. I am glad to know that, because I think if the Senator's mind is open he will vote for this amendment, and if there are any Senators whose minds are not open I wish they would open them.

Mr. KENYON. The trouble in my mind has always been that in the guaranty of deposits in banks apparently character

is not one of the assets of the bank.

Mr. BRISTOW. I am going to reach that. That is an erroneous notion, as experience has demonstrated.

I do not like to interfere with my distinguished friend from Nevada [Mr. Newlands], but I want the Senator from New York [Mr. Root] to hear every word of this that I am about to read. Continuing further in section 4:

After the officer in charge

That is, referring to the insolvent banks-

That is, referring to the insolvent banks—

After the officer in charge of the bank shall have realized upon the assets of such bank and exhausted the double liability of its stockholders, and shall have paid all funds so collected in dividends to the creditors, he shall certify all balances due on guaranteed deposits (if any exist) to the bank commissioner, who shall then upon his approval of such certification, draw checks upon the State treasurer, to be countersigned by the auditor of State, payable out of the bank depositors' guaranty fund, in favor of each depositor for the balance due on such proof of claim as hereinafter provided.

Now, again, section 6, and this comes in line with the impression which the Senator from New York has, judging from his statement in the speech from which I have read.

All deposits not otherwise secured shall be guaranteed by this act.

That is, when a large depositor in a bank, as is the case occasionally, requires the bank to give some security, such deposits are not guaranteed. It is not usual, as the Senator from New York knows, for large depositors, when they go to a bank, to demand security from the bank for the safety of their deposits, but it occasionally occurs, and in this country, I am advised, in practically every State in the Union the assets of the bank are sometimes hypothecated to guarantee the deposit of a large

Mr. TOWNSEND. That is the State law in Kansas?
Mr. BRISTOW. Formerly the bank could give security. A
person may demand security from anybody for anything put in

Mr. TOWNSEND. Suppose the bank fails and the assets were, under the law, to be distributed among the creditors.

Mr. BRISTOW. Suppose some creditor has an assignment of some of the assets.

TOWNSEND. Would the law permit a preferred

Mr. BRISTOW. Really, I do not know. I am not a lawyer. know that security is sometimes given.

Mr. ROOT. Of course, a thousand things are going on in banking that I do not know about, but I never knew of such a

Mr. BRISTOW. I have known of it. So the law provides that any of these deposits that are insured, or security given in any way for them, do not come within this guaranty law. Now, I will read the language again:

SEC, 6. All deposits not otherwise secured shall be guaranteed by this act. The guaranty as provided for in this act shall not apply to a bank's obligation as indorser upon bills rediscounted, nor to bills payable, nor to money borrowed from its correspondents or others—

Which is right of course. If the banks gave security, that is a question other than the interest of the depositor who intrusted his money to the bank-

Each guaranteed bank shall certify under oath to the bank commissioner at the date of each called statement the amount of money it has on deposit not eligible to guaranty under the provisions of this act, and in assessing such bank this amount shall be deducted from the total deposits.

Further:

SEC. 7. Each guaranteed bank, and each State or private bank not guaranteed by this act, shall keep a correct record of the interest rate and terms of each deposit on which it has paid or agreed to pay interest, and shall make a statement thereof under oath to the bank commissioner quarterly. After the passage of this act any officer of any bank who shall pay interest on different terms or in excess of a rate (which rate shall be uniform within each county) that shall be approved by the bank commissioner from time to time, on any form of deposits, or pays any interest on any savings deposit withdrawn before July I or January I next following the date of the deposit, or on any time certificate cashed before maturity, shall be deemed to be reckless and may be removed from office as provided by law, and such bank shall not be permitted to participate in the benefits of this act.

Mr. KENYON Under that provision there are not a proposed.

Mr. KENYON. Under that provision there can be no competition for deposits.

Mr. BRISTOW. No; they have to pay the same uniform interest and that rate has to be approved by the bank commissioner of the State.

Mr. KENYON. There is a uniform rate for each particular

county or for the State?

Mr. BRISTOW. For each particular county. It was for-merly for the State. I have always questioned the wisdom of the legislature when it changed the provision. When the law was first enacted there was a uniform rate of interest, not to exceed 3 per cent, but in certain sections of our State, in the developing sections-the stock-raising sections-where money was less plentiful and there was a greater demand for it and the returns on money were greater, the banks felt that they should not be held to the same rate as prevailed in the populous part of the State. Eastern Kansas is densely populated. Western Kansas is not densely populated; it is a stock-raising country; and the western banks complained that they were being put to a disadvantage in competition with the national banks, because under the law they could not pay the same rate that national banks were paying in the same community. So the legislature made this change and provided that the rate shall be uniform in the county, that it shall apply to all banks within the county the same, and that it must be approved by the bank commissioner before it can be recognized as a lawful and proper rate.

Mr. ROOT. Mr. President, I am interested to know whether in that change of the law, so as to allow different rates in different counties, there was any element entering of the recognized difference in risks, whether the difference in interest in the different counties of the State proceeded upon a greater risk of investment in new counties than in the older and more settled counties, whether there was more chance of losing money in the western part of Kansas than in Leavenworth or Kansas

City?

Mr. BRISTOW. Of course, I could not answer that definitely. That may have had some consideration in connection with this change, but I do know in certain sections of the State the interest rates are higher for various reasons.

Mr. PERKINS. The legal rate of interest in the State is 6

per cent?

Mr. BRISTOW. Yes; 6 per cent is the legal rate in Kansas. Mr. BRADY. I should like to have the Senator tell us whether he thinks this same condition relating to difference in rates in the counties should apply to the different regional reserve districts.

Mr. BRISTOW. As far as the insurance of these deposits are concerned, when I drafted this measure as incorporated in the Hitchcock bill, which is substantially the same as is in the other bill, I felt that the Federal board should take these State laws-there are a number of States that have such provisionsand study them and then leave it to them to provide rules and regulations in regard to the distribution of this fund, believ-ing that after the system was in operation and we had some experience we then probably could legislate with more wisdom and effectiveness

Mr. TOWNSEND. In a case where the rate is fixed by who-

ever has had it in charge-

Mr. BRISTOW. The bank commissioner. Mr. TOWNSEND. The bank commissioner for a county. there any conflict between the rates paid in that county by the National banks and the State banks?

Mr. BRISTOW. Yes; the national banks can do what they please. They deal with the Federal Government and not with the State government. The State does not have any supervision over them at all.

Mr. TOWNSEND. Is it a fact that national banks raise the rate of interest above that provided in the State banking law?

Mr. BRISTOW. I do not know as to those details. I am not familiar with them. I know that the legislature changed the provision in the law which originally limited it to 3 per cent, and I believe I would have preferred it to stay at 3 per cent. I realize, however, that the competition between the National bank and the State bank might be such that the State bank would be put to great disadvantage if the National bank on one corner were paying 4 per cent on deposits and the State bank on the opposite corner were not permitted to do so.

Mr. TOWNSEND. I also think it would be necessary in that case that the bank commissioner should have the power to change this order frequently. For instance, if in one county it was discovered that the rate fixed was too low, the national

banks would obtain all of the savings deposits.

Mr. BRISTOW. That is the danger, I think, in leaving this discretion with the bank commissioner. I should have preferred that it should remain where it was, because I believe that even

in western Kansas-where at times the returns on money are great and at other times are not-it is well to be conservative in the banking business; but the judgment of the legislature, of the bank commissioner, and of the State administration, which was familiar with the operation of the law, was that this would be a better way to fix it; and so they changed it. I want to say to the Senator from New York [Mr. Root] that in this law we have hedged the matter about so that in the State of Kansas a character such as he describes could not go into the banking business. If they should do so, they could not get into the Guaranty State Insurance Association for the guaranty of the deposits.

Mr. NORRIS. Mr. President—
The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Nebraska?

Mr. BRISTOW. I yield to the Senator. Mr. NORRIS. From what the Senator from Kansas has said, I judge that men of the character referred to by the Senator from New York would go around in good places to start banks and pay enormous rates of interest; that the disreputable fellows whom he has mentioned who would be invited in, would, if they went to Kansas, all go into the national-bank business?

Mr. BRISTOW. They could not go into the State banking business and have their deposits insured.

Mr. TOWNSEND. Well, is there any provision in any one of these bills before the Senate which permits that kind of an examination or test before a man can be permitted to engage

in the banking business?

Mr. BRISTOW. I should say not before a man could engage in the banking business, but the Federal board has the authority to make such regulations before those banks could have their funds guaranteed; and I think the United States ought not to permit characters, such as have been described by the Senator from New York in his speech here, to go into the national banking business

Mr. ROOT. Well, Mr. President, is there anything in the bill which would authorize the Federal board to exclude any citizen of the United States from the right to go into the banking

business

Mr. BRISTOW. No. If he runs a bank as the Federal board and the Comptroller of the Currency think it ought to be run, if the bank is run in a legitimate and proper way, of course, they might not examine into the character of the man who is running the bank. There are bad men and good men who are running banks, but the Federal board and the comptroller have the authority to see that that bank is properly run, and if they do not do it they fail in their duty. My complaint against the Owen bill is that it does not put the responsibility of determining the character of the banks and the manner of conducting the banks so much on the Federal board as it ought to do.

Mr. GRONNA. Mr. President, if the Senator from Kansas will permit me, the Comptroller of the Currency under the present law has the right to investigate and inquire into the character of the men who apply for a charter to organize a national bank, and no man will be granted a charter for a national bank unless he is recommended by some one assuring the Comptroller of the Currency that he does enjoy a good reputation and that he is a man of good moral character. That is the present law.

Mr. BRISTOW. I thank the Senator from North Dakota for incorporating that into the Record. I am neither a banker nor a lawyer, and I am not familiar with all of the provisions in

the law in reference to this matter. Mr. BRADY. Mr. President-

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Idaho?

Mr. BRISTOW. I do. Mr. BRADY. I wish to inquire if the provision which the Senator from Kansas now states applies to the national banks will apply to the State banks that are permitted to come into this reserve association?

Mr. BRISTOW. Oh, yes. Mr. BRADY. I am very much interested in the remarks of the Senator, and I have simply asked him the question for information.

Mr. BRISTOW. Oh, yes; that provision would apply.

Another thing. I have been reading a few of the provisions of this law. The law has been over four years in operation; it is not any vision or dream; it is an actual fact; it has been tested, and I am going to tell you something about what it has

done. It provides:

Sec. 14. It shall be unlawful for any bank guaranteed under the provisions of this act to receive deposits continuously for six months in excess of ten times its paid-up capital and surplus, and the violation of

this section by any bank shall cancel its rights to participate in the benefits of the bank depositors' guaranty fund and work a forfeiture of its bonds deposited with the State treasurer for the benefit of such

There is a provision which we have incorporated into our State law so far as the banks that are guaranteed are concerned. The Senator from Nebraska [Mr. HITCHCOCK], upon several occasions since this debate began, has called attention to the fact that in our section of country the deposits in banks have grown so much more rapidly than has the capitalization of the banks that the liabilities are far in excess of the ability of the bank to meet them as compared to conditions that prevailed years ago. We in Kansas recognize that, and so a bank can not have more than 10 times its capitalization and surplus in deposits and remain a member of this association.

Mr. BRADY. Mr. President-

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Idaho?

Mr. BRISTOW. I yield to the Senator from Idaho. Mr. BRADY. I should be glad to have the Senator from Kansas tell me what action is taken by the banks in Kansas after they have received 10 times as much in deposits as their capital and surplus? Is there any method provided by which they can take care of the excess?

Mr. BRISTOW. I will read the provision again, so that the

Senator may understand it.

It shall be unlawful for any bank guaranteed under the provisions of this act to receive deposits continuously for six months—

If for a month or two months its deposits have run up so that they are more than 10 times the capital, it is not penalized, but if the bank has such excessive deposits for six months, it has got to increase its surplus and its capital stock. I know of a bank in my own town whose deposits when this law went into effect were 10 times its capitalization, and within six months it doubled its capitalization.

Now, Senators, men may criticize the insurance of bank de-posits if they will, but I invite your attention to this law framed by the lawmakers of the State of Kansas, and if it does not appeal to the judgment of every Senator here I will

be greatly disappointed.

Mr. TOWNSEND. Mr. President— Mr. BRISTOW. I will yield to the Senator in just a moment. It is not a radical, unsafe, and insane measure; it is conservative, and added to its conservatism there enters into it that fundamental element of justice which I will discuss a

Mr. TOWNSEND. Mr. President, it seems to me that the real test of this law would be not the wording of it alone, but how it has worked. I understand the Senator to say that it has been in operation four years.

Yes; I am going to tell the Senator some Mr. BRISTOW.

experiences under it.

Mr. KENYON. Mr. President, before the Senator leaves the discussion of the Kansas law, I desire to inquire of him what is the practical method under which a bank can start in Kansas? I remember that, as the Senator has read it, the Kansas law provides that at the end of the year a bank must have a surplus of 10 per cent of its capital stock.

Mr. BRISTOW. Yes.
Mr. KENYON. In other words, John Smith and Henry Jones start a bank with a capital of \$25,000. They could not enter this association until they had a surplus of \$2,500.

Mr. BRISTOW. No; not until they had a surplus of 10 per

Mr. KENYON. And they must accumulate that surplus in one year's business?

Mr. BRISTOW. They have to be in operation for one year

before they are eligible for membership.

What is the practical working of the law? How does that bank get any business? How does it earn this surplus in competition with other banks in the guaranty association? How can that bank make money unless it can become a member of the association?

Mr. BRISTOW. The banking business is like any other busi-You may ask how can a merchant go into a town where there are half a dozen stores and start in business.

Mr. KENYON. Does this new bank get any deposits during

the first year?

Mr. BRISTOW. Oh, yes. As I have said, the banking business is much like any other business. In my town there were four successful banks. Two of the banks merged, leaving three. It is a town of something over 10,000 people, and some gentlemen thought it was a good opportunity to start another bank, and they started it. They had the money; they put up the capital and paid in a surplus; they started out with friends who had confidence in them, who had known them, and who de-

posited their funds with them. The deposits of the bank were not great the first year—deposits are not expected to be great the first year after a bank is started—but they ran the bank in a conservative way, and at the end of the year they were eligible to enter the association.

Mr. KENYON. I am curious to know how a surplus could be earned by a bank in competition with other banks whose

deposits were already guaranteed.

Mr. BRISTOW. I do not think the bank more than paid its expenses during that year, but it had deposits.

Mr. ROOT. Mr. President, the time required to elapse before the bank can enter the association, and the surplus which it is required to have, seem to be rather in the direction of guaranties of the proper and sound management of the bank.

Mr. VARDAMAN. Mr. President, we can not hear anything

that is being said on the other side of the Chamber, and we

are very much interested in the colloquy.

Mr. ROOT. I was observing to the Senator from Kansas that the time which, under the Kansas law, was required to elapse before a bank could enter this insurance system, and the surplus which the bank was required to have, seemed to be in the nature of guaranties of the sound and proper conduct of the banking business. That is my notion of it.

Mr. BRISTOW. I think so. I think it is a wise provision.

Mr. ROOT. I quite agree with the Senator from Kansas that

it is a wise provision.

Mr. BRISTOW. I have only read a part of the regulations. I do not want to read the entire law, but it is a public document here, and I invite every Senator to get it and study it if he is interested in the subject.

Mr. ROOT. I think it would be more efficient if the Senator

would call attention to it.

Mr. BRISTOW. I have called attention to the salient points; but every section of the law surrounds the banks with restric-

tions to enforce honest and efficient banking.

I have been asked as to how that law worked. I became an ardent believer in the insurance of bank deposits from the experience I have had-not personal experience, for I never lost dollar in a bank in my life-but I remember, something over 20 years ago, I employed a boy in my printing office. He started in to work for me at \$10 a week. He was a good boy; he worked well; and in the course of a few years his wages were advanced to \$15. They had been advanced from time to time.

The town was small, and the business did not justify the payment of as high wages as were paid in larger cities; and, being ambitious, he concluded to go to a larger town. So, with deep regret on his part, I am glad to say, as well as on my own, he left my employ and went to a larger town and became connected with a much larger office. He was economical; he saved his money. In the meantime he had married a girl in our town, one of our high-school girls, one of the jewels that grow out on those plains of ours. When he went to this larger town he took with him what little money he had saved from his meager wages during the hard and pinching times of more than 20 years ago. In the town to which he went there was the First National Bank, the strongest bank in town, with a fine building, granite pillars, marble counters, tile floors, and a large business. Everybody had confidence in it. He put his little money into that bank. His wages grew where he was employed from year to year until he was earning, I presume, \$25 a week. In the course of time he had saved as much as \$1,600 and had contracted for a little home in which to put his family; but, to his amazement, one morning when he went downtown he saw posted on the doors of this bank "Closed by the Comptroller of the Currency." Locked up in those vaults were his savings of 15 years of hard and industrious labor-\$1,600 that represented as much sacrifice to him as Carnegie's millions

represent to him. You can imagine the feelings of that boy.

The president of this bank was one of the leading citizens of the community, a man in whom everybody had confidence. The bank was patronized by the richest man in the town; he had large business, and his possessions were thought to be in the millions, but his investments had turned out against him, mis-fortune came, and he failed, and when he failed he took that bank down with him, and not only that bank but other banks. So great was the failure that it almost closed the doors of one

of the large banks in Kansas City.

Now, you say that the guaranty of bank deposits opens an opportunity for the reckless man to go in the banking business. This was not a reckless bank; this bank had been deceived; it had placed its confidence in this man, who had the confidence of nine-tenths of the business men of that community, but that man failed, and his bank was closed.

This boy exercised all the discretion and judgment any man could have exercised. If I had been going to that community,

I probably would have done the same thing. Months went by, years went by, and he finally got a part—something over 75 per cent, I believe—of his \$1,600. The rest of it he lost.

I call attention to another instance. There is a town 22 miles from the town in which I live. I think it was a national bank of that town which failed. I refer to the town of Abilene. It was some years ago, but the Senator from Idaho [Mr. Brady] will realize the terrible desolation that the failure of that bank caused the city of Abilene, Dickinson County, Why, the failure of that bank was a greater calamity than if a fire had swept every business house in the town, because the business houses were insured, but the money which the depositors had intrusted to these people was not insured and they lost it, and it brought a financial depression on that community that lasted for years. That was a national bank which had the confidence of the people of the community until the crash came.

Years went by; more than 20 years passed and another bank failed in the same town. This time it was a State bank that was a member of the Kansas Bank Guaranty Association. failure was caused by the dishonesty of a cashier who had been falsifying his books to cover up his peculations. When he realized that the discovery of his dishonesty was at hand he looted the bank and fled to New York to spend his ill-gotten gains.

Within 12 hours a representative of the Kansas bank commissioner's office appeared in Abilene, and within 2 days he had a list of all the depositors in the bank. He issued to them cer-tificates for their deposits, drawing 6 per cent interest, and those certificates sold at par. They were eagerly sought for if anyone wanted to sell them. Those who preferred to keep their certificates for the purpose of obtaining the interest kept them. There was no disturbance. It did not disturb any other bank in the community. It was simply a normal business operation, and not a man lost a cent or went without his money longer than 48 hours.

The bank commissioner took charge of the assets of the bank. He wound it up. It took two years to realize on all of its assets, and in the end he collected all but \$22,000 of the bank's indebtedness. The interest that had run on the certificates amounted to something over \$6,000. At the end the bank commissioner notified all the holders of these certificates to present them, and they were paid from the depositors' guaranty fund. With between 500 and 600 banks in this association, which has been in operation more than four years, this is the only failure.

Ah, Senators, there never has been incorporated into the laws of any State a wiser, a more humane, or a more desirable piece of legislation than the guaranty law in the statutes of the State

of Kansas.

Suppose this printer boy to whom I have referred had had his deposits in the First National Bank of Topeka insured; how much better would he have felt toward the Government that stood sponsor for this national bank if the same provisions had been incorporated into the national laws that are incorporated in the laws of our State?

I wish the Senators who propose to speak against this provision in the bill, instead of declaiming against the men who are unfit to enter the banking business and saying that they may do so and therefore this may shield fraud, would set their minds to work for plans for developing a system that will exclude the fraud and retain the good.

Mr. SUTHERLAND. Mr. President, I did not hear the terms of the Kansas law either read or stated by the Senator. should like to ask him whether or not the law is compulsory in

Mr. BRISTOW. It is not.

Mr. SUTHERLAND. Or whether it provides for a voluntary

Mr. BRISTOW. A voluntary association.

Mr. SUTHERLAND. And means are provided under the law by which the standing and responsibility of the members of the association may be investigated?

Mr. BRISTOW. A very critical examination is provided and

very strict requirements are made.

Again, a national bank failed last week at Yates Center, Kans. It is the only national bank in the town. There are three other banks there, State banks, and they are all members of the Depositors' Guarantee Association. It was the national bank that failed, not one of the State banks. If there were reckless banking as a result of this guaranty law, you would have expected the State banks to fail, not the national bank. The failure of that bank did not disturb the depositors of the other banks in the community. They know they will get their money without any trouble if their banks should fail.

Now, let me say something as to the matter of encouraging reckless banking. That is the only argument that ever has

been made against bank depositors' insurance. In the State of Kansas there is this association of between five and six hundred State banks. They do not want this fund depleted, because if it should be depleted too rapidly their assessments would be increased. It is their duty as members of the association, if they discover any improper banking practices by any member of the association, to notify the State bank commissioner. result has been, instead of reckless banking, a toning up of the banking business in the State of Kansas.

Mr. TOWNSEND. Mr. President, do the banks which are members of this association have any method or practice of

examining the other banks?

Mr. BRISTOW. No; simply their observation. My experience has been that as a rule, unless there is some dishonesty inside a bank, such as stealing or falsification of books, which is likely to occur anywhere under any method of regulation, knowledge as to unwise, unprofessional, or unsafe banking practices on the part of a bank in dealing with the general public will be obtained by the other banks quicker than anybody else, for they have the opportunity of seeing just what it is

It is true that in the banking business there is fierce competition. I think that is true generally. I know it is true throughout our part of the country. A membership in the association of the State banks of Kansas for the insurance of depositors is a certificate that the bank obtaining the membership is a good bank and is doing a legitimate and honest banking busines

Of course mistakes will be made occasionally. Men will fail and banks sometimes fail without fault of their own, because any man is likely to be misled at times in regard to the financial

responsibility of his associates.

I have spent some time in presenting this matter, and I have done it in a plain and simple way. It is one of the things that are coming. There is not any legitimate business on earth that is more creditable than insurance. The arguments that are made against taxing one bank in order to pay the losses of

another can be made against any kind of insurance. We keep up here in this city a fire department at great public expense. The real estate that does not have a house on it is taxed to maintain the fire department for the public advantage. Take the Southern Office Building, a magnificent fire-proof structure. In the same block are several shacks. The Southern Building is taxed probably 50 times as much as these shacks are to maintain the fire department of the city of Washington. The shacks are a hundred times more likely to burn than the Southern Building.

Mr. WEEKS rose.

Mr. BRISTOW. I yield to the Senator from Massachusetts. Mr. WEEKS. I do not intend to interrupt the Senator, but I am led to inquire at this point if he does not recognize the fact that the rate charged per thousand for the insurance on the Southern Building is probably one-fifth what it is on the adjoining shack?

Mr. BRISTOW. That depends upon what kind of insurance the Senator refers to. If it is the insurance provided by the fire department, the rate is no different; it is the same. If it is the insurance that is provided by the insurance companies, the rate is different. I was referring to the insurance which the

public provides by maintaining a fire department.

In my own city there is, for a town of that size, a magnificent wholesale establishment, selling groceries, hardware, and so forth. It does a very large business for the western country in a city of that size. It has a very fine building that is fireproof. Probably there is not a building in the State of New York that is constructed with any more provisions than this for safety against fire. Within the same block are cheap frame buildings that have been there for some years. Those buildings, of course, are a menace to the town. We keep a fire depart-We have an automobile fire apparatus there. think they have attained that perfection yet in Washington. We have good fire protection. This mercantile company pays one hundred times the tax that the wooden buildings pay to maintain the fire department, though it would be almost impossible to burn its establishment. Why? Because it is in the interest of the general community. If a conflagration gets started, it is likely to burn up a large section of the town.

The conflagration which comes from the burning of a block is mighty little different from the conflagration that comes from a scare in regard to the safety of the money of the community in the banks. We all saw the run down here on the United States Trust Co. Why did a lot of other bankers put up their money to secure this valuable property and turn it over to a competitor? Did they want to help that competitor? Did they want to give him a valuable piece of property to go out and use in competition with them? No. It would have been to their personal interest to have had that institution closed up. because it would have made more business for them. They were afraid the conflagration might spread, however; they were afraid their depositors might get uneasy, and in that state of alarm, to protect themselves, they submitted to requirements which otherwise they would have spurned.

Senators, there never has been incorporated into the laws of the United States a provision that is more just, more desirable, or sounder than a provision for the guaranteeing or insurance of the depositors in the member banks or in the national banks

of the United States.

Mr. BURTON. Mr. President, I should like to ask one ques-Possibly the Senator from Kansas has treated the mattor while I was not here. What is the relation of the Bankers' Deposit Guarantee Insurance Co. to this system? It is a private incorporated company, is it?

Mr. BRISTOW. The Senator means in Kansas? Mr. BURTON. Yes.

Mr. BRISTOW. It is a separate corporation that was organized by the national banks. The national banks are the stockholders. They manage it, and they insure the State banks if they want to be insured, the same as any insurance company would insure any kind of property.

Mr. BURTON. Is it a corporation? Mr. BRISTOW. It is a corporation. Mr. BURTON. Of large resources?

Mr. BRISTOW. It is a mutual corporation, which embraces only the banks in the State of Kansas. It does not go outside of the State. I have put its charter in the RECORD and made it public document. It is a creditable institution, and it is run the same as an insurance company would be run under private

Mr. BURTON. That is, State or National banks may, for a compensation, obtain from this company the promise of indem-

nity against loss?

Mr. BRISTOW. Yes.

Mr. BURTON. The national banks are not under the State

Mr. BRISTOW. The Comptroller of the Currency, I think through prejudice, and without warrant, ruled that they could not spend any of their funds in purchasing this security for

Mr. BURTON. The national banks have been excluded from becoming members of or subscribing and paying compensation to this bankers' insurance fund established under State law?

Mr. BRISTOW. Yes; then they organized one of their own, and the comptroller permitted them to do that. That is the sort of thing the layman can not understand. They can organize a private corporation, and then a national bank can pay a premium for insurance from this private corporation; but the comptroller would not permit them to pay a premium for insurance from the State association that was under the supervision of the State bank commissioner. I think—I am simply giving you my opinion—that it was prejudice in the comptroller's mind against insurance of bank deposits that led him to make what think was an unwarranted decision.

Mr. BURTON. Is the company of which the national banks

are members a mutual company?

Mr. BRISTOW. A mutual company; yes.
Mr. BURTON. What share of the national banks belong to it?
Mr. BRISTOW. I think most of them are in it. There are 340 banks that participate in this private insurance company, and that is more banks than we have national banks in Kansas. A good many State banks have joined it where they were banks in which officers of the national banks were interested.

Mr. BURTON. From the very language of the provision the State banks would rely on this statutory provision in the State and enter that system?

Mr. BRISTOW. Yes. Mr. BURTON. While the national banks would be members of this guaranty association?

Yes. Mr. BRISTOW.

Mr. SUTHERLAND. Mr. President-

Mr. BURTON. Excuse me just a moment. I have one question further: Is there any special system for the examination of these national banks for membership in this association?

Mr. BRISTOW. Yes; the by-laws of this corporation make certain requirements of membership. They investigate it and then the board of directors vote them in or vote them out.

Mr. BURTON. The board of directors are mostly officers of

the national-bank association?

Mr. BRISTOW. I think they are all. Mr. BURTON. And they exercise a wide discretion in accepting or rejecting members?

Mr. BRISTOW. Yes.

Mr. BURTON. Do they have any staff of officers engaged in the business of examination, like a clearing-house association?

Mr. BRISTOW. I think not. I am not clear as to that. have not examined as to private corporations as carefully as I have the State associations, because I was not so much inter-Now I yield to the Senator from Utah.

Mr. SUTHERLAND. The question which the Senator from Ohio asked was one I had in mind to ask, but I want to ask another question of the Senator. Do I understand that the rate paid by these banks for insurance is uniform?

Mr. BRISTOW. Yes; it is in the State association.

Mr. SUTHERLAND. The Senator from Kansas, I think, will recognize that banks, like all other business institutions and like all individuals, differ in their financial strength and responsibility. One bank in a city will be a very old, established institution with immense resources, that everybody regards as perfectly sound and safe, and another will be a new institution, untried, with resources comparatively small as compared with the bank I first spoke of.

The Senator spoke about fire insurance—that is, the sort of fire insurance that is involved in the keeping up of a fire department. That, however, is not an insurance against loss. It is simply precautionary insurance, like keeping up a police depart-When a man takes out insurance against loss on a building, the character of the building, the surroundings, and everything of that sort are carefully investigated, and the insurance rate is based upon the character of the individual risk. The same is true of life insurance. One man can obtain a life insurance policy at a much less rate than another. It all depends upon the character of the individual risk.

Now, does the Senator think that it is a good system and a fair system to permit three or four hundred banks of varying degrees of responsibility to insure at exactly the same rate?

Mr. BRISTOW. We do not do that. They have got to be

first class or they can not get in.

Mr. SUTHERLAND. They could be called first class and yet not all be so. There is a difference, because the Senator has already shown that one of them failed, which indicates that it was not substantial.

Mr. BRISTOW. Yes; and that was one of the oldest banks in the community. No bank in the State of Kansas ever stood

any higher, and yet it failed.

Mr. SUTHERLAND. Still it was not a stable institution, for it failed.

Mr. BRISTOW. The investments of some of its borrowers happened to be bad and it went down. I say you can fix certain standards, but you can not tell with any degree of certainty whether a bank will last for 10 years, 20 years, or 50 years any more than you can tell whether a man will live 10 years or 20 years or 50 years. Insurance companies will accept the risk, provided the man passes the examination, and they fix the rate according to his age, not according to his complexion, color, or anything like that. If all men 35 years old pass the same examination so that they can be admitted, they have the same rate.

Mr. SUTHERLAND. Still-

Mr. BRISTOW. Now, if the bank measures up to the requirement of the Kansas law, it can get in and it pays the same rate. It is exactly in harmony with life insurance. That bank may fall, just as a man may be in the best of health to-day and he may be dead within a year. A man may narrowly get He may not be a robust man, and he may live much longer, as the Senator knows, than a man in robust health.

Mr. SUTHERLAND. Those are exceptional cases. Mr. BRISTOW. No; they are not exceptional. Mr. SUTHERLAND. Oh, yes.

Mr. BRISTOW. Of course, it is not the rule, because there is

a certain degree of expectancy.

Mr. SUTHERLAND. All insurance is based on the law of averages and not upon exceptions. The Senator knows that it is possible to insure a deposit, even under existing conditions. Lloyds will issue a policy. If a man went to an insurance association of that kind to insure, the amount which would be charged to him as a premium would depend, would it not, on the character of the bank?

Mr. BRISTOW. On the character of the risk. I suppose

they would insure anybody.

Mr. SUTHERLAND. And the rate would vary?

Mr. BRISTOW. Yes. Mr. SUTHERLAND. The Senator's proposition is to have all banks pass the same examination? Mr. BRISTOW. Yes.

Mr. SUTHERIAND. And the same rate?
Mr. BRISTOW. Who will comply with certain requirements of law, and it can not be done in any other way. You can not determine the exact difference between a risk in this bank

and that bank. It is not a practical proposition.

Then, it is said to me that Lloyds will insure the deposits and you can get bank insurance. I am not trying to take care of the large amounts of money that are deposited by the rich in these banks. Deposits such as those of the printer's boy that I referred to are what I am interested in. I want him to feel that when he puts his money into a national bank that belongs to this regional bank association which we are now creating that that money is safe, and it certainly ought to be as safe in a national bank as it is in one of the State banks of my own State.

The objection I have to the provision which is incorporated in this bill by the Senator from Oklahoma is that I think so far as insurance is concerned in half or more of the regional banks in the United States it is a delusion and a snare. There never will be a dollar to insure the deposits in these small regional banks Some of us have struggled here to try and get this proviso in shape, so that it could merit our support, so that it could appeal to the honest judgment of the American people, and we have failed so far. I suppose we will fail now, although I am not through offering amendments to this provision. If this is defeated, there will be other amendments offered. I propose if there is any way that I can do it to force into the bill a measure that will be of some benefit in insuring the deposits of people of the United States in banks who intrust their funds to

Mr. BURTON. Mr. President, there is a still further question, if the Senator from Kansas will yield. Yesterday I asked the Senator from Oklahoma whether this provision for the guaranty of deposits contemplated a general fund in which the share of surplus earnings from all the regional banks would be deposited or whether it would constitute a separate guaranty for each region. I should like to ask the Senator from Kansas if there is any difference between the two bills in that regard; and, if so, which system he regards as the better one, the pro-

posed guaranty by regions or a universal guaranty?

Mr. BRISTOW. Of course that involves the fundamental questions we have been differing on here from the beginning. I believe we should have but one reserve bank, and that the profits of the one bank should guarantee the deposits in every bank in the United States that is a member of this one reserve association. But since Congress has seen fit to provide for a number of reserve banks, I think every reserve bank ought to stand on its own foundation so far as its profits are concerned. I do not believe that it would be fair to take the money earned by a bank in New York to insure the depositors in the banks in by a bank in New York to insure the depositors in the banks in New York and use it to insure the depositors in banks in the far West, in another region, where the banks are managed under other management. I do not believe that would be right.

Mr. NELSON. Will the Senator yield to me?

Mr. BRISTOW. I will be glad to yield to the Senator.

Mr. NELSON. I think the phraseology of both bills in this secret backs where the the the research where shall be a son.

respect contemplates that these reserve banks shall be a separate institution; that is, that the net earnings of all the reserve banks are not placed for this purpose into one common fund, but it is a fund belonging to each reserve bank of the member banks in the district.

Mr. SUTHERLAND. Mr. President, I have the highest possible respect for the opinion of the Senator from Kansas upon this banking question. I know what thorough investigation and conscientious attention he has given to the subject. pared to follow him in almost any suggestion which he has thus far made, but I want to ask the Senator this question. know he has given the matter much thought, and I have not.

What difference in principle is there between guaranteeing the repayment of a deposit in a bank to a depositor and guaranteeing, for example, that a man who works for another shall be paid his wages? There are men working for all sorts of companies and all sorts of individuals engaged in all sorts of enterprises. Very often an institution fails and the workingmen are unable to get their wages. What difference in principle is there between those two cases? If we guarantee bank deposits, why not guarantee the payment of wages to workingmen?

Mr. BRISTOW. I think the difference in principle may not be so great, but there is a difference in practice. It would not be a practical thing to do. Then, the employees of a concern in most of the States—at least in our State—have a lien on about everything in sight. If the contractor fails, they have a lien, and they have not only a claim against him but also on the house they have built.

Mr. NELSON. Will the Senator from Kansas yield to me? Mr. BRISTOW. Certainly. Mr. NELSON. We protect the bill holders. The bills that are issued by these banks are protected. I go to a reserve In the city of Washington there are 30 or 40 banks, more or less,

bank and apply for credit. I want to secure \$10,000. I get \$5,000 in bills and the rest is credited to me on the books of the bank, against which I can draw my check. In the one case, as a bill holder, I am amply protected. In the other case there is no protection. Why should there be a distinction between the two classes of creditors?

Mr. SUTHERLAND. I understand the depositor has protection to the extent of the resources of the bank, just as the

workingman has protection to the extent of the resources of his

employer

Mr. NELSON. It is not such protection as the bill holder has. Mr. SUTHERLAND. No; and it is not such protection as a man who has a mortgage upon the institution would have, but after all the depositor is preferred in a variety of ways. In the first place, all the resources must be first of all devoted to paying his deposits. In addition to that the stockholder must contribute. Each individual stockholder of a banking concern, unlike the liabilities in ordinary corporations, must contribute an amount equal to the amount of his original subscription.

Mr. NORRIS. Will the Senator from Kansas yield to me? Mr. BRISTOW. Certainly.

Mr. NORRIS. I should like to suggest to the Senator from Kansas one difference, it seems to me, between the case put by the Senator from Utah and the man who was working for somebody else and wants his wages and the guarantee of a deposit in a bank. In the case of a bank it is a semipublic institution, and the entire community is interested in it. The idea is not only to get the payment of money in time, but to fix it so that he will be able to get it immediately. It is in order not to block the business of innocent people and business men and other bankers in case of a run on a bank. It seems to me that one of the great reasons for the security of deposits is to prevent a run on a bank when the bank is even perfectly solvent, and when if the bank were closed every depositor would get his money in full, but it would take perhaps two years before they could realize on it, as in the case of the illustration the Senator gave. It is the public—the community generally—that is interested, that money deposited can be used for an immediate purpose instead of having it tied up. It is not only the safety of the deposits that is involved, but the right to use them and to use them at once.

Mr. BRISTOW. I think—
Mr. NELSON. Mr. President, the Senator from Kansas furnished a moment ago the best illustration for the necessity of this kind of a protection to the depositors. A few days ago there was a run down on the street here upon one of these trust companies. I walked down Pennsylvania Avenue when there was a string of people with policemen on both sides to keep a space on the sidewalk open. The people were in a constant stream for a block running up to the doors of the bank. Two or three days before that run I had information through a banker that that institution was in a precarious condition. depositors got hold of it and turned out and commenced the run.

Now, how did the other banks intervene? They secured a million dollars of cash from the Treasury of the United States and used that money to stop a run on this institution, in which they had no pecuniary interest as stockholders or depositors. Why did they do it? They did it because they felt that if the run was not stopped on that institution, like a fire, it might spread to the other moneyed institutions of this country, and bring on a

That is a stronger illustration, it seems to me, than a petty comparison with the wages of a laborer. A laborer hires out for a given time, and if he fails to receive his wages, it does not create a general panic; people do not have to intervene.

Suppose the depositors in New York in 1907 had been assured that their deposits were perfectly safe, there would have been no run, no financial panic. It is to stop such things as they were stopped here in this city that we want this protection. They are not to be put on such little theories as the example the Senator gave in respect to life insurance or fire insurance. Why do we have fire protection in addition to fire insurance? It is for the protection of the public at large.

The public at large is as much interested in stopping fire in a miserable shack that is not worth anything as in a brick building, because the fire may spread and burn other property.

Mr. WEEKS. Mr. President—
The VICE PRESIDENT. Does the Senator from Kansas

yield to the Senator from Massachusetts?
Mr. BRISTOW. I yield.
Mr. WEEKS. The Senator from Minnesota a few moments ago raised the question about protecting the note holders and I think there is a vast difference between the two. depositors. The depositing of money in a bank is a voluntary operation. A portra spetime

where any depositor may leave his notes or his credits, and he has his choice of the location where he will leave them. But taking a note is an involuntary operation. A note must go where the makers of the note, if it is a bank note, are not and can not be known. Therefore it is essential that the notes shall pass current everywhere without any question. reason why we have Government supervision of the issuing of notes and, as far as possible, the Government guaranty in all note issues that the note is not a counterfeit and that it is issued in accordance with Government regulations.

But in the instance of the run on the United States Trust Co., in Washington, it seems to me it is not altogether a happy illustration of what the Senator has so well tried to demonstrate. Here are a large number of banks. A great many people deposited their money in the United States Trust Co. and yet it was common report, and anybody could have discovered if he had cared to have inquired, that the managing operator of the United States Trust Co. was what is known in modern times as a Napoleon of finance; that the United States Trust Co. was spreading out all over this city, erecting buildings and opening branches in places where the best business judgment would seem to indicate that there was not any possibility of getting an immediate return on the investment.

I should have supposed, without giving it any investigation, that the ordinary depositor in a bank would have gone elsewhere, even if he had gone down on the street and made an Yet von inquiry during the last year or two or three years. are going to protect people, if you protect their deposits in such a bank, against their own folly and their own negligence and prevent the necessity of their using ordinary business sagacity

Mr. BRISTOW. I know the Senator's views well, and he gives great weight to that; but there are Members of this body who have deposited money in the United States Trust Co. within the last year and up to within a month of the time when it practically failed. Now, if United States Senators and Members of Congress—there were a number of Representa-

Mr. WEEKS. It is a reflection on their business prudence.
Mr. BRISTOW. I do not think so.
Mr. KENYON. Probably they did not deposit very much.
Mr. BRISTOW. I do not know how much, but more than

I have; some of them did, I know.

I saw that line; I saw the poor old negro washerwoman standing there waiting to get the little savings she had deposited. I saw the look of anxiety and care on the face of those people. When you expect them to determine the reliability of a banking institution you are expecting an impossi-bility, when the best business men in the community lose in the same way.

Now, I will refer to the question of the Senator from Utah [Mr. Sutherland], which has been almost forgotten in the interrogatories. He spoke of the insurance of the wages of workingmen. If the failure of concerns even of a semipublic nature or of a public nature to pay workingmen caused such widespread disaster as a bank failure does, then I would be trying to find some means of insuring the wages of the laboring but that does not happen, because the States have provided means by which no universal disaster comes on account of the failure of a company to pay its laborers.

Now, disaster comes when the company has failed and can not employ the labor, but I do not know of a concern failing owing any large number of laboring men any large amount of

money.

Mr. McLEAN. They are paid every week. Mr. BRISTOW. They are paid, as the Senator from Connecticut says, every week. So these misfortunes so widespread and universal never come over a community from the failure

of a company to pay its day laborers.

Mr. GALLINGER, Their wages are preferred, are they not?

Mr. BRISTOW. Oh, yes. Of course we have the strictest law in our State in regard to the payment of the wages of the laborers. Indeed, if you are engaged in any kind of business that is the one thing you have got to know about, whether the laborer has been paid for what you buy or what you sell. If you do not, you have got to pay it.

Mr. CRAWFORD. Mr. President, will the Senator permit me to make an observation right here?

Mr. BRISTOW. Certainly.
Mr. CRAWFORD. It is with reference to what is claimed to be a difference between these notes and the rights of depositors. These notes we all recognize are not money. They are promises to pay. They perform the same function that the depositor's check performs. Their status is the same as that of a deposi-

arrangement for them is so adjusted that it is expected that they will answer the purpose of currency and exchange in a larger field. But confidence is just as necessary to a successful use of checks and book credits as confidence is necessary in floating the currency mechanism that we call notes. It is absolutely the same in principle. The public interest, the demand of business and public policy, confidence in the instrumentality is of the same character and just as necessary in the one case as in the other.

There is an injustice, then, in undertaking to discriminate in the law in favor of the holder of the note or in the backing of the note with a guaranty and withholding it in the case of a depositor. It is in the interest of the public welfare, as has been mentioned here, to prevent runs, to sustain the confidence of the public in the bank, and to protect on grounds of public policy the depositor, and that is of exactly the same quality as that which prompts the security of the holder of these forms of currency, which are not money but mere promises to pay, after all

Mr. BRISTOW. I feel the same as the Senator from South Dakota about that.

Then there is another feature about this which we ought not to lose sight of, and that is that you impress the community with confidence in the bank There are thousands and thousands of foreigners who will not deposit in banks. established the postal savings system in order to inspire confidence in the minds of a large number of the laboring people of our country who are afraid of banks. If we can establish a system which guarantees that no man who puts his money in a bank will ever lose it if the bank fails, we will bring dollars out of the dark corners of thousands of homes and put them at work in the business activities of the country.

There is another matter that I will refer to before I close, and that is that both bills have such a provision. The Hitchcock amendment is a much more effective one. It is a more desirable one; it is a safer one; it has something to it, while, in my judgment, the other, so far as the small regional bank is concerned, is a delusion and a snare. In this amendment I hope that those who are opposed to the bank guaranty will at least, as choosing between the two, select one that has got something to it instead of the one that has not.

Mr. GALLINGER. I will ask the Senator if he will read into

the RECORD now the provision of the Hitchcock bill.

Mr. BRISTOW. I will be very glad to do so. Mr. BURTON. Mr. President, if the Senator from Kansas will excuse me, I ask the attention of Senators while this provision is being read. The question whether this proposed guaranty applies to the whole system and contemplates one fund or contemplates a separate fund for each district or region was discussed yesterday. I really can not agree with the Senator from Minnesota [Mr. Nelson] that it provides for a separate fund. In any event, the language is very ambiguous.

The section provides that a fund-

shall be paid to the United States, as a trustee for the benefit of de-positors in failed national banks, the money to be kept in and losses from failures to be paid from it as a depositors' insurance fund under a division of the Treasury to be constituted and managed under such regulations as may be prescribed by the Secretary of the Treasury.

Then, again, the provision as to the application of a certain amount for the reduction of the public debt, called a franchise

tax, applies to all regional banks.

Mr. NELSON. I ask attention while the language is being read.

Mr. GALLINGER. Will the Senator from Kansas read the provision? I have asked that it be done.

Mr. BURTON. I have asked that Senators give attention to it, as it is being read with a view to determining that point.

Mr. BRISTOW. I will ask the attention of Senators, and, if the Senator from Minnesota will note, I will read first the provision contained in the bill reported by the Senator from Oklahoma [Mr. OWEN].

After all necessary expenses of a Federal reserve bank-

I call the attention of the Senator from Ohio to that language. Everything else is qualified by that phrase "a Federal reserve That means one, not more than one.

SEC. 7. After all necessary expenses of a Federal reserve bank have been pald or provided for, the stockholders shall be entitled to receive an annual dividend of 6 per cent on the paid-in capital stock, which dividend shall be cumulative. One-half of the net earnings, after the aforesaid dividend claims have been fully met, shall be paid into a surplus fund until such fund shall amount to 40 per cent of the paid-in capital stock of such bank—

Mr. NELSON. Mr. President, I call attention to the words such bank" there in connection with the other statement.

Mr. BRISTOW. Yes-

check performs. Their status is the same as that of a deposition of the remaining one-half 50 per cent shall be paid to the tor's check, except that the machinery back of them and the United States as a franchise tax, and 50 per cent shall be paid to the

United States, as a trustee for the benefit of depositors in failed national banks, the money to be kept in and losses from failures to be paid from it as a depositors' insurance fund under a division of the Treasury to be constituted and managed under such regulations as may be prescribed by the Secretary of the Treasury.

That is the provision of the Owen bill. Now I will read the provision of the Hitchcock bill, and invite the attention of Sen-

ators to the same phraseology respecting the matter.

Mr. SUTHERLAND. What the Senator is now going to read is proposed to be offered as a substitute for the Owen bill.

Mr. BRISTOW. This is to be offered as a substitute for the Owen bill. You will note that the Owen bill requires a dividend of 6 per cent to be paid to the stockholders of the bank, the member banks themselves, while under our provisions the stockholders would receive but 5 per cent. Then they provide that half of the net earnings shall go to that surplus until it amounts to 40 per cent. That surplus goes to the banks. amounts to 40 per cent. That surplus goes to the banks.

Mr. CRAWFORD. The Senator is now speaking of the

Owen bill?

Mr. BRISTOW. I am speaking now of the Owen bill. After surplus of 40 per cent has been accumulated, 50 per cent of that is divided between a franchise tax and a guaranty insurance fund.

Section 7 of the Hitchcock biil-and I ask Senators to note the difference-reads:

SEC 7. That after the payment of all necessary expenses and taxes, including its share of the expenses of the Federal reserve board, the stockholders of each Federal reserve bank shall be entitled to receive an annual dividend of 5 per cent on the paid-in capital stock, which dividend shall be cumulative.

The difference is that it is 6 per cent in the one case and 5 per cent in the other.

Net earnings over and above expenses and the aforesaid dividend shall be applied as follows: Twenty-five per cent of such net earnings—

The other bill requires 50 per cent, you will rememberto be carried to a surplus fund until such fund shall amount to 20 per cent.

The other bill requires 40 per cent-

of the paid-in capital stock of such reserve bank, and 37½ per cent of said net earnings shall be set aside in a trust fund to be known as the depositors' insurance fund and shall be used for the payment of the depositors of insolvent member banks under rules and regulations made

I do not see why the Treasury should have anything to do with this. This is banking business, and the Federal reserve board has the supervision of it under our bill.

board has the supervision of it under our bill.

When, in the judgment of the board, there has been accumulated in such depositors insurance fund a sufficient sum fully to insure the payment of the depositors of insolvent member banks, the board shall have power to suspend the setting aside and accumulation of the said 37½ per cent of such earnings, and thereafter such 37½ per cent of such earnings shall be paid to the United States, except that in the event the depositors' insurance fund is depleted by the payment of depositors of insolvent member banks such fund shall be replenished by again setting aside such 37½ per cent of the earnings or so much thereof as, in the judgment of the board, may be necessary. The remaining net earnings shall be paid to the United States: Provided, That the amount so paid shall be applied to the purchase, at par, with accrued interest, of the 2 per cent bonds of the United States, said bonds then to be retired; or if such bonds can not be so purchased said amount shall be applied to the purchase, of other interest-bearing obligations of the United States, which obligations shall thereupon be retired.

It is better in every respect. In the first place, we pay the 2

It is better in every respect. In the first place, we pay the 2 per cent bonds which this legislation has injured as to their value and caused the purchasers of these bonds, these obligations of the United States, to lose large amounts of money which I think is one of the outrageous things that have attended this attempted legislation. We undertake to provide for those bonds, which the United States Government ought to do if it proposes to be honest with the men who buy its obligations. Then we propose that, instead of 25 per cent, as provided in this bill, 371 per cent of the earnings shall go to pay the bonds; that 371 per cent shall go into this fund; that instead of leaving the banks to have 6 per cent interest on their stock we make it 5 per cent; and instead of permitting the banks to accumulate 40 per cent of a surplus for their benefit, we fix it at 20 per cent for their benefit, and the remainder goes to liquidate our bonded indebtedness and to insure the depositors who entrust their

The PRESIDING OFFICER (Mr. Bryan in the chair).

Does the Senator from Kansas yield to the Senator from Utah?

Mr. SUTHERLAND. I have not any doubt in my mind that the provision last read by the Senator from Kansas is far preferable to that reported from the other branch of the committee, but do I understand the Senator from Kansas is far preferable to that reported from the other branch of the committee, but do I understand the Senator from Kansas is far mittee; but do I understand the Senator from Kansas to say that there is a difference between the two in this respect: That under the Owen proposition there will be separate guaranty funds for each of the regional banks, while under the Hitchcock proposition it will be a single fund?

Mr. BRISTOW. No; I think it is a separate fund under each proposition.

Mr. SUTHERLAND. I thought so, too, from the reading, and I wondered whether I had misunderstood the Senator.
Mr. BRISTOW. I think it is a separate fund. The lan-

Sec. 7. That after the payment of all necessary expenses and taxes, including its share of the expenses of the Federal reserve board, the stockholders of each Federal reserve bank—

That is the Hitchcock provision-

shall be entitled to receive an annual dividend of 5 per cent on the paid-in capital stock, which dividend shall be cumulative.

Then we go on to deal with the Federal reserve board as an individual institution.

Mr. SUTHERLAND. Each region will take care of itself in that respect?

Mr. BRISTOW. Each region will take care of itself.
Mr. BURTON. Mr. President, if the Senator from Kansas
will yield, I desire to say that it is true you deal with each region until you come to a certain provision that there shall be a franchise tax paid to the United States

Mr. NELSON. That is not in the Hitchcock bill. Mr. BURTON. It is in the Owen bill—that it shall be put into a certain fund and be under a certain control. to me clearly when you reach that point you depart from the regional idea to a provision which is general in its application, and refers to but one fund. Anyway it is ambiguous.

I shall perhaps have something to say on this general plan of the guaranty of deposits. If you have any plan, the smaller the areas included in the associations the better it will be, so that they can exercise care and scrutiny over each other.

A broad general plan that every bank in the United States must come into the system and that every bank must join has in it certain elements of danger of loss by the failure of a bank thousands of miles remote is one thing, and a plan such as exists in Kansas, where each knows something of the business of every other, is a very different thing.

Mr. BRISTOW. I wish to say as to my friend from Massa-

chusetts [Mr. Weeks] that I believe this is the only provision in the Hitchcock bill upon which he and I have had any very serious differences of opinion. I want to say that for a conservative New England statesman and a Boston banker I have found him very progressive along every line until we came to this very vital matter.

Mr. SUTHERLAND. It may be that the Senator thinks that

that is not progressive.

Mr. BRISTOW. I think I should like to say that in my association with the conservative members on the Republican side of the Committee on Banking and Currency, they, though conserva-tive and commonly called "standpatters," have been far more progressive in the kind of legislation they have supported than the so-called progressive Democrats, who have with such vehemence been proclaiming themselves as progressives for many years. I was exceedingly gratified last night when the roll call showed that the old conservatives from New England stood here and voted for a banking system owned by the people of the United States, one that should be controlled by the Federal Government, while Democratic statesmen, who have been proclaiming from one end of this land to the other their virtues as champions of popular government and progressive legislation, voted, with two exceptions, against such a salutary provision. I want to say that I was very greatly delighted with the progress that has been made by my friends from New England, and gravely disappointed at the attitude of so many of my Democratic friends.

Mr. WEEKS. Mr. President, I should like the attention of the Senator from Nebraska [Mr. HITCHCOCK] and the attention of the Senator from Oklahoma [Mr. Owen]. I do not know whether there are other Senators who propose at this time to discuss this provision. I had announced that I would speak this evening in opposition to the guaranty of bank deposits, and I am having some figures prepared, which are not yet ready, so that I should like to keep the announcement I have made rather than to continue the discussion now. Therefore, if the Senators have no objection and there is no other discussion on this amendment, I should like to ask that it be passed over until this evening and that some other amendment may be taken up for the rest of the afternoon.

Mr. HITCHCOCK. Mr. President, so far as I am concerned, I see no objection to that program. I am ready to offer another amendment and proceed to a vote upon it as soon as possible, if

that is agreeable to the Senator from Oklahoma.

Mr. OWEN. Mr. President, it is quite agreeable to me to pass this amendment over, and, if there be no objection, I ask that that may be done.

Mr. BURTON. Mr. President—
The PRESIDING OFFICER. The amendment to section 7, in the absence of objection, will be passed over. The Senator from Ohio is recognized.

Mr. BURTON. Mr. President, I should like to be heard briefly on an amendment which I offered yesterday and which I trust will be accepted by the chairman of the committee. I ask to have it read at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The Secretary. On page 67——
Mr. WEEKS. Mr. President, I did not understand the Chair to announce that the amendment which we have been discussing

would go over by unanimous consent.

The PRESIDING OFFICER. The Chair has announced that the amendment to section 7 has been passed over. ment referred to by the Senator from Ohio [Mr. Burton] will be stated.

The Secretary. On page 67, lines 21 to 24, it is proposed to strike out the following words

The PRESIDING OFFICER. Will the Senator from Ohio

indicate to what print the amendment refers?

Mr. BURTON. It is the print of December 1, 1913, "showing changes proposed by the modified amendment of Senator Owen. It is the print which includes the original Glass bill, as well as the amendments proposed by the six members of the Currency Committee headed by its chairman.

Mr. OWEN. Mr. President, I should like to suggest to the Senator from Ohio that, under the orderly parliamentary procedure, the perfecting of the House bill by amendment is first in order under the rules; and if the Senator would defer his

amendment, I believe it would be better.

I think there is a good deal of force in the suggestion of the Senator from Ohio, and I had expected that in conference, at least, this matter would be subject to microscopic revision. Its purpose, of course, is obvious. It is to protect those nonmember banks who do not contribute from being the beneficiaries of a system supported by others; yet that might easily go too far, and especially in the case of small banks which can not under the terms of the bill come into the system. We leave it with the Federal reserve board to make the rules, in order to let them draw the line of distinction where it might seem to be wise and expedient after they have the facts before them. I believe they could exercise that power in any contingency, even without this provision; but I have had no opportunity really for a consultation with regard to it. I think that it would be better, under the parliamentary procedure, if the Senator would defer offering his amendment until the House bill, with the proposed amendments to it, has been disposed of.

Mr. BURTON. Mr. President, I prefer very briefly-it will not take me more than 5 or 10 minutes-to state the argument, so that even if we do not vote on the amendment now, it can be

The PRESIDING OFFICER. The Secretary has not read the amendment. The amendment will now be stated.

The Secretary. It is proposed in the proposed amendment of Mr. Owen, in section 19, on page 67, beginning in line 21, to strike out the following words:

No member bank shall extend directly or indirectly the benefits of this system to a nonmember bank, except upon written permission of the Federal reserve board, under penalty of suspension.

Mr. BURTON. Mr. President, under this provision as it now appears in the proposed amendment offered by the members of the committee headed by Senator Owen, the presumption is against the right to deal with a nonmember bank. It would require permission in thousands of cases if the banks inside of the system are to deal with those outside of it. It seems to me this is an exceedingly drastic proposal. What does it mean when it says that no national bank or other bank that enters the system can deal with any bank which is outside except upon the permission—that is, not by general regulation, but upon the written permission—of the Federal reserve board?

What is the aim of this bill? Is it to give stability to commerce? Is it to provide resources for borrowing communities? Or is it to create a banking monopoly? Yet under that provision every bank which stays outside will have the stigma of exclusion placed upon it; and, in addition to that, will be unable to

obtain accommodations.

I want to argue this, first, from the standpoint of the smaller banks. No bank can come into the system unless it has a capital of \$25,000. In a majority of the States of the Union the minimum capital required for a State bank is under \$25,000. In Alabama it is \$15,000; in Florida it is \$15,000; in Colorado, Idaho, and Kansas it is \$10,000; in Louisiana it is \$10,000; in Kentucky it is \$15,000; in Michigan it is \$20,000; in Minnesota, Mississippi, and Missouri it is \$10,000; while I am informed that in the State of Georgia there is also a regulation that a bank having a

paid-in capital of \$15,000 may establish branches with only \$1,000 capital, which serve a very useful purpose. It gives opportunity for the extension of credit to small communities, where otherwise there would be an entire lack of banking facilities. If this amendment should be adopted those banks whose relations are close and intimate with national banks would be entirely shut off from any dealings with them; the ordinary course of business would be seriously interfered with, and no

accommodations on any considerable scale would be possible.

I desire to file, without reading, a list of the States in which banks are authorized to do business with a capital of less than \$25,000. It will be well also to set forth a partial list of the State and private banks and trust companies actually organized and having a paid-up capital under \$25,000. In Alabama there are 91 such banks; in Arizona there are 12; in Arkansas there are 236. Going down the list a little, in Illinois there are 261; in Iowa there are 542; Kansas has 644. Not only would this be a very serious matter as pertains to the smaller banks, but it would interfere with the settled relations already existing as to the larger banks having a capital of \$25,000 or more. The outside banks have relied very largely for rediscount and ac-commodations on the national banks. If this bill passes and goes into effect, not only these national banks but many State banks will enter under the plan in different regions; and if this provision goes in, all outside banks, especially the small ones to which I have referred, which could not come in if they would, would be debarred from any transactions with them except on the written permission of the Federal reserve board. I trust the Senator from Oklahoma may accept this amendment.

I ask that the tables to which I have referred may be printed in the Record in connection with my remarks.

The PRESIDING OFFICER. In the absence of objection, permission is granted.

The tables referred to are as follows:

State banking laws which allow banks to organize with paid-in capital of less than \$25,000.

State.	Minimum capital.	Paid in when busi- ness began.	When re- mainder must be paid.	Branches.
and the preference		Per cent.	The Salata

4 Paid-in capital shall consist of money, deposits, national, State, or municipal onds, bank furniture, bu ilding and the lots on which the building is situated free from incumbrance; public bonds not to constitute more than one-half; building and lots, with furniture and fixtures, more than one-third; nor furniture and fixtures more than one-tenth of such paid-in capital.

Mr. OWEN. Mr. President, I ask that action on the amendment of the Senator from Ohio [Mr. Burron] be deferred at this time until the substitute offered shall come up in regular order, and then we may consider the amendment.

Mr. HITCHCOCK. Mr. President, I offer section 11 as it

appears

Mr. NELSON. Mr. President, before the Senator offers another important amendment to this bill, I think we ought to have a quorum. I see the other side of the Chamber is almost empty, and I suggest the absence of a quorum.

Mr. LEWIS. Mr. President, it will be noted that it is 5 minutes of 1, and Senators are at lunch. The Chamber is almost

empty on both sides.

The PRESIDING OFFICER. The Secretary will call the roll. The Secretary called the roll, and the following Senators an-

swered to their names:

Nelson Newlands Norris Overman Owen Simmons Smith, Ga., Smith, Mich. Smith, S. C. Stephenson Sterling Sutherland Brady Brandegee Gronna Hitchcock Hollis Hughes James Johnson Bristow Bryan Burton Chamberlain Page Kenyon Kern La Follette Lane Penrose Perkins Poindexter Ransdell Chilton Swanson Thompson Tillman Clapp Clarke, Ark. Colt Crawford Dillingham du Pont Fletcher Colt Lea Lewis McCumber Martin, Va. Martine, N. J. Townsend Vardaman Reed Root Shafroth Sheppard Shields Walsh Warren Gallinger Myers Shively Williams

Mr. SHAFROTH. My colleague [Mr. Thomas] is confined to his home to-day on account of a slight illness, and will not be here. He is paired, however, with the Senator from Maine

[Mr. Burleigh]. Mr. SHIVELY. I wish to announce that the senior Senator from Arizona [Mr. SMITH] is unavoidably absent from the Chamber. He is paired with the Senator from New Mexico [Mr. FALL].

Mr. HUGHES. I desire to announce that the Senator from Alabama [Mr. Bankhead] is necessarily absent from the Chamber on public business. He is paired with the junior Senator from West Virginia [Mr. Goff].

The PRESIDING OFFICER. Sixty-four Senators have responded to their names. A quorum of the Senate is present.

Mr. WALSH. Mr. President, I have some observations I wish to make to the Senate, and this may be an appropriate time for me to do so.

The contention has been made, in evident seriousness, on the floor of the Senate, that in some of its fundamentals the bill now being considered, as well as the so-called Owen amendment thereto, is violative of constitutional guaranties. As such a charge, unrefuted or unanswered, is calculated to excite apprehensions concerning the practicability of the plan of banking and currency reform proposed that may prove embarrassing in the effort to launch it, we may well pause to inquire with some degree of care into the argument advanced somewhat belatedly, to discredit the measure before us.

It is quite natural that some degree of unrest, some temerity, more pronounced than ordinarily prevails in banking circles, should attend any effort to inaugurate a safer and more serviceable system of banking. It would be difficult to conceive of a plan reasonably calculated to obviate the defects which experience has exposed in that under which we now operate which would not produce some disturbance and more or less anxiety in those immediately affected.

If we shall succeed in dispelling no other grounds of alarm, the task of allaying such as would otherwise arise from the attack made on the constitutionality of the measure before us may with confidence be undertaken.

It will be sufficient for the present purpose to refer to those provisions of the Owen amendment said to be unsound from the

standpoint of the Constitution. They are as follows:

when a Federal reserve bank shall have been organized, every national banking association within that district shall be required and every eligible bank may be permitted to subscribe to the capital stock thereof in a sum equal to 6 per cent of the paid-up capital stock and surplus of such bank, one-sixth of the subscription to be payable on call of the organization committee or of the Federal reserve board, one-sixth within three months and one-sixth within six months thereafter, and the remainder of the subscription, or any part thereof, shall be subject to call when deemed necessary by the Federal reserve board. \* \* Should any national banking association in the United States or trust company engaged in commercial banking in the District of Columbia now organized fail within one year after the passage of this act to become a member bank under the provisions hereinbefore stated, or fail to comply with any of the provisions of this act applicable thereto, all of the rights, privileges, and franchises of such association granted to it under the national-bank act, or under the provisions of this act, shall, within the discretion of the Federal reserve board, be thereby forfeited.

Reference is made also to the following paragraphs:

Reference is made also to the following paragraphs: The shareholders of every Federal reserve bank shall be held individually responsible, equally and ratably, and not one for another, for

all contracts, debts, and engagements of such bank to the extent of the amount of their subscriptions to such stock, at the par value thereof, in addition to the amount subscribed, whether such subscriptions have been paid up in whole or in part, under the provisions of this act.

Any noncompliance with or violation of this act shall, however, be determined and adjudged by any court of the United States of competent jurisdiction in a suit brought for that purpose in the district or territory in which such bank is located, under direction of the Federal reserve board, by the Comptroller of the Currency in his own name before the association shall be declared dissolved.

It is said that by these provisions the existing national banks are coerced into subscribing for the stock of the Federal reserve banks, that a portion of their property—of their capital—is seized and turned over to another corporation, and that thus they are deprived of property without due process of law con-trary to the guaranty of the fifth amendment to the Constitution. It will be helpful to have the question more accurately stated at the outset. No bank is compelled to subscribe to the stock of the Federal reserve bank; there is no invasion of its funds to provide capital for the reserve bank. It is at liberty to subscribe or not as it sees fit. But if it declines to do so, it ceases at the end of a year after the passage of the act to enjoy the character of a national bank.

Though the provisions to which reference is made are denounced as coercive in character, the option offered by them is not lost sight of, nor is it overlooked that the Congress in devising the system of national banks reserved the right at any time to "amend, alter, or repeal" the act which brought them

into being. (13 U. S. Stat. L., 118.)

The history of this very common provision in modern acts creating or providing for the creation of corporations and of like safeguards in constitutions reserving to the legislatures of the States respectively control over corporations established under their authority is well known. They come into being in order to avoid the consequences which would otherwise result from the decision of the Supreme Court of the United States in the Dartmouth College case, in which it was, in effect, held that every corporate charter is a contract between the sovereignty issuing the same and the corporation which comes into existence by virtue of it, and that a State has no power to aiter, amend, or repeal the law under which a corporation was created, the right to do so not being reserved, because of that provision of the Constitution of the United States which forbids a State from passing any law impairing the obligation of contracts. Though this specific provision is a restraint upon State and not upon national legislation, Congress is, in effect, equally hampered by the fifth amendment referred to. A contract is property, and to impair its obligation is to deprive of his property the person to whom such obligation is due. (4 Ency. Sup. Ct., Dec. 706; 1 Clark & Marshall on Corporations, 282.)

The adjudications in cases involving the impairment of the contracts clause of the Constitution are, accordingly, illuminating, if not entirely controlling, in considering the validity of congressional acts said to offend against the due process clause of the fifth amendment. They have been so numerous and the opinions filed with them so exhaustive as to leave little occasion for argument in most cases. They leave no room for doubt that charters of corporations may be kept within the control of the legislative authority to which they owe their origin by making such subject to repeal or amendment, the reservation finding a place either in the act under which the corporation was authorized or in a general statute or the constitution in force at the

time of its organization.

The extent to which any subsequent amendatory acts may go has been likewise the subject of repeated consideration by the courts. It is obvious that under the guise of amending an act authorizing the organization of corporations, or defining their powers, or regulating the conduct of the business in which they embark, they can not be deprived of property theretofore acquired. That would be confiscation.

Pertinent reference is made in this connection to the authorities which hold that though the rates which railroads and other public-service corporations may charge may be regulated by the State, either directly or through a commission, rates so fixed which are so low that a reasonable return can not be had on the money necessarily invested in the enterprise are confiscatory and invalid. Just where the line is to be drawn and the rule by which to determine whether any particular amendment is void are not here important, as will be shown. The subject will, however, be recurred to later. It is sufficient for the present to note that under the reservation found in the act of 1864, Congress has the power to repeal the national-bank act in toto. Such an act would necessarily terminate the existence and recall all the powers of every bank organized under it. A statute of Massachusetts, by which the charter of a street railroad was repealed and all its franchises transferred to another corporation, was upheld by the Supreme Court of the United States in Greenwood v. Freight Co. (105 U. S., 13). The right to repeal had, of course, been reserved. Introductory to its consideration of the validity of this act the court said:

of the validity of this act the court said:

One obvious effect of the repeal of a statute is that it no longer exists. Its life is at an end. Whatever force the law may give to transactions into which the corporation entered and which were authorized by the charter while in force, it can originate no new transactions dependent on the power conferred by the charter. If the corporation be a bank, with power to lend money and to issue circulating notes, it can make no new loan nor issue any new notes designed to circulate as money. If the essence of the grant of the charter be to operate a railroad, and to use the streets of the city for that purpose, it can no longer so use the streets of the city, and no longer exercise the franchise of running a railroad in the city. In short, whatever power is dependent solely upon the grant of the charter, and which could not be exercised by unincorporated private persons under the general laws of the State, is abrogated by the repeal of the law which granted these special rights.

And then the court distinguishes between the effect of such

And then the court distinguishes between the effect of such an act on what may be spoken of as the franchises of the corporation and personal or other property held by it, adding

Personal and real property acquired by the corporation during its lawful existence, rights of contract, or choses in action so acquired, and which do not in their nature depend upon the general powers conferred by the charter, are not destroyed by such a repeal; and the courts may, if the legislature does not provide some special remedy, enforce such rights by the means within their power. The rights of the shareholders of such a corporation, to their interest in its property, are not annihilated by such a repeal, and there must remain in the courts the power to protect those rights.

It is conceivable that such an act as that thus held valid might, indeed it is altogether likely that it would, have a more or less disastrous effect on the values of some or all of the properties acquired by the corporation during its existence. But the risk of such loss it incurred in organizing under an act which was subject to repeal at any time. That consideration is addressed to the wisdom and justice of the act, not to the power of the legislature to pass it. In that connection the court said:

Whether this action was oppressive or unjust in view of the public good, or whether the legislature was governed by sufficient reason in thus repealing the charter of one company and in chartering another at the same time to perform as part of its functions the duties required of the first is not, as we have seen, a judicial question in this case. It may well be supposed, if answer were required to the complainant's bill, that it was made to appear that the Marginal Co. had shown its incapacity to fulfill the objects for which it was created, and that another corporation, embracing larger area, connecting with more freight depots and wharves and with more capital, could better serve the public in the matter for which both franchies were given.

The following paragraph from the opinion expresses the conclusion at which the court arrived:

It results from this view of the subject that whatever right remained in the Marginal Co. to its rolling stock, its horses, its harness, its stables, the debts due to it, and the funds on hand, if any, it no longer had the right to run its cars through the streets, or any of the streets, of Boston. It no longer had the right to cumber these streets with a railroad track which it could not use, for these belonged by law to no person of right, and were vested in defendants only by virtue of the repealed charter.

There can be no question, accordingly, of the right of Congress to legislate the national banks out of existence. They, or rather their stockholders, respectively, would remain the owners of all the assets theretofore acquired, but the banks would enjoy no longer the character nor would they be entitled to exercise any of the privileges of national banks.

Now, the right remaining in Congress to annul all existing charters by repealing the act which gives them life, it follows as an irresistible conclusion that it may impose any conditions it may see fit on the enjoyment of further life by any of the banks it has brought into being.

From the opinion of the Court of Appeals of the State of New York in Mayor v. Twenty-third Street Railway Co. (113 N. Y., 311-317) the following quotation is made:

Under its reserved power it (the State) can not deprive a corporation of its property or interfere with or annul its contracts with third persons; but it may take away its franchise to be a corporation and may regulate the exercise of its corporate powers. As it has the power utterly to deprive the corporation of its franchise to be a corporation, it may prescribe the conditions and terms upon which it may live and exercise such franchise.

So obvious is this that the celebrated law writer, Seymour D. Thompson, is able to say in his Commentaries on Corporations that the proposition that the life of the corporation may be made to depend upon observance of any conditions the legislative authority may prescribe, is not a disputable one. His language is as follows:

The exercise of the power of amendment under the right reserved either by statute or constitution can not be arbitrary or unlimited. This reserve power must be exercised within the scope of the original charter. Under it the nature and purposes of the corporation can not be changed; they can only be amended. It is conceded that under this reserved power the State may tender what in its opinion is a proper amendment and require its acceptance or compel a cessation of business. (1 Thomp. on Corp., 410.)

As authority for the statement with which the quotation concludes he cites the case of Yeaton v. Bank (21 Gratt., 593), a decision by the Court of Appeals of the State of Virginia. The ing payment in accordance with the strict terms of the contracts

opinion in that case amply justifies the author in the remark to which attention is directed. The following is taken from the language of the court:

In anguage of the court:

Though the legislature may have the reserved power to amend or modify a charter of incorporation, it can no more force the corporation to accept such amendment or modification than it could have forced upon them the acceptance of the original charter without their consent. Under the reservation they can repeal or destroy the charter without any consent on the part of the corporators, but as long as they remain in existence as a corporate body they necessarily have the power to reject an amendment or modification of their charter. The power reserved by the legislature gives the right certainly to repeal or destroy, but so far as the right to modify or alter is concerned it is nothing more than the ordinary case of a stipulation that one of the parties to a contract may vary its terms with the consent of the other contracting party. These principles grow out of the nature of charters or acts of incorporation, which are regarded in the nature of contracts. The amendment or modification must be made by the parties to the contract, the legislature on the one hand and the corporation on the other, the former expressing its intention by means of a legislative act and the latter assenting thereto by a vote of the majority of the stockholders, according to the provisions of its charter, or by other acts showing its acceptance.

The reservation of the right to alter, amend, or repeal the act by which the corporation is created may be prudent and salutary, but it seems to be a necessary implication that if the legislature should undertake to make what in their opinion is a legitimate alteration or amendment, the corporation has the power to reject or accept it, whatever may be the consequences. One consequence undoubtedly is that the corporation can not conduct its operations in defiance of the power that created it, and if it does not accept the modifications or amendment proposed must discontinue its operations as a corporate body.

It will be sufficient to remove from the realm of doubt a proposition which so learned and discriminating an author as Mr. Thompson speaks of as "conceded" to refer to one more adjudication. I select this case from the reports of the Supreme Court of Iowa, among other reasons, because the assault upon the constitutionality of the measure before us, in the particular pointed out, was made in eloquent phrase and with his great power and earnestness by the senior Senator from that State. The case is St. John v. Iowa, etc., Association (113 N. W., 863).

Before entering upon a consideration of what was therein decided, the attention of Senators is directed to the language of the Supreme Court of the United States above quoted from the case of Greenwood against Freight Co., designating the kind of property which remained to the street car companyto its stockholders-on the repeal of its charter. Besides rolling stock, horses, harness, and so forth, it remained the owner, the court said, "of debts due to it." Any negotiable notes which it held were still, notwithstanding, payable according to their terms, with interest as therein provided.

In the Sinking Fund cases, Ninety-ninth United States, page 700, to which reference will again be made, the court said that Congress, under its reserve power to amend, "can not unmake contracts that have already been made." The same idea was expressed in the language above quoted from the opinion of the Court of Appeals of New York, as follows:

Under the reserved power it—the legIslature—can not deprive a corporation of its property or interfere with or annul its contracts with third persons.

An executed contract is property, and Congress can no more destroy the right of a corporation thereunder than it can confiscate any other property of a corporate body which it has created.

As to executory contracts, the power to comply with which is taken away by the annulment of its charter, performance is excused. The existence of such is no legal obstacle to the exercise of the right of repeal, and performance being impossible the law does not require it nor does it award damages for failure to perform. But in respect to rights arising out of contracts wholly performed, so far as performance is due from it, the corporation is protected just as it is in respect to its tangible property.

Having this principle in mind we may recur to the Iowa case mentioned above.

It concerned the operations of a building and loan association which had entered into a large number of contracts with its members upon loans which it had made to them, by which they had respectively become obligated to pay to it the amount of the loan, with interest at varying rates above 8 per cent. In that situation of affairs an act was passed revising the law under which it was organized, the new act containing a provision that loans in the future should be made at the rate named, and that members who had theretofore borrowed should pay at the rate so fixed. To enforce this requirement the amending statute further provided that any association that failed to readjust its outstanding contracts and to amend its articles to conform to the new law before a specified date should expire, and that its affairs should be wound up as provided in the act. An attack was made upon the statute, the association demandentered into with it prior to the passage of the act. Preliminarily the court, in a unanimous opinion, said:

A corporation under our laws has no absolute right to do business in this State, and its articles of incorporation are at all times subject to amendment by the general assembly. Conditions may at any time be imposed upon a corporation, and enforcement thereof assured by revoking their privileges in the event of noncompliance.

And then, addressing itself to the direct question involved, it continued:

continued:

Is the act violative of the constitutional provision prohibiting a legislative impairing of the obligations of a contract? It will be noted that the act litself does not attempt to change the contracts of members, but it does provide that if the association falled to comply therewith on or before July 15, 1900, its authority to do business should cease, and its affairs should be wound up and settlements made with all members according to the provisions of the act. Defendant then had the option of complying with the law and adjusting its outstanding contracts on the basis outlined in the act or of going out of business and settling with its members upon the basis fixed in section 7 of the act. It had no constitutional or other right to continue in business indefinitely, or for any other time than the legislature might see fit to permit. This is a fundamental principle of corporate law under the reserved power now generally given to the legislature. (Bishop v. Brainerd, 28 Conn., 289; In re Brooklyn R. R., 72 N. Y., 245; s. c. 75 N. Y., 335; Id., 81 N. Y., 69.) Of course, the relation between the corporation and its stockholders can not be changed or disturbed against their will. All that the legislature may do in this respect is to grant the power, and then it is for the corporation to accept or not, as it pleases. (Kenosha Co. v. Marsh, 17 Wis., 13.)

\* \* Defendant had two courses open to it: One to quit doing business and settle up its affairs, and the other to comply with the law, amend its articles, and give to its members the benefit of the new law. It chose the latter course, and, having done so, it is in no position to say that the act under which we did these things is unconstitutional and void.

It is believed that there is no possible escape from the logic

It is believed that there is no possible escape from the logic of this reasoning.

The idea is advanced in some quarters that the right of repeal is to some extent embarrassed by the fact that national banks are incorporated for a definite period, namely, 20 years. This view, however, has been disposed of by the court of last resort in Citizens' Savings Bank v. Owensboro (173 U. S., 636), wherein we read:

wherein we read:

The assertion that wherever it is stated in a legislative grant or charter that it is to last for a given period of time, therefore such provision is a plain manifestation of the intention of the legislature that the grant or charter shall not be repealed or amended for the time for which it was declared that it should exist, is fallacious, since it overlooks the consideration that the limit of time fixed for the duration of the charter or grant, like every other provision therein, is qualified by the reserved power to alter, amend, or repeal. It hence results that where in a charter or grant enacted, when there is a general statute reserving the power to repeal, alter, or amend, a time is stated, the granting act must be read just as if it declared that the charter or grant should exist for a designated time, unless sooner repealed, altered, or amended. Indeed, reduced to its final analysis, the argument that because in a grant or charter a time is designated for its duration, it can not, therefore, until the expiration of such time, be repealed, altered, or amended, is equivalent to saying that the reserved power can not be exercised in any case of contract.

The very able Senator, whose presentation of this question

The very able Senator, whose presentation of this question has alone given dignity to it, has contented himself with advancing the view that there is an essential difference between the exercise of the right of unconditional repeal and of the withdrawal of the privileges of the law except upon compliance with conditions imposed. This view has not been supported by any authorities to which the Senator has referred, and it is asserted with some confidence that none such exist.

Reference was made to the rule that, under the reserved power to amend, railroad rates may be fixed by legislative authority, but not so low as to be confiscatory, acts authorizing such procedure being regarded as in the nature of amendments to the law under which the railroads affected were incorporated. But no case was cited in which an option was given to retire from But business in the event of failure to put in force the rates pre-scribed under the amendatory law. It is quite generally held that railroads may not at will cease operations and decline to discharge the public duties they have undertaken. Unless the act plainly gave the right to divest themselves of their corporate capacity and to decline further to act as carriers, they may be forced by mandamus or otherwise to operate.

But if the considerations advanced be dismissed, and the conditions imposed be regarded separate and apart from the option to retire, with which they are coupled, no valid objection can be successfully made to the law.

A brief reference to some of the justifiable amendments will aid in forming an accurate idea as to the character of those

that are permissible under the reserved power.

In Massachusetts it was held that an act under which a mutual life insurance company had been incorporated and which required it to pay a certain proportion of its profits to a hospital could be amended so as to increase the amount of the profits to be thus applied. (Massachusetts General Hospital v. State Mutual Life Assurance Co., 4 Gray, 227.) The same court held that by special act railroad corporations entering a certain city might be compelled to build and use a union depot, though it appeared that it would involve an outlay of many hundreds of thousands of dollars in construction and in the acquisition of necessary rights of way to enter such station. (Worcester v. Norwich, etc., Railroad Co., 109 Mass., 103.) The decision in this case and in others of like character was approved by the Supreme Court of the United States in Shields v. Ohio (95 U. S., 319).

It has been repeatedly held that a liability may be imposed upon stockholders of a corporation for future debts of the company, the law in effect when they became stockholders subjecting them to no such risk. It was so held in New York and the ruling affirmed on writ of error by the Supreme Court of the United States in Sherman v. Smith (1 Black, 587.) authorizing the fixing of railroad rates by a commission and laws imposing upon railroads a liability for injuries to servants by the negligence of fellow servants, for fires set out by their engines, and for injuries to passengers regardless of negligence, are familiar examples of the exercise of the reserved power to amend charters. The validity of these laws has been repeatedly affirmed, and is no longer open to question.

What the legislature can not do under the power to amend is to be gathered from general expressions rather than from direct adjudications, it being rare that the representatives of the people are guilty of attempting to put into the form of law a bill so flagrantly unjust as to fall under the condemnation of the amendment to the constitution appealed to. Thus, the Supreme Court has said:

The power of alteration and amendment is not without limit. The alterations must be reasonable; they must be made in good faith and be consistent with the scope and object of the act of incorporation. Sheer oppression and wrong can not be inflicted under the guise of amendment and alteration. Beyond the sphere of the reserved powers, the vested rights of property of corporations, in such cases, are surrounded by the same sanctions and are as inviolable as in other cases. (Shields v. Ohio, 95 U. S., 319.)

On the other hand the same high tribunal said in Miller v. State (15 Wall., 498), that though-

vested rights, it is conceded, can not be destroyed or impaired under such a reserved power, it is clear that the power may be exercised, and to almost any extent, to carry into effect the original purposes of the grant, and to protect the rights of the public and of the corporators, or to promote the due administration of the affairs of the corporation.

If, then, the power may be exercised to almost any extent, in order to carry into effect the original purpose with which the national-bank act granted to the associations the powers enjoyed by them under it, or if in the conduct of the business conducted by them the Congress may prescribe regulations, calculated to protect the public and the stockholders, or to promote the due administration of the affairs of the banks, who can doubt that the present act falls easily within the legitimate field of congressional action? That such regulations would impose some burdens on the banks to which they are not now subject, that it involves the expenditure of some money on their part, does not, as plainly appears from the authorities to which reference has been made, preclude the establishment of the same by law.

It may be admitted that the Constitution would forbid a law by the operation of which money would be taken from one corporation and given to another, or one would be forced to turn over a part of its assets to another, the two being in no wise re-That is quite aside from the question as to whether to enable the national banks of a certain district the better to fulfill the purposes for which they were created, to lessen the danger of causeless runs upon them, to assure them a means of averting the disastrous results of such should they unhappily ensue, such banks may all be required to contribute to a common fund to constitute the capital of another bank to which they may resort in times of trouble, of which they are the stockholders, and of whose board of directors they are entitled to elect a majority of the members.

In the case of Miller against Smith the Supreme Court said that the legislature may go "to almost any extent to carry into effect the original purpose of the grant" of powers to a corporation. The means adopted in the bill under consideration have the most direct and intimate relation to the purposes for which the banks were originally authorized.

Victor Morawetz, a writer on both law and economics, referring to the right to amend, says:

Such a reservation is designed to enable the State, to a certain extent, to dispose of the corporate funds and to interfere with the agreement among the stockholders. (2 Morawetz on Corporations, 1095.)

And further:

Provisions intended for the future government of the affairs of a corporation are generally held valid. (Id., 1105.)

In the Sinking-fund Cases it was declared that "whatever rules Congress might have prescribed in the original charter, for the government of the corporation in the administration of its affairs, it retained the power to establish by amendment," the act under consideration being an amendment to the charter of the Union Pacific Railroad Co. granted by a law which by express provision was subject to repeal or alteration at the will of Congress. Surely no one would assert that Congress could not have made such provision as it is now contemplated it shall make as a part of the original national-bank act. All banks hereafter organized must conform to its requirements, and even the distinguished Senator from Iowa has not expressed any doubt as to the constitutionality of the law as it applies to banks that may in the future be incorporated with a national charter. Though he has appealed to the Sinking-fund Cases as affording some support to his contention, it must have been done in anticipation of reliance upon it as complete justification for the legislation attacked. By virtue of the acts under which the Union Pacific railroad was constructed, the corporation created by Congress for the purpose of building it, in addition to receiving a great land grant, was loaned large sums of money which were presumably spent in the great work which it undertook and successfully accomplished.

The repayment of these was secured by a second mortgage on the property of the company, the original act providing for the payment of the interest out of a fund created by setting aside one-half of the earnings of the road for government service and 5 per cent of its net earnings. The fund so created proved inadequate to meet the interest on the sums due the government as it came due, and apprehension was felt concerning the principal when it should mature. Meanwhile dividends were being declared and paid to the stockholders out of the earnings of the road. In this situation Congress, in the year 1878, long after the road was constructed, passed an act, some of the essential provisions of which, briefly stated, required that there should be retained in the Treasury of the United States not the onehalf but the whole amount of the compensation which might become due from the Government for services rendered it, as required by the original act, the amount so retained to constitute a sinking fund. The amendatory act further required the company to pay into this fund not 5 per cent of its net earnings, but such a sum as would amount to 25 per cent of its net earnings. Out of the sums so accumulated the accruing interest on the bonds due the government was to be met and the remainder, with its accretions, invested by the Treasury, the fund even-tually to be applied to the redemption of the bonds when they should become due. The stockholders, or at least those in control of the company, preferred to have the earnings distributed in dividends rather than having them impounded to meet debts, a large part of which were not due. The validity of the act of 1878 having been tested in the cases, collectively referred to under the title of the Sinking Fund Cases, was upheld by the Supreme Court as a legitimate exercise of the reserved power of amendment. The dissenting opinion by Mr. Justice Strong states the controversy in respect to the legal principles in-volved much as does the Senator from Iowa the argument upon which he urges the unconstitutionality of the bill before us. From the opinion of the court the following is taken:

From the opinion of the court the following is taken:

Giving full effect to the principles which have thus been authoritatively stated, we think it is safe to say that whatever rules Congress might have prescribed in the original charter for the government of the corporation in the administration of its affairs, it retained the power to establish by amendment. In so doing it can not undo what has already been done, and it can not unmake contracts that have already been made, but it may provide for what shall be done in the future, and may direct what preparation shall be made for the due performance of contracts already entered into.

\*\*

Legislative control of the administration of the affairs of a corporation may, however, very properly include regulations by which suitable provision will be secured in advance for the payment of existing debts when they fall due.

\*\*

Take the case of an insurance company dividing its unearned premiums among its stockholders without laying by anything to meet losses; would anyone doubt the power of the State under its reserved right of amendment to prohibit such dividends until a suitable fund has been established to meet losses from outstanding risks? Clearly not, we think; and for the obvious reason that while stockholders are entitled to receive all dividends that may legitimately be declared and paid out of the current net income, their claims on the property of the corporation are always subordinate to those of creditors.

\*\*

Such a regulation, instead of being destructive in its character, would be eminently conservative.

The case seems to meet every condition of the problem before us. Every bank is a debtor to its depositors. If it had no such creditors, it would cease to be a bank in any true sense. Any reasonable provision intended to safeguard the interest of its depositors is within the legitimate scope of legislative action. It is not for the judicial department to sit in judgment upon the wisdom of the means provided or to give its adherence to one of two or more plans proposed to accomplish the end, both or all calculated to attain it.

In the case of the railroad company the fund was intrusted to the Treasury to be applied eventually to the discharge of specific debts. The owner was not to be permanently separated from his money, though plenary power to convert it into securities named in the bill was reposed in the Secretary.

In the case of the national banks the money of each is permanently impounded to be utilized in aid of a plan to secure payment, not only to the present creditors of the bank, but to all who may become such during the course of its future opera-

Take the case of an insurance company, referred to in the language from the opinion last above quoted, which not only has creditors now but which, by the very character of the business it conducts, as long as it remains in business, must accumulate other creditors. Certainly it will not be doubted that a statute might require it permanently to lodge with some officer of the State a certain portion of its capital as security for the performance of its obligations to its stockholders as a condition of its being permitted to continue in business.

The bank guaranty case, Noble State Bank v. Haskell (219 U. S., 104), seems equally decisive of the question being considered. Under the act involved in that case banks chartered before it was passed were required to pay to the State 1 per cent of their average daily deposits for the purpose of creating a depositors' guaranty fund. By a later act the contribution required was raised to 5 per cent. This fund was to be held and administered by the State. From it, so far as it would go, the depositors of a failed bank were to be paid immediately and the fund reimbursed out of its assets when they should be reduced, to the extent that the advances could be thus returned. The contributing banks were thus permanently deprived of the money exacted of them. While the depositors in each bank had a contingent interest in the fund thus created, the bank itself had none in any just sense, nor did its stockholders. That act was assailed upon the same grounds as those urged against this bill. The inquiry presented was stated by the court in these words:

The only contract that it relies upon is its charter. That is subject to alteration or repeal, as usual, so that the obligation hardly could be said to be impaired by the act of 1907 before us, unless that statute deprives the plaintiff of liberty or property without due process of law. (See Sherman v. Smith, 1 Black, 587.) Whether it does so or not, is the only question in the case.

That question was answered as follows:

That question was answered as follows:

The power to compel, beforehand, cooperation, and thus, it is believed, to make a failure unlikely and a general panic almost impossible, must be recognized, if government is to do its proper work, unless we can say that the means have no reasonable relation to the end. (Gundling v. Chicago. 177 U. S., 183, 188.) So far is that from being the case that the device is a familiar one. It was adopted by some States the better part of a century ago, and seems never to have been questioned until now. (Receiver of Danby Bank v. State Treasurer, 39 Vermont, 92; People v. Walker, 17 N. Y., 502.) Recent cases going not less far are Lemieux v. Young (211 U. S., 489, 496); Kidd, Dater & Price Co. v. Musselman Grocer Co. (217 U. S., 461).

We can not say that the public interests to which we have adverted and others are not sufficient to warrant the State in taking the whole business of banking under is control. On the contrary we are of opinion that it may go on from regulation to prohibition, except upon such conditions as it may prescribe.

It is impossible to give these plain words any significance at

It is impossible to give these plain words any significance at all, except it be that there is no limit to the conditions Congress may impose upon those who desire to enter or remain in a national banking system, which it provides. If any ban's does not care to conform, it may retire. It can not remain in the system and defy the Government in its effort to make that system safe and serviceable.

Mr. LEWIS. Mr. President, in this connection the able Senator from Montana [Mr. Walsh] has disclosed himself to be the able lawyer that we who know him intimately have always conceded him to be.

I wish to invite his attention to the fact that the Supreme Court, in Two hundred and nineteenth United States, 221, and in the Two hundred and eighteenth-the Calder and Louisiana cases-makes this distinction, which I think is appropriate, if I may be permitted to intrude it upon his argument. The court holds that it is not in the power of persons to contend that a change in a charter is unconstitutional, so far as they are concerned, unless there is exist-ing between them and the person against whom they complain some contract upon which they rest their claim. claim must disclose some reserved right of theirs particularly The opinion points out that a contract must be vioaffected. lated by the change; that the mere fact that there has been a change between the sovereignty or individual can not be the subject of complaint on the part of any individual person unless it likewise shall come from a contract right given him by the charter apart from the general conflict between the legislation and the Constitution. The bank can not put itself in the place of the sovereign-to complain in its behalf, nor the

banks generally—merely because banks may be curtailed of privileges, by the amending act, previously enjoyed by the original act. I will hand the Senator the citations.

Mr. REED. Mr. President, I regard the brief—for that is

what it is-of the Senator from Montana [Mr. Walsh] as so able and comprehensive and so useful at this time that I ask unanimous consent that it be made a public document.

The PRESIDING OFFICER (Mr. BRYAN in the chair). The

Chair is of the opinion that under the rule of the Senate that can not be done.

Mr. REED. Why?

The PRESIDING OFFICER. Because it is a speech delivered on the floor of the Senate by a Member of the Senate.

Mr. REED. I am aware of no rule of that character.

think I know of precedents to the contrary.

Mr. BRISTOW. If the Senator will pardon me, I will suggest to him the reason why, and it is very manifest. A Senator delivers an address. If it is made a public document, it is printed at the Government expense and circulated at public expense.

Mr. REED.

Mr. REED. Yes. Mr. BRISTOW. While when a Senator makes an address and it is not printed as a document, he circulates it at his own expense. It seems to me it ought to be an invariable rule that of speeches delivered here one should not be printed and cir-

culated at public expense and another not.

Mr. REED. If there is going to be opposition, I would not embarrass the Senator from Montana, who had no idea I would make this request, by urging it, but I want to say to the Senator from Kansas that I do not regard this as an ordinary speech made on the floor of the Senate. It is a legal argument, carefully prepared, which simply deals with the question of law involved in this bill. It is not in advocacy of the bill. It has nothing in it of a personal or a partisan nature. It is merely a lawyer's brief; but if the Senator objects, of course, I have nothing further to say.

Mr. BRISTOW. I do not want to be put in the position of objecting, because I realize all that the Senator from Missouri I am not a competent judge as to the value of a brief of that kind. But it was in answer to a speech delivered by the Senator from Iowa [Mr. Cummins], and the Senator from Missouri will see that to make one a public document and not to make the other would be a discrimination which the Senate could not be justified in, and it would open the door to the widest kind of discrimination and abuse if anyone saw fit to follow it up as a precedent. I would rather not be put in the position of objecting. I simply refer to the rule, which, I think, forbids such a proceeding.

Mr. REED. Mr. President-

The PRESIDING OFFICER. The present occupant of the chair is of the opinion that there is a rule adopted by the Committee on Rules, under the authority of the Senate, which for-bids the printing as a public document of a speech delivered on the floor of the Senate. If the Senator from Missouri will look into that matter, there not being a copy of the rules adopted by that committee on the Vice President's desk, he may prefer his request later.

Mr. REED. I want to say, and I intend at this point to drop the matter, that my thought in making the request was simply this: There has been a great deal of talk that I think has been hearkened to somewhat by bankers to the effect that Congress is acting in the passage of this bill outside of its constitutional right; that it is an invasion of the rights of the banks under the Constitution. There has been much talk before the committee and otherwise to the effect that we are invading the rights of the banks. I had hoped that we might have about 20,000 copies of this brief printed and sent to each of the banks of the United States. I had the notion that if it was so distributed we would not hear much more of the particular kind of complaints I have referred to. It was only because it could be used in that way that I made the suggestion. However, I with-

draw the request, in view of the objection which has been made.

Mr. BRANDEGEE. Of course the same purpose could be accomplished, if the rule prohibits anything of the kind to be

lege, and I think there is merely a nominal charge for the

printing

Mr. CHILTON. Mr. President, I am a member of the Committee on Printing. This is a matter that has been before that committee one or two times. I think it is the printing law the Chair has in view that prohibits, even by unanimous consent, the printing of an address delivered upon the floor of the Senate. I wish there was some way by which we could obviate that rule, because, with the Senator from Missouri, I would very much like to see the speech printed as a public document. should like to have both the discourses on this subject printed in that form; but I think there is a law of Congress that stands in the way. That is my recollection.

Mr. REED. If there is such a law, it is doubtless bottomed upon the logical principle that a speech having been once deliv-

ered in the Senate it has entirely lost its public uses.

Mr. HITCHCOCK. Mr. President, I am ready now to proceed with section 11. I think we ought to have a quorum here for the purpose, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Nebraska suggests the absence of a quorum. The Secretary will call

the roll.

The Secretary called the roll, and the following Senators answered to their names:

Gallinger Goff Gore Gronna Hitchcock Hollis Hughes Johnson Kenyon Kern La Follette Simmons Smith, Ga. Smith, S. C. Stephenson Sterling Sutherland Swanson Thompson Tillman Townsend Vardaman Walsh Bankhead McCumber McLean Brady Brandegee Martine, N. J. Myers O'Gorman Overman Bristow Bryan Burton Chamberlain Chilton Clapp Clarke, Ark. Colt Crawford Cummins Dillingham Fletcher Bristow Owen Page Perkins Pomerene Ransdell Reed Robinson Shafroth Walsh Warre Lane Lea Lewis Shafroth Sheppard Williams

Mr. TOWNSEND. The senior Senator from Washington [Mr. JONES] is unavoidably detained from the Chamber on important

The PRESIDING OFFICER. Fifty-nine Senators have responded to their names on the call of the roll. A quorum of the Senate is present.

Mr. HITCHCOCK. Mr. President, I now offer section 11 as it appears on page 32 of the bill as presented by me on behalf of certain members of the committee.

The PRESIDING OFFICER. The Secretary will state the amendment proposed by the Senator from Nebraska.

The Secretary. It is proposed to strike out of section 11 of the House bill, from line 4, on page 31, down to and including

line 11, on page 32, as follows:

line 11, on page 32, as follows:

SEC, 11. That there shall be created a Federal reserve board, which shall consist of seven members, including the Secretary of the Treasury, the Secretary of Agriculture, and the Comptroller of the Currency, who shall be members ex officio, and four members appointed by the President of the United States, by and with the advice and consent of the Senate. In selecting the four appointive members of the Federal reserve board, not more than one of whom shall be selected from any one Federal reserve district, the President shall have due regard to a fair representation of different geographical divisions of the country. The four members of the Federal reserve board appointed by the President and confirmed as aforesaid shall devote their entire time to the business of the Federal reserve board and shall each receive an annual salary of \$10,000, together with an allowance for actual necessary traveling expenses, and the Comptroller of the Currency, as ex officion member of said Federal reserve board, shall, in addition to the salary now paid him as comptroller, receive the sum of \$5,000 annually for his services as a member of said board. Of the four members thus appointed by the President not more than two shall be of the same political party, and at least one of whom shall be a person experienced in banking. One shall be designated by the President to serve for two, one for four, one for six, and one for eight years, respectively, and thereafter each member so appointed shall serve for a term of eight years unless sooner removed for cause by the President. Of the four persons thus appointed, one shall be designated by the President. The manager of the Federal reserve board, subject to the supervision of the Secretary of the Treasury and Federal reserve board, shall be the active executive officer of the Federal reserve board.

And in lieu thereof to insert:

And in lieu thereof to insert:

Mr. BRANDEGEE. Of course the same purpose could be accomplished, if the rule prohibits anything of the kind to be printed as a public document, by having the speech reprinted from the Record and circulated to the same constituency.

Mr. REED. But who would have it printed? Who would circulate it?

Mr. BRANDEGEE. Whoever is interested, I presume, in presenting the views contained in the speech to the parties who want to read it.

Mr. REED. I am not interested to that extent as an individual.

Mr. BRANDEGEE. I do not know what the charge is per page for reprinting speeches. Of course it has a franking privi-

Federal reserve board thus appointed by the President shall devote their entire time to the work and duties of the board and shall not while in office be officers, directors, or employees of any bank or trust company, nor hold stock in any such institution, and they shall each receive a salary of \$12,000 per year, payable monthly out of the Treasury of the United States upon the order or warrant of the Secretary of the Treasury. The President shall designate, other than the Secretary of the Treasury, one member of said board as governor thereof, and one member as vice governor thereof who shall act in place of the governor during his disability or absence. The governor shall be the active executive and presiding officer of the board. The Secretary of the Treasury Department Bullding, or the board may select quarters elsewhere in the city of Washington if sufficient office room can not be found in said building. The said board shall hold its office in the city of Washington, D. C. The first meeting of the board shall be held as soon as may be, upon the call of the Secretary of the Treasury, at a time and place designated by him.

On page 34, line 5, after the word "stock," to insert "and

On page 34, line 5, after the word "stock," to insert "and surplus"; in line 6, after the word "expenses," to insert "and salaries"; in line 8, after the word "any," to strike out "deficit" and to insert "deficiency," so as to make the clause

The Federal reserve board shall have power to levy semiannually upon the Federal reserve banks, in proportion to their capital stock and surplus, an assessment sufficient to pay its estimated expenses and salaries for the half year succeeding the levying of such assessment, together with any deficiency carried forward from the preceding half year.

On page 34, after line 4, to strike out:

On page 34, after line 4, to strike out:

The first meeting of the Federal reserve board shall be held in Washington, D. C., as soon as may be after the passage of this act, at a date to be fixed by the reserve bank organization committee. The Secretary of the Treasury shall be ex officio chairman of the Federal reserve board. No member of the Federal reserve board shall be an officer or director of any bank or banking institution or Federal reserve bank nor hold stock in any bank or banking institution; and before entering upon his duties as a member of the Federal reserve board he shall certify under oath to the Secretary of the Treasury that he has complied with this requirement. Whenever a vacancy shall occur, other than by expiration of term, among the four members of the Federal reserve board appointed by the President, as above povided, a successor shall be appointed by the President, with the advice and consent of the Senate, to fill such vacancy, and when appointed shall hold office for the unexpired term of the member whose place he is selected to fill.

On page 35, line 3, before the word "report," to insert "full"; in line 4, before the word "report" to strike out "full"; in line 4, before the word "report," to strike out "fiscal"; in the same line, after the words "to the," to strike out "Speaker of the House of Representatives, who shall cause the same to be printed for the information of the," so as to read:

The Federal reserve board shall annually make a full report of its operations to the Congress.

ment," so as to read:

Section 324 of the Revised Statutes of the United States shall be amended so as to read as follows: "There shall be in the Department of the Treasury a bureau charged with the execution of all laws passed by Congress relating to the issue and regulation of national currency secured by United States bonds and, under the general supervision of the Federal reserve board, of all Federal reserve notes, the chief officer of which bureau shall be called the Comptroller of the Currency, and shall perform his duties under the general direction of the Secretary of the Treasury." Nothing in this act contained shall be construed as taking away any powers heretofore vested by law in the Secretary of the Treasury which relate to the supervision, management, and control of the Treasury Department and the bureaus under such department.

All HITCHCOCK Mr President I have very little to say

Mr. HITCHCOCK. Mr. President, I have very little to say concerning this amendment. Both branches of the Banking and Currency Committee concurred in the belief that the House bill was seriously defective in providing a board with seven members, only four of whom should give their whole time to the The House bill provided a board of seven members, three of whom were ex officio, namely, the Secretary of the Treasury, the Comptroller of the Currency, and the Secretary of Agriculture—three public officials whose time is completely taken up with the duties they already have, and three public

officials, therefore, who would not be able to give much attention to the important duties of the Federal reserve board.

Another objection to the House bill, which was concurred in by both branches of the committee, was that the House bill did not sufficiently remove from the realm of politics the membership of this board, in providing that only four of the officers should be appointed and that their terms should be short, and uniting them with three Cabinet officers appointed by the President. It was thought that the Federal board came too immediately under the control of the President for the time being, and that the welfare of the country, the welfare of the system, and the permanency of the banking system required that the board should not only be larger, but that it should be further removed from immediate political control.

The branch of the committee of which the Senator from Oklahoma is the spokesman has reported a bill providing for a board of seven, that has limited the ex officio membership to one-the Secretary of the Treasury-and has provided that the other six members shall be appointed, each having a term of six years in office. We have thought that the board was of sufficient importance, that the interests under its control were sufficiently great, and its power sufficiently vast, to warrant a larger membership. We have, therefore, recommended that a board be created with nine members, the Secretary of the Treasury to be the only ex officio member, because of the fact that his duties bring him in immediate contact with the banking and currency system of the United States, and that the other eight members of the board should be appointed for terms of Those first in office would be so classified that one eight years. would hold for one year only, another for two years, another for three, another for four, another for five, another for six, another for seven, and another for eight years; so that one member of the board should go out of office each year.

The wisdom of this provision rests in the fact that in this

way it will be made impossible for a President to inject the political element into the board so largely as to control it immediately upon coming into office; it rests in the fact that in this way we shall have a permanent body, exercising the great powers of the Federal board. They are great—the power to control the interest rate, the power to supervise not only the reserve banks, which this system proposes to create, but as the terms of the bill are drawn practically to supervise the member banks, perhaps ten, twelve, or fifteen thousand in number. The board not only has an outlook over the domestic life of the country, the banking and currency system in the United States, but it must take into account the great world movement of gold, of prices, of credit, and, in our opinion, this board ought to have the strength of nine members, and ought to have the dignity of an eight-year term.

I have nothing further to say, Mr. President, in regard to the amendment, and am ready for a vote.

Mr. SHAFROTH. Mr. President, the differences between the sections of the committee are not very great. The Owen amendment provides for a term of six years, and provides for the membership of the board to be six and the Secretary of the Treasury. Under the Owen bill the salary is to be \$10,000 a year, while under the Hitchcock amendment it is proposed to fix it at \$12,000 a year. Under the Owen amendment a President can, in the closing year of his administration, control the board, but he can not do so at any other time under ordinary circumstances.

Mr. President, I move to lay the amendment of the Senator from Nebraska on the table.

Mr. NELSON. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Brady Brandegee Bristow Bryan Burton Chamberlain Chilton Clarpe, Ark. Colt Crawford Cummins Dillingham du Pont	Gore Gronna Hitchcock Hollis James Johnson Kenyon Kern La Follette Lane Lea Lewis McCumber MeLean	Nelson Norris O'Gorman Overman Owen Page Perkins Pomerene Ransdell Reed Hobinson Root Shafroth Sheppard	Smith, Ga. Smith, Mich. Stephenson Sterling Sutherland Swanson Thompson Tillman Townsend Vardaman Walsh Warren Weeks Williams
Dillingham	McCumber	Shafroth	Weeks

The VICE PRESIDENT. Sixty-five Senators have answered to the roll call. There is a quorum present. The question is on the motion of the Senator from Colorado [Mr. Shafroth] to The question is on Bi Ca Cl Cl

lay on the table the amendment proposed by the Senator from Nebraska [Mr. Hitchcock].
Mr. NELSON. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded

Mr. CHAMBERLAIN (when his name was called). a general pair with the junior Senator from Pennsylvania [Mr.

OLIVER]. In his absence, I withhold my vote.

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. Jackson], who is absent. If he were present, I should vote "yea" and he would vote "nay."

Mr. DILLINGHAM (when his name was called). On this

question I have a pair with the senior Senator from Maryland [Mr. SMITH]. If I were permitted to vote, I should vote "nay."

Mr. DU PONT (when his name was called). I have a general pair with the senior Senator from Texas [Mr. Culberson]. transfer that pair to the senior Senator from Idaho [Mr. Borah] and will vote. I vote "nay."

Mr. NELSON (when his name was called). I have a general

pair with the senior Senator from Georgia [Mr. Bacon]. transfer that pair to the senior Senator from Utah [Mr. Smoot] and vote "nay

Mr. STERLING (when his name was called). I am paired with the senior Senator from Louisiana [Mr. Thornton]. transfer that pair to the Senator from New Mexico [Mr. Catron] and vote "nay."

The roll call was concluded.

Mr. DILLINGHAM. I have already announced my pair with the senior Senator from Maryland [Mr. SMITH], but I transfer that pair to the Senator from Washington [Mr. Jones] and vote "nay."

Mr. KERN (after having voted in the affirmative). I desire to inquire if the Senator from Kentucky [Mr. Bradley] has voted?

The VICE PRESIDENT. The Chair is informed that he has not voted.

Mr. KERN. Then I withdraw my vote on account of my pair with him.

While on my feet I desire to state that the Senator from Georgia [Mr. BACON], the Senator from Missouri [Mr. STONE], and the Senator from Colorado [Mr. Thomas] are detained from the Senate on account of illness. All of them, if they were here, would vote "yea." The Senator from Missouri [Mr. STONE] is paired with the Senator from Wyoming [Mr. CLARK]

Mr. ASHURST. I desire to announce that my colleague [Mr. SMITH of Arizona] is unavoidably detained from the Chamber. He is paired with the Senator from New Mexico [Mr. Fall]. If present, my colleague would vote "yea." I will let this announcement stand for the day.

Mr. GALLINGER. I desire to announce that the junior Senator from Maine [Mr. Burleigh] is detained from the Senate on account of illness and that he is paired with the Senator from Colorado [Mr. Thomas]. That notice may stand for the day.

Mr. WILLIAMS (after having voted in the affirmative). I voted I was under the impression that the senior Senator from Pennsylvania [Mr. Penrose], with whom I am paired, was here. I have just been informed that he has not voted. Is that correct?

The VICE PRESIDENT. The Senator from Pennsylvania has

not voted.

Mr. WILLIAMS. Then I withdraw my vote, as I have, as already stated, a pair with him.

Mr. WALSH (after having voted in the affirmative). I observe that the senior Senator from Rhode Island [Mr. Lippitt] has not voted. I have a general pair with him and accordingly withdraw my vote.

The result was announced-yeas 37, navs 32, as follows

So the motion of Mr. Shafroth to lay on the table the amendment of Mr. HITCHCOCK was agreed to.

Mr. HITCHCOCK obtained the floor.

Mr. ROOT. Mr. President-

Mr. HITCHCOCK. I defer to the Senator from New York.
Mr. ROOT. Mr. President, before passing to another amendment, I wish to make some observations regarding the several replies which were made yesterday to the argument I made last Saturday regarding what seemed to me to be the possibilities of

inflation under the pending currency bill.

I am going to depart from the custom to which my feeling ordinarily holds me and make a remark regarding some personal allusions which occurred in the speeches of two, perhaps three, of the Senators who replied to me. Those Senators saw fit to intimate that my motive in making the argument I did make was not merely the desire to contribute what I could to the fair and intelligent discussion of the merits of this bill, but that there was also a motive of personal ambition coloring my judgment and affecting my utterances.

That is not a very cogent argument in itself, for what a Senator says here is to be judged by the weight of what is said rather than by any motives he may have in saying it. theless, I have this to say about it, and I should not say it were it not for the fact that a public statement has appeared coming from the senior Senator from New Hampshire [Mr. Gallinger], and that public statement has been commented upon in this Chamber and in the public press, the substance of the statement being that under some circumstances I might be a candidate for the Presidency of the United States.

I shall always be grateful, sir, for the friendship and the good opinion of the Senator from New Hampshire, and for the toopartial friendship which has led other gentlemen to express agreement with him; but I ask my friends upon the other side who do not agree with him and in whose minds a suspicion of personal ambition upon my part may detract from the weight of my utterances, to remember the fact that before this administration comes to a close and the next President has been inaugurated I shall have reached the age of 72 years. Before the next administration comes to a close I shall have passed the age of 76 years. It is manifestly impossible, sir, that I should be the President of the United States. I could not render the service. I would not undertake it. I would not accept the nomi-I could not accept the office.

Such suggestions are and can be merely a graphic way of expressing the feelings of friendship and approval. My political career and my public career are drawing to a close. No political ambition whatever finds its place in the horizon of my future. I look with sympathy and interest upon the younger and more vigorous men who surround me, who rightfully cherish ambitions for place and usefulness of service for our country, but I have no part in them.

Now, sir, let me say a very few words regarding the arguments which have been employed-

Mr. GALLINGER. Mr. President

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from New Hampshire?

Mr. ROOT. Certainly.

Mr. GALLINGER. If the Senator from New York will permit me, I desire, for the purpose of placing myself right as well as doing justice to the distinguished Senator from New York, to say that the Senator from Missouri [Mr. Reed] yesterday, upon incorrect information from some source, stated that a typewritten copy of what appeared in the newspapers of the country over my signature had been presented to the press gallery before the Senator from New York made his remarkable speech. The statement was not correct, and the Senator from Missouri very kindly has said to me that he will correct it in the permanent RECORD. The fact is that at the close of the speech of the Senator from New York I went to my committee room and dictated the few lines that appeared in the public press, and I did it simply because I felt like doing it.

For a great many years I have had the profoundest admiration for the Senator from New York, and if it had been in my power he would have been President of the United States long ago, and I still hope that he may grace that exalted position. I do not share with him the view that his age will make him an undesirable candidate for the Presidency three years from now; but that, of course, is in the keeping of the Senator from New

I simply desire to add, so that the RECORD may be correct, that exchanged no word with the Senator from New York or any other Senator before writing what I did. I am personally responsible for what appeared over my signature; and I am especially gratified at the flattering reception my suggestion has received in all parts of the country. I am glad to know that the incorrect statement made by the Senator from Missouri will be corrected in the permanent RECORD.

Mr. REED. Mr. President, the Senator from New Hampshire informed me this morning that my statement was not accurate. I told him at once that I would gladly correct the remarks as they will appear in the RECORD. I made the statement upon the strength of a statement which was made to me, and which I credited.

I will say, further, that when I took the floor to make some remarks on yesterday I intended to speak only to the matter which was then immediately before us. When I began talking, without any deliberation, I took up the other matter. said was said without any deliberation or forethought; and in so far as I did the Senator from New Hampshire an injustice, or the Senator from New York, I very frankly express my

Mr. ROOT. Mr. President, I wish to say a few words regarding the arguments made by the several Senators yesterday.

The Senator from Oklahoma has presented two series of reasons why the objections which I made to the sixteenth section of the currency bill should not have weight. The first series related to the value and the adequacy of the security which the Government receives when it loans its notes. The other series related to the question whether there can be inflation under the

As to the first series I shall take up no time. I had already said that I did not assert that in any particular case the se-curity which the Government would receive for the loan of its notes would not probably be adequate security, but that the phase of the business which I thought we ought to consider was not the security for a particular loan but the general effect of the process, the course of business which was contemplated and authorized in the bill.

The loans of Government notes to the banks authorized by the sixteenth section of the bill will be subject to just the same dangers and possibilities and vicissitudes of good and bad judgment, of honesty and dishonesty, as in all cases of credits. All credits by banks or by merchants or by individuals, in whatever business, are extended subject to certain vicissitudes, to certain possibilities of loss; and these credits, created by the Government loaning its notes to the banks on the securities specified in the bill, will be subject to vicissitudes. There may well be situations arising in which the Government will lose, and it may well be that in the great mass of cases the Government will not

That is neither here nor there so far as my criticism of this bill is concerned. My objection is that the bill permits a vast inflation of our currency, and that inflation can be accomplished just as readily and just as certainly by loans of the Government paper upon good security as upon bad security; that is to say, upon security that is good until the time comes when, through a process of inflation, we reach a situation in which no security

If it be true that the bill permits inflation, if it be true that under this bill the process of inflation can go on to the point with which we are all familiar, the point when the too-sanguine hopes and expectations of the business world are brought to a sudden and disastrous end, if that be true, then none of this If it be not true, then I grant you security will then be good. that the security is reasonably good security.

So, I turn to what the Senator from Oklahoma says will be the safeguard against inflation. Before I go to that, however, let me restate what appears now to be admitted in the answers that have been made—that is to say, not to be denied.

It is not denied that it is possible under this bill to add to the existing greenbacks, the existing gold and silver certificates of the Government, and the existing seven hundred and forty-odd millions of national-bank notes, a further issue of currency consisting in demand obligations of the United States to the extent of \$1,800,000,000. It is possible. No one denies the possibility periods of inflation. It is denied that we are to have one under this bill, but no one denies that such periods do occur. No one denies that in the past, from time to time, great commercial nations have found themselves moving along upon a tide of optimism which, with the facilities of easy money, has brought them to a point of most serious and injurious collapse. No one denies either the possibility of such periods or the serious and ruinous consequences which inevitably follow them. So we have a basis upon which to proceed—the history of the recurrence of periods of inflation, the ruinous consequences following such periods, and the possibility of the enlargement of our currency under this bill by adding to the existing currency \$1,800,000,000 of demand obligations of the United States.

Mr. SWANSON. Mr. President-

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Virginia?

Mr. ROOT. Certainly.

Mr. SWANSON. The statement of the Senator is based on an estimate I made in a speech to the Senate. looked over the figures and the provision of the Owen bill, and I find that there was a mistake in my estimate; so I would not like to have my figures mislead the Senator.

I find that the resources of the banks will be \$636,000,000, according to the estimate made by an expert. Of that, \$105,000,000 is estimated as the capital of the banks, which would leave \$531,000,000 as deposits of the reserves of the member banks and of the United States. The Owen bill, as reported, provides that these banks shall keep a reserve of 35 per cent for their demand obligations and for their note issues. As the reserves of the banks would be \$531,000,000, and a reserve of 35 per cent must be kept for that, that would leave \$185,850,000 which must be kept in the banks as a reserve for their obligations in the way of the deposits which may be put there by the United States and the member banks.

Mr. ROOT. How much?

Mr. SWANSON. One hundred and eighty-five million eight hundred and fifty thousand dollars. So all the currency that could be issued would be upon \$636,000,000 less \$185,000,000, which would leave \$451,000,000, with a reserve of 35 per cent, which would permit a currency issue of only \$1,288,000,000.

The mistake I made in my estimate was in not providing for

the reserves for the deposits of the United States Government

and for the deposits of the member banks.

I think if the Senator will look at the provisions of the bill he will come to the same conclusion that I did when I looked at the language subsequently. I am satisfied that the provision requires the reserve I have stated for the deposits made by the United States Government and also by the banks; and then, after these deposits have been provided for by a reserve, the residue of \$451,000,000 could be utilized for the issuance of

Mr. ROOT. Mr. President, I think the Senator was right in the first instance and wrong in this, but I will not stop to deal with the matter here, because \$1,200,000,000 spells the same result as \$1,800,000,000.

Mr. OWEN. Mr. President-

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Oklahoma?

Mr. ROOT. Certainly, Mr. OWEN. Since the error of \$600,000,000 has been corrected, I desire to correct the remainder of the \$1,200,000,000.

Mr. ROOT. I shall be glad to have the Senator do that in the bill

Mr. OWEN. The Senator can explain it on the floor, whether the Senator from New York perceives it or not; but I will not do it now unless it is agreeable to the Senator.

Mr. ROOT. As the Senator pleases.
Mr. OWEN. The reserves and the funds which will be placed in these banks, and might be borrowed from them, of course would be paid out in the currency which they would have rather than to apply for currency which they would not need at the time the loan was made. In the normal course of human conduct in handling a bank and making loans no prudent, sensible banking management would apply for Federal reserve notes, with the difficulties attending the issue of such notes, when it had abundant funds in gold or silver or lawful money available to be loaned to those who desired such currency. It must not be overlooked that human nature, which will operate in the conduct of these banks, and the ordinary laws of business prudence would forbid the issuance of these emergency notes when there was no emergency, but that the money which they had on hand would go out to those who desired currency before any application could or would be made for the Federal reserve

Mr. ROOT. Mr. President, that is an argument, not as to the possibility of inflation but as to what the banks probably would do. I shall say a word about that presently. It still leaves the possibility of inflation by the increase of the demand obligations of the United States over the now existing currency to the extent of \$1,800,000,000, according to the first estimate of the Senator from Virginia, and \$1,288,000,000 according to his last estimate.

There are some further considerations bearing upon that It was agreed between the Senator from Virginia and myself when I was speaking on Saturday that that estimate was based only upon the mandatory provisions of the law-that is, based upon deposits from member banks which were required by law. If, as my friends on the other side expect, many other banks come into the system, so much more will be deposited with the reserve banks and so much more will be the reserves held by the member banks and so much greater will be the possibilities of enlarging the demand obligations of the United States by the issue of more and more of these reserve notes.

Still further, the bill in its twelfth section-that is, the eleventh section of the Owen bill, which is printed in this three-column edition under the head of "Section 12," because it relates to the twelfth section of the House bill-contains two provisions bearing upon this subject. One is provision (k) in the enumeration of the authority of the Federal reserve board. Under that the Federal reserve board has power-

To authorize member banks to use as reserves Federal reserve notes or bank notes based on United States bonds to the extent that said board may find necessary.

Under that language I can not see how there is any limit to the enlargement of our currency under this bill. Understand, I am talking now about the power we confer upon a sub-

ordinate agency of government.

We confer by this bill on the Federal reserve board the power to issue demand obligations of the United States to the fullest extent that the banks can bring to the board commercial paper, subject only to the provisions that the banks shall hold against that paper a reserve of 35 per cent, 331 per cent of which shall be gold. At the same time we authorize the Federal reserve board to give authority to the banks to use as reserves Federal reserve notes; that is to say, to use as reserves against the notes that are loaned to them the very notes that are issued. Where, then, is the limitation of reserves?

In that same section of the bill we also confer power upon this subordinate agency of government to suspend for a period not exceeding 30 days and from time to time to renew such suspension for periods not exceeding 15 days any reserve requirement specified in this act. Where, then, are the limits upon the power of this Federal reserve board, this subordinate government agency, to permit the indefinite inflation of the demand

obligations of the United States? Mr. President, let me turn again to the reasons which the Senator from Oklahoma gives to show that there will not be inflation. He says that the citizen must, first, apply for a loan; that the member bank must, second, consent to discount the citizen's paper; that the Federal reserve bank must, third, consent to rediscount the paper; and, fourth, that the Federal reserve agent, representing the people of the United States and the public interest, must also consent. Now, all that is merely saying that the process of borrowing money by the business man or the citizen desiring to embark on new adventures or an enlargement of his old enterprises must go through the same process under this bill that he goes through now—bank scrutiny on the loan, bank scrutiny on rediscount, safeguards to prevent errors of judgment in the making of the loan.

But, sir, the very essential quality of a period of inflation is that the standards which are applied in the exercise of that kind of judgment become modified by the optimism of the hour and grow less and less effective in checking the expansion of business as the period of expansion goes on.

Mr. OWEN. Would it interrupt the Senator if I should ask him a question?

The PRESIDING OFFICER (Mr. SAULSBURY in the chair). Does the Senator from New York yield to the Senator from Oklahoma?

Mr. ROOT. Certainly.

Mr. OWEN. The Senator concedes, does he not, that the extent of the loaning power of a bank depends upon the reserves required by law?

Mr. ROOT. So long as they are required by law and so long as the law is observed.

Mr. OWEN. That is an automatic limitation, is it not?

Mr. ROOT. No; it is not.

Mr. OWEN. The loans can be extended then beyond? Mr. ROOT. They can; and there is express power given here that they may.

Yes; a suspension of the reserve requirement Mr. OWEN. may be allowed, but that is apart from the general rule; and that is a rule which has been observed by the Bank of England, as far as the ministerial permit to ignore the law of 1847, and which three times saved them against a panic. It was put in as an extraordinary remedy. I only want to call the attention of | HITCHCOCK] is addressed.

the Senator to the fact that the normal power of a bank to extend its loans is automatically limited by the reserve requirement of the proposed statute.

Mr. President, I have been proceeding in what Mr. ROOT. have said to-day, and I proceeded Saturday last, upon the basis of the reserve of these banks, the whole estimate and calculation regarding which the Senator from Virginia and myself have been talking, was an estimate as to what would be the amount of issue that would be possible, observing the reserve requirement.

Mr. OWEN. Mr. President, the Senator has not observed that the amount of reserve money in the United States is insufficient to supply the reserve requirements imposed by this proposed act, and that it is of necessity to be supplemented by rediscounting from the reserve bank. This justifies the provision that the reserve notes may themselves be used for the reserve of member banks in order to meet the exigency of the limited amount of reserve money which is in the hands of the banks available for reserves.

Mr. ROOT. Mr. President, I have assumed there was a reason for that, and I do not dispute that assuming the system it is a fair reason. My proposition is that your system is one which, when you come to make it a practical working system, does leave open the possibility of this enormous inflation. However reasonable it may be to allow to the Federal reserve board. a power to permit the use of Federal reserve notes as reserves, power to suspend the reserve requirements-grant that it is necessary under your system-it but emphasizes the fact that you have a system here which makes indefinite expansion and inflation possible.

Mr. President, let me proceed with the specific reasons the Senator from Oklahoma gave to show that there would not be inflation. He refers to the necessity of putting up commercial bills. Of course, that is fundamental. That was the process which was necessarily a part of the data from which I argued on Saturday. The necessity to put up commercial bills or securities in one form or another is an incident to every period of inflation.

Then he proceeds with the six, seven, eight, and nine safeguards-I think that is the number-every one of which is a safeguard dependent upon the exercise of discretion and authority by the Federal reserve board.

Now, just what I complain of is that instead of our doing our duty as the responsible legislative branch of the Government of the United States we are shirking that duty and throwing it off upon a subordinate agency of the Government.

And, Mr. President, I called attention to a fact that I think I was entitled to mention. I mentioned it with good temper and with respect to the fact that the Federal reserve board would probably—certainly possibly—represent an idea that I think is false and injurious, and which I think ought not to be applied in the financial system of this country. Surely no one has a right to be offended with the expression of such a view. We all know, sir, that there are many people in the United States who believe in flat money. I do not class the members of this committee in that category; far from it; but we all know that there are many people who believe that it is the duty of the Government of the United States to print money and furnish it on easy terms to the people of the country, and who believe that it is not necessary to have that alleged money supported by anything but the flat of the United States.

Now, that is a theory of finance which is widespread, which I believe to be wholly erroneous, and which I believe a majority

of the Senate regard as wholly erroneous.

My proposition is that if we have a Federal reserve board that view, then no matter what the Congress of the United States thinks about it, under this bill, those subordinate agents of our Government can reverse the financial policy of the United States and put into operation that view. It is against that, sir, that I address my remarks. I am assuming that they will be honest men; I am assuming that they will have a right public spirit; but I am declaring that we hand over to them the exercise of a tremendous power that no one but the Congress of the United States should ever be permitted to exercise.

Let me turn to an observation made by the Senator from Mississippi [Mr. Williams], whose learning and acumen and public spirit I value very highly. After he had with much genial humor repudiated the position which I have taken, he proceeded yesterday evening to point out some of the defects in the pending bill-the Owen bill-and the first defect that he pointed out was one of the very defects toward the curing of which my amendment is directed, and one of the very defects toward the curing of which the amendment proposed by the section of the committee led by the Senator from Nebraska [Mr.

I had proposed following the views of the Senator from Nebraska and his associates and following the views of the Monetary Commission in a slightly different form, that we should put a brake on the issue of Government obligations by a progressive tax, increasing with the decrease of reserves.

The Senator from Mississippi said:

There is another point. There ought to be somewhere in any bill that is passed a provision automatically contracting the notes, withdrawing them from circulation.

That is what I urged by the hour on Saturday. That is what the Senator from Nebraska [Mr. Hitchcock] and his associates put into their form of the bill, which we have already defeated here under a motion to lay on the table. Senator from Mississippi proceeded:

Some gentlemen object to the word "contracting," no matter where you use it. There ought to be a provision automatically withdrawing that note when the need for the note had ceased. I think no provision was ever adopted better than that which characterizes the Reichsbank when, at a certain stage of the proceedings, the notes are taxed.

I still read from the Senator from Mississippi, for he has presented the argument in favor of making this a really elastic currency much better than I have done or can do it. He said:

currency much better than I have done or can do it. He said:

One of the men who appeared at the Academy of Political Sciences—
I have forgotten now who he was; I was not present; I never met him.
but I read what he wrote afterwards—made a suggestion which I think
is a very good one. You fix a reserve of 33½ per cent. He suggested
that wherever the reserve fell as much as 2½ per cent below the minimum there should be a tax of 1½ per cent. Thirty-three and one-third
per cent—take it at 33 for easy calculation—bring it down 2½ per cent
and that would be 30½ per cent, and there should be a tax of 1½ per
cent. Then when you went to 2½ per cent more it would bring it down
to 28 per cent. Whenever it fell 2½ per cent more it would bring it down
to 25½, and there would be a 4½ per cent more it would bring it down
to 25½, and there would be a 4½ per cent tax. Then if it fell still
lower, bringing it down to 23 per cent, there would be 4½ plus 1½,
which would be 6 per cent, and down the line.

He proceeded to say:

He proceeded to say:

I do not think that is necessary to this bill, because the board of control, the reserve board, is given the option of raising the rate of interest wherever it thinks it is necessary, and it will, of course, think it necessary whenever it will stop undue inflation; but I would rather have an automatic process, because this board is to be named by the President and to be consented to by the Senate, and I know—

I beg the Senate to observe this just and wise observation of

the Senator from Mississippi. He says-

and I know that this system will not be in operation long if the people want more money—and they are always wanting it—before a pressure will be brought to bear upon every Senator in this Chamber to use his influence with the reserve board in order to get them not to contract or in order to get them to consent to a further expansion.

Mr. President, that paragraph of the speech of the Senator from Mississippi states the whole case. The conditions under which a board appointed by the President and confirmed by the Senate will perform their duty under our system of government, and with our political habits, will be such that we can not rely upon their standing up against the pressure that will be brought to bear upon them to always expand, to never contract. broken reed; it is a futile hope; it is a long chance, which we have no right to take, that such a board will present a barrier against the popular, the agreeable, the demanded enlargement of the money of the country which we ourselves are now failing

Mr. President, the suggestion has been made that the currency would not be inflated because people would not want to carry off the money. That is not the way currency is inflated. It is not by people coming with bags and baskets and getting the money and carrying it off. It is that men go and borrow money on the basis of currency, and they borrow it by establishing bank credits. Your increased currency may not go out lishing bank credits. and be carried about the streets, but stay in the vaults of the bank and be drawn against, and the drafts be paid by transfers of credits, pyramided, piling up-just to go back again to the basis of figures that I laid down at the beginning of my remarks on Saturday-just as we have over \$17,000,000,000 of individual deposits in the banks of the country now and only a little over one billion and a half of money of all kinds in the banks of the

Mr. SHAFROTH. Mr. President, will the Senator yield to me for a question?

The VICE PRESIDENT. Does the Senator from New York

yield to the Senator from Colorado?

Mr. ROOT. Certainly.

Mr. SHAFROTH. Is it not a fact that the experience which we have had in this country is directly opposite to that which has been claimed both by the Senator from New York [Mr. Root] and the Senator from Mississippi [Mr. WILLIAMS]? Is it not a fact that the right to coin and issue money in the shape of silver was denied and rejected? Is it not a fact that the greenbacks were limited and contracted? Is it not a fact that the purchasing clause of the Sherman Act was repealed? Is it not a fact that the greenbacks, which were pure flat money at

the time they were issued, were made as good as gold by this Government? Was there any demand upon Senators to go to anybody or to cause expansion during all that time? That is the experience which this Government has had, and it seems to me to be absolutely contrary to the statement which has been made or the theory which has been presented by the Senator from Mississippi and by the Senator from New York.

Mr. ROOT. Mr. President, every one of those things was

done by the Congress of the United States.

WILLIAMS. Mr. President, one word. I uttered no statement with regard to historical facts and no theory that was not in keeping with what the Senator from Colorado [Mr. Differing from the Senator from New SHAFROTH] has said. York [Mr. Root], I think I can rely upon this board to withstand that sort of popular demand; but I do think it would be infinitely better to have the bill withstand it, to do it by legislation, and have it automatically appear in the bill.

This, however, must be remembered by the Senator from Colorado: He says that we finally did stop the amount of greenbacks in circulation at a certain figure. The Senator in that particular case has forgotten his history. After it was found that there were \$346,000,000 of greenbacks and an act was passed to forbid the further withdrawal of them, then, still later on, Congress passed an act to permit the further issuance of them. Congress did that in both branches, and the bill was vetoed by Gen. Grant. But for that popular demand you would have had a provision for an unlimited issue of greenbacks to-day upon the statute books.

Mr. SHAFROTH. But, if the Senator please, the power which was granted to the Secretary of the Treasury to withdraw that circulation and to cancel it was not subject to the appeal from Members of Congress, because he went on reducing it and reducing it, until it got down to \$346,000,000. Consequently, this vesting of power in the Secretary of the Treasury, like the vesting of power in the Federal reserve board, is likely to be exercised with a contrary view and in a contrary way than that which is expressed by the Senator.

Mr. WILLIAMS. Mr. President, I wish to add this: Of course, when the people found out what was going on they checked up the process of further contraction. Then they went still further, and made their Representatives and Senators demand an unlimited issue; and the Representatives and Senators accorded with their wishes, but the bill was vetoed by the President.

I wish, however, to say that that has nothing to do with a situation of this sort. I believe that this board can be relied upon, in its discretion, in the varying of the rate of interest up and down to suit the conditions of business and check undue expansion. That, however, does not prevent me from believing at the same time that it would be better to have incorporated in

the act itself a system which shall work automatically to do it.

The Senator from New York, however, goes a little too far. He seems to take it for granted that the natural result of having the power to issue notes upon reserves, which may be dispensed with, must necessarily lead to inflation. I wish to call the attention of the Senator from New York to the fact that up to the passage of the Peel Act in 1848 there had never been any reserves demanded by the Scottish banks, except what each bank thought it ought to keep, and there was no limitation upon the amount of asset currency that they could issue.

I want to call the Senator's attention to the fact that there is no reserve required to be kept in the Bank of France to-day; that up to-I have forgotten the date, but late in the nine teenth century-there was no limitation placed upon the volume

of notes that could be issued by the Bank of France.

A reserve board appointed of the character that we think will be appointed will not be men representing a popular clamor merely for more money, but they will be men rather fitted by their character, their history, and their attainments to withstand it wherever it is wrong and giving way to it only when it is right. The Senator from New York is, of course, right in saying that there is a possibility of their yielding to popular clamor, but I think the Senator is entirely wrong in assuming that it is more than a bare mathematical possibility. For example, the Senator a moment ago said that there was a great sentiment for fiat money in the country and that a great many people believed in it. I can not believe that the Senator believes that the present President of the United States, or any other President of the United States, will ever appoint upon a board of that sort even one man, much less a majority, who is a devotee of the doctrine of flat money. It is impossible for me to

believe, at any rate, that any President would ever do that.

Mr. ROOT. I congratulate the Senator from Mississippi on

the increase of his faith since he spoke last night.

Mr. WILLIAMS. I said last night that I did not think it was necessary to do that, because I thought the board could be relied upon, but I would rather have it in the act.

Mr. ROOT. We are in full agreement upon that; and I stand upon the reason given by the Senator last night when he said:

I know that this system will not be in operation long if the people want more money—and they are always wanting it—before a pressure will be brought to bear upon every Senator in this Chamber to use his influence with the reserve board in order to get them not to contract or in order to get them to consent to a further expansion.

The peculiarity about this, Mr. President—
Mr. WILLIAMS. I did not mean by that that the board would give way to that influence necessarily; I do not think it would.

Mr. ROOT. I congratulate the Senator upon the facility with which he deals with the observation which he made last night. It is quite beyond any possibilities which I have ever

The peculiarity about this board, to which we are going to intrust the performance of our duty, is that the members are to be selected from different sections of the country. Many sections of the country are exceedingly anxious for more capital. One of the troubles about our system—I will not put it just that way; but I will say one of the causes of complaint about our system—is that for a great many years men have been going from all parts of the country to New York, and Boston, and Philadelphia, and Chicago, and other considerable cities to get the money with which to develop their sections of the country. I myself, practicing law in the city of New York continually in the courts in the trial of causes of all kinds, have seen year by year for between 30 and 40 years a continual procession of men coming to New York to get money to develop the resources of their sections of the country. Ninety-nine out of a hundred have gone away angry and resentful because they could not get hard-headed, unconscionable bankers to treat their sanguine expectations as good security. That is one of the elements which has built up the feeling against New York that finds such ready expression in this

Chamber.
One of the things which is looked for from this bill is that the people of the country at large shall no longer be subject to the tyranny that is involved in having the owners of money require some security other than the expectation of success. One of the things expected from this bill is that the regional banks will be more sympathetic, more appreciative, more responsive to the needs of great areas of the country than the

bankers of New York have been.

The effect of that is going to be that every member of the Federal reserve board will come representing a section of the country, and everyone will have behind him a body of people whom by the terms of his appointment he, to a certain degree, represents, for where you have a board created with reference to sectional distribution, necessarily there is a representation of sections. Everyone will be under pressure from the people of his section to use his influence to turn the life stream toward his own home to encourage and increase the prosperity of business and to set on foot and to prosecute to success the great enterprises which the spirit of his people have organized; and everyone, in order to secure what his people demand for his section, will have to make concessions to his colleagues on the board in regard to the things that their people demand in their sections, and you have the give-and-take of sectional adjustment and mutual concessions going on there, as it is to some extent going on in Congress, but without the limitations of experience and responsibility to check it and keep it subordinate as in these great councils of the Nation. So, sir, it will have to be more than ordinary human nature that will enable this board to stand against the constant pressure for inflation that will be brought to bear upon them.

Mr. President, I do not wish to detain the Senate unduly, and I will close by correcting what I think are some erroneous views of the Senator from Virginia [Mr. Swanson], which were expressed by him in his speech a week or two ago regarding the action of the banks of New York at the time of the panic

The Senator from Virginia based his charge that the banks of New York had not treated the country banks fairly upon the proposition that they had enlarged their loans to the extent, I think, of \$85,000,000. I will say to the Senator from Virginia that I propose to put in some figures bearing upon his attack upon the banks of New York in a speech made by him a week or two ago.

The Senator says there were several million dollars due to

banks in the city of Richmond from banks in New York which

the Richmond banks were unable to get; that the banks in New York had enlarged their loans after the report upon the comptroller's call of August 22, 1907, and down to the comptroller's call of December 3, 1907, to the extent of \$85,000,000; and that the deficiency in reserves which existed and was alleged as a reason for not continuing the shipment of currency to the country banks after the 31st of October, 1907, was due to the enlargement of loans.

Mr. SWANSON. If the Senator will permit me, I will state

distinctly what I stated.

Mr. ROOT. I shall be very glad to have the Senator do so. Mr. SWANSON. This is from an article by Prof. Sprague, of Harvard University, who compiled these figures. It is an article included by the Monetary Commission in its publications. He says that for the week ending October 22 the bank statement showed a loan increase of only \$10,800,000; that during the next week it was \$60,000,000; and for the week ending November 9 it was \$38,000,000-a total of over \$110,000,000 for the three weeks. So for the three weeks prior to November 9-the suspension having been on October 31—the loans in New York had been increased \$110,000,000, from this statement.

Mr. ROOT. Mr. President, I will observe, in the first place, that there are no data there which make it possible for us to know how great a part of those loans were loans to country

Mr. SWANSON. If the Senator will permit me, if he will look on the same page in the same book he will find that during that entire crisis only \$104,000,000 of currency was shipped to the interior

Mr. ROOT. That is quite a different proposition. talking now about the expansion of loans. I say that the Senator does not give us the information. I tried to get it, but it is exceedingly difficult to secure, because it would require recourse to the books of each individual bank. The Senator gives us no information on the point—and I do not criticize him for that—as to how great a part of that increase of loans was in loans to country banks

Mr. SWANSON. If the Senator will permit me, I will approximate that. On the 3d of December, I think, when the report for all the banks was made immediately following the crisis, loans made to country banks were either in the shape of bills payable or rediscounted notes, and all in the United States at that time amounted to a little over \$100,000,000. That comprised all the discounts and rediscounted paper and bills payable from all the national banks in the United States

If half of that was in New York at that time following the crisis, it would be only \$50,000,000; if you were to assume that New York furnished half of all the discounts and bills payable that one bank has with another it would be liberal. statement has been furnished me by an expert. I do not know whether it is included in the book to which I have referred or

Mr. ROOT. That is a long distance from the situation on the 31st of October.

Mr. SWANSON. That was on the 3d of December and takes

in the rediscounting all during that period.

If the Senator will go further, there is a statement as to what was due by interior banks to banks in New York on the 22d of August. I think it was between \$50,000,000 and \$60,000,000. There was due them at that time \$460,000,000, making a balance of \$410,000,000 in their favor. The statement shows the amount due from one bank to another; and if the Senator will look at the statement of August 22, when it began, he will find that there was a balance due the interior banks of \$410,000,000.

Mr. ROOT. Still we have not any information as to how far the increase of loans between the 22d of August and the 31st of October consisted of loans to country tanks. Doubtless there was, and properly was, an attempt on the part of the banks of the central reserve cities to prevent the panic by enlarging loans. That is an axiom. It was one of the conclusions of the bullion report of 1811, which ever since 1819 has been accepted by bankers the world over, that discounts should be freely made in the face of the possibility of a panic, for the purpose of preventing failures which will set the trouble going. I have no doubt the banks in New York did that. But, sir, let me call attention to the actual cash situation.

Mr. SWANSON. If the Senator will permit me-Mr. ROOT. I beg the Senator from Virginia not to inter-

fere with me now. I wish to get in these figures.

I will ask, Mr. President, that the schedules from which I

read may be printed in the RECORD as a part of my remarks.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

Report of Comptroller of the Currency, showing the condition of national banks on Dec. 3, 1907.

DECEMBER 11, 1913.

Mr. ROOT. I will state the essential facts which the schedules exhibit.

According to the report of the Comptroller of the Currency showing the condition of the national banks on December 3, 1907, which was the lower limit of the panic, the cash which the central reserve city banks were required to hold by way of reserve was as follows

New York City, \$206,098,000. Chicago, \$56,591,000. St. Louis, \$26,774,000. New York had on hand, \$180,448,000.

Chicago, \$54,792,000.

St. Louis, \$21,826,000

Making a deficit in New York of \$25,650,000; in Chicago of \$1,797,000; in St. Louis of \$4.948,000. That is to say, in those three central reserve cities there was a deficit of reserves of \$32,397,000.

In all the principal reserve cities there was likewise a deficit.

In Boston there was a deficit of \$3,488,000.

In Philadelphia, \$5,897,000.
In Kansas City, Mo., \$1,191,000.
In Pittsburgh, \$1,026,000.
In Cleveland, \$562,000.

In Detroit, \$486,000.

This was on the 3d of December. This is where they were a month following the suspension of payment. There was about \$11,000,000 of excess taking all the reserve cities together, the

excess being almost altogether in the smaller cities.

Now, let us turn to the country banks, the treatment of which by the New York banks the Senator from Virginia has de-

nounced as unfair.

The country banks, the banks outside of the central reserve and reserve cities, had at that time an excess of cash of \$113,840,000 over and above their legal reserves. At that time, when the banks of New York were \$25,000,000 below their legal reserves, the banks of Virginia had 65 per cent in excess of their legal reserves in cash. Their required reserves were \$3,530,000 in cash. They had \$5,832,000.

The banks of Massachusetts were required to have \$6,748,000 in cash. They had \$10,707,000.

The country banks of New York were required to have \$14,066,000. They had \$20,424,000.

The banks of Pennsylvania were required to have \$20,253,000. They had \$32,796,000.

Mr. REED. Mr. President, what is the date of which the Senator is speaking?

Mr. ROOT. The 3d of December, 1907.

Mr. REED. I thank the Senator.

This was the date of the first comptroller's re-Mr. ROOT. port following the suspension of the shipment of currency.

Taken all in all, at the time when the Senator from Virginia denounces the banks of New York for not shipping more currency the country banks had 76 per cent in excess of the currency required for their legal reserves, and New York was \$25,000,000 short.

Mr. SWANSON. Will the Senator permit me to interrupt

him for a moment?

Mr. ROOT. Let me add one fact before I yield to the Senator. That is not all. It is not all the banks in New York that deal with country banks. It is only a portion of them—in substance, only the clearing-house banks. While the banks in New York as a whole were \$25,000,000 and more below their legal reserves, the clearing-house banks-that is to say, the banks that dealt with the Virginia banks; those banks upon which the demands were made-were, on the 30th of November, \$52,989,425 below their legal reserves. On the 23d of November they were \$54,103,600 below. On the 16th of November they were \$53,-666,950 below. On the 9th of November they were \$51,924,625 On November 2 they were \$38,838,825 below. On October 26 they were \$1,233,300 below.

You will perceive that while these country banks were hoarding currency to an amount almost double their legal reserves the clearing-house banks of New York, in which they kept their accounts and with which they did their business, were pouring out their lifeblood to help the country banks, going to the verge and beyond the verge not only of propriety but of audacity to save the situation and to permit the country banks to perform

their obligations to their customers.

Look at the figures. On the 5th of October the clearing-house banks had an excess over their required reserves of \$2,648,075; on the 12th an excess of \$4,655,450; on the 19th an excess of \$11,182,650; on the 26th a deficit of \$1,233,300; on the 2d of November a deficit of \$38,838,825; on the 9th of November a deficit of \$51,924,625; on the 16th a deficit of \$53,666,950; on the 23d a deficit of \$54,103,600. This was a deficit created in order to pile up more currency in the vaults of the country banks, which were hoarding it and withdrawing it from the business of the country

Mr. SWANSON. Mr. President, will the Senator permit me? Mr. ROOT. I shall be through in a minute, Mr. President. I was right in saying that the amount of actual cash which the country banks held in their vaults was an average of 76 per cent more than was required during that time.

Mr. SWANSON. At what date? December 3, 1907? Mr. ROOT. Yes; and the actual amount of money which they were hoarding in excess of their reserves was \$113,000,000 in cash. The Senator from Virginia was somewhat, I will not say sarcastic; but he thought little of the action of the New York banks in bringing gold to this country at that time, because he said gold came for the cotton and crops that were shipped abroad. Ah, yes, sir; but the New York banks had already paid for the cotton and the crops that were shipped abroad and which brought gold here, and those banks at the time of that panic paid a premium upon gold which they imported from abroad in order to keep the country from ruin, amounting to \$107,000,000. I think it comes with very poor grace from representatives of the whole United States, upon slight information and upon assumption, to cast aspersions upon a great body of the business men of our country whom the record shows are doing everything in their power to avert disaster.

Mr. SWANSON. Will the Senator permit me in that con-

nection?

Mr. ROOT. I will.

Mr. SWANSON. Here is the report of Prof. Sprague, of Harvard University, professor of economics, whose publication has been indorsed by the Monetary Commission, and who was hired as an expert by the Monetary Commission. Here is what he says in connection with those gold importations:

The significance of these large shipments requires some explanation.

That is, the shipment of currency to the interior, amounting to \$106,000,000 during the entire panic.

ceeds of commodities produced in the West and South which were exported to Europe.

That is, \$96,000,000 in gold.

The gold which was imported did not belong to New York; New York was merely the channel through which bills of exchange went out and gold entered. If New York had attempted to retain this gold, the gold-import movement would have ceased entirely and at once.

Now, that is what Prof. Sprague said, who is certainly a conservative man.

Mr. ROOT. How does the Senator know that he is a conservative man?

Mr. SWANSON. I know from his writings. I do not regard that the Monetary Commission, headed by Senator Aldrich, would have employed him unless he was conservative.

Mr. ROOT. If the Senator infers it from that writing, I should say he was a very reckless man. The Senator from Virginia too easily assumes the writing of some college professor as a sufficient foundation to cast aspersions upon the banks of New York.

Mr. SWANSON. I have that impression from the compliment the Senator paid to the Monetary Commission and the very splendid speech he made of the wisdom of its investigation and its policies. He was one of the special experts employed by the commission to discuss these matters and to discuss the question as to who was responsible for the panic of 1907. That commission evidently read it and approved it, for it submitted it to Congress for its consideration.

Mr. ROOT. It is evident that that commission was more broad-minded than the Democratic majority in the Senate, for they wanted to hear the discussion of the question from all

points of view.

Mr. SWANSON. I will say to the Senator, so far as the Democratic committee of this body is concerned, everybody was heard by the members of that committee, and special attention was given to every phase of this question, and especially to the representatives of the large banks and those of the city of New York, and it comes with poor grace from the Senator, when this committee has been here for two months giving the utmost consideration to everybody and was dominated by a majority of Democrats, to asperse it as being in fact narrow-

Mr. ROOT. I have said nothing about the committee.

Mr. SWANSON. The Senator said the Democratic majority.

Mr. ROOT. Not of the committee.

Mr. SWANSON. The Senate has never been able to have persons appear before it and testify. People could only be heard through the organ of the Senate, this committee, and the committee was considerate, the committee was fair, and it was the organ of the majority of the Democrats in the Senate. I have never known a committee to be fairer and broader and to give its time more conscientiously to the study of a question than it gave to this question when it considered it, and for such a length of time that many of us became impatient.

Mr. ROOT. The Senator from Virginia has repeated, in more felicitous phrases, precisely what I had already said about the

committee.

Now, let me go on with my figures. I ask leave to put in a table showing the loans and discounts of the clearing-house banks of New York City, as reported to the manager of the clearing house from the 3d of August, 1907, to the 28th of December of the same year.

The table referred to is as follows:

Loans and discounts of the clearing-house banks of New York City, as

Aug. 3	\$1, 126, 950, 000

Dec. 21	1, 165, 446, 000
Dec 28	1 147 694 000

Mr. ROOT. You will perceive, sir, that this is a schedule covering all those banks which dealt with the country banks, and in view of it the whole foundation of the criticism by the Those of the first two weeks were offset by Government deposits in New York banks, and as for the remainder, they were simply the pro-Senator from Virginia and his informant disappears. The loans 17th of August, 1907, were \$1,096,000,000, and on the 24th they were \$1.088,152,000. Those are the two amounts on either side of the 22d of August, the date of the comptroller's call, and on which the figures in the comptroller's report appear. The loans ran each week as follows, omitting thousands:

August 24, \$1,088.000.000. August 31, \$1,087,000,000. September 7, \$1,088.000.000. September 14, \$1,088,000,000, September 21, \$1.097,000.000. September 28, \$1,100,000,000. October 5, \$1,089,000,000. October 12, \$1,083,000,000. October 19. \$1,076,000,000. October 26, \$1,087,000,000.

So, sir, at the close of the last week, before they stopped sending currency to the country, the loans of all the clearing-house banks did not vary a million dollars from the loans on the 22d of August, the date of the comptroller's call.

Let me give it again: On the 24th of August the total loans of the clearing-house banks were \$1,088,152,000. On the 26th of October, at the close of the last week before the suspension, the total loans of the clearing-house banks were \$1,087,711,000.

So, sir, the clearing-house banks of New York, the banks concerned in this business, had not enlarged their loans. They had depleted their reserves. They had sent their money to the country banks, whose reserves were exceeded and which were hoarding money. The evils of scarce money to our country then were the result not of the action of the New York banks,

but of the country banks of the country.

Mr. SWANSON. Mr. President, I will not detain the Senate very long in replying to the Senator from New York [Mr. Root]. It is a remarkable position that the Senator has taken in this discussion. He says that the panic of 1907 was occasioned by the country banks.

Mr. ROOT. Mr. President, I have said no such thing. Mr. SWANSON. By the country banks hoarding their money and having larger reserves than they were required to keep.

Mr. ROOT. I have not said that they caused the panic of

1907. I said that they did hoard their money, and that the scarcity of money which resulted was occasioned by that hoard-

Mr. SWANSON. If the Senator's reason amounts to anything, it is that the hoarding by the country banks of more money than their reserves occasioned the panic of 1907, and thus the responsibility for that panic lies on the country banks and not on the banks of New York City. I can not see how the Senator's reasoning would amount to anything unless that is the substance of it. He takes the figures for December 3, 1907, when the panic started October 31, 1907. That was more than 30 days after. He r'ows that the country banks at that time had more than their legal reserves. That is true. Noboc has ever disputed that. His very statement in his former speech would have shown that to be true.

What did the country banks do? A part of that reserve was in New York and in central reserve cities, and was not available to meet their obligations and demands. No currency was shipped on these reserves. That was included 1, the reserve statement.

What was the position of the country banks? As I stated, the report of December 3 shows-and I hope the Senator from New York will listen-that the rest of the country had to contract its loans and had to force liquidation on account of the expan-

sion of loans in New York City.

Now, what does this show? It shows that the country banks
December 3, 1907, contracted their loans \$77,000,000. Why? Because there was over \$400,000,000 that they had due them in New York and they could not obtain any shipment of currency to pay it. It shows that the reserve city banks were forced to contract their loans \$59,000,000, making \$136,000,000 contracted between those two dates. St. Louis had to contract \$3,000,000, Chicago \$11,000,000. In other words, between the beginning of the panic-October 31-and the 3d of December the rest of the country was compelled to contract its loans \$150,000,000. is not disputed. And New York expanded its loans \$64,000,000 with over \$400,000,000 of money belonging to these other banks where the contraction was forced.

What does that mean? It means that in order to resume payment, in order to pay currency, in order to get the country on resumption, the contraction and liquidation in these reserve cities and the interior banks were forced, while New York was expanding her loans. It meant that business, that enterprise in New York were encouraged and that business and enterprise, mercantile and manufacturing establishments, in the rest of the country had to contract, had to liquidate, because the money l

due the interior was held in New York and payment was refused.

The report of the Comptroller of the Currency shows that instead of being an act of credit, an act to be approved, as the Senator from New York makes it, it was just the reverse. While New York was expanding her loans, the interior banks, because there was very little shipment of currency, were contracting their loans in order to get reserves sufficient to resume payment and meet their deposit liabilities. That can not be disputed.

Mr. WEEKS Will the Senator yield to me?

Mr. SWANSON. I will.

Mr. WEEKS. Has the Senator any figures to show to whom the New York banks were expanding their loans?

Mr. SWANSON. I think these figures from Mr. Sprague show; and the Senator knows that he is an expert.

Mr. WEEKS. I know Mr. Sprague.
Mr. SWANSON. Mr. Sprague says that they expanded their loans \$63,000.000 or \$64,000,000.

Mr. WEEKS. To whom?
Mr. SWANSON. Mr. Sprague says \$54,000,000 was on call
Mr. SWANSON. Mr. Sprague says \$54,000,000 was on call loans, which meant stock loans, on the stock market-loans for speculation.

Mr. WEEKS. How many stock brokers were paid? Mr. SWANSON. That the statement does not show.

Mr. WEEKS. Probably not.

Mr. SWANSON. It shows, as Mr. Sprague says, that \$54,-000,000 was loaned on call on collateral, which is usually under-

stood to be loans for stock speculation.

Mr. WEEKS. I think, if the Senator will investigate further, he will find that a large percentage of those loans were made

to country banks.

Mr. SWANSON. It is exactly the reverse. The loans were made on collaterals, Mr. Sprague says, and everybody knows such loans are made for speculative purposes. What is still such loans are made for speculative purposes. more remarkable, he says that they reduced \$11,000,000 of commercial loans. What kind of loans? Commercial loans; that is, one-name paper, such as notes given by Armour, Swift, and Morris, and other commercial concerns. This shows that \$11,-600,000 of commercial loans were called or contracted during that time, and loans of \$54,000,000 for stock speculation were

Mr. WEEKS. If the Senator will pardon me, his figures do

not prove anything, because—
Mr. SWANSON. They might not to the Senator, but they

do to me and to other people.

Mr. WEEKS. They will not to the Senator from Virginia when he knows all the facts. It is a common practice for reserve city banks to hold collateral owned by the country banks, and when a country bank wishes to borrow to put up its collateral against the loan. As far as those stock loans or bond loans, to which the Senator refers, and collateral loans are concerned, they may have been very largely for the benefit of the country banks. I do not know that they were, but the Senator does not know that they were not.

Mr. SWANSON. Does the Senator mean to say that the country banks were loaning money in New York when they were making every possible effort to get all the money they had on deposit there?

Mr. WEEKS. I think they were borrowing in New York because they could not buy domestic exchange and in that way replenish their reserves.

Mr. SWANSON. Here is another statement that is very significant: On December 3 all the banks in the United States report their rediscounts of that date as \$20,309,973.

Mr. WEEKS. Mr. President-

Mr. SWANSON. Wait; let me finish. Mr. WEEKS. Let me call the Senator's attention to the palpable inaccuracy of those figures. There is one bank in Chicago to-day loaning \$26,000,000 to country banks.

Mr. SWANSON. That is since and not during the panic of

Here is a statement given by an expert:

December 3, 1907, all rediscounts of national banks amounted to \$20,309,973; all bills payable, which is another form in which one bank will owe another, \$80,645,257. These are the two items under which banks conduct their transactions with each

other. It amounted to \$100,955,230.

Now, suppose half of what was due from them was due the banks of New York for loans or currency they had shipped to the country banks. This is a most liberal estimate. There was due \$438,208,265 on that date to the interior banks by New York banks. That is what was due the interior banks by the banks in New York as of the 3d of December, 1907, and as previously stated, all the discounts, rediscounts, and bills payable of all the national banks amounted only to \$100,000,000. If half of this, as previously stated, belonged to New York banks, it shows that these banks had eight times more money of the interior banks on that date than they had furnished accommodation to them.

These are figures taken from the report of the Comptroller

of the Currency and can not be controverted.

Now, what else does it show? It shows that up to the 3d of December New York had expanded its loans to \$63,000,000 and forced the rest of the country to contract to \$150,000,000 in order to resume payment by January.

Now, what did that mean to the country? It meant distress; it meant paralysis of business; it meant sales of all kinds of

securities and stocks.

I can not see how the country banks precipitated a panic, as has been alleged here. Suppose the country banks had had the money that was put on deposit in these central reserve cities, payable to them, in order to meet the crop moving; they would have continued payments and there would have been no panic in the country, no paralysis of business. The money was needed to move and market the agricultural crops. moving comes every year. It is just as certain as the seasons. The amount required for the purpose is usually \$200,000,000. This is not a guess. The banks must know that it comes; they must be prepared for it. It is just as much a demand as any other demand that can possibly be made when the country banks ask for it. The money on deposit amounted to \$410,-000,000 on the 22d of August. It was in cash. This demand was not unexpected; it was certain to come; it had come every year for the last 20 years, and the banks should be prepared to meet it. If they are not prepared to meet it, there is a depression in prices; there is a failure to move and market Consequently I said there was no unusual demand; there was no unexpected demand; but I say it was a demand which the banks ought to have been prepared to meet.

What was done? They suspended payment. The position I take is that the New York banks suspended payment too quickly; they suspended payment with \$224,000,000 of reserves. Some banks were below their usual reserves, while others were a little above their usual reserves. My contention is that they ought to have continued to pay their depositors until they had certainly much further depleted their reserves. Suspension of payment meant what? It meant paralysis and cessation of business in nearly every community in the United States. There were a large part of the reserves of this country, one-third of

the reserves of the United States, on deposit there.

Let us see what the Bank of England did. As I said before, the Bank of England at that time had only \$125,000,000 in its reserves. It practically held the reserves of all the banks in England. Did it suspend payment? No; it continued payment until its reserves were reduced to \$85,000,000; and the storm passed. No suspension was made in England. The New York banks never had less than \$215,000,000 in their reserves at any time, as I understand, and yet that \$215,000,000 was lying there absolutely useless for the purposes of trade, of commerce, and of business. That suspension by the New York banks compelled all the banks of the country, except 53, to suspend. We can not estimate the loss in business, in commerce, and in fortunes that it thus occasioned. I point this out to show the necessity of having our reserves put where there is a public responsibility and where people will not get frightened, where people will feel it their duty to stand up in the storm, animated by public considerations, and not entirely by motives of private profit.

All these facts are derived from the report of the Comptroller of the Currency. They show what I contended at the time, that the rest of the country liquidated, the rest of the country was compelled to contract; but New York was expanding; and the report shows that a great deal of this expansion was for stock speculation, \$54,000.000 of the money being on call on collateral loans, and \$11,000.000 contracted in a certain kind of mercantile securities. I say this shows conclusively that that system of reserves at that time broke down and that there is an urgent necessity for a change in the system as proposed in the

pending bill.

Mr. BURTON. Mr. President, will the Senator from Virginia yield for a moment?

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from Ohio?

Mr. SWANSON. I do.

Mr. BURTON. Naturally I have a partiality for the publications of the Monetary Commission, and I have a very high esteem for Prof. Sprague. I must say, however, that if he makes the statement that the gold which came to New York was to be transferred to the interior for payment for the movement of the crops, he has fallen into an error, because very large loans, amounting to tens of millions of dollars were made from abroad, on which gold was shipped, the ruling rate of interest being about 7 per cent and the commission paid for gold being about 1½ to 2½ per cent. An effort was made to borrow directly from the Bank of France, but that institution declined, expressing its willingness only to lend to the Government or to a banking institution which was the recognized organ of the Government. The Bank of France, however, did loan to bankers in England, and they in turn loaned to banks and trust companies in New York City.

Mr. SWANSON. Mr. President, I have not read to the Senator from New York what Prof. Sprague said with reference to that, and I wish to say that in the same treatise he makes the

following statement:

Summarizing the results of this analysis of the influences which led to suspension in New York, it may be said that it came about primarily because no real effort was made to prevent it.

Mr. ROOT. Mr. President, will the Senator from Virginia permit me to add one further set of figures to the statements which I have already put in?

which I have already put in?

The PRESIDING OFFICER (Mr. SAULSBURY in the chair).

Does the Senator from Virginia yield to the Senator from New

Mr. SWANSON. I do.

Mr. ROOT. I merely wish to make this statement: On August 17, 1907, the cash in the clearing-house banks in New York City was \$274,000,000. By November 30 this cash had been reduced to \$217,000,000—this covered the worst period of the panic—the greatest reduction in cash in the week at the height of the panic, from October 26 to November 7, and the cash reserve of the banks was reduced \$30,000,000. The total reduction from the 17th of August to the 30th of November in the cash actually in the vaults of the New York banks was \$57,000,000, so that the reduction of the reserves did not come from the enlarged loans, but it came from the sending out of cash.

Mr. SWANSON. If the Senator will permit me, I also wish to insert at this point a statement of Prof. Sprague, and I am satisfied this is a very fair compilation. He says in his History

of Crises under the National Banking System:

For the week ending October 26 the bank statement showed a loan increase of only \$10,800,000, but during the next week it was \$60,700,000, and for the week ending November 9, \$38,900,000, a total of only \$110,000,000 for three weeks.

At that time New York had ceased to take currency to pay its depositors who had reserves or bank deposits in New York. My contention was that while they refused to pay interior banks the money due them and ceased the shipment of currency, which compelled the interior banks to suspend during the three weeks prior to November 9, at that time they increased their loans \$110.000,000.

Mr. NEWLANDS. Mr. President, I have been greatly interested in the speech of the Senator from New York [Mr. Roor]. and particularly that portion of it which refers to his apprehensions regarding the expansion of currency under this bill, which, in his judgment, may amount to an inflation. I join with him in the view that whilst moderately expanding the currency of the country to meet the demands of increasing population and business we should avoid inflation, that kind of inflation which ultimately ends in contraction; and yet I hardly think the Senator is correct in stating that the dominating influence of a Democrat distinguished in this administration this bill in those provisions which he indicates will lead to infla-In a nonpartisan way, alluding only to parties historically and not with a view either of commendation or attack, I wish to call the attention of the Senator from New York to the fact that the financial history of the United States has been one of constantly alternating inflation and contraction, a record which no other civilized country has shared to the same extent.

Within a little more than a half century, when the world was suffering from a diminution in the output of both gold and silver from the mines, there came the enormous output of California and Australia, commencing in 1848. From 1848 to 1860 the output of gold from California was unprecedently large, and yet, instead of utilizing that gold at home, we allowed it to drift abroad for merchandise, contenting ourselves with the "red dog" and "wildcat" State currency which prevailed during that time. That was mainly under Democratic administration; and when the war came on we had practically no gold in the country and the financial system of the country, controlled then mainly by the States, had broken down.

Then, under the administration of the Republican Party, we commenced the creation of national flat money, called green-backs, and supplemented that by the issue of national-bank notes uncovered by coin, except in a moderate degree to the extent of 5 per cent, and secured by the national debt. During that

period an enormous expansion of the money volume took place. Then, after the war, at a time when the silver production of this country had largely increased, nature itself responding to our necessity through the enlarged output of the mines, the Republican Party stopped the use of silver, at that time not a discredited metal, for our action preceded that of Germany and of England in India. We struck down silver as a basic money metal, and to that extent deprived ourselves of the ability of easy resumption of specie payments. The world had not as yet repudiated bimetalism and drifted to monometalism. And in that movement our influence was the commanding influence. We did not yield to the influence and the power of other nations, but we led the way in this unnecessary act of self-sacrifice and suicide.

Then we commenced the process of contraction. Instead of realizing that the increasing population and wealth of the country would gradually bring us up to the full use of the expanded currency then existing, we commenced to destroy the greenbacks, with the result that during all this period, from 1870 up to 1894 or 1895, we were going through a process of contraction, which meant an increase in the purchasing power of the dollar and a diminution in the paying capacity of every unit of products, thus enlarging the value of money and increasing the burthen of debt throughout the entire country.

In this process of contraction, during which the property of the debtor was being turned over to the creditor, a great move-

In this process of contraction, during which the property of the debtor was being turned over to the creditor, a great movement, not for inflation but for a moderate expansion, took place, that expansion to be based upon a money metal recognized as such throughout the history of the world. That was at a time when the production of gold, which had increased during the California period from 1848 to 1860, had gradually declined until, according to the statistics, there was hardly sufficient current production of gold for dentistry and the arts.

It was at this time that a young man appeared in the political arena, a man of extraordinary capacity, eloquence, and power to persuade, of extraordinary integrity of purpose and determination of will, who led the forces intended to emancipate the entire country from the tyranny of the contracting money volume. He headed that movement which relied upon silver as the only available metal from which basic money could be made, gold itself at that time being notoriously inadequate. At that time the prediction of the mining engineers and the scientists of the world was that the production of gold would not increase; so that, with reference to those conditions, the movement was not that of inflation. It was simply a movement for moderate expansion of the money of the country so as to keep a proper proportion in value between money and products, between money and labor.

Was Mr. Bryan an inflationist then? He led our forces in 1896, and shortly afterwards—or shortly before, perhaps—the increase in the production of gold commenced. Gold, which in 1893 was produced to the extent of only \$150,000,000 annually, has since increased until now \$450,000,000 are produced; but who would have predicted that in 1893; who would have predicted it in 1896; and who would have predicted it in Mr. Bryan's second campaign in 1900?

Look back to the statistics of 1892 and you will find that the total money volume of this country, consisting of green-backs, gold, national-bank notes, and silver, aggregated less than a billion and a half dollars. Look at the statistics for 1912, 20 years later, and you will find that the money volume in this country was \$3,200,000,000, an increase of over 100 per cent during that period. The money volume of this country has more than doubled within 20 years, though the population has increased only 30 per cent

increased only 30 per cent.

To what is this due? To the largely increased production of gold, which has increased to such an extent that within 20 years more gold has been produced and has gone into the money volume than the accumulation of the ages. Could Mr. Bryan forecast that in 1892 or 1896 or 1900?

The part, then, that Mr. Bryan took in the campaign for bimetallism can not stamp him, as the Senator from New York intimates, as "the inflationist of the time." He was seeking only a moderate increase in the money volume of the world, to be furnished by the only metal which throughout the history of the world has stood side by side with gold as a money metal, the only metal which in its abundance promised to make up for the deficiency in the production of gold.

Here let me say that whilst this extraordinary expansion in the production of gold has taken place the production of silver has proved the more stable of the two during these years. The world produced about 160,000,000 ounces, I believe, in 1892. But little in excess of that is produced to-day. The contention, therefore, of Mr. Bryan and the Democratic Party was simply for the quantitative theory of money. Their insistence was

against either contraction or inflation. When the money volume was insufficient by reason of the demonetization of silver, they demanded remonetization of silver. When the production of gold so largely increased as to make up for the demonetization of silver, they abandoned their contention for its restoration. They were perfectly logical in both.

Yet, Mr. President, Mr. Bryan is held up as an inflationist; and apparently the Democratic Party, the party that followed him, is held before the country as an inflationist party. Let us see what the history of the Republican Party has been during this period of 20 years.

We were defeated in 1893 in our efforts to restore silver by the opposition of our own leader, Mr. Cleveland. During his time and in his administration, from 1892 until 1896, certainly we can not be charged with any legislation tending to inflation. How is it since that time?

The money volume of this country in gold, which was about \$500,000,000 in 1892 and 1893, has now grown to a billion and a half. A billion dollars in 20 years has been the expansion in the volume of gold in this country. That was a sufficient expansion to meet the demands of increasing business; anything beyond it would tend to an expansion that would prove an inflation.

What did the Republican party do? Did it retire its green-backs, which for the most part were uncovered by either gold or silver? Did it retire its national-bank notes, which were uncovered except to the extent of 5 per cent? Did the Republican Party pursue the prudential policy, which would have been pursued by any country in the world guided by the principles of political economy or monetary science, that when your basic money is increasing that is the time for the retirement of your uncovered money in the shape of paper money? Oh, no. Instead of diminishing its uncovered paper money it has increased it.

In 1892 we had but \$167,000,000 of national-bank notes. Today we have over \$700,000,000 of national-bank notes. The Republican Party, not content with leaving out the \$167,000,000 then existing, has permitted this vast increase to take place, not under preexisting legislation but under new legislation that stimulated the increase. Of old the banks could get circulation only to the extent of 90 per cent of the face value of the bonds they deposited with the Government.

Under the financial leadership of Mr. Aldrich they were allowed to issue 100 per cent, and so pari passu with the enormous expansion in the volume of gold, the dominant party permitted an enormous expansion in the uncovered paper money of the country.

You will find that of this vast increase in the volume of our money from 1892 up to the present day, aggregating \$1,700,000,000—an increase away beyond the demands of the increasing population and wealth and business of the country—\$1,000,000,000 is gold, which is the natural expansion, and over \$500,000,000, nearly \$600,000,000, is the artificial expansion that has been created by the issue of uncovered paper money in the shape of national-bank notes.

Mr. President, what are we suffering from? Contraction? No; we are suffering from expansion, inflation of our money volume—so much so that the prices of food products, which were steadily going down from 1886 to 1894 or 1895 or 1896, since then have been steadily going up. The unit of product is constantly increasing in value, whilst the unit of money in this extraordinary expansion and inflation has been constantly diminishing in value and purchasing power. Instead of having that moderate and proportionate increase to meet the increasing demands of population and wealth, we have had this extraordinary expansion under Republican administrations, amounting to positive inflation—so much so that every unit of money has gone down in purchasing power and every unit of product has gone up.

What has been the result? Constant readjustments between the employer and the employee. The employee year after year has been engaged in constant strikes with a view to increasing his wage, in order that his wage might keep up with the increasing price of products which he has been compelled to buy. So the cost of living has been steadily going up, while the wage of the wage earner has not yet gone up with the accelerated page of the products of the country and of the world.

pace of the products of the country and of the world.

That is the record of the Republican Party regarding expansion. That is the record of the Republican Party regarding inflation. Inflation always goes too far; the balloon bursts, and then the history of finance is that a period of contraction follows, with all its evil and destroying power.

Recollect that during this whole time the banks of the country have stood with the Republican Party in its policy of expansion and inflation. Why? I dare say they would have

gladly checked the production of gold, but they welcomed the increase in the volume of money which came from the issue of their notes. The inflation has come, not so much from the expansion of gold, which would have met proportionately the increasing demands of an increasing population and business, but from the expansion of uncovered paper money in this country, every dollar of which, in my judgment, ought to be gradually retired, not in such a way as to produce a contraction with its accompanying disaster, but by gradually using the in-creasing number of units of gold to cover the paper money that is outstanding, so that in the end every dollar of paper money, whether it is the greenback or the national-bank note, will be covered by 100 cents in gold.

When the world enters upon an era of diminished production of gold, then we can commence to diminish the amount by which the paper money will be covered. We can gradually diminish it in such a way as to keep out our paper money, so that perhaps it will have less cover than before, so that the number of units of money will either remain the same or will

increase in proportion to business and population.

Mr. President, these lessons ought to be very significant lessons to us in connection with this legislation. It is for this reason that I welcome the thoroughgoing work that has been done by both sections of the committee. I think perhaps it would have been a misfortune if the will of the dominant party had been so vigorous and strong as to enable us to push through currency measure without the necessary deliberation. I believe much importance is to be attached to what the Senator from New York [Mr. Roor] says with reference to the necessity of so carefully guarding this bill as to protect us from an expansion that will mean an inflation. What I object to is his allusion to Mr. Bryan as an inflationist. I insist that throughout the entire history of our monetary legislation Mr. Bryan has been just and prudent and wise, and never has been an inflationist in any sense. His steady advocacy of the quantitative theory, now vindicated everywhere, his steady opposition to the asset-currency bills that were before the country some years ago evidenced that. He stood everywhere against an inflation of bank currency. He has insisted that every dollar of money that circulates as a legal tender among the people shall be issued by the Government, taking the scientific view that the standard of all values, the volume of money, the number of units of money in existence under a government should be controlled by the government and not by the banks or by any private interest.

Mr. CLAPP. Mr. President-

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Minnesota?

Mr. NEWLANDS. Certainly.

If the Senator will pardon an interruption, Mr. CLAPP. of course, with the Senate remaining in session 13 hours a day it has been impossible for any Senator to be in the Chamber all the time and hear all that is said. I am somewhat surprised by some things that have been said, and I ask, for information, whether anyone has ever charged that Secretary Bryan is the author or is responsible to any extent for the terms of the pending bill? I had not heard the charge made. I am surprised, because it seems to me there is nothing in the past attitude of the Secretary with reference to financial matters which would warrant the assumption.

Mr. NEWLANDS. I do not know whether Mr. Bryan has

been potential in framing this bill or not.

Mr. CLAPP. I was asking the Senator whether or not it was claimed that he had been.

Mr. NEWLANDS. I do not know that it was claimed he was. It was claimed, as I understand it, that the Democratic Party was simply in this bill practically carrying out the views of a very prominent Democrat, characterized as an inflationist, whose name was not given, but whose individuality was clearly indi-

Now, Mr. President, I will say in all candor, that I have had some doubt as to whether the insistence of Mr. Bryan with reference to the issue of these notes by the Government instead of by the banks is the best thing for the Government. But that is a debatable question. I should dislike to see the Government put in the position of a primary obligor with the endless chain at work, as it was in 1893. I would much prefer under those conditions that the primary obligor should be the bank and that the Government should be the guarantor. But those are mere matters of detail.

Mr. SHAFROTH. Will the Senator yield right there?
Mr. NEWLANDS. Certainly.
Mr. SHAFROTH. The requirement of this bill puts the end-Mr. SHAFROTH. less chain on the banks to maintain the gold reserve instead of the Treasury of the United States.

Mr. NEWLANDS. I am aware of that, and that may diminish the objections to which I have referred. If that can be maintained and the banks always respond to the obligation the Government will not be affected. But I should very much deplore any condition under which the Government would be called upon

as the primary obligor to make this redemption.

Mr. President, to what extent have we expanded under Republican administration? In 1892 the loans deposited in national banks were \$1,753,000,000, and in 1912 they were \$5,825,000,000. The deposits of all the banks 20 years ago were not more than about \$4,500,000,000. In 1912, outside of the savings banks, they were \$12,000,000,000; and these deposits constitute the real currency of the country. That currency is created in this way: The banks give credit upon their books to a borrower, who thus becomes a depositor; and the depositor, who is the borrower, practically issues money whenever he issues a check in the payment of a transaction. So we have had not only this extraordinary expansion in the basic money of the country from \$1,500,000,000 to \$3,300,000,000 in 20 years, but we have had an expansion of bank loans from about \$4,500,000,000 to over \$17,000,000,000, of which \$12,000,000.000 is deposited in commercial banks, National and State. Every dollar of these bank deposits constitutes a practical currency through which the transactions of barter and sale are effected.

Mr. President, I think we have gone far enough in the process of expansion. I think we should address ourselves simply to the correction of the occasional bank panics and bank scares and the occasional seasonal stringencies. How can we do it? They always come from the alarm of the depositors in these

banks.

Mr. HITCHCOCK. Before the Senator proceeds to that point, I should like to ask him to state whether he thinks the effect of the pending bill will be to tend toward inflation? If he has not reached that point and expects to reach it, I will not interrupt him:now.

Mr. NEWLANDS. I am not prepared to say, because I have not examined those provisions critically. All that I can say is in the closing days of this discussion that I believe very care-

ful consideration should be given to that question.

Mr. HITCHCOCK. I should like to call the Senator's attention to a considerable difference between the provisions of the two bills reported by the Senate Committee on Banking and Currency and to ask him whether he does not think that the bill reported by the Senator from Oklahoma [Mr. Owen] does suggest the possibilities of expansion, if not inflation?

Mr. NEWLANDS. I will state to the Senator that I am not

prepared to give an answer to that question, because I have

not given it careful study.

Mr. HITCHCOCK. I want specifically to draw the Senator's attention to the bill reported by the Senator from Oklahoma. It provides that these Federal reserve notes, issued through Federal reserve banks, may be counted among the reserves of the 10,000 banks that are expected to join the system. If those notes can be so used, if the banks are permitted to hold them in their vaults as reserves, will not that inevitably tend toward inflation?

Mr. NEWLANDS. It would unless the reserve board limits and controls the amount of these reserve notes that shall be held in reserves. I can understand why there should be a reason for allowing these reserve notes to be held at the start, and perhaps for some years, in the reserves of these banks. We are about to inaugurate a system into which the State banks are to be invited. We propose to make all the national banks member banks under this regional system. We are met at the start with the fact that the national banks have an average reserve of about 18 per cent and the State banks have an average reserve of about 8 per cent. It is true we propose to diminish the required reserves. We propose to require only 12 per cent of the country banks, 15 per cent of the reserve city banks, and 18 per cent of the central-reserve city banks, making the average probably about 14 per cent, instead of the existing reserve in the national banks of about 18 per cent.

But with reference to the State banks that come under this system, they will be compelled to adjust themselves to this act. The reserve requirements under this act should be such that as to member banks it will not compel them to suddenly increase the average of their reserves from 8 per cent to 14 per cent. They could not get the money. You must either have a very gradual period, lasting over 5 or 10 years, in which they may bring those reserves up to the requirement of the law, or else you must permit them to count in their reserves these reserve notes; or else you will compel them to contract their loans so that the actual reserves which they have will bear the proportion of 14 per cent to their deposits. Recollect that a contraction in loans means a contraction in deposits in a corresponding degree.

Mr. HITCHCOCK. I want to say to the Senator-

Mr. NEWLANDS. If the Senator will permit me, he must see, therefore, that the bringing up of these State banks to the national banking requirements ought to be a slow one, or else it will result in a contraction of the loans, and a contraction of deposits, which would necessarily diminish the practical currency of the country. I have already referred to the fact that

bank deposits really constitute the currency of the country.

Mr. HITCHCOCK. After this system is in operation it is impossible to conceive of any contraction of loans, because when a bank is privileged to take its portfolio of paper to a reserve bank and secure currency upon it, it will be able to meet all possible demands of the borrowing public. So instead of being a contraction of loans the thing I think we have to con-

front is an almost inevitable expansion of loans.

As to the statement made by the Senator that the State banks are not required to hold reserves as large as national banks, that is true, and the testimony before the committee was almost invariably to the effect that, as a matter of fact, State banks have been holding about 15 per cent. I am speaking of the country banks. They have been holding about 15 per cent of

Mr. NEWLANDS. Let me tell the Senator that the statistics do not show that to be the case. The statistics of the last showing of the banks, both National and State, show that the average reserve held by the National banks was about 18 per cent, and the average of the reserves held by State banks, excluding the savings banks, was about 8 per cent.

Mr. HITCHCOCK. That may be so with trust companies and sayings banks taken into account, but not as to purely State

banks themselves.

I want to call the Senator's attention to the fact that State banks are permitted to hold in their reserves in most States national-bank notes, and as a matter of fact they do hold from \$60,000,000 to \$100,000,000 of national-bank notes in their vaults as reserves all the time. National banks are not allowed to hold them as reserves. For that reason they are kept in a

constant process of redemption.

Now, I want to ask the Senator if the inevitable result will not follow that if the 10,000 banks of the country in this new system, National banks as well as State banks, are permitted to hold Federal reserve notes as a part of their reserves there will be a permanent expansion of the paper currency for that purpose, and will not that be one of the very evils that he contends against here? Should not this legislation provide for the rapid presentation of these notes for redemption in order that they may become simply the instruments of trade and not become the means of permanently inflating the currency?

Mr. NEWLANDS. Mr. President, I will simply say that I have not made a sufficient study of that provision of the bill to be able to answer the Senator. The only purpose I have in the closing hours of this debate is to call the attention of the committee itself-and I have no doubt the duty will be wisely performed-whilst providing for the money necessary to meet these occasional bank scares and panics and the seasonal demands which are in excess of the ordinary demands, that they should be exceedingly careful not to let such paper issues remain out

so as to unduly expand the money volume of the country.

I feel that the money volume of the country has already been unduly expanded and that we are suffering from inflation. Whilst I wish to avoid what almost always follows inflation, contraction, and to avoid any legislation that will so contract either the money volume of the country or the bank loans or bank deposits as to aid in that contraction, yet I do think we should exercise the greatest care that we do not add to the existing inflation. I do not pretend to be able to go into statistics in this matter at all.

Mr. BURTON. Mr. President—
Mr. NEWLANDS. If the Senator will permit me just to go on with the few words I have to submit, I will conclude very shortly.

Mr. BURTON. It is in this connection that I desire to ask a question.

Mr. NEWLANDS. It must be very evident to the Senator that I can only answer in generalities upon this subject, as my information would not be sufficient to answer questions with reference to the specific provision to which the Senator rises.

Mr. BURTON. It is really but generalities about which I wish to ask. Does not the Senator from Nevada think that an expansion of credit, giving unusual inflated credit, has just the same unwholesome effect as undue expansion or inflation of the currency?

Mr. NEWLANDS. I think so. One follows the other.

Mr. BURTON. The two go side by side.

Mr. NEWLANDS. Always.

Mr. BURTON. So, if there is any danger of inflation of credit there is equal danger of an inflation of currency?

Mr. NEWLANDS. Of course; and I want proper guarantees against inflation of credit by proper bank capital and proper

Mr. President, we have only had two very serious panics within the past 20 years, but we have had a number of seasonal stringencies. Now, what caused the panic of 1893? Largely it was the result of the Baring Bros. failure, Values had been contracted in this country because our volume of money had not been increasing as compared with population and business

The Baring Bros. failure, in which were involved simply South American investments, caused a trouble in London which within a week caused a monetary stringency in New York, and within another week caused a monetary stringency in Chicago, and within another week in San Francisco-so marked there that a friend of mine with \$100,000 of United States bonds was unable to borrow more than \$7,000 upon them. This shows the interrelation of the various countries. That difficulty was largely caused by the fact that in England, in order to meet that emergency, it was necessary for England to sell her American securities, which caused a drain of gold from this country, to be met either by a sale of products at low prices or by furnishing the gold itself.

In 1907 the difficulty was largely psychological. We had been having rate legislation regarding the railroads of the country. In 1906 the railway managers of the country arrayed themselves against that legislation and they predicted the direst disaster from it. Their purpose was to influence legislation and to prevent the legislation that was pending. They did not succeed in preventing that legislation, which afterwards proved to be entirely beneficial, according to their own acknowledgment; but dld succeed in alarming their own stockholders both at home and abroad to such a degree that they threw their shares on the market.

The result was that in the fall of 1907, at a time when the banks of New York expected to make their usual call upon Europe for about \$300,000,000 of gold with which to move the crops of the country, they found that the European investors, alarmed regarding their railway and other securities, were thrusting them upon the market, and, instead of supplying them with \$300,000,000 to move the crops, were withdrawing the gold from this country which was the basis of our bank credit.

Mr. GALLINGER. Mr. President, would it interrupt the Senator if I should ask him a question?

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from New Hampshire?

Mr. NEWLANDS. I yield. Mr. GALLINGER. I am a listener in this debate and am getting a great deal of valuable information. My attention has been frequently drawn to the fact alleged both in the Senate and outside that the banks of New York were responsible for the panic of 1907, but I never heard it suggested that the railways were the responsible parties until now.

Mr. NEWLANDS. How can you account for the demand of

Europe for our gold during the year 1907?

Mr. GALLINGER. I am glad to have the banks of New York exonerated from these very grave charges which have been preferred against them for several years past and to have the

responsibility placed somewhere else.

Mr. NEWLANDS. Mr. President, it is not my aim to exonerate the banks, but to simply state the facts. The facts were that there was an extraordinary demand for gold from foreign countries and a sale of American securities in the American markets in 1907, and this sale of the American securities which were held abroad took place at a time when, unfortunately, the banks of New York were engaged in sustaining a large amount of so-called undigested securities, the securities to which Mr. Morgan referred in his testimony, the enormous issues of stocks and bonds, mainly of industrial corporations, which had been underwritten there by the banks themselves or by men associated with the banks, and which had to be sustained during this period of depression, and for which there was no market, so that they lay undigested upon the financial stomach of New York.

Mr. CLAPP. Will the Senator permit me to interrupt him? Mr. NEWLANDS. If the Senator will just permit me one

word further, I shall yield to him in a moment.

That was one trouble with New York. It had the money that had been gathered and sent to it from all the country banks, who were eager to get 2 per cent for their moneys which were lying idle in their banks, and the New York banks had used them largely in sustaining these undigested securities. They were expecting to get \$300,000,000 from abroad. I had that from one of the most eminent bankers in New York. They had been accustomed for years to get money from abroad for the purpose of moving the crops; they expected it then; but they found that instead of getting it Europe was thrusting upon the markets the American securities which they held. Then I asked the banker what was the cause of the thrusting of these securities upon our market. The response was that it was our rate legislation of 1906. I challenged that statement and insisted that the rate legislation had not been injurious to the railroads, but that, on the contrary, after 1907 the railway managers who had appeared before us, the very men who had been before our Committee on Interstate Commerce and who predicted the direst disaster, declared that the legislation of 1906 had been beneficial not only to the people, but to the railroads themselves. They then commenced to realize that the Government was dominant in railroad legislation, and instead of that regulation being used for destruction it was being exercised in such a way as to meet the just demands of the people without subjecting the railroads to loss. So, as a matter of fact, that legislation was not injurious or destructive.

What I insisted upon to him was that the clamor raised by the railway managers in 1906, which was intended to be operative upon legislation and to revent legislation, had its effect upon the stockholders of the railroads which they represented, causing alarm in them and forcing them to thrust their stocks upon the market. Thus they were the victims of their own clamor. I have been very anxious throughout this entire investigation that the banks themselves should not raise such a clamor with reference to the legislation which we propose as to alarm their own depositors, as the railway managers alarmed their stockholders in 1906-7.

These things are psychological. In that case the stockholders in this country and in all the world were throwing their stocks upon the market because they believed the statements of their own managers, who had the conduct of their properties, that the effect of that legislation would be destructive.

If the banks of this country at this time should pursue a similar course, raising a clamor against legislation which, in whatever form it passes, in my judgment, will be beneficial to the country, with a view to defeating it, the effect will be felt upon their own depositors, securing through their alarm the very results that they predict and the results which they themselves will deplore.

Mr. CLAPP. Will the Senator yield to me now? The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Minnesota?

Mr. NEWLANDS. Certainly.

Mr. CLAPP. Although the Senator has partially answered the question, I rise with reference to the statement he made a few moments ago, when he referred to the railroad legislation of 1906 as bearing upon the conditions of 1907. The Senator has practically refuted that; but I think if, when his New York friend had charged the disaster of 1907 to the legislation of 1906, the Senator had had in his possession the market reports, he would have silenced him at once. It is true that the railroad managers did predict disaster following the legislation of 1906, but I think, if the Senator had looked at the reports as to the market price of most of the American railway securities, he would, once and for all, have effectually silenced the criticism of his friend that there was anything in 1907 due to railroad legislation in 1906.

Mr. NEWLANDS. Well, but there was a marked decline in

the fall of 1907 in railway securities.

Mr. CLAPP. After the squeeze of 1907 came and men had to liquidate, of course there was a decline, but following the legislation of 1906, instead of there being a decline that brought on the squeeze of 1907, the market reports, I think, will justify the statement that as to the bulk of American securities there was no such decline and that some of the stocks sold higher. stead of being due to the legislation of 1906, the condition in the fall of 1907 in the price of securities was due to the squeeze

Mr. NEWLANDS. Yes; and that squeeze was largely caused by the sale of foreign securities in this country

Mr. CLAPP. But not railroad securities.

Mr. NEWLANDS. And due to the inability of the New York market to take care of them, carrying, as it was, this enormous mass of undigested securities.

Mr. President, I have already referred to the present indica-tions of an enormous expansion in the last 20 years, the

national-bank deposits during that time having increased from \$1,753,000,000 to \$4,072,000,000; the State-bank deposits during that time having increased from \$648,000,000 to \$2,271,000,000; the loan and trust company deposits during that time having increased from \$411,000,000 to \$3,262,000,000; and the total deposits having increased from \$4,600,000,000, in 1892, including all the banks, National and State, savings banks, trust companies, and so forth, to \$17,000,000,000 in 1912, an increase during that period of \$12,000,000,000 in total deposits, or an increase of 264 per cent, whilst the population had increased only about 30 per cent. If the check and deposit system, which is—
Mr. GALLINGER. Will the Senator restate the period his

figures cover?

Mr. NEWLANDS. Twenty years, from 1892 to 1912. With the check and deposit system, which is used in this country to a much higher degree than in any other country in the world, and which furnishes the people really with their currency, actual money being hardly used in commercial transactions, can you refuse to admit that we are at the apex of an enormous expansion unprecedented in the history of this country, which is the legitimate cause of the enormous increase in the prices of products and the cost of living in their relation to the value of the dollar itself?

Mr. CLAPP. Will the Senator pardon me if I ask him a question?

Mr. NEWLANDS. Yes.

Mr. CLAPP. The Senator bases the relation upon the increase of bank credits, or deposits, as he calls them, in comparison to the increase in population. That is not a fair basis for the relation. The fair basis for the relation would be to measure the increase of credits, which he calls deposits, with the increase in the value of the property of this country. Has the Senator collected the figures on that subject, as to what relation the increase in the deposits bears to the increase in the value of the general property of the United States?
Mr. NEWLANDS. No; I have not any such comparison, but,

of course

Mr. CLAPP. That would be the true test. If I own a farm to-day that is worth \$10,000 and in five years the fair value of that farm will be \$20,000, it is no inflation of credit that I might then have an equivalent increase of credit based upon the increased value of the property. It seems to me that that is a fatal defect in the reasoning of the Senator.

Mr. NEWLANDS. It is very hard to draw any parallel to which objections can not be made. I spoke of the population and also of business. I say there has been an enormously dis-proportionate increase in the credits and deposits as contrasted with the increase in population and in business, and that that necessarily means a diminution in the value of every unit of money and an increase in the value of every unit of property and products. I insist upon it that these values are inflated values and that the inflation has been caused by not only the increase of the basic money but the increase of the credits based upon that basic money, the inevitable tendency being to reduce the purchasing power of the dollar, which means, necessarily, that you increase the price of products and of property, for the dollar buys less of property, whilst the unit of property and of products buys more of money.

Mr. CLAPP. Mr. President, if the Senator will pardon me, he states that there has been a disproportionate increase in credits in comparison with the increase in business. There is only one test of business, and that is the volume of business, and of course that volume of business is largely based upon the volume of bank credits. It is true that values may be inflated, but when you take the credits and currency of the country and with them build 10,000 miles, for instance, of railroad, then that is shifted over into the building of cities, and that is shifted again into the building of factories, and while there may be an inflated value at some points, at some periods, surely the vast increase in the property that is created by the use of these credits and what currency we have must be the only fair test as to whether bank credits have increased unduly in proportion to the fair practical value of the property of the country.

Mr. NEWLANDS. Well, Mr. President, that is a very inter-

esting field of discussion in economics; but I am afraid it would take too much of my time and exhaust the patience of my hearers were I to enter into it. I simply adhere to my axiomatic statement, accepted by all political economists to-day as to the quantitative theory of money, that if you increase the number of units disproportionately to population and property you will diminish the purchasing power of each one of those units, and the diminution of the purchasing power of each one of those units is evidenced by an increase in the price of the products and the

property which they purchase.

What we want to do is to avoid either inflation or contraction. We are about to make a change in our financial system, and it is of the highest importance, whilst we avoid contraction, that we also avoid inflation. The committee has been extremely solicitous so to shape this bill as to save us from the horrors of contraction, and they are justified in that solicitude. I hope and believe that they will be equally solicitous in trying to save us from further inflation, and that they will also be intent upon saving us from the consequences of the existing inflation, not by an immediate reversal of the engine, but by such a moderate and gradual process as will maintain the stability of values until the country catches up with the extraordiinflation that has taken place.

Mr. HITCHCOCK. Mr. President— Mr. NEWLANDS. If the Senator will pardon me just one word further, I wish to say that if the production of gold is to go on as it is going on, and we maintain the diminished reserves called for by this bill, it will mean that every bank that has a dollar of gold can issue under this system \$8 of credit, and that credit is changed to a deposit. Then, you have a deposit of which your cash dollar is 12 per cent. You have \$8 of credit and

\$1 of eash.

If this production of gold is to increase, it seems to me it is incumbent upon the reserve board gradually to increase the percentage of reserves required. As the gold, the basic money, increases, instead of allowing it to stand as the basis for further expansion of credit by the issue of eight dollars of credit to one of gold why not raise the required reserve of 12 per cent to 13 per cent so that you can issue only \$7 of credit to \$1 of cash; and later, if the increase in gold continues, provide that the reserves shall be 14 per cent, so that you can issue only about \$6 of credit for \$1 of cash? In that way you will maintain your volume of credits without inflation. Of course, the figures thus given are not quite accurate. They simply indicate one method by which the reserve board can bring about this result if it has the power. I do not know whether it has been given it or not in this bill. I do not believe you have given it the power in this bill. It may be necessary to give it. The reserve board will thus have the power, by gradually increasing the requirements of the law as to the reserve to be kept by the banks, to prevent this gradual expansion of basic money from tending toward a vast expansion of credit which will result in inflation and later on in panic and contraction.

Mr. HITCHCOCK. Mr. President, will the Senator allow me

to interrupt him?

Mr. NEWLANDS.

Mr. HITCHCOCK. The Senator makes the statement that he hopes the committee will endeavor to protect the country from inflation. It is past the stage where the committee can do any-

Before the Senator from Nevada there are three bills. One is that coming from the House, which puts no limit on the amount of currency which can be issued, and which provides for that currency a redemption fund of gold or lawful money. Another bill is that reported by the Senator from Oklahoma, which provides no limit to the extent to which currency can be issued, and provides that the currency shall be redeemed in gold at the Treasury, and in gold or lawful money at the reserve banks, the reserve being only 331 per cent. Another bill is before the Senator, reported by myself, which seeks to provide a limit to the issue of currency, which provides that the redemption shall be in gold and gold certificates alone, which provides that the reserve shall be 45 per cent, which provides that when banks have had discounts to an amount equal to their capital stock they shall have no more discounts without paying an additional rate of interest, and that even then they shall not have discounts exceeding twice the amount of their capital stock. bill which I had the honor to report does not permit the use of Federal reserve notes as reserves in the 10,000 member banks. The bill which was reported by Senator Owen permits the use of those notes as reserves by member banks.

It is for the Senator from Nevada to say whether or not he wants to provide against inflation. If he votes for the bill presented by the Senator from Oklahoma, he votes for the use of the reserve notes as reserves in the 10,000 banks, and he votes for inflation. If he votes for the bill presented by Mr. OWEN, he votes for a reserve of only 33½ per cent or, possibly. 35 per cent, of which 33½ per cent is to be gold. He votes for no limit on the issuance of that currency except in the dis-cretion of the Federal board, composed of human beings, subject to the same influences to which other human beings are subject. If the Senator from Nevada votes for the bill presented by Senator Owen, he votes practically for inflation, in my opinion, or at least for a bill which contains within its terms the dangers of inflation.

It is past the time when the Senator from Nevada can say that it is for the committee to protect the country. It is for the Senator from Nevada to say whether he is for inflation or whether he is in favor of taking precautions to avoid the dangers of inflation.

Mr. NEWLANDS. Mr. President, my general view of this subject is that it is so complicated that it is very hard to settle it in an entirely rational and scientific way by the votes on this floor. We have here three classes of thinkers upon this subject. One class is composed of those who believe in the central-bank system, who have simply temporarily abandoned that contention because it is hopeless, and who have joined the Senator from Nebraska in the advocacy of a regional system limited in the number of banks to four and with stock publicly owned. On the other hand we have the regional-bank system proposed by the six Democrats upon the committee. On the other hand we

have the House bill in its integrity.

I do not expect to get very scientific results out of the votes of 90 men in this body if each one pursues rigidly his own view as to what should be done. There must be the spirit of accommodation somewhere, and we must ally ourselves with the measure that comes nearest to our views. None of these measures is entirely satisfactory to me. I have explained that again and

I make the same contention to-day that I made in opposition to the Aldrich bill. I advocate the plan I then presented, the only plan that was presented in opposition to that bill in either body at that time. I believe in it still, but I have not been able to persuade the Senate to take that view; and I must ally myself with one of these measures and with the friends of one of the measures. Otherwise one of the measures may by my cooperation with itseopponents be entirely torn to pieces,

We have gone through all the processes of deliberation and consideration with reference to getting the collective judgment of the party as to what is desirable, and we are now engaged in the final process. We have had consideration in the House committee, in the House caucus, and in the House itself. We have had consideration in the Senate committee, in the Senate caucus, and in the Senate itself. I believe the members of the committee are better qualified to adjust these differences than I am. They have had a long experience in going over all the details of the matter, involving a knowledge of the statistics of the subject. I hope that after this debate they will get together upon matters such as those to which I have referred, If they get together and have a committee meeting and fully consider all these measures and the amendments which have been presented and conclude that the bill does not require amendment, I shall be disposed to stand by their judgment.

I shall hope then that in conference, when the House bill and the Senate bill, differing radically from each other, are up for consideration in their entirety, full consideration shall be given to these questions, perhaps with expert aid, and that by this process we finally shall have a measure that is perfect, or

as nearly perfect as can be.

That is the reason I am standing by this measure. As I announced, the second section of the House bill was more satisfactory to me than the second section reported by either one of the sections of the committee, because it provides that there shall be not less than 12 regional banks, leaving it in the power of the reserve board to organize as many more as they choose. They could carry out my contention that there should be one organized in every State, capped by a Federal reserve bank here at Washington that would control at least one-third of the moneys controlled by the State associations. I am in doubt now, however, whether I should do that, whether I should signify my convictions upon that question by perhaps imperiling the section that is presented by the Democratic section of the committee, because I fear that if it should be successful the whole scheme of legislation would be thrown into confusion.

I have been very contentious about my views. I think Senators will agree with me in that particular. Perhaps I have been too contentious. I believe we ought to have a very simple procedure, and that this whole thing ought to be built up by a process of evolution, as were the powers of our national railway commission. I believe that many of the things in this plan we should leave to the recommendation of the Federal reserve board itself after experience has been acquired. I believe that our legislation to-day should be directed simply to the prevention of the occasional scares that produce local bank panics that gradually enlarge into extended bank panics, and to the seasonal demands which the expansion of the country may make for the movement of the crops, aggregating two or three hundred million dollars. I believe we can accomplish it if we will only mobilize in each State the reserves in both State and National

I want every State bank to come in and every national bank. I do not want a single bank left out. I will coax them in if I can not drive them in. I should not hesitate to use the interstate-commerce power of the Constitution to compel them to come in, but obviously Congress is not in that mood.

I claim that we can do it as an exercise of the interstatecommerce power. We can compel every State bank engaged in interstate exchange to come into this system as a matter of safety, just as we would put a safety device upon a State rail-I would not hesitate to exercise the power. is not in that humor, however. If I could not do that, I would coax every one of them in, for the reason that all these 25,000 individual banks, National and State, constitute links in our system of commercial exchange, and the strength of a chain is that of its weakest link. Therefore I would not leave a single one of the links outside of this system, with all the guaranties and security and safety devices that it provides; for I would fear that those that were left out, the weaker links in this chain of commerce, would themselves take away from the strength of the stronger links, and we would therefore lose many of the benefits we expect to get from this legislation.

I regard it as of the highest importance—of higher importance than anything else-that every State bank that is engaged in interstate commerce-and they are all engaged in interstate -shall come in under this system. If we are not to use the process of compulsion, then I propose to use the process of persuasion.

I insist that there is no need of the capital that is demanded, when we take from each one of the banks an amount equal to one-third of that proportion of its capital which constitutes its cash, and impound it under national control. Then we have all the capital that we require.

I would not make one of these institutions a profit-making institution. They are not entitled to profit. The cash which the banks now hold as reserve is cash which must be in the vaults of the banks, and which they can not loan out. They can not make money on it in their own vaults. Therefore they should not complain if they are told by the National Government: You shall not make money upon it when it is in our vaults.'

Then, having organized, and mobilized, and strengthened these banks in every State by the union accomplished in this way, which would involve investigation of the banks, bank examinations, and local democratic self-government, I would Federalize them after the manner of our Federal Government by taking the State associations and unionizing them in the form of a Federal reserve association at Washington.

As a safety device, I would take from the State banks onethird of the reserves which they have taken from the member banks, and I would put that \$166,000,000 in this national reservoir, to be poured out whenever a panic or a stringency assumes something more than a merely local aspect and takes on national and interstate proportions. Then, to relieve a local panic and a local stringency, I would give these banks the power of rediscount out of the reserves to a certain extent-rediscount by a utilization of Government funds aggregating \$300,000,000; rediscount by the use of the Federal reserve notes which can be issued by the deposit of only 35 per cent of gold, thus giving every dollar of the reserve notes three times the efficiency of the gold dollar itself deposited as security. Then I would give the reserve board the power of recommendation to Congress, and I would expect by a process of evolution, just such a process as we have gone through with reference to interstate transportation, to solve gradually all the difficulties that relate to the banking of the country.

Mr. President, I ask leave to insert as an appendix to my

remarks a table which I will present.

The VICE PRESIDENT. Without objection, that may be

The matter referred to is as follows:

RECESS.

The VICE PRESIDENT. The hour of 6 o'clock having arrived, the Senate stands in recess until 8 o'clock p. m.

The Senate thereupon (at 6 o'clock p. m.) took a recess until 8 o'clock p. m.

### EVENING SESSION.

The Senate reassembled at 8 o'clock p. m.
Thomas B. Catron, a Senator from the State of New Mexico, appeared in his seat.

## BANKING AND CURRENCY.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. OWEN obtained the floor.

Mr. SMOOT. Mr. President-

Mr. OWEN. Does the Senator from Utah desire to inter-

Mr. SMOOT. I was simply going to suggest the absence of a quorum, that there may be a quorum present, but if the Senator prefers to go on I will not do it.

Mr. OWEN. I prefer to go on. I wish to take just a few minutes. The Senator from Massachusetts [Mr. Weeks], I understand, desires to address the Senate on the banking and currency measure. I am going to take only a few minutes.

Mr. SMOOT. Very well.

The VICE PRESIDENT. The Senator from Oklahoma will proceed.

Mr. OWEN. I wanted to put into the RECORD, Mr. President, some figures that, I think, the RECORD ought to contain as a somewhat more complete answer to the argument which has been repeated by the senior Senator from New York [Mr. Root].

The Senator from New York again made the argument that the Federal reserve notes were in effect a fiat money. After the statement in the Record last night of the 12 lines of security behind these notes, it seems to me that it is entirely unjustified that he should again make the assertion that these notes are in the nature of greenbacks or fiat money

Fiat money is money issued without a reserve behind it on mere Government credit.

The objection to flat money is that it is so easy to use the printing press to turn out flat money that there is a constant temptation for legislators to manufacture fiat money to meet Government obligations. That is the reason why flat money is regarded by all thoughtful men as involving hazard and as being dangerous.

But these Federal reserve notes are secured by commercial bills of a highly qualified class, commercial bills made by a solvent and trustworthy citizen in the first place, based on an actual commercial transaction, indorsed by a responsible member bank in the second place, and indorsed by the Federal reserve bank in the third place. The Federal reserve notes have a reserve of 333 per cent in gold, these notes not being capable of being issued without the consent and active demand not only of the citizen, the member bank, the Federal reserve bank, and the consent of the Federal reserve agent passing on these securities, but in addition it must have the approval of the Federal reserve board.

The Federal reserve board has the right also to fix an interest charge on the loaning of these notes, and is further charged with the responsibility of fixing the rate of interest upon all loans made by Federal reserve banks, which include the loaning of these notes. These notes are required to be repaid either in kind or in a volume of lawful money equal in quantity whenever these commercial bills are paid, and they must be paid within 90 days. These notes upon passing into the hands of another Federal reserve bank are required to be promptly re-turned by such Federal reserve bank to the emitting bank for redemption. There is a very extraordinary line of safeguard thrown around these notes, as I explained more fully last night. So the Senator from New York is not justified in repeating this suggestion that they are no better than "greenbacks," or that they are flat money; and I enter my protest against that designation of these notes as flat money, secured as they are and kept at par with gold and protected against expansion.

The Senator from New York objects very strenuously to

trusting the Federal reserve board with the power of fixing the rate of interest and fixing the penalty for going under the He treats the Federal reserve board as if it reserve limit. were impossible to be trusted with such power, as if like power had never been trusted to any other board of like character.

I remind the Senator that like power is intrusted to the governor and the managers of the Bank of France. The Government employs and appoints the governor and managers of the Bank of France. Yet they have the right to issue 5,800,000,000 francs, and they constantly preserve a margin of a thousand million francs, which they do not trespass upon but which they keep for emergencies. From time to time the French Government has advanced the volume of the notes which are permitted to be issued by these public officers.

The same is true with regard to the Bank of Germany. directorate has the power to issue unlimited notes. It is true that when they issue notes against commercial bills those bills are under a 5 per cent tax, but it is also true that under this bill the Federal reserve board, charged with the duty of pro-tecting our financial system, have the right to put upon these notes a 5 per cent tax or a higher or lower tax. They are not limited to 5 per cent. They may raise the rate to whatever per cent they please or lower it as they find expedient.

So far from the gold supply of the country being in danger or being in any hazard, this Federal reserve board have the right to fix the rate of interest for all the Federal reserve banks in the United States, and by raising the rate of interest, just as the Bank of England raises the rate of interest, can attract gold to these shores whenever a national exigency requires, which is a complete and overwhelming answer to the apprehen-

sions of the Senator from New York.

Mr. President, we have not hesitated to trust great powers in the hands of various boards in this country. The Interstate Commerce Commission have very great powers over vast properties. Nobody has the temerity now to charge that board with an improper or an unjust or an unwise exercise of the great powers put in their hands. On the contrary, experience has demonstrated that we may trust that board with still greater powers, and they are now charged by the recent statute with the duty of ascertaining the value of the railway properties in the United States, and they are now engaged in making a physical valuation of the railroad properties of the United States with a view to using that valuation as a basis for fixing of the railroad rates in this country.

I have been somewhat amazed at our Republican brethren, who for all these years past have had in their hands the power to give the people relief against the unjust exactions of those who have controlled the credit system of the United States, and our Republican brothers have so far failed in the discharge of their obligations to the country, so far failed in their express duty to the country when they had power that the people of the United States were compelled in self-defense to retire them from power and to put in power the representatives of another party from whom the people might expect relief. We find it somewhat strange that those who only a short time since strenuously advocated the so-called Aldrich bill, which had for its obvious purpose the concentration of the powers of the banking world in private hands without any adequate Government control, are now strenuously telling us that they are violently opposed to the things for which they so recently stood.

Why, only during this session of Congress the distinguished Senator from Massachusetts [Mr. Weeks], a member of the Banking and Currency Committee of the Senate, introduced in the Senate Senate bill No. 7, which is the same Aldrich bill, which proposed to put the banking power of this country into private hands, proposed to put the credit system of this country

into private hands.

But now we find ourselves somewhat bitterly reproached by Members of the opposition on the ground that we who have framed a bill giving the Government Federal reserve board, consisting exclusively of representatives of the people of this country, entire control over this system, that we do not go far enough to suit them. We put the system under Government control, with three directors appointed by the Government on the managing board of the bank, who shall constantly be on guard against unjust action by the banks, but we are now told by those who advocated the Aldrich bill with private control that we do not now go far enough to please them.

They would now go so far as to urge upon us a plan which would defeat this bill in its operation by driving out of this proposed system the banks whose assent and whose approval and whose cooperation are necessary to the success of this measure. I say the present urgent advice of those who recently advocated putting the banking system under the control of private hands in the Aldrich bill is such as to defeat our public-control plan by driving the banks away from us by too harsh conditions. I do not impute improper motives. not impugn the motives of any man, but I say that if their advice should be followed in this case, if we should so far impose conditions upon these banks as to prevent their adherence to this plan, we would defeat this plan of public control of the credit system, and we would thus leave the control of credits in this country in private hands, where they are now.

Do not forget that, my fellow Democrats. If the advice so strenuously given to us by our political opponents should drive out of this system the national banks, should prevent the national banks from adhering to our proposed Federal reserve bank system, then the credit of this country would still remain under the control of private hands, and that result would be entirely consistent with the proposal of the Aldrich bill-S. 7—that boldly proposed to put this whole banking system in the hands of private persons without governmental control. There is at least that measure of consistency in the two plans urged upon us by our political opponents-both plans

lead to private control of the credit system.

I am reminded of the advice given to the country and to the Republican national convention by the distinguished Senator from New York as temporary chairman when he addressed the convention on the Aldrich bill. He said:

the convention on the Aldrich bill. He said:

The national currency, which the election of McKinley rescued from disaster at the hands of a free-silver Democracy, still rests upon the Civil War basis of Government bonds and is no longer adapted to our changed conditions. It is inelastic; its volume does not expand and contract according to legitimate demands of business. It subjects us to constant danger of panies which begin in speculation and end in paralyzing business. It facilitates and promotes the arbitrary control of a small group of banks and bankers with enormous capital and tends to an undue concentration of the money of the country in a few great money centers. Any possible remedy involves the study of world-wide finance, because we are no longer isolated and money flows from city to city and country to country in accordance with the laws of demand and supply and the attraction of interest rates. No Congress could by its ordinary methods get beyond the surface of the vast and complicated problem, yet the working out of a new system adapted to American conditions is of vital importance to the prosperity of the country and the security of every business and of every man whose support is directly or indirectly dependent upon American business.

Very sound doctrine; very good doctrine.

Very sound doctrine; very good doctrine.

For the solution of this question the policy of the Republican Party established a Monetary Commission, which has made a most thorough and exhaustive study of the financial systems of all civilized nations, of their relations to our own system, and for the establishment of a new system of reserve associations, under which the currency will be clastic, the business of the country will find ready sale for its commercial paper, the people of the country at large will exercise control instead of a little group of large bankers, and the danger of panics will disappear. The President—

Referring to President Taft-

has recommended the conclusions of the commission to the Congress, where the proposed bill is under consideration. It is for the interest of every business man in the United States that the party controlling the Government shall not be changed until this policy has been carried into

Mr. President, I call the attention of the Senate to the fact that the necessities of the country in this respect, well recognized by the whole country, were made the basis by the Senator from New York for proposing a bill which not only would not have given the relief the country was entitled to, but would have used the exigencies of this Nation as a means and as a pretext under the Aldrich bill for putting into private hands the entire control of the credit system of the Nation, because that is what the Aldrich bill would have done. Those who now advise us to pursue a policy which will break down the plan we have suggested, by preventing the adherence of the national banks, would assuredly leave the control of the credit system of the country where it is now-in private hands.

We have heard much about the danger of these Federal reserve notes, which are Government obligations kept at par with gold, first, by the banks, but, second, by the Government, secured, as I have shown, by 12 lines of fortifications against being an actual demand upon the Government. We have been told that to permit these notes to be reserve notes for the member banks would be extrahazardous. A new light has broken upon the eyes of those who drew the Aldrich bill, of those who urged the Aldrich bill, because the Aldrich bill made the notes of the reserve association, a private corporation, available for reserves. I call attention to the language of that bill, section 53, Senate bill No. 7 of the present session, which provides:

SEC. 53. The circulating notes of the national reserve association shall be received at par in payment of all taxes, excises, and other dues

to the United States, and for all salaries and other debts and demands owing by the United States to individuals, firms, corporations, or associations, except obligations of the Government which are by their terms specifically payable in gold, and for all debts due from or by one bank or trust company to another, and for all obligations due to any bank or trust company.

Under this Aldrich bill the bank holding the reserves of others could pay those reserves in these notes. These notes are thus made available for reserve purposes. I think no harm would have come from it, but I want to point to the inconsistency of giving these notes that quality and then strenuously and publicly reproaching us with such bitterness for our lack of wisdom in making it permissible for the Federal reserve board to permit these United States reserve notes to be used for the reserves of member banks.

Mr. President, I want to show the necessity for extra reserve money. I have shown it before, and I want to put into the RECORD again a table which has been compiled by the Treasury Department. If the Federal reserve act had been in force and the final period for transfer of reserves had been reached on August 9 last, the figures would show the following:

	Total res	serve required.	Requi	red in vault.	Cash actu-	
	Per cent.	Amount.	Per cent.	Amount.	ally held on Aug. 9, 1913.	
Country banks	12 15	\$399,328,455 276,223,743	4 6	\$133, 109, 488 110, 489, 496	\$250, 702, 980 240, 947, 005	
Central reserve city banks.	18	289, 692, 160	6	96, 564, 053	407, 519, 389	
Total		965, 244, 358		340, 163, 037	899, 169, 374	

It will be seen from the foregoing that the amount required for reserve would be \$965,244,358, while the amount of cash actually held in all three classes of banks was but \$899,169,374. Instead of creating an expansion, as Senator Root claims, this would require \$66,074,984 more than the banks actually possessed in cash which would have to be made up by a transfer of credits, an actual shortage of reserve money for the national banks alone of \$66.074,984. They would be compelled to redis-count from the Federal reserve bank in order to comply with the law. So instead of there being a necessary inflation under the reserve requirements of this bill there is a necessary contraction unless they comply with an opportunity to discount funds from the Federal reserve bank, which I assume they would do.

Mr. President, I made a set of tables, verified by the Treasury Department, as to the effect of the reserve requirements of this bill on the cash of the country. I ask that they be printed in the RECORD without reading.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The tables referred to are as follows:

PROBABLE READJUSTMENT OF CASH UNDER REQUIREMENT OF THE FEDERAL

The tables referred to are as follows:

PEORABLE READJUSTMENT OF CASH UNDER REQUIREMENT OF THE FEDERAL RESERVE ACT.

If all national banks enter the system and subscribe at the rate of 6 per cent of their capital (\$1,056,345,786) and surplus (\$725,333,629), or \$106,900,764.90, paying one-sixth in cash, one-sixth in three months, and one-sixth in six months, the Federal reserve banks will have in six months a paid-up capital of \$53,450,382, to which should be added about \$150,000,000 of Government funds, which will be deposited with the Federal reserve banks, making a total of \$203,450,382 cash, of which two-thirds could be used for discounting.

The relative proportion of subscription to the Federal reserve bank is as follows: Country banks, 55 per cent; reserve city banks, 26 per cent; and central reserve cities, 19 per cent.

Assuming that the banks will immediately avail themselves of the discounting privilege to the extent of one-third of this fund in the Federal reserve banks, the country banks will be entitled to 55 per cent of (one-third of \$203,450,382) \$67,316,794=\$37,299,236; the reserve city banks 26 per cent, or \$12,885,190

Should the banks avail themselves of this privilege to the extent of one-half of this fund, the country banks will be entitled to 55 per cent of (one-half of \$203,450,382) \$101,725,191=\$55,938,855; the reserve city banks 26 per cent, or \$24,48,549; and the central reserve city banks 19 per cent, or \$19,327,787.

In the event the banks should avail themselves of the discount privilege to the extent of two-thirds of the fund in the Federal reserve banks, the country banks would be entitled to 55 per cent of (two-thirds of \$203,450,382) \$135,633,588=\$74,598,472; the reserve city banks 26 per cent, or \$35,264,732; and the central reserve city banks 26 per cent, or \$35,264,732; and the central reserve city banks 26 per cent, or \$35,264,732; and the central reserve city banks 19 per cent, or \$25,770,380.

The reserve requirement and the probable readjustment of cash in the several cla

Mr. OWEN. These tables show, from a careful calculation of the cash on hand in reserve money, and the readjustment that would take place of the national banking system, that if the United States put in \$200,000,000 of its current funds in cash, in addition to the cash which the banks have, and the banks should avail themselves of the right to discount onethird of the resources which the Federal reserve banks have, there would be only \$18,000,000 of margin. If they should discount one-half of the resources which the Federal reserve banks have, it would leave a margin of only \$114,000,000 of cash for the 7,500 banks, or \$15,000 apiece. If the Federal reserve system should have the adherence of the State banks, and they should put in their proportionate part of the capital, and if they should discount one-half of the funds they contributed as capital and as reserve, there would then be a net deficit of cash because of the adherence of these State banks of \$239,000,000. So with a deficit of \$239,000,000 and with a possible surplus of \$114,000,000, there is still a deficit of over \$100,000,000. We are compelled, therefore, to have the right of rediscount, and we are compelled to do more than that-we are compelled to have the right to allow the Federal reserve board to the extent necessary to permit the banks to use national-bank notes and Federal reserve notes as member-bank reserves,

These notes are the best notes in the world. The Bank of England issues its notes in part against Government obligations. The Bank of France does likewise; the Bank of Germany does likewise. All the banks of Europe in part issue their notes against the Government debts, but these national-bank notes not only have dollar for dollar of Government obligations behind them, but they have, in addition, the assets of the national banks, and those assets amount to \$10,600,000,000 against an issue, in round numbers, of \$747,000,000. It is true, however, that each bank stands for its own particular notes.

Take a single bank that has a million dollars of capital and probably \$10,000,000 of resources. Such a bank would have a possible note issue of a million dollars, secured by a million dollars in bonds; but behind those notes, in addition to the million dollars in bonds, stands \$10,000,000 in securities, the property of the national bank issuing those notes, and, moreover, a double

Own vaults\_\_\_\_\_\_In Federal reserve banks\_\_\_\_\_\_ \$323 344 172 Own vaults\_\_\_\_ In Federal reserve banks ... 516

liability of stockholders of a like amount. Therefore we have many times over the values of these notes as security behind these notes, while the notes of other countries are content to have much less security. There are no better notes in the world than these notes. The Federal reserve notes are much stronger than the national-bank notes. There is, therefore, no reason why they should not be used as reserves. They are redeemable in gold; they are to be kept at par with gold by the Government of the United States; they are to be kept at par with gold by the banks, which are abundantly able to keep them at par with gold.

We should not have any misapprehension in regard to the difficulty of getting gold. We can get gold whenever we want it and in whatever quantity we want it by paying the interest rate necessary to hire its use. That is all there is about gold. You can buy the use of gold whenever you want it. That is what London does. When the Bank of England raises the rate and attracts gold from all the countries of the world which have gold to loan, because gold seeks the point of safety where it has the best interest-earning power, just as in the panic of 1907 we attracted from Europe all the gold that was necessary by paying the price that was necessary. We got it, and we can get it again. We will never again have such a need for gold in this country; but, as has been well pointed out, there is no country in the world that has such a volume of gold as we have. We have the greatest supply of gold in the world. We have the most productive country in the world. We have been attracting gold for the last few years at the rate of from \$100,000,000 to \$200,000,000 per annum.

Our gold certificates measure the constant growth of gold in this country. Our gold supply now amounts to over \$1,100,000,000 in trust funds, also an additional \$150,000,000 in the gold reserve, besides the very large volume of gold in the banks of the country. The national banks have about \$600,000,000 in gold, and the State banks have about \$295,000,000 in gold. There is also a large quantity of gold in the pockets of our people. So we need have no apprehension of getting gold.

The panic of 1907 caused such a shocking change in values that I thought it proper some days ago to put in the Record a table showing the gigantic fluctuation of prices during that panic year, as well as greater fluctuations between 1900 and 1908. (See table following.) I want to call the attention of the Senate to a few of these tremendous changes in stocks; not the stocks of little, inconsequential companies, but the stocks of such companies as Amalgamated Copper, with \$153,000,000 of capital, where the fluctuations ran from \$130 to \$33 in 12 months. What a commercial catastrophe that was! A fluctuation from \$33 to \$130, measuring the high point by the low point, is a fluctuation of over 300 per cent. The American Beet Sugar Co., with \$15,000,000 capital, fluctuated from \$36 to \$7. The low price as compared with the high price was less than one-fiftha tremendous fluctuation. Take the American Ice Securities Co., with a capital of \$19,000,000; it fluctuated from \$94 to \$8 a share.

Is it any wonder that the gentlemen who accumulated cash and cash credits and broke that market enriched themselves? The investigation has not been made, but it ought to have been made, and it ought to be made yet, to ascertain who it was that sold stocks and bonds in advance of that panic, and then, when that panic broke those stocks to the low point, invested their funds and multiplied their fortunes. The American public

would have an illuminating history if those disclosures should be made.

The American Telephone & Telegraph Co., with \$131,000,000 capital, broke from \$186 to \$88; the Baltimore & Ohio R. R. Co., with \$152,000,000 capital, broke from \$125 to \$55; the Erie Railroad, with \$112,000,000 capital, broke from \$52 to \$10; Great Northern broke from \$348 to \$107; the New York Central, with \$178,000,000 capital, broke from \$174 to \$89; the Union

Pacific, with \$195,000,000 capital, broke from \$195 to \$44; Westinghouse E. & M., with a capital of \$29,000,000, broke from \$233 to \$32. I ask that the table on page 6760 of the Congressional Record and the additional table I have here be printed in the RECORD without reading.

The VICE PRESIDENT. Is there objection? The Chair hears none, and that order is made.

The tables referred to are as follows:

Fluctuation of principal stocks during 1907.

Here these values are shown to fluctuate from the low to the high, not by ordinary percentages—5 per cent, 10 per cent, or 20 per cent—but by 100 per cent, by 500 per cent, by 1,000 per cent.

And yet these gamblers raise a howl of lamentation if anybody proposes to make stable these values, and appeal to high heaven in the name of the widows and orphans whose last dollar is invested in these precious securities.

Mr. OWEN. Mr. President, I did not intend to detain the Senate. I thought it was only proper to call attention again to the figures in this case, to the facts which have been verified by the Treasury Department at my instance, with regard to these reserves, showing that we have provided in this bill for a larger requirement of reserves than the banks have hereto-fore carried, because the reserves beretofore have been fictitious and now we are making them real. We will end the pyramiding of reserves in this bill, and, under the honest reserve requirements of this bill placed upon as high a basis as we can, with the money we actually have in order to make the constriction of credits unnecessary. We have thus drawn as conservative a bill as we could draw, and we have safeguarded it as far as we could by authorizing the Federal reserve board to permit to the extent necessary the use of these notes as

reserves, but only to the extent necessary.

Mr. MARTINE of New Jersey. Mr. President, through the courtesy of the Senator from Massachusetts [Mr. Weeks] I am permitted to trench upon his time for a few moments to present a matter which I feel is of the utmost necessity and

vital importance at this time.

I want to say, Mr. President, that I have the highest regard for the senior Senator from New York [Mr. Root]; in fact, the whole Senate shares in such esteem and regard. I have no desire to pose in the rôle of a financier, but as a layman I appreciate that the Senator's speech in this body a day or two ago was a very severe, and, I insist, an unjustifiable criticism of the bill and of the Democratic majority. The Senator knows in reason that this bill is sure to pass; hence his outcry is calculated to prejudice the sentiments of the country against our party and to create alarm among the people on the subject which we are to-day discussing.

I hold in my hand two newspapers, most conservative and reliable journals, published in the city of New York, the Senator's home. They are deemed authority on matters of finance and commerce. There are two editorial articles, one in the Journal of Commerce and the other in the Evening Post, which, I feel, are a complete answer to and an utter refutation of the Senator's charge and his cry of alarm and undue inflaof the Senator's charge and his cry of alarm and undue infla-tion. Each of them is about a column in length. I shall not ask the Senate to listen to them at this time; but I ask, with the consent of the Senate, that they may be printed in the RECORD as a part of my remarks.

The VICE PRESIDENT. Is there any objection? The Chair

hears none, and it is so ordered.

The matter referred to is as follows:

[Editorial from the New York Journal of Commerce and Commercial Bulletin, Tuesday, Dec. 16, 1913.]

Editorial from the New York Journal of Commerce and Commercial Bulletin, Tuesday, Dec. 16, 1913.]

[Editorial from the New York Evening Post, Monday, Dec. 15, 1913.]

[Editorial from the New York Evening Post, Monday, Dec. 15, 1913.]

SENATOR ROOT ON THE BANKING BILL.

The speech of Mr. Root in the Senate on the banking and currency bill has been read by most people, we imagine, with a feeling of perplexity. This bill has been before the public nearly six months. It has been under fire of the national bankers' convention, has been examined by numerous financial organizations, has been publicly discussed by antiadministration Congressmen, including some who had a hand in framing the Aldrich bill, and has been made the subject of exhaustive revision and amendment in the report of the Republican members of the Senate Banking Committee. But the singular fact is that none of these carcful, experienced, and more or less hostile critics have included in their objections to the measure the objection set forth in his three-hour speech of Saturday by Senator Root—that the currency provisions of the bill are in effect identical with those of the Bryan platform of 1896, that the note circulation would always expand indefinitely, and would never be reduced, and that the consequent perfectly inevitable inflation would be so prodigious as to wreck both public and private credit.

We say that the lateness of this discovery of what, if the facts are as Senator Roor alleges, not only supersedes every other objection to the backing fill she will be a substantial to the state of th

Mr. WEEKS. Mr. President, I wish it were possible for the Senator from Oklahoma [Mr. Owen] to discuss in an impersonal way the great economic question which is now before the Senate. He takes occasion from time to time to refer to the framers of the bill which was presented by the Monetary Commission, known as the Aldrich bill. I have not hesitated to say, and I say now, that in my judgment there was more merit in that proposition than in any proposition which is now pending before the Senate. An honest effort was made to leave the management of the system that would have been inaugurated if the bill had been passed in the hands of those who were competent to manage banking affairs, under the supervision of the Government. It is possible that we failed to accomplish that, but that was the attempt, and any language to try to change that is entirely unjustified.

I have not taken the time of my colleagues on the Committee

I have not taken the time of my coneagues on the committee on Banking and Currency or the time of the Senate to discuss that proposition, although I did introduce the bill at the be-ginning of this session, because I thought it would be well to have its provisions before the Senate, hoping that possibly there would be something in it which would attract the Senate's attention. It turned out that there was reason in that position, because very much of the House bill as it came to the Senate was taken bodily from the report of the Monetary Commission. I knew perfectly well, however, that it would be futile to attempt to pass that bill through the Senate or through this Congress, and therefore I have not attempted to bring it to the front, either in debate or in the committee.

I think, however, that the Senator from Oklahoma ought not to hold that up as a bugaboo to drive away Senators on this side from the support of this legislation. Those who have made the most violent attacks—if I may use that expression—on the proposition which the Senator from Oklahoma is fathering are those who never advocated and never have been willing to support the report of the Monetary Commission. It is unfair to them, unfair to the report of the commission, and unfair to the Senate to take the time of the Senate to try to indicate that they are the same men who drew and supported the report of the Monetary Commission.

There are several phases of the pending legislation which will be adopted when we come to a vote with which I am not in sympathy. I do not believe in redeeming in "lawful money." I do not believe the notes of these banks should be used as reserves. I do not believe the Government should issue these notes or that there is any necessity for it. I do not believe in

guaranteeing bank deposits.

There are two or three other very important propositions in this legislation to which I am opposed, and in opposing which I am sustained by my colleagues on this side of the Chamber on the Banking and Currency Committee, with one exception, and that is in the guaranteeing of bank deposits. It is that proposition which I wish to discuss to-night, because I feel very strongly upon it. If I did not feel as I do, I should not oppose my colleagues. I feel very strongly that it is a public policy which should not be undertaken, and I wish to put my views before the Senate so that they may, at least, be matters of record, because when this measure comes up for a final vote I hope to be able to sustain it.

I am particularly sorry that I can not agree with the Senator from Kansas [Mr. Bristow], who spoke to-day with all the earnestness of which he is capable, and with all the intelligence he has, in favor of guaranteeing deposits. I have a genuine regard for his judgment and opinions. Working with men as I have worked with my colleagues on the Banking and Currency Committee for two or three months, one can not help having genuine regard for their patriotism, for their intelligence, and for their industry. Therefore I regret all the more that I am put in the position of opposing them on this important question.

On the 5th of December in some general comments which I made on the pending legislation I referred to guaranteeing

bank deposits in using the following language:

The fund which will be provided in this case, whatever may be the regulations or arrangements made by the reserve board, is to apply to fisuring the deposits in all member banks. Fundamentally that is wrong, and can not be made right by any course of reasoning. To take from a fund provided in this way moneys which really should go to the Government and insure all classes of deposits in all kinds of banks is simply saying to the average depositor, "Place your money where you can get the largest return on it and we will see that you make no loss."

where you can get the largest return on it and we will see that Jumake no loss."

It is legislating and providing against the folly of the unwise. It is placing a premium on careless and unskillful banking. It encourages the withdrawal of funds from conservatively managed banks where anreasonable rates of interest will not be paid and transferring them to banks which will pay higher rates of interest than conservative management warrants. It makes the same provision for the savings depositors that it does for the protection of the extremely prosperous, who do not need protection. It does not in other ways differentiate between the character of deposits or the responsibility of depositors.

I now wish to take advantage of the notice which I then gave to further discuss this proposition. It has been stated, and I think with truth, that some banks are in favor of this proposition and that all of the people are in favor of it. I doubt the correctness of the latter part of this statement, because I believe some people have really thought about it and have reached the conclusion that, however much it might benefit them personally, a policy which is fundamentally wrong should not be undertaken. I further believe that if this question were carefully considered a great majority of the people would be against it, as they were in 1908, when the question was debated in the campaign of that year. It is one of the most taking and plausible of the many nostrums which are being dealt out to the public because their proposers believe they will be popular.

One of the reasons which has been assigned for guaranteeing bank deposits is that it will prevent panics, as people would feel secure and would therefore leave their deposits in the banks. I doubt if even this argument will stand the test of analysis, for having seen panicky people in times of great financial disturbance, I am convinced that nothing will prevent a frightened depositor from taking advantage of his legal right to withdraw his deposit from a bank. They do not always do this entirely because they fear the safety of the bank, but perhaps to a great extent because they fear they may want to use their money and can not get it when the necessity arises. For example: Experience shows that large numbers of people of comparatively small means take advantage of financial depressions to make investments in securities which at such times are selling on a low level. Stock and bond brokers would be united in their testimony as to the correctness of this statement,

and in such cases at such times, very largely at least, the purchaser pays for his purchase with cash instead of using a check; and on inquiry it is found that frequently he withdrew the cash some time before he wished to use it, depositing it in a safetydeposit vault, so that he might certainly have the funds at hand in case he wished to use them for such a purpose. Then, again, there are instances, some of which developed during the 1907 panic, where corporations having considerable pay rolls withdrew and kept on hand all the time two weeks' pay roll, instead of withdrawing their pay roll at the end of each week, as they would normally have done. This, of course, in cases where the law or custom requires that employees shall be paid weekly, and there are other prudent reasons, all of which add to the dis turbing conditions, which might be found for the withdrawal of money from banks in times of unusual stress. For instance: An examination of conditions which existed in the panic of 1891, 1892, and 1893 shows that people did not hoard greenbacks or silver certificates or national-bank notes to any considerable extent; although, substantially speaking, even at that time these forms of circulation had behind them the Government guaranty. But they did hoard gold and gold certificates, and in such a case as that a Government guaranty in any form would not have prevented people from drawing gold from the banks and hoarding it. We may not ever have to consider this phase of the question again, and yet I believe that the 1907 panic will demonstrate the fact that those who were drawing money out for hearding purposes did it because of their desire to use circulation rather than because they feared the solvency of the banks.

The way to prevent a currency panic is to establish a proper currency system which will respond to business needs. This will allay the fear of depositors to such a degree that I believe

we shall never have another currency panic.

Depositors in a bank are among its creditors. they any more entitled to have their deposits guaranteed than the individual who takes out a life insurance policy is entitled to have his policy guaranteed, or the person who holds a fire insurance policy is entitled to have it guaranteed; or, in fact, should the same principle not apply to any creditor as well as to bank depositors? Ordinarily the depositor in a bank makes his deposit for one of several reasons, or many, or all of them combined. The money which he has on deposit may have been borrowed from the bank, a portion of the loan having been used in his business and the balance left to his credit. Is there any more reason why he should be guaranteed, or his de-posit guaranteed, than his note should be guaranteed to the bank which has made the loan? Indeed a combination of such deposits in the shape of bad notes may be the reason for the bank's failure or getting into other trouble, and yet we guarantee the deposits, but give no consideration to the bank's stockholders, who must lose their stock and as much more before the depositors can lose a cent. In such a case the bank may have made the loan at a lower rate of interest on account of a portion of it being left on deposit, and quite likely it is paying interest to the depositor for a similar reason. I saw a statement bearing on this phase of the subject made some years ago Mr. James B. Forgan, president of the First National Bank of Chicago, which is a great commercial institution and quite likely represents with some degree of accuracy commercial banks generally:

The following figures recently taken from the books of the First National Bank of Chicago show the relation existing between that bank and its customers in regard to their deposits and their loans. In round figures the bank has from its customers a total of commercial and personal deposits amounting to \$38,000,000, and the total loaned to customers who are also depositors amounts to \$50,000,000, so that the bank's loans to its regular customers exceed their aggregate deposits by \$12,000,000. These figures show that a very large part of the bank's deposits is based upon loans made to depositors. Of the loans amounting to \$50,000,000 about \$10,000,000 could be made immediately available for liquidating an equal amount of deposits by simply returning to the depositors their own obligations as an offset to the amount of their credit.

This means that one-fifth of the loan made to the customers of the bank, who are its depositors, has been left in the bank. Quite likely when these loans were made the arrangement was entered into to leave a portion of the loans on deposit, and it may be that on those balances interest is being paid. If a loan has not been made or interest is not being paid on the deposit, quite likely the depositor, in consideration for keeping his account in the bank, is receiving other privileges, such as being furnished with foreign exchange or domestic exchange, or he may be having his checks collected without charge being made, and in many cases such collections are made at considerable expense. In fact, in almost every instance the depositor is receiving some direct return as the result of an arrangement entered into with his bank. Therefore his deposit is a business risk similar to any other and it does not entitle him to a guar-

anty any more than would he be entitled to a similar guaranty in other business transactions in which he is engaged.

It has been urged that deposits should be guaranteed to individuals because the Government, States, counties, cities, and towns require security against the money which they deposit in national banks. It is true that the National Government has required security in the past and that some other political organizations follow a similar course, but I have never been a believer in that policy; and if the Government had during the last 25 years deposited its money in banks as has other depositors, receiving 2 per cent interest on the deposit, it would have amounted to about \$50,000,000, and the possibility of loss would have been very slight, even if the department had not used any judgment whatever in selecting its depository, but had placed the money in banks without any discrimination. Even under those conditions the Government would not have lost 10 per cent of the amount of interest it would have received on account of its deposits; that is, if no judgment had been used in selecting depositories, the Government would have received \$45,000,000 more than it could have lost. I do not think, however, that States or other public organizations ordinarily require security. Certainly that is not the practice in Massachusetts.

The only instance I am familiar with in which a city or town has required security the bank was comparatively weak, but had received the deposit on account of its having been offered to public competition. In any case, however, if such public organizations do require security, they are in a somewhat different position from commercial depositors, because they seldom borrow from the bank as consideration of the deposit kept with it, and they have no similar business reasons for making a deposit without security which exists in commercial affairs. Those who deposit money in national banks or other commercial banks do it for commercial purposes which have nothing whatever to do with trust or savings deposits. Correctly speaking, savings deposits are those made by people of small means, very largely wage earners, who have not generally the knowledge or experience which justifies them in investing their own money, and frequently the amount they have to invest is so small that it must be combined with other similar amounts to make a total sufficient to invest in well known and established securities. would certainly seem that there are ample reasons for differentiating between that kind of a deposit and the deposit of a man engaged in commerce who has borrowed of his bank and left part of his borrowing to his credit. It has been urged that if the deposits in some banks were guaranteed and in other banks they were not, that depositors would withdraw their money from the banks where they were not covered by a guaranty and deposit in such banks as are covered by such a guaranty. This, to some extent, would be done. Of course, this would be done even if the same rate of interest were paid by both banks, though financially competent people would hesitate about making such a change if they were satisfied that the officers of their depositing bank were suitable men. Banking more than any other business depends on confidence. Before opening a bank account the individual ordinarily does, and certainly should, make every possible inquiry into the character and business methods of those who are to handle his money. He looks over the bank's statement to see if it indicates that the bank has been prosperous, and places his account in the bank which makes the best showing as the result of such investigation, of course taking into consideration the possibility which he has to get accommodation whenever he may need it. which is ordinarily a definite arrangement entered into between the bank and the borrower.

If any deposits should be guaranteed, they should be the savings of the wage earner; after these, moneys held for the benefit of widows and orphans and other trusteeships, and, lastly, the deposits in commercial banks. In many sections of the country these deposits are indiscriminately mixed and loaned on exactly the same kind of securities, and banks believe it is necessary to do this in order to supply the needs of their communities.

We have made no provision for savings deposits in the pending bill, and I believe in not doing so, because, in my judgment, real savings deposits should be kept in another class of banks than commercial banks. There are hundreds of savings banks holding many hundreds of millions of deposits, especially in the eastern section of the country. These deposits would not be guaranteed under this law, and if a savings bank happened to be located in a town where there was a national bank or a member bank having this guaranty, in time of trouble there would almost certainly be a run on the savings bank; deposits would be drawn out and put in the national bank for that reason, and that alone, as mutual savings banks do not ordinarily carry any reserve, would require the giving of the 30 days'

notice provided for in the law and much confusion and injustice, including the loss of interest which the depositor would Furthermore, if State banks do not see fit to come into the system which we are establishing they will be placed in an embarrassing position, because there are different laws in every State of the Union applying to State banks. The methods of inspection are different, the reserve required is not the same, and Congress has recently provided for postal savings banks, which now have deposits aggregating about \$37,000,000, and deposits are increasing at the rate of \$1,000,000 a month. These deposits are paying 2 per cent interest, so that instead of considerable amounts of money being sent abroad, as was done under old conditions, those moneys are now being deposited in postal savings banks. Therefore there is not the reason which formerly existed for guaranteeing bank deposits, for heretofore one of the principal reasons assigned was that there were many foreign residents who questioned the solidity of our banks and who sent their savings to Government banks in their native countries for safe-keeping.

It has been charged that national banks confess that their institutions are not secure when they oppose the guaranty of State banks on the ground that it would lessen deposits in national banks, and that State banks confess the same thing when they oppose a national guaranty. Nobody contends that any bank is absolutely secure, and it would be foolish to argue that a person would not be likely to deposit his money in a bank which had an absolute guaranty rather than in a bank which did not have such a guaranty if other things were equal; but when, as has been done, an advocate of bank guarantee says, "If you want to find whether banks are absolutely secure, ask the directors to give you their personal note to secure your deposit and you will learn that they will not bear the risk

which they ask you to bear."

I have frequently heard assertions of this kind made. Such a proposition is both ridiculous and demagogic. It is difficult enough to get good men to go on boards of directors of banks under present circumstances, because they have to assume a large degree of responsibility. Why should a director, who, possibly, is a comparatively small owner in the corporation, guarantee personally a depositor without a consideration for so doing, whether he thinks the institution is absolutely safe or not? Would it not be as reasonable to suggest to the creditor of any corporation that he ask a stockholder of that corporation to guarantee his account as it would be in the case of a bank? It is as legitimate to insure bank deposits, as I have said, as it is to issue insurance in any other form, and I have no doubt that there are guaranty companies which would engage in that business if a depositor wishes to pay a reasonable premium; that is, a premium commensurate with the value of the insurance.

The restrictions which are placed on banks are those which experience has proven to be wise not only for the protection of the depositor but for the protection of the banker himself, and the contention that when all people are careful about fire, fire-insurance rates will not be as high as at present, is undoubtedly true, and yet fire-insurance rates are absolutely based on the character of the risk—the rate on a detached house being different from that on a house made of the same material in a block, and the rate on a stone or brick house being less than that on a wooden structure. Not only are fire-insurance rates based on the quality of the structure insured, but frequently on the character of the owner or of the tenant. A man who has not a good reputation very often pays a higher rate, even if he can obtain an insurance at all, than a man whose integrity is absolutely good. The same reasoning will apply to life insurance. The rate depends on the age of the insured, and the insurance company reserves the right to reject poor risks, refusing to insure where the risk is considered hazardous. case which we are now considering, the depositors in every member bank would be insured and, although it will be claimed that member banks are protected by Government inspections, yet it would be nonsense to assume that one bank is as safe as another.

When we undertake a new Government policy, we should, if possible, look to the past for such guidance as experience furnishes. Until recently we have had in this country but one instance where such a program has been undertaken. That was in the State of New York, in 1829, when the safety-fund law was enacted. The guaranty tax under this law was one-half of 1 per cent on the capital of the banks. The law read that the fund should protect notes and other debts, and the courts properly considered deposits as other debts. These banks were recklessly managed, at least enough of them were so that failures became frequent, the fund became insolvent, and the plan was abandoned. While it is fair to admit that banks were not as

thoroughly organized or as well conducted at that time as they are now, so that no such immediate collapse would probably take place, that is the natural result of such a system; and if it is grafted on our national-banking system we will eventually, and quite likely within a short time, have a repetition of this

history, which would be a public calamity.

As I have said at another time, our banking and currency laws are materially behind those of European countries, which have been experimenting in one way or another to obtain the best results possible; but it is worthy of mention that in all of the experiments made by European countries, not one of them has ever attempted any such scheme as insuring deposits, in any form.

It has been charged that one method of preventing a bank taking advantage of the guaranty provision to make unusual promises is by restricting the rate of interest which it is allowed to pay on deposits, as is done in the Oklahoma or Kansas law, in these States the rate being limited to 3 per cent. I deny the business propriety of limiting the rate of interest which shall be paid on bank deposits, and especially in a general law which would cover the whole United States. Interest rates are very much higher in some sections than in others. Banks can afford to pay their depositors in some sections of the country 3 or 4 per cent, and in some instances 5 per cent, and still make a reasonable profit, while in the larger centers they can not afford to pay over 2 per cent, and very frequently less than that; so that if a general rate of 3 per cent were established it would be an injustice to the depositor in the locality where the bank might afford to pay 4 per cent or more and an injustice to the bank in the section where interest rates are normally lower than 3 per cent, because it would induce the withdrawal of money from these localities and the redepositing it in sections where the full 3 per cent rate is paid.

It is not possible, even at this time, to pass finally upon the results which have been obtained from the Oklahoma legislation or the Kansas law. They have not yet been in operation long enough to determine what the result will be. The experiment must be tried out through a term of years, must go through all conditions of business, good, bad, and indifferent, before it can possibly be used as a reason for a national guaranty system. this connection it is well to say that for several years the New York banks did not have any great difficulty with the law, be cause deposits were small compared with the bank's capital and note issues; but as the State increased in wealth deposits increased proportionally, and as the law guaranteed deposits as well as note issues the collapse finally came because business conditions had reached a periodical condition which produced a

series of failures which broke down the law.

It has also been urged that the stockholder and depositor are on a different basis; that there are many less stockholders than depositors, which, of course, is true; but that the stockholder has an advantage in that he has a vote to be used in selecting the officers who are to manage his banks. But the stockholder is also at a disadvantage, for while he takes his stock as a voluntary act, as the depositor makes his deposit, he not only, in case the bank is badly managed, loses the entire cost of his stock, but also an equal amount in addition thereto before it is possible for the depositor to lose anything; and if it is reasonable to insure the depositor, who frequently has the choice of many banks in which to deposit his money and who should use his best business judgment in making the selection of a safe one, why is it not as reasonable to insure the stockholder against loss by asking the stockholders in other banks to provide a fund to guarantee the stockholders in each bank against loss? It is also contended, because the Government provides a substantial guaranty against bank notes, that that is a reason for guaranteeing bank deposits. But they really do not belong in the same class. There must be no question about the soundness of circu-If there were, we would have the condition which existed before the Civil War, when there was a large variety of notes with varying and constantly changing values. Bank notes should be such that they will go readily into the hands of all classes of people without any question as to their soundness. A person does not have an opportunity to examine the quality of a bank's note. If he had to make an examination of the value every time he accepted a bank note, it would greatly retard business and would add materially to the cost of business. matter of fact, it would be impossible for him to make such an examination without a serious loss necessarily following.

An effort has been made to show that the big banks are opposed to this legislation. As a matter of fact, a large bank has no more reason for opposing a guaranty of deposits than a small bank. The interests of the large and the small banks are exactly the same. The sound banks would have no need of the benefits of this fund, and would never use it, while the unsound ones would build up their business at the expense of the sound

ones while the latter were making contributions to protect their unsound rivals' depositors. It would be an inducement to reckless men to start a bank with a limited amount of capital, make unbusinesslike propositions, and thereby obtain a large number of customers, and loan those funds in such a way that he would be the beneficiary if the concerns to which the money was loaned were successful, and would only stand to lose the money which he originally invested in the stock of the bank, which might be of very minor importance.

Guaranteeing deposits does not make a bank safe. The loans which might cause a bank's failure are made and are a part of the bank's assets long before the actual trouble takes place; and, therefore, if this guaranty were sufficient to pay all depos itors in the bank it would not prevent the trouble, but would simply provide a fund which would prevent final loss. The manner of investing this fund is of considerable importance. In Oklahoma it is being invested in the 3 per cent bonds of that State. Let us assume that the whole fund is invested in these bonds and that they are perfectly good. It is proposed to pay out bank deposits on demand as soon as the bank fails and reimburse the fund, if necessary, by additional taxation, but how is the cash to be obtained when the fund is invested in bonds which might not be marketable at the time. During the panic of 1907 it would have been impossible for the State of Oklahoma to have obtained circulation as a result of the sale of the bonds in this fund, so that if there had been bank failures the depositors would not have immediately benefited.

The amount of capital and the accumulation of surplus are factors in this consideration. The very fact that deposits are guaranteed would be a sufficient excuse for the reduction of capital to the lowest possible point, and, quite likely, to the paying out of the bank's surplus in dividends. Why should a bank attempt to pay dividends on a large amount of capital when the amount of capital has no bearing on the question of acquiring new business? Why should it attempt to build up a large surplus when the possession of that surplus does not, in any way, assist the bank to obtain additional business? And if a bank's surplus is divided, and the capital is reduced to the lowest point. it removes two of the present guaranties which depositors have, for the double liability which the bank's capital is subject to is of importance in proportion to the size of the capital, and as the surplus must be lost before depositors can make any loss themselves, it follows that the guaranty which depositors now have as a protection must be very largely removed.

Runs on banks are not generally fatal in cases where banks are solvent. In fact, I do not know a single instance where a sound bank has failed by runs on it. In the cases of the solvent bank the comptroller makes an examination and certifles to its soundness, or the banks in its neighborhood make an examination and come to its rescue, thus preventing it being obliged to close its doors

There are many other considerations which should be passed on before adopting such a policy as this. Our whole tendency is toward paternalism, but it will be generally agreed that it is not wise to provide for people in such a manner that they will not have to exercise their best judgment and discretion in business matters. The banker appeals for business, using various arguments, such as the amount of his capital, the accumulation of surplus which he has made, and, especially, through the personality of the bank's management; but if we are to adopt this system, all of those elements may be waived, and people, closing their eyes, may drop into the first bank they come to, make the best possible trade they can for the best rates of interest, or unusual accommodation, and feel perfectly sure that they are going to receive their money when they need it. If it is well to make the individual a nonentity, this may be a desirable move, but, in my judgment, he should be taught to be solicitous for his own personal welfare by keeping his eyes open and his mind exercised to protect his personal interests. It is a form of socialism which must be repulsive to anyone who deplores the socialistic tendencies of the day, and is added evidence that the socialist is looking to the State to provide for him what he has not been able to provide for himself. It recognizes the inequality of the capacity of the human being to successfully carry on the same character of enterprise, and asks the State, through its taxing power, to insure that the improvident, those who have not foresight and judgment and wisdom, shall be placed in the same category as the wise, the prudent, and the farseeing business man. Does our experience warrant extending this practice? Let us see. In addition to the New York safety fund there are guaranty laws in Oklahoma passed in 1908; in Kansas it went into effect in 1911; in Texas, January 1, 1910; in Nebraska it went into effect in 1911.

I have called to the attention of the Senate the results which

were obtained from the New York safety-fund law. It seemed

to work well for a few years and until we ran into the panic Then the banks commenced to tumble like so many ninepins, and by 1840 many of the banks which had cooperated in providing the fund had failed, the fund itself had become insolvent, and a similar attempt was not made again until it was taken up in Oklahoma in 1908 as a result of the panic of

the previous year.

I wish to submit to the Senate that the results in Oklahoma do not justify our adopting any such policy as is proposed in either one of these bills. Let me point out to you what they have been. Twenty-seven State banks have failed since 1908 in the State of Oklahoma, the number, in proportion to the number of banks in Oklahoma, exceeding any record of failures in the United States, even in 1893, when many banks in the western section of the country failed on account of the failure of crops and the general panic that existed at that time. The failures in Oklahoma had nothing whatever to do with any financial panic pending, because there has been none, or with the failure in crops in that State, although one or two years they have not been especially good.

During this time, when 27 State banks have failed in the State of Oklahoma during the last five years, there have been failures of but three national banks. These failures have been recurring and did recur with such frequency, especially in Oklahoma City, that they aggregated losses which amounted to \$1,750,000 June 30 this year, and the fund at that time was \$418,000 short, with only \$35,000 on hand to pay the \$418,000; so at that time the failures of banks in Oklahoma had caused a loss of \$2,168,000, which was 23 per cent of the capital of the

State banks of Oklahoma.

Let me show you in detail what has happened to some of the State banks which had a part in this insurance fund. In four years one bank with \$50,000 capital put into this fund \$13,000 in assessments; another bank having \$50,000 capital put into the fund \$10,000 in asssessments; another bank, with \$50,000 capital, put in \$15,000 in assessments; another, with a capital of \$10,000, put in \$1,300 in assessments; another, with a capital of put in \$3,000 in assessments; another, with a capital of \$5,000, put in \$2,255 in assessments; and another, with a capital of \$30,000, put in \$20,000 in assessments. I have pointed out the condition of the fund last June; its condition is worse I read from a dispatch from Oklahoma City December 7 of this year, as follows:

OKLAHOMA CITY, December 7, 1913.

OKLAHOMA CITY, December 7, 1913.

Declaring that the Oklahoma depositors' guaranty fund is seriously impaired by failure of the 112 former State banks to pay the balance of the 5 per cent special assessment in 1909, Assistant Attorney General J. L. Hull has filed a motion with the supreme court asking that the test case against the Farmers' National Bank of Cushing be advanced and assigned for some day this month. Hull alleges that the outstanding warrant indebtedness of the fund at the present time is \$692,777.76—

That is about \$200,000 worse than last June-

and that there is on hand but \$30,000 to meet the same. The suit of the Farmers' National of Cushing was instituted in a lower court and appealed to the supreme court by the State. It is being made a test case for the actions now pending against 112 national banks which have been converted from State banks to national institutions since 1909. The same question is involved in all the suits.

Including this additional \$200,000, which has been added by failures since last June, makes a loss of more than 25 per cent of the capital of the State banks in that State.

Here is a letter I have from the Comptroller of the Currency referring to the action taken by State and National banks in that State:

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, October 1, 1913.

Hon. John W. Weeks, United States Senate, Washington, D. C.

My Dear Senates, Washington, D. C.

My Dear Senates, Replying to the inquiry contained in your letter of September 30, you are advised that 312 national banks, having an aggregate capital of \$12,215,350, reported on February 14, 1908, the last call issued by the Comptroller of the Currency for reports of condition prior to the enactment of the Oklahoma guaranty law on February 17, 1908. On August 9, 1913, the last call issued by this office, 326 national banks, having an aggregate capital of \$14,330,000, reported from the State of Oklahoma.

In other words, the number of natonal banks in Oklahoma has been increased during that time by 14, and the deposits have increased something over \$2,000,000. As during this time national banks have not been increasing throughout the country, it is a pretty fair inference that the guaranty of deposits in the State banks in Oklahoma has not depreciated the value or the popularity or the strength of national banks there, for they have increased faster than the average throughout the country.

Since the adoption of the Oklahoma guaranty law 92 national banks have liquidated to become State banks, and 117 State banks have either been converted into national banks or national banks have been organized as their successors.

Now mark the time at which these changes were made. The law went into effect in 1908. Then it was going to be a panacea for all the troubles of the banks of that State. In 1908, 27 State banks liquidated and became national banks: in 1909, 55 State banks liquidated and became national banks; in other words, in those two years 82 out of a total of 92 liquidated and became national banks. In 1910, 3 liquidated; in 1911, 5; in 1912, none; in 1913, 2; in other words, since 1909 there have been 10 national banks that have changed into State banks and taken out State charters. Now exactly the reverse condition has been followed in the case of State banks. In 1908, 1 State bank changed into a national bank. That was the year of the adoption of the law. In 1909, 3 changed into national banks; in 1910, 8; in 1911, 66; in 1912, 22; in 1913, 17; in other words, after an experience of two or three years with the law, the State banks were taking out national charters as rapidly as possible.

In that connection I want to call attention to the fact that very many of the State banks of Oklahoma have not sufficient capital to become national banks; otherwise undoubtedly there would have been many more taking out national charters. example, the report of the bank commissioner shows that from January 1, 1910, to November 26, 1912, 114 State banks organized in that State. They will have a State bank at every cross-roads in time. The aggregate capital of these 114 banks was only \$1,987,000, or an average of less than \$20,000. Banks must have a capital of \$25,000 in order to become national banks; so, of course, many of those banks can not take out a national The bank commissioner of the State of Oklahoma charter.

There is a craze to start banks, and they are being organized in excess of economic need. The bank commisioner said a year ago that there were on file more than 300 applications for small State banks.

I wish to insert in the RECORD a complete statement showing the changes in the Oklahoma bank situation. It gives the number of State banks, the capital of the banks, their deposits, and the same figures for national banks. Before doing so, how-I want to call attention to a few more figures relating to this subject. In 1908 there were 470 State banks in Oklahoma; in 1911 there were 695, an increase of 255 State banks; in 1913 there were 596, or 99 fewer State banks than there were two years before. So far as the national banks are concerned, the reverse has been the case. There were 312 national banks in 1908; in 1911 there were 229; now there are 326.

The deposits and the capital of the State banks and the National banks have followed a reverse course. The capital of the State banks increased up to 1910. It is now over \$3,000,000 less than it was two years ago. The capital of the national banks decreased up to 1911. At that time it was \$2,000,000 less than in 1908, when the law became effective. It is now \$14. 000,000, or \$4,000,000 greater than it was in 1911, two years ago. I think if Senators will take the trouble to look at these figures they will have an object lesson in the workings of a guaranty system in a State where it has had time enough to work out the results which are sure to follow.

The table referred to is as follows:

Items in round amounts from Oklahoma bank statements. [Sums of money in millions.]

State banks.	Feb. 29, 1908.	Nov. 16, 1909.	Jan. 31, 1910.	Jan. 7, 1911.	Feb. 20, 1912.	Apr. 4, 1913.	Aug. 9, 1913.

Mr. WEEKS. I have already stated that last June the loss for the previous four years by Oklahoma State banks had aggregated 23 per cent of the capital of the banks of that State. The bank commissioner says:

The reasons of the heavy losses, as they have been narrated in the foregoing discussion, may be here summarily restated: (1) The banking department was for a long time in politics. (2) Unsound banks were admitted and guaranteed at the outset. (3) The record of bankers has not been properly traced. (4) There has been procrastination in closing insolvent banks and timidity in the face of losses. (5) Economic conditions have been somewhat adverse. (6) The guaranty of deposits has relieved depositors of all necessity for care in selecting

It is the commissioner of banking of the State of Oklahoma who makes that statement, and I call attention to the last statement, to the effect the guaranty has on the individual. Now, let me take up the case of Kansas. The Senator from Kansas [Mr. Bristow] said to-day that the law had worked well in that State, and I am bound to admit that that statement is substantially accurate; but I wish Senators to bear in mind that it has only been in operation two years. It has only been in operation about two years in Nebraska, and it has been in operation a little over three years in Texas. During those years there have been normal business conditions, so there has not been an opportunity to give them a fair test.

The State banks in Kansas may be guaranteed after they have been organized and in operation one year. It is voluntary in that State to come within the provisions of the guaranty fund, and a very small assessment is made-one-twentieth of 1 per cent-on the capital of the banks annually, and yet, with this voluntary arrangement in Kansas, an arrangement that works relatively well, there are only 472 State banks covered by the guaranty law and 446 State banks that are not guaranteed; in other words, substantially one-half of the State banks in Kansas have not seen fit to take advantage of this law; and the figures which I will submit, but will not read, relating to conditions in Kansas will show that while the number of State banks has increased somewhat faster than the number of national banks, and while the deposits and capital have increased somewhat faster, the guaranty law has not prevented a relatively good increase in the capital and deposits of national banks, and in all cases the capital of national banks is very much larger than the capital of State banks. For instance, the average capital of the national banks in Kansas is more than twice as great as the average capital of the State banks.

There is in Kansas a Bankers' Guaranty & Trust Co., established for insurance purposes under the laws of the State. think that is the only company of that character that has been established in this country. It is insuring the deposits of about 100 banks. I have not any evidence to indicate that the amount of business which this company is doing is increasing rapidly, but here is a concrete instance where a company has been organized and is actually doing business and is prepared to insure the depositors in banks under such conditions as to rates, and

so forth, as should govern in insurance. As I have said, the assessment on the State banks of Kansas

is one-twentieth of 1 per cent annually-

Mr. WILLIAMS. Mr. President-

Mr. WEEKS. I yield to the Senator. Mr. WILLIAMS. Merely for information I should like to ask if the Senator has any information as to the minimum and maximum premium charged by the insurance company.

Mr. WEEKS. No; I have not. I could not get those figures.

Nebraska has a remarkable record, Mr. President, in the case of both its National and State banks. It has been 15 years since there has been a failure of a national bank in the State of Nebraska. It has been 8 years since there has been a failure of a State bank in the State of Nebraska.

Mr. NORRIS. Mr. President— The PRESIDING OFFICER (Mr. Lea in the chair). Does the Senator from Massachusetts yield to the Senator from Nebraska?

Mr. WEEKS. I yield to the Senator. Mr. NORRIS. There was a failure of a national bank not two months ago in Nebraska-a very disastrous failure.

I am sorry, Mr. President, that the State of Nebraska has broken its record.

Mr. NORRIS. I am sorry, too, but I want the record

Mr. WEEKS The figures which I have here were prepared about two months ago, evidently before that failure.

Mr. NORRIS. Very likely.

Mr. WEEKS. But I do not recall any similar instance where a State, having more than 240 national banks and more than

700 State banks, can show that for 15 years in one case and for 8 years in the other there was not a bank failure.

The guaranty law applies in Nebraska in a very similar manner to the law in Kansas. I could show that that law is very much better than the Oklahoma law was originally, and is better, I think, than the Oklahoma law is to-day, after it has been revised two or three times; but even under these conditions, with the State bank depositors guaranteed in Nebraska, the increase of capital and deposits of banks under national charters has been going on relatively as fast as the increase in the case of the State banks-not quite so fast, but there has evidently been no particular movement to withdraw funds from national banks and put them in State banks because there was a guaranty in the case of State banks.

In Texas the guaranty law went into effect on the 1st of January, 1910. So far as the evidence submitted up to this time is concerned, it has worked about as have the Kansas and Nebraska laws, and the conditions there are substantially the same as in Kansas and Nebraska. It has not prevented a moderate increase in the capital of the national banks, in the deposits of national banks, and in the number of national banks; and yet there has been a little more rapid increase in all three of these particulars in State banks. Evidently when a new bank is to be started preference, other things being equal, is given to a State bank under present conditions; but I find no evidence to show that deposits are being withdrawn from national banks and placed in State banks because of this change. And in all of the States the increase in national banks is much more rapid than for the country at large.

If we pass the guaranty provision as proposed in both the pending bills, we will guarantee \$5,761,000,000 deposits in national banks, but we will not guarantee the deposits in State banks and trust companies or in the savings banks of the country. I said a few moments ago that if any deposits should be guaranteed, those deposits should be, first, the deposits in savings banks; second, the deposits in trust companies; and, third, commercial deposits. Yet we are proceeding in exactly the opposite way. We are proposing to guarantee commercial deposits and are not proposing to guarantee savings-bank and trust-com-

pany deposits.

As I have said, the national-bank deposits of date of August 9, 1913, were \$5,761,338,731.77. They would be guaranteed, without any regard to the character of the bank or the character of the bank's management. The deposits in 14,011 State banks on June 11, 1913, were \$3,081,011,582,79. The deposits in 623 mutual savings banks were \$3,769,555,330.59. The deposits in 1,355 stock savings banks were \$956,917,437.09. The deposits in 1,016 private banks were \$143,457,229.32. The deposits in 1,515 loan and trust companies were \$3,571,361,003.90, or a total in 18,520 banks which have not national charters on the 4th of June last were \$11,522,302,583.69. Those deposits would not in any case be guaranteed by the provision we are proposing to adopt. Even if this were a system which should be adopted by Congress, can we safely guarantee commercial deposits in national banks and leave without guarantee the deposits of the wage earner, the widow, the orphan, and the trusteeships in the trust companies and savings banks? It would, in my judgment, be one of the most deplorable pieces of business that Congress ever

There are guaranty laws, as I have said, in four States— Texas, Kansas, Oklahoma, and Nebraska. The aggregate de-posits in the trust companies and State banks in those States are \$305,000,000. Taking that from the \$11,522,000,000 leaves \$11,-217,000,000 on deposit in such banks outside of national banks, which would not be guaranteed if this bill becomes a law in its present form.

I have stated, Mr. President, that this method of procedure has never been undertaken, so far as I can find out, in any country in the world, and was never undertaken until 1908 in the United States, with the exception of the safety-fund law in New York. I can not find a record of any financial expert, domestic or foreign, who believes that it is a justifiable course to follow. I want to read a few extracts from the testimony of two or three well-qualified experts on that subject.

I will take, first, that of Prof. J. Lawrence Laughlin, head

of the department of political economy in the University of

Chicago, who says:

There is no more justice in laying the depositor's losses, for which he is not responsible, upon others who are also not responsible for the losses than there would be for A, who had been robbed by B, to ask that his honest neighbor C should be robbed to make up his loss. No matter how confidingly A had trusted B, C is not responsible for A's voluntary acts. Similarly, the honest and efficient banks can not in justice be asked to make up to a depositor in a failed bank losses for which the honest and efficient banks have no presponsibility whatever.

All reason, all justice demand that the punishment be inflicted on the doer of the wrong and not on the innocent neighbor. In fact, the ethical justification for taxing sound banks to cove the lapses of unsound banks has no existence whatever. It is unmoral.

A very well-known Canadian banking authority, of life-long experience, states the case in this form:

experience, states the case in this form:

The proposal hits at the roots of all morals in the matter of credit, because an effort to make by law the credit of one banking unit as great as that of another, and thus to counteract the essential principles which cause one banking unit to have good credit and another bad credit, is as mischievous as it is absurd. If such a thing were attempted, all the units which by their upright behavior have created for themselves good credit would have to retire from business or else submit to a scheme of cooperation which would give without consideration to other units who have been unable to creat credit for themselves a share of one of the most valuable assets in banking. Men cooperate for mutual advantage, but when cooperation is enforced by law for the benefit of some and to the loss of others, socialism in that particular matter has been achieved. Again, is it not clear that the tendency of such a law would be to cause banks to distribute their surplus profits? What would be the object of any bank accumulating surplus profits if the credit of all banks is to be allke, and how absurd it would be for shareholders to allow reserve profits to remain undistributed, if they were subject to attack in order to pay the losses of other dishonestly managed banks.

Mr. J. B. Forgan himself, who is one of the oldest and best-

Mr. J. B. Forgan himself, who is one of the oldest and bestqualified bankers in the United States, has testified on this subject. He has had a remarkable experience as a banker. He was born in Scotland, brought up in a Scotch bank, removed to Canada, and had experience under the Canadian system. In this country he has been, and is now, at the head of one of the largest and best-managed banks in the country. He has given testimony which should receive consideration from the Senate before it undertakes the guaranteeing of deposits. He says:

Anything that can be legally and equitably done to protect the depositors, to raise the standard of the banks and of the men engaged in the banking business, to protect the honest banker against the dishonest one, to keep those engaged in the business honest and to punish those who are dishonest, should be enacted into law, and the laws for such purposes can not be made too rigid. But to attempt to make all banks equally safe by passing a law that would establish an artificial credit for the incompetent and the dishonest, enabling them to offer all sorts of specious inducements to the public for business, and thus creating illegitimate and ruinous competition against sound and conservative bankers, would have in the long run contrary and disastrous results. By the passage of such a law the rascal would be tempted to become a national banker, and to cover himself with a mantle of credit which otherwise it would be impossible for him to acquire and which would be provided for him by and at the expense of all the good national banks in the country. This would not be a "square deal."

All newspapers have been referring to the question of guarant.

All newspapers have been referring to the question of guaranteeing bank deposits in a critical way. I have brought here to-night what seems to me to be a particularly good editorial on this subject, from the Washington Times. The New York on this subject, from the Washington Times. The New Yo Journal of Commerce is quoted in a part of the editorial. wish to send this to the desk, and ask to have it read and inserted in my remarks.

The PRESIDING OFFICER. Without objection, the Secretary will read as requested.

The Secretary read as follows:

[Editorial from the Washington Times of Dec. 12, 1913.]

## GUARANTEEING BANK DEPOSITS.

It is difficult to believe that a guaranty of bank deposits can be written into a seriously considered piece of national legislation. If it does get in, there will be justification for fear that we are getting back toward that hysteria which committed a good many people to financial fallacies, a few years ago, that they would hardly want to defend to-day.

Character is the basis of credit in the banking or any other business. A Government guaranty that eliminates the necessity and the value of character as an asset would be ruinous. It would encourage, even indorse and underwrite, the most reckless kind of speculation in the guise of banking.

Indorse and underwrite, the most reckless kind of speculation in the guise of banking.

How the guaranty of deposits would actually work is excellently analyzed in an editorial in the Journal of Commerce, which puts the thing in its simplest human terms:

"Suppose Deacon Jones and Deacon Brown preside over rival banks in XYZ town. Deacon Jones is a man of character, honesty, and sincerity, who regards the safety of his depositors' money as the first consideration and who would regard speculation with his depositors' money as a heinous crime. Deacon Brown, on the other hand, has a record of two or three failures behind him, has speculated with his own and other people's funds, but is now on his feet, for the time being, at the head of a bank, but there, possibly, by people who wish to use the bank and enlarge its deposits, that the bank funds may be put into promotion or speculative enterprises in which they and Deacon Brown are jointly interested.

"Deacon Jones says he will pay 2 per cent for money deposited on call and 3 per cent for money deposited on call and 3 per cent for money deposited on time, and that no bank can safely afford to pay more.

"Deacon Brown promptly bids 1 per cent higher for deposits.

"Now, suppose the church funds and the missionary funds are to be held on deposit until needed, and the question comes up which bank—the bank of Deacon Jones or the bank of Deacon Brown? If both men stand squarely upon their own feet, the money goes to Deacon Jones and the bank of character entitled to deal in credit. But if a deposit in both banks is guaranteed by the State, or by the Nation, the deposit must go to the bank paying the highest rate of interest. And to that extent Deacon Jones is out of business and Deacon Brown gets away with

the funds; and the church, the Government, and all the depositors have been guilty of an immoral business—partnership with unworthy men—partnership promoted directly by the Government guaranty.

"Deacon Brown is apparently successful for a time in paying 3 and 4 per cent for money, which he loans to adventurers and speculators jointly interested with himself. It is only a question of time when he is superseded in the XYZ village by a man more daring and reckless than himself, who bids yet 1 per cent higher for deposits and takes yet greater risks—all under the protection of the Government guaranty of deposits, removing individual responsibility from the depositor and promoting speculative, immoral, and iniquitous banking."

Mr. TOWNSEND. Mr. President, may I ask the Senator a question?

Mr. WEEKS. I yield to the Senator. Mr. TOWNSEND. In the course of the very careful study which the Senator from Massachusetts has made in reference to the guaranteed banks in the four States mentioned, did he investigate the question as to whether there was an effort made

to get the funds by overbidding for them?

Mr. WEEKS. At this time, in Kansas and Oklahoma, the rate of interest which banks may pay is limited to 3 per cent. There did seem to be evidence that there was overbidding for funds in Oklahoma before the present limitation was put in the law; but I wish to call the attention of the Senator from Michigan to what I have stated in another form, I think before he came into the Chamber. If in a national law we place a limita-tion on the amount of interest which can be paid, it will be doing an injustice to one section of the country or the other, because in the newer and developing sections banks might be able to pay 3 per cent or even 4 per cent for deposits, while the banks in the Past ordinarily can not pay 2 per cent and make safe leans or any profits on the business. Therefore if we do not make a flat rate it certainly would drive money from the East to be deposited in western banks where large rates may be paid, while if a flat rate were made of 3 per cent eastern

banks could not afford to pay it.

Mr. NORRIS. Mr. President—

The PRESIDING CFFICER. Does the Senator from Massachusetts yield to the Senator from Nebraska?

Mr. WEEKS. Yes; I yield.
Mr. NORRIS. In connection with the question asked by the Senator from Michigan [Mr. Townsend], I should like to suggest to the Senator from Massachusetts that it was shown here this afternoon by the Senator from Kansas [Mr. Bristow] that the law of Kansas permitted the State bank commissioner to fix the rate, the only limitation being that the rate should be the same all over a county, as I remember; and that in that State, while at first they had a flat rate, they changed the law and gave the commissioner the authority to change the rate and to fix it.

The reason for that was stated to be that national banks not under the guaranty law had come into localities and offered exorbitant rates of interest, higher than the laws would permit the State banks to pay. So, instead of these rascals and escaped convicts going out into Kansas and establishing State banks, they were, in fact, in national banks, trying to rob the people in

that way, where they had no guaranty.

The law proposed by the section of the committee of which the Senator from Massachusetts is a member, as I understand, does not pretend to fix a flat rate for the entire United States, but gives the board a right to fix the rate and to make all rules and regulations that may be necessary to put it into active

force.

Mr. WEEKS. It does not mention the rate.

Mr. NORRIS. No; but I take it that would be one of the rules and regulations. If there is any doubt about that, I should like to have the Senator's judgment on the matter.

Mr. WEEKS. It does not mention the rate.
Mr. NORRIS. Not by name. But does the Senator contend that they would not have a right to fix the rate?

Mr. WEEKS. I very much doubt it. That matter was not mentioned in the consideration of the subject in the committee. Mr. NORRIS. I think myself they ought to have that authority.

Mr. WEEKS. I am not in favor of any board in Washington fixing the rates of interest which shall be paid by the independent banks in any part of the United States.

Mr. NORRIS. Then, is the Senator in favor of having what he was arguing against, as I understood—a flat rate that would cover the entire United States?

Mr. WEEKS. I am not in favor of having any rate at all.

am not in favor of guaranteeing deposits.

Mr. NORRIS. I understand the Senator is not. But if a guaranty deposit law is had, we certainly should have the benefit of the expert wisdom of the Senator in trying to make it as good and as workable as possible. If we are not to have a flat rate—and I have been satisfied, from the argument of the Senator, that we ought not to have a flat rate all over the United States-then there ought to be some regulation by which the rate could be established. What would be the objection to giv-

ing to this board the right to fix the rate?

Mr. WEEKS. In the first place, I am not in favor of guaranteeing bank deposits. In the second place, I doubt the advisability of putting in the hands of a board in Washington the power to fix interest rates throughout the country; yet I am frank to say that unless that is done I fear, under certain conditions, the drawing of large amounts of money from State banks and trust companies and savings banks to get under the cover of this law.

We can not estimate, neither can the Senator from Kansas estimate, what the results of a system of this kind would be under conditions of stress. Things have been moving smoothly in Kansas since this law became effective. They have not had any opportunity to determine whether or not, under other conditions, it is going to work well. I am willing to take his statement that it has worked well, relatively, up to this time, and he certainly is an enthusiastic advocate of the plan; yet he has

not been able to convince me, though the law does work well at this time, that it should be incorporated in this bill.

Mr. NORRIS. Mr. President, I think all of us will agree to the proposition the Senator has laid down, that no man can tell now just how this or any other law that has not been tried extensively is going to work out; and perhaps it is too early to say just what the effect of the law in Kansas or in Nebraska or in Texas is going to be. On the other hand, the Senator has paid a great deal of attention to the law of Oklahoma; and I believe it was conceded at the beginning that that was a law which no careful legislator would try to put on the statute books. Even the letter that he himself read from the official of the State of Oklahoma having charge of it says that, in addition to the law being faulty, the banking system of Oklahoma was in politics for several years. I believe that is common knowledge; at least, I have heard it a great many times. Any system that will put the banks in politics, whether National or State, must bring ruin in the end. I believe they have improved since then, although I am not familiar with the details of the matter. I believe they have profited by their experience.

It seems to me that while the Senator emphasizes Oklahoma and belittles Kansas and the other States which have not had the law so long, where the record has been very favorable to the law, he ought to take that into consideration as well as the time, which, I admit, is an element that must be taken into

consideration.

Mr. President, I want to say to the Senator Mr. WEEKS. from Nebraska that I have tried to take those things into consideration. I think the conditions in Oklahoma were particularly unsatisfactory, and I think there were other reasons than the guaranty law why there were so many failures, at least which contributed to a number of the failures, such as the reasons which were instanced by the bank commissioner of Okla-

Yet I do not think that this is a proposition which should go into the bill, even assuming that in time it will work well and be to the advantage of all the people of the country, because it has not been tried sufficiently in these States to determine what the final result is going to be. It ought to be adopted in other States before this action is taken. It ought to be in operation for a series of years under good conditions and bad conditions before we put it into a national statute. Therefore, even if I felt reasonably sure that the conditions in Kansas and Nebraska and Texas were going to continue as they are now, I would be opposed to putting this provision in the bill.

Look at the conditions in a State like Massachusetts.

is more money in the mutual-savings banks in Massachusetts than there is in the national banks of the State, and the savings banks do not keep a reserve of any considerable amount against it. Yet those deposits are not guaranteed, and they would not

be under this law.

Mr. NORRIS. We could not guarantee them.

Mr. WEEKS. I know we could not.

We could not legislate in regard to those banks Mr. NORRIS.

if we wanted to. We have no jurisdiction over them.

Mr. WEEKS. That is true; but let me go on. As far as
Massachusetts is concerned, I think the Senator will admit that it has been pretty progressive in providing necessary laws of this character

Mr. NORRIS. I think so, and I am very glad to bear testi-

mony to it.

Mr. WEEKS. If it were considered necessary and desirable to pass such a law in Massachusetts, and it had been in opera- | deposits are guaranteed?

tion and had worked well under all conditions, I think we might look on this proposal with more favor. But to pass this as a national law before we have any evidence from any source, foreign or domestic, that the law is going to work well, through a term of years, is, in my judgment, unwise.

Mr. NORRIS. It would be an additional argument if we had put it on the statute books and it had worked successfully for a term of years. No man will dispute that; but even admitting that Massachusetts has been very progressive in her legislation, which I admit, it does not follow that we must wait first for Massachusetts to take the step or wait until the system has been given sufficient trial in other States.

I want to call the Senator's attention to another thing that I had forgotten when I interrupted him before. He says if the rate were the same all over the country, a flat rate, it would have a bad effect in taking profits from one part of the country to another; or if we had not a flat rate, it would have that tendency. I do not just remember which way the Senator put it.

Mr. WEEKS. The statement which the Senator from Nebraska made in the last instance. If the rate paid were not a flat rate, if the banks in Nebraska were paying 4 per cent and the banks in Massachusetts were paying 2 per cent, the money might go from the Massachusetts banks to the Nebraska banks, in order to get the 4 per cent rate.

Mr. NORRIS. I am not disputing that that might be true, yet I want to submit to the Senator that in Nebraska and in Kansas for the last two years they have had a guaranty deposit law, and in Nebraska there has never been a failure of a State bank since the law has been enacted, and there has been only one national-bank failure since that time. If it would have a tendency, as applied to national banks by a national act, to have the effect of taking money from the East to the West and putting it on deposit there, why has it not had that effect already? I am asking the Senator why, if there is danger along that line, money has not already been taken, for instance, from Massachusetts, where they have no guaranty of deposits, and sent to Kansas, where they have a guaranty of deposits.

Mr. WEEKS. For the very good reason that all the people of Kansas have not subscribed to it.

Mr. NORRIS. Perhaps that would be a sufficient reason; but if they had a national law, would not the same rule operate?

Mr. WEEKS. I do not think so. Let me ask the Senator from Nebraska a question. Suppose you were going to deposit some money in a Washington bank, and the deposits of one bank were guaranteed and the deposits of the other bank were not guaranteed, other conditions being equal, where would you put your money?

Mr. NORRIS. I might put it where it was guaranteed, if I had the money to deposit, but after more deliberate consideration I might change my mind about it. Answering the question offhand, I would say I would put it where it was guaranteed.

Mr. WEEKS. That is exactly the point. Those who have money to deposit should use their own brains and select a depositary which is safe, without having the law point it out

Mr. NORRIS. I understood the Senator's argument to be against the exercise of brains in that direction. He did not want some banks to guarantee deposits and others not to guarantee them, for the reason that it would relieve the people of the exercise of their brains to investigate as to which was the best bank, if I understood his argument.

Mr. WEEKS. Then the Senator has heard only one part of

my argument.

Mr. NORRIS. In other words, the Senator-Mr. WEEKS. Will the Senator permit me Will the Senator permit me to make a statement?

Mr. NORRIS. All right.

Mr. WEEKS. What I said was that if the banks guaranteed a man's deposits there would not be any need for the exercise of any judgment as to where his deposits should be made, because whatever happened, if some banks are guaranteed and others are not, then he will naturally go to the place where the deposit is guaranteed, even though the management of that bank is inferior to the management in the other case.

Mr. NORRIS. That would be true if he knew it. As a matter of fact the ordinary citizen does not know in the majority of It is an opportunity that few people have to determine as between two banks which is the most stable.

Mr. WEEKS. Let me ask the Senator from Nebraska if they do not display signs on the State banks in Nebraska that the

Mr. NORRIS. I presume that is true, although I do not remember now to have seen such a sign.

Mr. WEEKS. I guess the Senator will find that they adver-

Mr. NORRIS. I would not blame them if they did.

Mr. WEEKS. I would not blame them, either.

Mr. NORRIS. I think it would be perfectly proper.

Mr. WEEKS. I think so, too.

Mr. TOWNSEND. Mr. President—
The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Michigan?

Mr. WEEKS. I yield to the Senator.

Mr. TOWNSEND. The Senator from Massachusetts brought out one thing that had not been called to my attention before, which upon the statement of the Senator appeals to me quite strongly, as a theory at least. It is that if all the depositors were guaranteed there would be no inducement to the bank to maintain a large capital or to increase its surplus. I wanted to ask the Senator was if in the course of his investigations as to Oklahoma and other States he found that it had lessened their capital or reduced their surplus.

Mr. WEEKS. I have no evidence that will prove that statement, but it is true that the capital of a State bank is very small compared with the capital of a national bank which has

been established at the same time. Mr. NORRIS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Massachusetts yield further to the Senator from Nebraska?

Mr. WEEKS. I do.

Mr. NORRIS. I want to call the Senator's attention to the fact that the question propounded by the Senator from Michigan was answered this afternoon in this Chamber. The operation of the guaranty law of bank depositors in Kansas has resulted in an increase of the surplus and the capital, because, to meet the argument the Senator from Michigan says has impressed him so much, they have provided in that law that when for six months the deposits of the bank have increased to an amount exceeding ten times the capital and surplus they have to go out of the system. The result has been that where that has occurred they have increased their capital and surplus in order to stay in the system. So the very suggestion by the Senator from Michigan brings out what I believe to be the un-reasonable argument that is often made against guaranteeing deposits. A properly regulated law meets that argument, I think, fully and completely, as in the State of Kansas, as was shown here this afternoon.

Mr. WEEKS. I have evidently not been able to convince the Senator from Nebraska that my judgment is good on this proposition. I regret it exceedingly, because he was one man that I had hoped to convert to sound banking and reasonable methods. I am not prepared to establish a national law based on the evidence which we have now, and I do not believe this

Congress should do it.

Mr. President, this whole system, in my judgment, is the confiscation of good character. It is putting a man without reputation or record on the same level with a man who has a record and a reputation. Kipling makes the Tommy Atkins, who has lived a good part of his life in the indolent atmosphere of the East, say something like this:

Take me somewheres east of Suez, where the best is like the worst; Where there ain't no Ten Commandments, an' a man can raise a thirst,

That is exactly what we are doing; we are making the best we the worst. We are not making the worst like the best. like the worst.

If we were going to make the worst like the best, we would rovide for better methods of examination; we would provide that only men of proven character should be put at the head of banking institutions; we would provide every means surrounding banks and banking methods which would be businesslike and sound. But as we are proposing to act we are dragging the best down to the same level with the worst scoundrel who ever looted a bank. That is what I am opposed to. I favor any scheme that is proposed for making conditions better— for building up men rather than dragging them down. But in this case we are going to put all kinds of men—those who have proven their character and reputation, who have established a credit which is a part of their capital—on exactly the same level that we do the man who has never established a reputation and probably never would if he had the opportunity. It is fundamentally wrong; it is unmoral, if a thing can be unmoral in business; and it never ought to be countenanced in this body.

I ask permission to incorporate in the RECORD as a part of my remarks certain tables to which I have heretofore referred. The PRESIDING OFFICER. Without objection, the permission is granted.

The tables referred to are as follows: Bank organizations. KANSAS.

		nks organ-		ks nation- zed.
	Number.	Capital.	Number.	Capital.

Mr. WILLIAMS. Mr. President, whenever the question of the Government guaranty of bank deposits shall present itself it will be time for argument. No such question is presented in either of the reports which are offered here as amendments to the House banking and currency bill. The newspaper article which the Senator from Massachusetts [Mr. Weeks] had read at the desk is an excellent illustration of the ignorance and carelessness with which great newspapers of this country deal with questions which are up for consideration before the Federal Congress. I do not want this question to go out to the country under a misapprehension as to what is before the Senate now.

Not only that, but the Senator from Massachusetts has made a long and labored argument concerning experiences with State guaranties of deposits in Oklahoma, Kansas, Nebraska, and Texas, and it has gone upon the theory that we were now presented with a proposition to give a Government guaranty of deposits by the Federal Government. There is no such proposition before the Senate. In those four States they did have a guaranty, accompanied by the power in the State or in some functionary of the State to levy an assessment to make good the losses of depositors in the banks. No such proposition is before the Senate at all. There is no guaranty in either one of these propositions. This is a proposition for the division of the earnings of the regional banks.

Now, I like to have men argue the question before them and not something else. I no more believe in the right of the Government to guarantee the debts of a corporation than I believe in the right of the Government to guarantee my debts. I think it would be much better for the Government to guarantee the debts of a carpenter or blacksmith than to guarantee the debts of a big, rich banking corporation, and deposits are nothing but the debts of the banking corporation.

Now, what is the proposition before the Senate? One of these two measures says that after paying a 5 per cent dividend and 20 per cent surplus one-half of the balance of the earnings, if there shall be any, shall go into a fund for the benefit of depositors in falled banks. The other proposition says that after the payment of a 6 per cent dividend and a 40 per cent surplus one-half of the balance of the earnings, if there shall be any, shall go into a trust fund for the benefit of the depositors of failed national banks.

The Senator from Massachusetts went on to say that if we are going to begin a scheme of insurance losses even partially on people who had deposited in institutions we ought to begin with the savings banks and the trust companies, where the estates of widows and the poor are deposited. Of course the Senator knows as well as I do that the Federal Government has no jurisdiction over any banking institutions except national banks, and that the only reason why we have jurisdiction over them, going back to John Marshall's original decision, is upon the ground that they are fiscal agencies of the Federal Government.

This is a partial insurance proposition. We say that here are possibly a lot of earnings which have been made out of the deposits of the people in the member bank, which in their turn have done business with the reserve bank. So we say that one-half of those final earnings, after the dividends and the sur-

plus, may be held by the United States Government—and I am repeating now almost the language of the Owen bill—as a trustee for the benefit of depositors in failed national banks, in a bureau to be organized under such rules and regulations as the Secretary of the Treasury may think best, and in which shall be kept and out of which shall be paid the money under such rules and regulations as he shall establish.

Mr. President, that means that after all the assets of the failed bank have been exhausted and after everything that can be taken and subjected to the rightful claims of the depositors has been taken and subjected, the United States Government will permit this part of that fund to go to help make out whatever the depositors have lost. It is a question merely of the division of the earnings.

Here is the question before you, and there is no escape from it. After the dividends and after the surplus, do you want the Government to take the entire balance of the earnings as a franchise tax, or are you willing that it shall take one-half of them as a trustee for the benefit of these people?

There is nothing new in the Federal Government holding funds as a trustee. Every month 10 cents, I believe it is, is paid out of the pay of every private soldier in the Regular Army, and it is kept in the Treasury in a trust fund for the benefit of the soldiers of the Regular Army. The Soldiers' Home out here was built in that way.

The Senator says, however, that leaving out the word "guaranty" now, which is an improper word, and using the right word it is unjust to establish an insurance whereby the man who conducts a bank carefully and properly may be made to pay through these regional banks in an exceedingly remote and indirect way, if at all, for somebody who has conducted a bank carelessly. In the first place, they are not taxed to pay it. This merely takes half the left-over earnings.

But even if there were a tax to build up in the Treasury an insurance fund for the benefit of depositors in failed national banks, the argument made by the Senator from Massachusetts could have no possible relevancy or force, because there is not an insurance scheme in the world to which it does not apply.

The Senator from New York [Mr. Roor], the Senator from Ohio [Mr. Burton], I will say, and I are insured in the same life insurance company. Let us say that they take great care of their health and that I take none of mine. Let us say that out of men insured in that life insurance company there are 10,000 who take no care of their health particularly and 2,000 who do. Undoubtedly the 2,000 pay in the shape of premiums for the carelessness of the 10,000, because in calculating what has to be paid to the insurance company in order to make expenses, losses, and make a slight profit, they have to calculate the average. There is no insurance company that ever existed in the world that insured a man's life in proportion to the care of his health.

Here are two men who have insurance in a fire company. One of them pays no attention at all to the ashes in his kitchen; he lets the brick fall out of the flue; he lets it become defective. His house burns up. Here is another man who pays every attention. Both of them are insured in the same company, and yet the premium to secure the insurance for the careful man is predicated upon the knowledge of the manner in which the

careless man acts. It is the average that is necessarily taken in order to establish the premium for fire insurance as for life insurance.

Here are men in the States of Kansas, Nebraska, and Mississippi, all of them carrying cyclone insurance policies. A cyclone comes in Mississippi and does not come in Kansas at all during the entire period of the policy, or vice versa, and yet the man in Kansas has paid in order that the man in Mississippi might There is absolutely no force in that be protected, or vice versa. sort of argument, even if this were a general insurance proposition for the benefit and for the full payment of depositors in national banks. It is not in either one of the bills.

The sole question with which you are presented is this: After paying the dividend and the surplus, do you want to take all the balance of the earnings to the Government and keep them, or are you willing to let one-half of them, at any rate, go to those whose money deposited in the banks has enabled the member banks, and through the member banks has enabled the regional banks, to make a profit and to get the earnings? That is all there is in this case. There is no use discussing the other matter until we get to it, and we are not to it now, even if we

should ever get to it.

This argument, however, comes with poor grace from my friend from Massachusetts [Mr. Weeks], because if there is a man in this body who has contended all the time that there was no difference between notes and deposits, it is the Senator from Massachusetts. He is solicitous, as are you and as am I, to see that the debt of the banks issued in the shape of notes is absolutely safeguarded. I see a distinction between the two, and I could make that argument, but I do not see how the Senator from Massachusetts can do it.

He spent an hour here the other night, very ably, too, in showing that there was no distinction; that both were bank credits; that when a man came in and borrowed he could either bank credit and draw his checks upon it, or else he could take the notes, go out with them, and pass them from hand to hand. I see a difference. The difference to me is that the Government allows him to pass one from bearer to bearer without indorsement as a representative of money; and when he does that, it is its duty to safeguard it in every possible way, whereas, in the other case, the Government does not give the man any right to do anything that he could not do with any Senator here if he wanted to. I could go and deposit money to-morrow with the Senator from New Hampshire [Mr. GAL-LINGER] and draw drafts upon him until I had drawn out of his hands all that I had deposited. There is no governmental function connected with that; there is nothing analogous to any governmental function. My check is not a representative of money; but the Senator from Massachusetts spent a long time showing that there was no distinction. Now, after very ably guarding the bank notes, he would have you believe that even from his standpoint the safeguarding of all the other bank credits, to wit, the deposits, the book credits, is a heresy

I am not prepared at this speaking, and I do not think I ever shall be, to support any proposition for the Government to pay the debts of any corporation, whether a bank or a manufactory or anything else; but I do say that when the Government takes a part of the earnings of a corporation, refusing to let the earnings of the business go to the people who have paid up the stock, refusing to let all of the earnings of that go to the people who have supplied the reserves, that they can at least afford to let one-half of what is left after a 6 per cent dividend and a 40 per cent surplus have been paid go back, if not to the shareholders or the stockholders, at least to those whose money upon deposit enabled the shareholders or stock-

holders to make the money.

I did not rise for the purpose of arguing the question, but I rose for the purpose of disabusing the minds of the public of what seems to be the apprehension all over the country, the idea that is spread all over the country, that there is a proposition here for the United States Government to guarantee the deposits of the banks. I want to say, with all the strength that am capable of, that there is no such proposition before the Senate, and that the only excuse for any man believing that there is, of which I can conceive, is that he had not read either one of these two bills. It is certainly not in the Owen bill; it is merely a proposition for a division of the earnings. might have provided here, if we wanted to, that all the earnings could go to the stockholders after the dividends and after the We can certainly provide that half of that shall go to the depositors, whose money has built up the dividends and the

Mr. PITTMAN. Mr. President, I wish to ask the Senator from Massachusetts [Mr. Weeks] a question simply for information. As I understood from his argument, in the event the above the interests of any bank.

bank deposits were guaranteed, there would be no distinction between the banks which were carefully managed and those which were carelessly managed, and, therefore, that the carelessly managed bank would obtain as large a business as the carefully managed bank, and so the carefully managed bank would not gain by its carefulness; in other words, at the present time the careful bank would naturally receive the larger portion of business and the careless bank the lesser portion of business; but if the bank deposits were guaranteed they would receive the same amount of business, and to that extent the carefully managed bank would lose.

The Senator also admits, I believe, that at the present time when the bank deposits are not guaranteed, sometimes the carelessly managed bank fails and some of the depositors lose. Then his idea, as I understand it, is that he considers it better that the present condition should continue to exist and that some of the depositors should sometimes lose by being mistaken in the banker, and that the careful bank should therefore make more money than that the careful bank should make only the same amount of money and none of the people should lose at any

time. Is that the theory?

Mr. WEEKS. Well, Mr. President, that is a somewhat strained version of what I have been trying to discuss. What I have said is that a part of a bank's capital and a part of a banker's capital is the character of the management of the bank; that after a term of years when a banker in a com-munity has established a reputation as a safe, wise, and conservative man, that is as legitimately a part of his capital as the money he has invested in business.

Mr. PITTMAN. Mr. President— Mr. WEEKS. Wait a moment. If a man who has not an established reputation can come into that community and ask for deposits, the deposits in both cases being insured to the depositor by some means, either by a guaranty or otherwise, it is an injustice to the man who has managed his bank wisely, because if the other bank is unwisely managed by a man without experience a part of the conservative and wise banker's earnings may have to go to pay the deposits in the badly managed

Now, let me give the Senator an example of just what hap-I have been in the banking business myself, and I think the bank with which I was at one time connected, though not then as an officer, was a wisely and sanely managed bank. Some men who did not have as well-established reputations as the officers of that particular bank took out a Government charter and started a bank across the street. They commenced to pay 4 per cent interest on deposits. The depositors in the old bank said, "You only pay us 2 per cent for our deposits. Why should we keep our money with you at 2 per cent when we can get 4 per cent across the street?" There is no very good argument to make to a man who wants to change his deposits under those circumstances. The result was that many of the depositors drew out all or part of their deposits and took then across the street and deposited them in the new bank, obtaining 4 per cent interest by so doing. In two years the bank across the street failed. Why did it fail? Because it was paying 4 per cent interest on deposits, and in the city of Boston no commercial bank paying 4 per cent interest can invest its money safely and make any profit.

Mr. PITTMAN. Mr. President-

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Nevada?

Mr. WEEKS. I yield. Mr. PITTMAN. Then Then, as I understand, the Senator wants that condition to exist. He thinks it is better for those people to lose their money so that he may continue a flourishing business at their expense and do without a law that will make that condition impossible in the future?

Mr. WEEKS. Mr. President, I want to ask the Senator from Nevada why I should lose my business because somebody was offering an extravagant inducement for taking it away, and then be assessed because that somebody lost his money when he did not use any judgment in depositing it in another bank?

Mr. PITTMAN. If the depositors had been guaranteed, even if that bank failed, the depositors could not have lost any

money, could they?

WEEKS. Mr. President, the bank to which I refer as the older bank would have been assessed to pay the losses sustained by those depositors.

Mr. PITTMAN. But the depositors would not have lost their money.

Mr. WEEKS.

Mr. WEEKS. If the Senator from Nevada wants to guarantee people against folly and lack of wisdom by national laws, this is the way to do it.

Mr. BRISTOW. Mr. President-

Mr. WEEKS I should like to go on for a moment.

Mr. BRISTOW. Will the Senator yield to me for a moment? Mr. WEEKS. Yes; I will yield. Mr. BRISTOW. The illustration which the Senator has just presented of the bank across the street paying ' per cent demonstrates not that bank insurance is not wise but that proper regulations should be made as to the method of doing business of the banks which are secured. No insurance company, State, national, or private, would insure the deposit of a bank that was doing that kind of business in the city of Boston. It is not proposed to secure any such bank deposits as that. They ought not to be permitted to get into any such insurance com-That is an argument in favor of regulating the character and the method of banking.

Mr. WEEKS. Well, Mr. President, the Senator from Kansas does not know just what is proposed, nor does any other Senator We turn some money over to a reserve board, and say, "Go ahead and make some rules and regulations to do something with this money which belongs to somebody else." That

is what we do.

Mr. President, I want the attention of the Senator from Mississippi for a few moments. I have had an opportunity for a good many years to listen to debates in which the Senator from Mississippi has participated, and I have taken occasion several times, many times, in fact, to say that I believe he is one of the ablest debaters who has been in Congress for m ny years. He is mentally honest, too, but I have occasionally heard him split hairs, especially on political questions. I think he is splitting hairs in the proposition before the Senate now, and I want to tell him why. We are proposing in both of these bills that when the stockholders have been paid 5 per cent in one case and 6 per cent in the other, and when a surplus of 20 per cent has been built up in one case and 40 per cent in the other, then-or during the process in fact-the balance of the earnings, if there is an excess, shall be disposed of in both cases by using one half of the excess to pay the Government's debt and the other half to put into a fund to pay depositors in failed banks under conditions to be prescribed by the reserve board.

I think that is a correct statement of what we are doing. Those excess earnings belong to somebody. They either belong to the Government or they belong to the stockholders in the reserve banks, or they belong to both, or they belong to somebody else. We believed originally in the Banking and Currency Committee that they belonged to the Government. believed that we could raise the capital for the reserve banks by paying the stockholders 5 per cent dividends, and then we proposed to use all the remainder of the earnings to pay the Government debt. That would have been beneficial to all the people of the country, would it not? Instead of doing that this proposition has been interposed to use one half of it to pay the Government debt and the other half to pay to some unwise stockholders in some bank, when they have not used their own gump-tion in locating their deposits. If we did not use it for that purpose, we would pay the Government debt, which would be beneficial to all the people of the country; but we are establishing this fund and we are going to use it to pay the losses to depositors in failed banks. In other words, we are taking a fund which I believe belongs to the Government, because the Government is guaranteeing almost everything that this bank does and it is depositing \$200,000.000 with the bank without interest; I believe the fund belongs to the Government; in other words, you are doing just exactly what you would do if you laid a special tax and built up a fund and then used that fund for the purpose of paying some individual who had not used business sense in determining upon a place in which to deposit his money. That is my judgment about it.

I believe the Senator from Mississippi is splitting hairs when he says this is not a guaranty fund. It is a guaranty fund, although not assessed directly on the banks. It is not like that kind of a mutual insurance to which the Senator has referred, to be sure, but it is paying for somebody's loss out of a fund that belongs to somebody else; and that, I say, is immoral and is unbusinesslike, and will create a condition in the minds of men which is unwise and which should not be encouraged—that is, that they should not exercise judgment in looking after their

Mr. WILLIAMS. Does the Senator from Massachusetts contend that these earnings belong to the Government in any way in the world except purely by the exercise of the taxing power? But for the exercise of the taxing power they would go naturally to the stockholders of the institution.

Mr. WEEKS. Mr. President, how does the Government get money if it does not get it by the exercise of the taxing power?

WILLIAMS. I understand that; but the Senator has said that these earnings belong to the Government; and I admit that the Government has a right to take them by taxation, just as it has a right to tax my land, but that does not prove that my earnings from my land belong to the Government at all; it only proves that the Government has the right by taxation to take a part of them. These earnings naturally belong to the stockholders who have taken the stock and put up the reserves-in the case of the Hitchcock bill to private individuals and in the case of the Owen bill to member banks. This would enable them to get the money from the depositors, so that in that sense the earnings belong to the depositors who furnish the money; but certainly they do not belong to the Government, except purely through the power of government by taxation to take it for a public purpose.

Mr. WEEKS. Mr. President, just one word more on this

subject

For the last 25 years the Government has deposited a certain percentage of its moneys in national banks, and it has required security for so doing. Latterly it has compelled the banks to pay 2 per cent interest on these deposits. The original proposition was that the Government deposits in the regional banks should pay 2 per cent interest. If the Government deposits \$200,000,000, as it is estimated will be done, that would mean, at 2 per cent, \$4,000,000 a year which would come to the Government as a return for its deposits.

The Government, however, is issuing notes for these banks to use. It is superintending all of the operations of the banks. It is lending its good name and its credit in many ways in connection with these banks, and is receiving nothing for it. I say it is only fair that the Government should receive the excess earnings after the stockholders have been pald a reasonable dividend, and it would not be an illogical or an improper thing for Congress to take all of these earnings and apply them

in paying the Government debt.

I wish it could be done. That is what I favor. Therefore even the Senator's argument does not stand, because we are taking one-half of them to pay the Government debt. If we can take one-half of them, why can we not take all of them?

Mr. WILLIAMS. Why, we could.

Mr. WEEKS. I think we ought to.

Mr. WILLIAMS. I admit that we could. I am merely saying that it would be wiser not to do so.

In that connection, the Government as a depositor in a bank gets its share of the amount paid to the depositors in a failed

bank just as well.

Mr. BRISTOW. Mr. President, I never could understand why national banks, especially in the eastern part of the country, should have such antipathy for the insuring of deposits. Most of the Eastern States have compensation laws. They require a corporation to tax itself to provide insurance for the health and maintenance of its employees. There is a proposition before Congress now to have a national compensation law whereby the railroads of the country will be taxed for the benefit of their employees. Still, when it is proposed here to take a part of the earnings of the banking system to guarantee the depositors in the banks it is regarded as a heresy.

Talk about a depositor, when he puts his money in a bank, exercising business judgment as to what bank he shall put it in. Why, the president of the American Bankers' Association was supposed to be a great banker, yet a few years ago his bank failed, and thousands of people lost money by the failure of that bank. Talk about the old bank being the one that never fails. The old bank is just as likely to fail as the new one.

The insurance of bank depositors, as I undertook to show this morning, and I think I demonstrated, is as legitimate an insurance as ever was written in regard to any other kind of a loss.

Now, as to the earnings of this association: What are the

resources of the regional banks?

First, there is the capital stock. We provide in one of the bills that upon the capital stock there shall be 5 per cent dividends; in the other bill we provide that there shall be 6 per cent dividends. That satisfies the interest of the stockholder. He gets his dividend. It is a cumulative dividend. He has, or should have no other interest. Second, we have a Government deposit, as the Senator from Massachusetts has declared, and upon that deposit these banks make a return. Third, we have the reserves of the member banks; and by the use of those reserves the bank makes a profit.

What is it proposed to do with these profits?

First, we pay the dividends to the stockholders. Next, we take the profits that accrue from the Government's deposits and use these profits to pay the national debt. Third, we take the profits, or a part of them, that come from the use of the reserves of the banks and use those profits to guarantee or to insure the depositors of the member banks. These reserves are a part of the deposits which the people put in the member banks. Government takes a part of those reserves and impounds them in a Federal reserve bank and uses them for profit, and takes a part of the profits and creates a trust fund, which will insure the depositors who have placed their money in the regional

Can anything be presented to the mind of man that is more just and that will appeal more strongly to a sense of right and

fairness than such a proposition as that? I think we would be justified in levying a tax upon every national bank in the country to create the deposits for this

My good friend, the Senator from Minnesota [Mr. Nelson], says he would like to have a vote on this matter to-night. Therefore I will quit, because I am very much interested in it, and I have talked too long to-day, anyway. SEVERAL SENATORS. Vote!

Mr. TOWNSEND. Mr. President-

Mr. OWEN. I should be glad to have a vote, unless some Senator desires to speak. I move to lay the amendment on the

Mr. GALLINGER. The Senator from Michigan has the floor, Mr. President.

Mr. HITCHCOCK. Before the motion is put I desire to call

Mr. TOWNSEND. Mr. President, I desire to say a word before the motion is put. I was on my feet trying to get recognition.

Mr. OWEN. I withdraw my motion, Mr. President. The VICE PRESIDENT. The Chair was intending to recognize the Senator from Michigan.

Mr. TOWNSEND. I am not so much interested in the refinement of definitions made by the Senator from Mississippi [Mr. WILLIAMS] as to whether this is a guaranty fund or an in-surance fund. It seems to me it has practically the same effect and is designed for practically the same purpose.

I am not objecting at all to guaranteeing deposits, having in mind first the fact that under proper banking methods the whole loss to depositors in the United States is less than onefiftieth of 1 per cent, almost a negligible amount. Yet, understanding as I do that where a loss does occur it is often 100 per cent to the one who loses, the only thing I have been interested in and my object in asking the question of the Senator from Massachusetts was to ascertain whether the insurance plan or the guaranty plan-call it what you please-will have a bad effect upon banking; that is, whether the plan we adopt will tend to increase the losses which must be paid by somebody.

I have not yet learned from any source anything that convinces me that where this plan has been properly tried the losses have increased because of bank guaranties or bank insurance. It appears from the statement that has been made that in the State of Oklahoma, and possibly in some of the other States, but surely in the State of Oklahoma, the people have not largely patronized the insured banks and neglected those that are proceeding under the old plan, which indicates to my mind that it could not have had the disastrous effects which the philosophy of the thing would seem to indicate might

I do understand why it would be likely that two banks, one conducted properly and another indifferently, but both guaranteed, might obtain deposits in equal amounts, but it is the proof of the thing that I should like to understand. As I have said, I have not yet been convinced that any method that has been adopted has resulted in looser banking methods.

I wish this bill provided for some method of examination in connection with the insurance plan and that there were more specific instructions carried in the bill for the purpose of carrying out the purposes which seem to me to be necessary in c to have it work right, namely, the investigation and establishment of conditions precedent to the opening of a bank and afterwards to its proper conduct.

Mr. HITCHCOCK. Mr. President, the Senator realizes that the reserve banks and the Federal board are given certain power over the member banks; that they are subjected to examinations in addition to the examinations they now sustain from the State authorities and from the comptroller's office?

Mr. TOWNSEND. I understand that. I understand there are provisions here within the discretion of the reserve board which, if properly exercised, would undoubtedly secure proper conditions; but it has occurred to me in reading the bill and in studying it as carefully as I could that we are leaving too much discretion with the reserve board and exercising too little

care as legislators in determining upon what conditions certain things shall be done

It seems to me that with the example before us mentioned by the Senator from Kansas as to what they do in Kansas it could well be incorporated in a bill of this kind, and provision could be made so as to do away with the possible danger which might arise from loose banking methods and through the loose organization of banks.

As I said in the beginning, while I have listened with great patience and great interest to the Senator from Mississippi [Mr. Williams], I can see no difference between bank guaranties or Government guaranties and insurance of these deposits so far as they affect the management of banks. That is the one particular thing in which I have been interested.

Mr. BURTON. Mr. President, I had thought of making some remarks on this question, but as the hour is late and I believe a vote is desired to-night, I wish to give notice that to-morrow morning, at the close of the routine morning business, I shall address the Senate briefly on the subject of the relation of credit and currency to capital.

Mr. GRONNA. Mr. President, I will ask the Senator from Oklahoma if he is willing to let this matter go over until to-morrow? I intend to address the Senate briefly on this particular feature of the bill

Mr. OWEN. Mr. President, while of course we are very anxious to bring this matter to a vote, I think it would not be quite fair to the Senator from North Dakota to refuse his re-I therefore assent to his wishes about it.

As the hour is so late, I think we might as well adjourn now. I move, therefore, that the Senate adjourn.

The motion was agreed to; and (at 10 o'clock and 55 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, December 17, 1913, at 10 o'clock a. m.

## HOUSE OF REPRESENTATIVES.

Tuesday, December 16, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We bless Thee, Infinite Spirit, for that quality hidden in the heart of man which makes him a hero worshiper, a quality which brings us to our knees in admiration and praise for the broad-minded, warm-hearted men of endeavor who have climbed high on the altar of fame and carved their names in letters of gold, which serves as a beacon light to those who come after them. But it is to be regretted that it is only after such men have done their work and passed on that our eyes are opened to the godlike which impelled them to deeds of heroism and glory. So it was with the world's great Exemplar; even His disciples failed to appreciate fully His sublime precepts and godlike character.

"And I, if I be lifted up from the earth, will draw all men unto me.

So the world is coming slowly to understand and appreciate the heart of the Christ. May our eyes be opened, that we may see more clearly and realize profoundly His life and work, and may we strive to quicken the Christ spirit within us and exemplify it in our daily life. Amen.

The Journal of the proceedings of yesterday was read.

Mr. MANN. Mr. Speaker, yesterday, in the passage of the omnibus claims bills, the gentleman from Texas [Mr. Greeg] moved to pass it with various amendments. One amendment

reads this way:

On page 2, line 4, after the word "claims," insert the following: "Except that claimants under this bill receiving compensation," etc.

Manifestly, it should read "act" in place of "bill," and I ask unanimous consent that the bill itself shall be amended or the amendment be changed so as to insert the word "act" in place of "bill," and that the Journal and Record be corrected accordingly

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the word "bill" in a certain amendment to the omnibus bill be changed to the word "act," which, of course, it ought to be, and that the correction be made both in the Journal and the RECORD. Is there objection? [After a pause.] The Chair hears none, and it is so ordered; and, without objection, the Journal as corrected will be ap-

There was no objection.

MESSENGER TO THE COMMITTEE ON USELESS EXECUTIVE PAPERS.

Mr. LLOYD. Mr. Speaker, I offer the following privileged resolution from the Committee on Accounts.

The SPEAKER. The Clerk will report the resolution,

The Clerk read as follows:

House resolution 329 (H. Rept. 145).

Resolved, That the chairman of the Joint Select Committee on Disposition of Useless Executive Papers be, and he is hereby, authorized to appoint a messenger to said committee, who shall be paid out of the contingent fund of the House at the rate of \$60 per month, for the second session of the Sixty-third Congress.

Mr. LLOYD. Mr. Speaker, this is the usual resolution that is passed at every session of Congress.

The question was taken, and the resolution was agreed to.

GEORGE IDEN, LIZZIE BASSETT, AND ROSE M. CORNELL.

Mr. LLOYD. Mr. Speaker, I also offer the following privileged resolution.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 336 (H. Rept. 144).

Resolved, That the Clerk of the House is hereby authorized to pay, out of the contingent fund of the House, to George Iden, \$42; Lizzle Bassett, \$6; and Rose M. Cornell, \$12, for clerical services rendered to the Committee on Enrolled Bills during the extra session of the Sixtythird Congress.

The committee amendments were read, as follows:

Amend, line 3, by inserting, after the word "Iden," the words "seven days' services," and, after the word "Bassett," the words "one day"; and in line 4 insert, after the word "Cornell," the words "two days."

Mr. LLOYD. Mr. Speaker, this simply provides pay for some extra services rendered to the Committee on Enrolled Bills during the extra session. Instead of allowing a clerk, we pay them for these 12 days' services.

Mr. MANN. Those are the last days of the session? Mr. ILOYD. Yes, sir.

The question was taken, and the amendments were agreed to. The resolution as amended was agreed to.

R. T. COOK

Mr. LLOYD. Mr. Speaker, I present the following privileged resolution.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 276 (H. Rept. 146).

Resolved, That the Clerk of the House of Representatives be, and is hereby, authorized to pay from the contingent fund of the House of Representatives to R. T. Cook the sum of \$581.95, for services rendered as acting assistant foreman of the branch folding room, House of Representatives, from August 3, 1912, to September 30, 1913, this sum being the difference between his salary as a folder at \$900 per annum and that of the position of assistant foreman of the branch folding room, at a salary at the rate of \$3.85 per diem.

The committee amendments were read, as follows:

Amend, line 4, by striking out "\$581.95" and inserting in lieu thereof "\$270," and in line 6, after the word "from," strike out the words "August 3, 1912" and insert "March 14, 1913."

Mr. MANN. Will the gentleman give some explanation of this?

Mr. I.LOYD. Mr. Speaker, this assistant in the folding room was held by special resolution for a number of years by Mr. Coultry, of Illinois. Mr. Coultry died in March last. Mr. R. T. Cook performed the duties from the time Mr. Coultry died until September 30, when a man was appointed to take the place, and this gives him the difference in salary between the \$75 a month which he drew as a folder and that which he would have received if he had been actually appointed to perform these

Mr. MANN. Does the original resolution date from August,

1912?

Mr. LLOYD. Yes, sir. Mr. Cook not only performed services after the death of Mr. Coultry, but Mr. Coultry was ill for a number of months. He performed duties from August up to the time Mr. Coultry died, but Mr. Coultry drew the salary, and we thought it improper to allow Mr. Cook the salary, or any part of it, which Mr. Coultry had drawn.

The SPEAKER. The question is on agreeing to the commit-

tee amendment.

The amendment was agreed to.

The resolution as amended was agreed to.

The title was amended to read as follows: "House resolution to pay R. T. Cook \$270 for services rendered as acting assistant foreman of the branch folding room, House of Representatives."

EXPENDITURES BY COMMITTEE ON THE JUDICIARY.

Mr. LLOYD. Mr. Speaker, I also present the following privileged resolution.

The SPEAKER. The gentleman from Missouri offers a privileged resolution, which the Clerk will report.

The Clerk read as follows:

Resolved, That the Committee on the Judiciary is authorized to expend for experts, accountants, and clerical and other assistance for the purposes stated in House Resolution No. 486, passed April 5, 1912,

a sum not in excess of the balance unexpended under said resolution, out of the contingent fund of the House, on vouchers ordered by said committee, signed by the chairman thereof, and approved by the Committee on Accounts, evidenced by the signature of the chairman thereof.

Also the following committee amendment was read:

Amend, line 5, by striking out the words "April fifth," and inserting the words "May third."

Mr. LLOYD. Mr. Speaker, this is to authorize the Committee on the Judiciary to make expenditures for extra services that may be needed in the investigation of the trust question. When they were authorized in the last Congress to make this investigation, they were authorized to expend not to exceed \$25,000. They expended in that investigation only about \$2,500. now necessary to make some extra investigation, and employ experts and take testimony, and this authorizes them to expend not to exceed the amount that was not expended by the authority of the last Congress

Mr. MURDOCK. That will be a total of how much?

Mr. LLOYD. Twenty-five thousand dollars.

Mr. MURDOCK. How much did they expend? Mr. LLOYD. About \$2,500.

Mr. MANN. What was the total amount authorized in the first place?

Mr. LLOYD. Twenty-five thousand dollars.

Mr. MANN. How much was expended in the last Congress?

Mr. LLOYD. About \$2,500.

Mr. MANN. How much during the special session?

Mr. LLOYD. There is no account of any expenditure during the special session.

Mr. MANN. They had authority to expend money during the special session?

Mr. LLOYD. Yes.

Mr. MANN. Was any money expended during the special

Mr. LLOYD. No, sir. Mr. MANN. I understood they had some meetings and— Mr. LLOYD. Well, it was just a small amount. I can not give you the exact figures.

Mr. MANN. This would give the committee somewhere in the neighborhood of \$22,000

Mr. LLOYD. About \$22,000; yes, sir.
Mr. MANN. Mr. Speaker, I suppose it is the intention of the committee and that side of the House to continue to do everything they can to bring a financial panic on the country. ever, they do not need to do much more, because one already exists now

The SPEAKER. The question is on agreeing to the commit-

tee amendment.

The committee amendment was agreed to. The resolution as amended was agreed to.

The title was amended to read as follows: "House resolution authorizing the Committee on the Judiciary to expend certain money for purposes stated in House resolution 486, passed May 3, 1912."

CORRECTION OF IMMIGRATION BILL.

Mr. BURNETT. Mr. Speaker, in reporting the bill 6060 yesterday, I inadvertently left out one amendment in the report and in the bill. It is an amendment on page 56, which makes the bill go into effect, as to all except one provision, on July 1, 1913. That was stricken out, and "1914" was inserted by order of the committee. I ask to amend the report and the bill, and also ask for a reprint of them as amended. I am under the impression we ought to have an extra number of copies, perhaps, of this bill printed, and I would ask, while they are printing it, to have 2,000 extra copies of the bill.

Mr. FITZGERALD. What is the amendment?
Mr. BURNETT. The amendment is simply to strike out "thirteen" and insert "fourteen."
Mr. FITZGERALD. Let me suggest to the gentleman from Alabama [Mr. BURNETT] that, as the bill and report are already printed, and this is not a very difficult amendment, instead of having a reprint of it now, he wait and correct his bill by

amendment when it comes up.

Mr. BURNETT. Mr. Speaker, I have no doubt but that can be done, but the bill will go out to the country as going into effect last July.

Mr. FITZGERALD. While that may be true, still there may be some confusion by having two prints of the report and the bill.

Mr. BURNETT. No; it is simply a correction of this report and of this bill. Otherwise I shall have to make another report and include the amendment.

Mr. FITZGERALD. I did not intend to make any difficulty with the gentleman. I am suggesting this simply as the least confusing way.

Mr. MANN. I suggest to the gentleman from New York that there might be a misapprehension on the part of the country.

Mr. FITZGERALD. I shall not object.

The SPEAKER. What amendment is it that the gentleman from Alabama asks?

Mr. BURNETT. The amendment is to strike out the word "thirteen," in line 18 of page 56, and insert the word "fourteen" in lieu of it.

The SPEAKER. The gentleman from Alabama [Mr. Bur-NETT] asks unanimous consent that the word "thirteen" be stricken out in line 18, page 56, and the word "fourteen" be inserted. Is that all?

Mr. BURNETT. No. What I want is that I may correct the report and the bill. This is a committee amendment.

The SPEAKER. The gentleman from Alabama asks unanimous consent to correct the report and the bill by striking out 'thirteen" and inserting in lieu thereof the word the word "fourteen."

Mr. MANN. That is to show an amendment striking out the word "thirteen" and inserting "fourteen." That is a committee amendment.

The SPEAKER. A committee amendment striking out "thiren" and inserting "fourteen" in line 18 of page 56; and the gentleman from Alabama also asks for a reprint on the report of the bill and asks that 2,000 extra copies be printed-

Mr. BURNETT. Of the bill and report—
The SPEAKER. Of the bill and the report. Is there objection?

Mr. MOORE. Mr. Speaker, reserving the right to object, I would like to ask the gentleman from Alabama if he will incorporate in his request a provision for printing extra copies of the hearings? There will be a large demand for the hearings; as large as for the bill.

Mr. BURNETT. Yes; that is correct. I would ask, Mr. Speaker, for the printing of 2,000 extra copies of the hearings.

Mr. Speaker, may I ask the gentleman also Mr. MOORE. whether the hearings will be printed along with the bill or the report, so that they will be ready for consideration at the time the bill is called up?

That will depend upon whether the mem-Mr. BURNETT. bers of the committee and those who were heard before it revise their hearings sufficiently early to get them to me at once.

Mr. BARNHART. Mr. Speaker, will the gentleman yield? The SPEAKER. The gentleman from Alabama [Mr. Bur-NETT] also asks, in connection with the first request and as part of it, that 2,000 extra copies of the hearings be printed.

Mr. BARNHART. Mr. Speaker, I would like to inquire of the gentleman from Alabama if these hearings will be a reprint of the hearings heretofore had in this Congress?

Mr. BURNETT. No; of the hearings that were held last week.

Mr. FITZGERALD. Mr. Speaker, I hope the gentleman will not ask for a reprint of the hearings. I think that request ought to go to the Committee on Printing.

Mr. BARNHART. He is not asking for a reprint of the

Mr. FITZGERALD. I mean an additional number. Some one should know something of the cost of these matters. Under the law I think 500 copies are printed in the first instance.

Mr. BARNHART. Will the gentleman from Alabama yield? Mr. BURNETT. Yes. The SPEAKER. The gentleman from New York [Mr. Fitz-

GERALD] has the floor. Mr. FITZGERALD. I was trying to find out what that

request was. Mr. BURNETT. The request is for 2,000 extra copies of the

hearings had on this bill last week.

Mr. FITZGERALD. Are they voluminous?

Mr. BURNETT. They would cover 200 pages, I expect.
Mr. GARNER. Mr. Speaker, will the gentleman yield for a question?

Mr. BURNETT. Certainly. Mr. GARNER. The hearings were held for the purpose of informing Congress with respect to the business before the committee?

Mr. BURNETT. Yes.

Mr. GARNER. And gentlemen came to the committee and made long addresses, and they want to get copies of the hearings in order to send them to their constituents. Some of them were not Members of Congress. Does the gentleman think that

public money ought to be expended for that purpose?

Mr. BURNETT. Mr. Speaker, I will withdraw that part of my request. I do not want to get into a controversy about

The SPEAKER. The gentleman from Alabama [Mr. Bur-NETT] withdraws his request as to printing additional copies of the hearings. Is there objection?

Mr. MOORE. I reserve the right to object, Mr. Speaker. The SPEAKER. The gentleman from Pennsylvania [Mr.

Moore] reserves the right to object.

Mr. MOORE. It seems to me, Mr. Speaker, that the position taken by the gentleman from Texas [Mr. GARNER] is not tenable. If his proposition goes through and this request to print the hearings is not granted, then this House is in entire ignorance of what transpired before the committee, and in ignorance of the evidence adduced upon which the committee is supposed to have prepared this bill.

One of the reasons why I asked the chairman of the Committee on Immigration to incorporate this provision in his motion was that this House, when it comes to consider this immigration bill, which involves the barring out from this country of probably one-quarter of a million unfortunate people in a year, will be in a position to understand what was said to the committee. The idea of having this bill brought in-a bill covering about 60 printed pages, involving all sorts of technical and legal questions—without having the human side of it presented at all seems to be wholly unfair to the House itself.

Mr. GARNER. Mr. Speaker, will the gentleman yield?
Mr. MOORE. Yes.
Mr. GARNER. Does the gentleman from Pennsylvania anticipate that any Member of Congress will have any difficulty in getting a copy of the hearings recently had before the Immigration Committee?

Mr. MOORE. I think not, but the Congress represents the

Mr. GARNER. The committee has already ordered 1,000 copies of the hearings printed. Now, for what purpose can the 2,000 additional copies be used, except to send to some people throughout the country who might be interested in the immigration question, or rather for the purpose of sending to the constituencies of those people who appeared before the committee,

and so advertise themselves in a public document? Mr. MOORE. This Congress represents the people of the nited States. The gentleman himself represents perhaps United States. 250,000 people, all of whom are interested in this question. all represent a great body of the people of the country, and I venture to say now that the country itself does not know and will not have an opportunity to know what is in this immigration bill and what is proposed to be done when this immigration bill comes up. One of the real troubles with regard to this whole question, vital as it is to the welfare of many of our people and many of the unfortunates who seek to come here, is that we do not give careful consideration in the House to this immigration question. A bill 60 pages long will be brought in here and efforts will be made to close debate. An effort will be made to press this bill through because it is on the calendar to go through. Whether you gentlemen care to have your constituents informed or not, I, as a member of the minority, insist that it is the right of my people to know upon what basis this bill was framed.

Mr. FITZGERALD. Mr. Speaker, I demand the regular order. We wish to pass an appropriation bill before the holiday recess. I make this demand on behalf of the Committee on Appropriations.

Mr. MOORE. If the gentleman is going to close me out with the regular order, I shall be obliged to object.

Mr. BURNETT. Does the gentleman object to the reprint? Mr. MOORE. Unless we can have the information upon which to be guided in the House.

The SPEAKER. The gentleman from New York demands the regular order.

Mr. BURNETT. Mr. Speaker, may I ask—— Mr. GARNER. The gentleman from Alabama has submitted a request for unanimous consent. Now, if the gentleman from Pennsylvania wants to object-

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

Mr. MOORE. I object. The SPEAKER. The gentleman objects.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following joint resolution:

H. J. Res. 164. Joint resolution authorizing the Secretary of the Senate and Clerk of the House to pay the officers and employees of the Senate and House, including the Capitol their respective salaries for the month of December, 1913, on the 20th day of said month.

LEAVE TO WITHDRAW PAPERS-MRS. DORA SMITH.

By unanimous consent, Mr. Driscoll obtained leave to withdraw from the files of the House, without leaving copies, the papers in the case of Mrs. Dora Smith (H. R. 23561, 62d Cong.), no adverse report having been made thereon.

BRIG "LITTLE JOHN BUTLER."

The SPEAKER laid before the House the following communication:

CHAMBERS UNITED STATES COURT OF CLAIMS, Washington, D. C., December 2, 1913.

Washington, D. C., December 2, 1913.

Hon. Champ Clark,

Speaker of the House of Representatives.

Sir: The findings of the Court of Claims in the French spoliation case of the brig Little John Butler, Smith, master, were certified to Congress on January 18, 1907, and in a case lately decided by this court some of the rulings in said case were modified. There has been no appropriation made in the case first mentioned, and by instructions of the Court of Claims I have the honor to request that the findings in the said case of the brig Little John Butler, Smith, master, be returned to this court for further examination.

Respectfully,

EDWD. K. CAMPBELL,

Chief Justice.

EDWD. K. CAMPBELL, Chief Justice.

Mr. MANN. Mr. Speaker, I suggest that the files in that case be returned, as requested.

The SPEAKER. If there be no objection, the files will be returned to the Court of Claims in accordance with this request. There was no objection.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 10523) making appropriations to provide for the expenses of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes.

Pending that motion, I should like to see if I can not enter into an agreement with the other side as to the time for general

From the requests that have been made on this side of the House and from my knowledge of the situation on the other side, I ask unanimous consent that the general debate on this bill be closed within four hours, half of the time to be controlled by myself and the other half by the gentleman from Minnesota [Mr. DAVIS]

Mr. MANN. Mr. Speaker, I do not know how many requests the gentleman from Minnesota [Mr. Davis] may have for time, but as this is the first appropriation bill to come up in this session, and as this is the first time when general debate is in order on an appropriation bill, I suggest to the gentleman that probably no one knows just how much time is demanded, and that he do not make that request at this time.

Mr. PAGE of North Carolina. Mr. Speaker, I will make this request, that the general debate run for to-day and be closed

with the adjournment of the House this afternoon.

Mr. MANN. Mr. Speaker, the gentleman would have power on Thursday morning to close debate, if he chose to, by motion, and probably it could be closed without a motion. I hope the gentleman will not make his request at this time.

Mr. PAGE of North Carolina. I think the gentleman from Illi-

nois will recognize that it is very much easier, and perhaps more pleasant, to terminate the matter now and to let the membership know definitely how long it will run than to let it go.

Mr. DAVIS. Mr. Speaker, during yesterday afternoon I had some conversation with the gentleman from North Carolina [Mr. PAGE], and it was thought at that time, from the amount of time I had been requested to yield and the time that had been requested of him, that we might get through with the general dehate in possibly four or five hours.

Since that time, however, I now have a large number of requests for time in general debate. Of course, as far as I am personally concerned, I would like to have the debate largely confined to the subject of the bill, but that, I guess, is impossible. Now, while I would like to enter into an agreement to limit debate, I really can not at this time accept any proposition; but I really hope, and express the hope, that we may get through with the debate this afternoon by the time we adjourn, say, 6 o'clock. The gentleman from Illinois says that he does not think that is feasible, and I am inclined to agree with him. I am anxious to get through, and do not desire to shut off legitimate debate. Quite a number of matters will be debated under this bill, and then the gentleman from Illinois [Mr. HINEBAUGH], the Progressive Party member of the committee, has stated that he desires an hour or an hour and a half. I have now tentatively booked three hours on this side, but I am willing to cut it down to be as reasonable as possible.

Mr. PAGE of North Carolina. Mr. Speaker, so far as application for time is concerned and the demands made upon the gentleman for time, there are possibly as many on this side who

have something in their system that they want to get clear of, and I have no doubt that the demands upon me for time have been greater than those of the gentleman on that side. I think it is more important to go ahead and pass these appropriation bills than to let the general debate go unlimited. to get an agreement to close general debate with the session to-day, and I hope the gentleman can see his way clear to reach an agreement.

Mr. DAVIS. Mr. Speaker, this bill has been drawn along a different line from any appropriation bill since I have been a Member of Congress. The subcommittee, of which the gentleman from North Carolina is chairman, backed up by the general committee, have studiously avoided putting in any new legislation; hence when we get to reading the bill under the five-minute rule it will not take as long as it ordinarily does to pass an appropriation bill where there are many new items of legisla-Where it ordinarily takes a week to pass the District of Columbia appropriation bill, I believe this bill will be passed inside of two days from the time we begin reading it, owing to the lack of items for new legislation in the bill. If that is any argument, I would ask, in view of the representations made by the leader of my party, that some latitude be granted as to general debate. I assure the chairman that I will endeavor to expedite the bill all I can.

Mr. MURDOCK. Mr. Speaker, if the gentleman from North Carolina is going to ask for this unanimous-consent agreement, I wish he would couple with it the request that a proportional amount of time shall be yielded by the gentleman from Minnesota to the gentleman from Illinois [Mr. HINEBAUGH], a Pro-

gressive.

Mr. PAGE of North Carolina. I will say that that is a matter to be determined on that side of the House.

Mr. MURDOCK. I will say to the gentleman from North

Carolina that a request has been put in that form.

Mr. PAGE of North Carolina. Mr. Speaker, I Mr. Speaker, I now ask that the debate be controlled one half by myself and the other half by the gentleman from Minnesota, under such arrangement as

he may make with the Progressives on that side.

Mr. MURDOCK. Will the gentleman from Minnesota yield an hour of his time?

The SPEAKER. Does the gentleman from North Carolina abandon his former request?

Mr. PAGE of North Carolina. I abandon my other request for unanimous consent.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that during the debate it be controlled on his side by himself and on the other side by the gentleman from

Minnesota. Mr. MURDOCK. Mr. Speaker, reserving the right to object, would like to ask the gentleman from Minnesota if the gentleman from Illinois [Mr. Hinebaugh] can have his proportional amount of that time?

Mr. DAVIS. If the gentleman from Kansas will decide what is the proportional amount of time, I will do it. In fact, I am

willing to give him more than that if I can.

Mr. MURDOCK. That is reasonable, and that is all we ask. Mr. DAVIS. I would suggest that if I was given three hours it would not hurt my feelings to grant one hour to the gen-

tleman from Illinois.

Mr. MURDOCK. That is a fair proportion.

Mr. HINEBAUGH. Mr. Speaker, it is somewhat irritating and not a little embarrassing for a man who occupies the position of the ranking Member of his party, which happens to be the first minority in the country, under the suggestion of the leader of the majority party of the country, to have to go to the leader of the second minority of the country and ask for him what are his rights. I feel that very strongly, for, unless some suggestion, at least, is made by the majority that time be granted to the Progressive Members, we are absolutely in the hands of the other minority in the matter of whether we get time or not. I do not think that is fair upon its face. Mr. FITZGERALD. Mr. Speaker, as long as I can recall the universal practice of the House has been—certainly during my

experience here—that the time for debate on general appropriation bills be equally divided between the majority and the

minority.

Mr. HINEBAUGH. Mr. Speaker, will the gentleman yield? Mr. FITZGERALD. I served most of my time in the House on the minority side. I yield to the gentleman from Illinois.
Mr. HINEBAUGH. Is it not a fact that the conditions exist-

ing in the House now, and since the 7th day of last April, are entirely different from what they have been before in the gentleman's experience?

Mr. FITZGERALD. The gentleman is mistaken. I served

in this House on the minority side, when there were representa-

tives of another party here, and at that time no attempt was ever made by them to set themselves up, because of insignificant an equality with the dominant portion of the minority, and no attempt was ever made to take any advantage of it. This arrangement of controlling the time is done for the convenience of the House. If it is not controlled in this way, under the uniform practice of the House, Members are recognized for one hour in their own rights, members of the committee having preferential rights to recognition. The proportion of time which the gentleman would get under those conditions would be as 1 in 21. I should imagine, from the relations of the gentleman with his colleague on the committee, there should be no difficulty in adjusting their differences. So far as I am concerned, I do not intend during this session of Congress to have this side of the House put in a position where it must negotiate with more than one person as the representative of the minority, regardless of how it is made up, for the control of the time of the House. If the gentleman from Illinois [Mr. HINEBAUGH], the second member of the minority on the committee, were in charge, regardless of the number of members affiliated with him politically, I should expect that the other members of the minority would look to him for their time, because I believe that he would be just as fair and deal just as equitably with the members of the minority regardless of their political affiliations as I believe every other Member of the House would under similar circumstances.

Mr. HINEBAUGH. Mr. Speaker, I do not intend for a moment to suggest that there will be any injustice done here

by the Republican minority in this House. The only thing I am contending for is this, that I do feel the majority members The only thing I of the committees who have control of the time and will have control of the time in this House under general debate, in making a request for unanimous consent for the division of time, ought to couple with the request recognition of the party to which I belong and not leave us absolutely helpless and alone to have our right, if we have any right on the committee, or on the floor, by reason of the fact that we are on a committee,

absolutely controlled by the other minority.

Mr. MANN. Mr. Speaker, will the gentleman permit?

Mr. FITZGERALD. Certainly.

Mr. MANN. I desire to make a suggestion that the gentleman from North Carolina [Mr. Page] change his request so that one-half of the time shall be controlled by the gentleman from North Carolina [Mr. PAGE], that six-sevenths of one-half of the time shall be controlled by the gentleman from Minnesota [Mr. Davis], and that one-seventh of one-half of the time, which is proportionately correct, be controlled by the gentleman from Illinois [Mr. Hinebaugh]. [Laughter.] That is what they are entitled to. They always have more, but they do not seem to enjoy it.

Mr. PAGE of North Carolina. Mr. Speaker, I think that would be less satisfactory to the gentleman than to throw himself upon the mercy of his colleague on the committee, the gentleman from Minnesota [Mr. Davis]. Mr. Speaker, I let my

request stand, and submit it as it is.

The gentleman from North Carolina moves The SPEAKER. that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the

bill H. R. 10523, the District appropriation bill.

Mr. BURNETT. Mr. Speaker, before that motion is put, I will ask the gentleman from North Carolina to withhold it for a moment. The gentleman from Pennsylvania [Mr. Moore] tells me that he will withdraw the objection he made to the

request I submitted a few moments ago.

Mr. PAGE of North Carolina. Mr. Speaker, I suggest that
the gentleman from Alabama permit that to go to the end of

the day.

The SPEAKER. Pending the motion to go into committee, the gentleman from North Carolina asks unanimous consent that the time for general debate be equally divided, he to control one-half of the time and the gentleman from Minnesota [Mr. Davis] the other half. Is there objection?

There was no objection.

The motion was agreed to. Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 10523, the District appropriation bill, with Mr. HULL in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 10523) making appropriations for the District of Columbia, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 10523) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915; and for other purposes.

Mr. PAGE of North Carolina. Mr. Chairman, I ask unanimous consent that the first reading of the bill may be dispensed

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the first reading of the bill be dispensed with. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

Mr. PAGE of North Carolina. Mr. Chairman, I yield 30 minutes to the gentleman from Georgia [Mr. CRISP]. [Applause.]

Mr. CRISP. Mr. Chairman, before I commence I ask Members of the House not to interrupt me, as I prefer to pursue the line of argument that I have adopted. When the bill comes up under the five-minute rule I will be glad to answer any questions that may be asked me, if I am able to do so. The speech, Mr. Chairman, I have prepared extends much longer than 30 minutes; therefore before I commence I will ask unanimous consent to extend and revise my remarks,

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to extend and revise his remarks. Is there objec-[After a pause.] The Chair hears none, and it is so

ordered.

Mr. CRISP. Mr. Chairman, I have often heard that "a political platform is like the platform of a train-made to get in on, but when once in you had no further use for the plat-form." This may be true of some men who run for office, but I believe, from the depths of my soul, that common honesty and decency requires a public man to faithfully keep the promises he made to his constituency when a candidate for office. I believe it the solemn duty of men honored by a constituency on a declaration of principles to exert every honorable means to have those principles enacted into law.

The greatest statesman of the century who to-day occupies the White House, President Woodrow Wilson, has won the admiration and confidence of the whole country, for he is a man with a great intellect, broad visioned, devoted to duty, possesses to a rare degree the courage of his convictions, and he believes a political party should keep its campaign promises. patience, but with courteous firmness, he insists that all the campaign promises of the Democratic Party shall be enacted into law, and the whole Nation is proud of our President. I say to the people their confidence is well founded, and I predict before his term of office expires all the pledges of the Democratic Party will have been enacted into law. The people have a right to demand that political parties and public officials shall keep promises made to them.

When I became a candidate for Congress I announced a declaration of principles, and among those principles called attention to the act of June 11, 1878, which provides for one-half of the expenses of operating the municipal government of the District of Columbia to be paid out of the Treasury of the United States. I thought then and I still think it is wrong in principle and unjust to the taxpayers of my district and every other district in the United States, and simply a gratuity and special privilege conferred upon those who are fortunate enough to own property in the District of Columbia. stated if I was elected to Congress I would endeavor to repeal this unjust law. In obedience to that promise and in deference to my conscientious convictions on the subject I have introduced a bill, H. R. 9417, which repeals the act of June 11, 1878

The bill now before the House is the annual appropriation bill, carrying \$11,347,503.49—millions of dollars—to provide for the expenses of the government of the District of Columbia for the ensuing fiscal year, and the bill provides that half of this vast sum shall be taken from the Peoples' Treasury and turned

over to the people of the District of Columbia.

When under the rules of the House it will be in order to offer an amendment to the bill, I shall offer one to amend the bill by striking from it the provision providing that "one-half of the sum shall be paid from the Treasury of the United States," and the further provision that the act of June 11, 1878, shall be repealed. I earnestly hope that the House will act favorably upon my amendment and thus correct the injustice that since 1878 has been perpetrated upon the people of the United States.

Mr. Chairman, of course the great newspapers of the city of Washington and the favored few who have received vast benefits by the way of cheap taxation are bitterly opposed to having the gratuity of about \$6,000,000 a year taken away from them, as without this gratuity their tax rate will necessarily

be somewhat increased.

Mr. Chairman, I have heard two reasons suggested why the act of June 11, 1878, was enacted by Congress. The first, that District of Columbia owed millions of dollars and was bankrupt; that it could not support its municipal government and pay the interest on its bonded indebtedness; and that as it was the National Capital it was the duty of Congress to aid it

financially in its time of distress. This is not a business reason. but is an appeal to sentiment and charity, and the Congress of the United States has most generously answered the appeal. Since 1878, in response to this appeal, the Treasury of the United States has contributed over a hundred millions of dollars to the District of Columbia for its municipal government. This does not include the vast millions the Government has spent here to erect its own buildings and purchase parks. has paid millions of dollars as interest and principal on the bonded debt of the District of Columbia, which the act of June, 1878, did not require, and to-day I doubt if any city of its size in the United States has as small an amount of bonded indebtedness.

There is no logical reason why those who own property in the city of Washington should not pay the expenses of their government just as citizens of other cities do. There is abundant property in the city of Washington to yield sufficient revenue to maintain its municipal government just as other cities of the United States do for themselves. The annual appropriation bill for the District of Columbia carries about Let us now see if there is sufficient property in the District of Columbia to raise this amount without inflicting an undue hardship or burden upon the property owners.

The last Democratic House authorized the District Committee to make an investigation as to assessments of property for taxation within the District of Columbia. On that committee participating in the investigation was the present able Secretary of Commerce, Mr. Redfield, and Mr. Henry George, Jr., of New York, who doubtless knows more of land values than any other York, who doubtless knows more of land values than any other citizen within the United States. The members of that committee who signed the report were Ben Johnson, of Kentucky; Henry George, Jr., of New York; William A. Oldfield, of Arkansas; W. C. Redfield, of New York; C. O. Lobeck, of Nebraska; C. A. Sulloway, of New Hampshire, Leonidas C. Dyer, of Missouri; and V. L. Berger, of Wisconsin—all able, conscientious Members of this House, and they thoroughly performed the duty intrusted to them. formed the duty intrusted to them.

On page 1 of their report you will find this statement:

Real estate in the District of Columbia is assessed \$414,000,000 below its true value, the true value being \$744,000,000, while the assessment is only \$330,000,000.

On the same page of said report the committee finds that there is great discrimination between classes in the assessment for taxation within the District of Columbia. The committee says that 40,000 small homes of Government clerks and workingmen generally stand assessed at an average of 90 per cent of their value, while the beautiful residences of the northwest show an average of 50 per cent. On page 20 of said report the committee finds the total assessment of the District of Columbia averages almost exactly one-third of the true value, or onehalf of the two-thirds assessment which the law requires as the minimum. On page 13 of the report the committee says that the assessment shows approximately but 44 per cent of the true value of land, so that 11 per cent on a theoretical two-thirds valuation reduces itself to 661 of 1 per cent of the true value. Therefore the real estate tax rate, which looks like \$1 on a hundred in the District of Columbia, turns out to be only 661 cents on the hundred. Surely this is an extraordinarily low realty tax for so large a city. Take the values of the realty in the District of Columbia as found by your committee, its value is \$744,000,000; intangible personal property, such as mortgages, bonds, notes, and money, is exempt from all taxa-tion in the District of Columbia (see 38 U. S. Stat., 620), and articles of personal adornment, diamonds, pearls, rubies, and jewelry of all kind are exempt from all taxation. (See 38 U.S. Stat. L., p. 620.) There is returned for taxation within the District personal property of the value of only \$32,122,407. It is a notorious fact that many retired millionaires of the country are moving to Washington, and, in my judgment, one of the reasons why they are so coming here is to escape taxation.

Let us see now how much personal property there is within the District not now taxed which should bear its proportion of the burden of government. The Comptroller of the Currency advised me that the capital and surplus of the 37 banks within the District of Columbia amounts to \$29,321,435; that on the 21st of October, 1913, the individual deposits in the banks of the District amounted to \$70,000 and the columbia amounts of the District amounted to \$70,000 and the columbia amounts of the District amounted to \$70,000 and the columbia amounts of the columbia amounts to \$20,321,435; that on the columbia amounts to the District amounted to \$70,323,519.86, and that the banks had deposits here to the amount of \$7,965,688.53, so the actual cash in the District of Columbia deposited in the banks alone amounts

to \$78,289,208.

I have endeavored to ascertain the value of the stocks, bonds, notes, and mortgages owned in the District, but as such property is not now taxed, the United States Census Office advised me there was no way of ascertaining its value. This is a large, rich, and influential city, and no one can question that the value

of such property owned within the District amounts to over \$50,000,000, but to be conservative I will estimate it at \$50,000,000. There are millions of dollars' worth of jewelry owned by the rich and influential citizens of the District, but as it is not returned for taxation I can not ascertain its value, so I

leave it out of my calculations.

Take the realty value, \$744,000,000, the tangible personal property as now returned at the low value of \$32,122,407, and add to this the value of the stocks, bonds, notes, and mortgages, estimated at \$50,000,000, the actual cash within the District, \$78,289,208, the value of the capital and surplus of the banks within the District, amounting to \$29,321,435, and you have a total valuation of property within the District of Co-lumbia amounting to over \$933,000,000 upon which tax assess-

ments may be levied.

Under the law the tax rate in Washington is \$1.50 per hundred on land, assessed at two-thirds valuation, which makes the rate, according to law, \$1 per hundred on the true value of land, but the actual rate paid by property owners, according to your committee, is only 661 cents per hundred. Millions of personal property pay no tax at all. Some of the corporations pay a tax on their gross income, but not on the value of the stock. This is all the tax owners of property pay, for they have no State and county tax to pay, as do the citizens of other cities in the United States.

Let us see what the taxpayers of some other cities of the United States pay for maintaining their municipal government. In reply to my request, the United States Census Office furnished me the tax rate of certain cities approximately the size of Washington, and I will here give you the tax rates:

	Nominal tax rates.			Model.	Reported basis	Reported	Rate
	City.	County.	State.	Total.	assess- ment.	true tax	hun- dred.
Detroit. Milwaukee Cincinnati. Newark New Orieaus Washington, Minneapolis. Jersey City. Indianapolis Louisville. Atlanta	\$19,832 11,468 11,430 13,760 22,000 15,000 23,400 13,860 15,900 17,900 12,500	\$1,454 3,425 2,959 4,076 2,950 5,550 2,615 2,800	\$2,204 985 451 2,564 6,450 3,580 2,500 3,185 5,000 5,000	\$23,580 15,878 14,840 20,400 28,450 15,000 20,990 22,000 21,900 25,700	Per cent. 100 90 100 100 75 60 50 100 60 70 60	\$23,580 14,290 14,840 20,400 21,338 10,000 14,995 22,000 13,140 17,990	\$2.35 1.42 1.48 2.04 2.13 1.00 1.49 2.20 1.31 1.70

Mr. SISSON. Mr. Chairman, does the gentleman object to an interruption?

Mr. CRISP. I stated that I preferred not to be interrupted. Mr. SISSON. I only wanted to ask this question, to make it more clear to myself and other Members: Does the gentleman include in that rate the State and county taxes?

Mr. CRISP. I do. I endeavor to bring that proposition out later. I endeavor to be perfectly fair.

Mr. SMITH of Minnesota. Will the gentleman yield?

Mr. CRISP.

Mr. SMITH of Minnesota. The gentleman says the Minneapolis rate is 1.49 on the 50 per cent valuation?

Mr. CRISP. Yes, sir.

Mr. SMITH of Minnesota. The Minneapolis rate, including county and State taxes, is 3.6.

Mr. CRISP. I was quoting literally the rates as furnished

me by the United States Census Office.

Mr. Byrns, of Nashville, says the tax rate in the city of Nashville, which includes State and county tax, is \$2.80 per hundred.

Mr. Murray, of Boston, advises me the rate in Boston. ton is \$1.83 per hundred. Mr. Bulkley, of Cleveland, advises me the rate in Cleveland is \$1.50 per hundred. Mr. Brumbaugh, of Ohio, advises me the rate in Columbus, Ohio, is \$1.45 per hundred. Mr. Coady, of Maryland, advises me the rate in Baltimore is \$2.22; and I know the citizens of my own little city in southwest Georgia have to pay a tax of \$3 per hundred.

The advocates of the present law will doubtless claim the tax rates of some of the cities here cited are not as high as the rates quoted by me. They have done it in the past and will probably do it again. The rates quoted by me include taxes paid by the property owners to the State and county as well as the city, and it is a favorite plan of the advocates of the half-and-half plan, when quoting tax rates of other cities, to deduct the amount the property owners therein pay to their State and county and only quote the city rate. In Washington only one tax is paid, the city tax, as no State and county taxes are required; so the only fair way to compare the burden of taxation borne by property owners here and elsewhere is to compare the total taxes paid by each on the property owned by them,

Let us take the lowest tax rate paid by any of the cities referred to. The tax rate of Indianapolis is \$1.31 per hundred, or a tax of 1.31 per cent. Surely the citizens of Washington can not ask a lower tax rate than is the lowest rate paid by any other city in the United States approximately its size. If you will levy 1.31 per cent on the value of the property owned in Washington, you will realize the enormous sum of \$12,222,300 for the purpose of running the municipal affairs; but, Mr. Chairman, this is not the only source of revenue the great city of Washington has. Take the report of the Commissioners of the District of Columbia, just filed, and they state the total receipts for the fical year ending June 30, 1913, at the low assessment prevailing here, amounts to \$9,131,270.93. The report shows prevailing here, amounts to \$9,131,270.93. The report shows that of this amount \$5,101,804.80 was realized from taxes on realty and \$1,130,840.52 personal taxation, which includes the tax on the small amount of tangible personal property returned for taxation. The report shows that in the items of receipts going to make the total the Government of the United States contributed \$264,795; and to be more than fair in my argument I desire to deduct this amount from the gross receipts from the fiscal year, as shown by the report of the commissioners. deducting the amount received from taxation on real and personal property and the sum contributed by the Government from the total revenue, \$9,131,270.93, you will see the District has a revenue, exclusive of the sum raised by taxation on property, both real and personal, of \$2,989,625, derived from licenses, water and light rent, and so forth. Add this amount of revenue to the revenue which would be raised by levying the lowest tax rate obtained in any of the cities mentioned of 1.31 per cent tax rate obtained in any of the cities mentioned, of 1.31 per cent on the true value of the property within the District which should be subject to taxation, to wit, the sum of \$933,000,000, and the District of Columbia will have revenue to support its municipal government amounting to \$15,211,925. This, Mr. Chairman, proves the falsity of the proposition of the District not being able to pay its own bills without enduring hardship and burdening the property owners therein.

While the tax rate of the District is lower than the tax rate

While the tax rate of the District is lower than the tax rate of any other city approximately its size, the cost of government per capita is greater than it is in other cities, for the management of the affairs of the District are conducted on a lavish scale; but, Mr. Chairman, while the per capita tax is greater in Washington, the taxpayers of Washington do not pay it, for the

people of the United States contribute half of it.

While the indebtedness of other cities is being increased, the indebtedness of the city of Washington is being steadily reduced, and its entire indebtedness, funded and unfunded, according to the last report of the commissioners, amounts to only \$9,100,683. Suppose we get the average tax rate of the cities herein mentioned, and the average rate will be 1.78 per cent. If you levy this rate upon the total property values, both real and personal, within the District, you will raise the enormous sum of \$16,607,400.

Mr. Chairman, it is not necessary to levy such a high tax rate, but in my judgment, if the property in the District of Columbia is fairly returned for taxation and the bonds, stocks, mortgages, notes, money, and jewelry of the rich are required to bear its proportionate burden of the Government, a tax rate of 1 per cent in connection with the revenue the District has from other sources will raise \$12,319,000 to pay the expenses of the municipal government, which even the friends of the half-and-half plan admit is sufficient. But for the purposes of argument, let us disregard all personal property and see what amount of revenue can be raised from real estate alone, without entailing hardships upon the owners. If you pay only one tax on real estate and have your personal property exempt from taxation, surely a rate of \$1.50 per hundred is not excessive. The value of the District real estate amounts to \$744,000,000, and 1½ per cent levied on this will yield \$10,710,000; add to this \$2,989,625, the revenue from special licenses, police-court fines, water and light rents, and so forth, you will have the sum of \$13,609,625. Surely, Mr. Speaker, this is ample revenue to pay the expenses of a municipality of about 350,000 people, when the great State of Georgia, with 2,609,121 people only raises to support the State government \$6,000,000, and expends of that amount \$1,180,000 for pensions to Confederate soldiers and their widows, and appropriates of the remainder \$2,550,000 to the public schools of the State.

Let us now consider the second reason urged by the proponents of the law. They contend the Government of the United States owns approximately half the property of the District of Columbia and that it is unjust to have so large an amount of property owned by the Government exempt from taxation; therefore the Government should pay half the expenses of the District of Columbia. The only logical inference from this contention is that because the seat of Government is located in

Washington it is an injury instead of a benefit to the fortunate people who live in the Capital City. Is this proposition true? Any honest man who will give the matter a few moments' consideration will be compelled to answer in the negative. There are a few manufactories in Washington, very few wholesale houses, practically no manufacturing industries or enterprises, but the city is maintained and supported almost entirely by the vast sums of money paid out by the Federal Government to the thousands of Government employees who reside in Washington. When the seat of government was laid out in Washington in

When the seat of government was laid out in Washington in 1802 it was largely woods, swamps, and marshes, and but for the seat of government being located here large parts of it to-day would be a swampy wilderness instead of the most beautiful city in the world. From 1802 until the act of June 11, 1878, the Government of the United States from time to time by acts of Congress appropriated many millions of dollars to the municipal government of the city of Washington to aid them in building and paving streets, laying sewer lines, and all the other municipal

pal improvements.

Mr. Chairman, the growth of the city of Washington, the high value of its real estate, is attributable solely to the fact that the seat of government of the United States is located here, and every sensible man knows it. To the property owners here, who profess to believe it is an injustice to them for the Federal Government to own a large amount of property exempt from taxation, I give them this thought to ponder: What would be the value of their real estate should the seat of government be removed? There are cities in the United States that would gladly donate a billion dollars to the United States for the proud privilege of being made the Capital of the Nation, and would ask no contribution from the Government to run the municipal government. I have no doubt the city of St. Louis, so much nearer the center of population, would cheerfully contribute that amount; but, Mr. Chairman, lest I be misunderstood, I want to expressly say I am opposed to ever removing the seat of government from the city of Washington. It has too many sacred and hallowed memories; but if, for some unlooked-for, unexpected reason, the seat of government should be removed from Washington, the following lines from Goldsmith's Deserted Village would truly and graphically describe what would then be the condition of the now rich, proud, and beautiful Capital of our glorious Republic:

Sweet Auburn! Loveliest village of the plain, Where health and plenty cheer'd the laboring swain,

No more the glassy brook reflects the day, But, chocked with sedges, works its weedy way; Along thy glades, a solitary guest, The hollow-sounding bittern guards its nest; Amidst thy desert walks the lapwing flies, And tires their echoes with unvaried cries; Sunk are thy bowers in shapeless ruin all, And the long grass o'ertops the mouldering wall.

Mr. Chairman, what is the truth of the contention that the Government owns half the property of the District of Columbia. The last governor of the District was Gov. Sheppard, and he made the statement that the United States owned half the property here, but he used values and not area, and in order to run the holdings of the United States to as high a value as possible he included the streets and avenues, and valued them at 30 cents a square foot. Mr. Noyes, owner of the Star, stated, in an article published in the Star, June 6, 1910—that when the cities of Washington and Georgetown were laid out, that within their corporate limits there was 6,110 acres, and of this amount 3,606 acres were set apart for streets, avenues, and alleys.

I have seen it stated that 982 acres were donated to the United States upon condition that the seat of government should be located here, and that the Government afterwards purchased 541 acres. You see, Mr. Chairman, not counting the land within the District included in the streets and alleys, which for all practical purposes belong to the residents, the Government owned about one-fourth of the land within the city of Washington proper. While the legal title to the streets, avenues, and alleys in the District is in the United States, it is simply held by the Government for the use of the people (see Smith v. Corporation, 20 Howard, p. 147), just as the title to the streets and alleys of every other city in the United States is vested in the sovereign as trustee for the public, and nowhere in the world are streets and alleys assessed for taxation.

This was the condition that obtained in 1878, when the act of Congress was passed, providing the Government should pay half the expenses of the city of Washington. The Director of the Census Office of the United States advised me by letter dated December 2, 1913, that there are within the District of Columbia, exclusive of sidewalks, streets, and alleys, 23,178 acres; that of this land the Government of the United States owns 5,212 acres; that there are 15,228 acres of land in side-

walks, streets, and alleys now within the District.

Mr. JOHNSON of Kentucky. Mr. Chairman, will the gentle-

Mr. CRISP. Yes, sir. Mr. JOHNSON of Kentucky. I would like to ask the gentleman if in dealing with the number of acres that are set aside in the District of Columbia for streets, alleys, and avenues, he has dealt with the subject as it appears upon paper or as it appears in streets that are actually paved? Now, the gentleman well knows that a great many acres of avenues and streets are set aside as front yards which are occupied by the owners of the property and which are not the street proper. If the gentleman has arrived at the difference between the streets as they are built and the streets as they are laid out on paper I will be glad to have some information.

Mr. CRISP. In answer to the question I simply took the statement of the Census Office, and the Director of the Census advised me that for several days he had an employee at the engineer's office of the District, and this data was furnished from there, and I accepted it as I wanted to be absolutely fair

in any argument I use.

Mr. Chairman, I do not believe Congress, when it passed the act of 1878, ever intended to tax the people of the United States half the expenses of developing a 10-mile square tract of land, mostly in woods and field. It is a very different proposition paying half the expense of maintaining 3,606 acres in streets already laid out and mostly paved and 2,500 acres of building lots than to bear half the burden of laying out, grading, paving, developing, and maintaining 15,220 acres in sidewalks, streets, and alleys and 23,178 acres for residence lots. I do not believe when Congress passed the act of 1878 it was ever dreamed that it would be used to make the people of the United States bear one-half the burden of developing so large a tract of suburban

I have shown from the United States Census Office that the entire holdings of land by the United States within the District of Columbia amounts to only 5,212 acres, and practically all of this amount is in parks, and surely the residents of the city of Washington derive the most benefit from the parks. I have heard it claimed by some of the friends of the half-andhalf plan that the Government owns so much parkage within the District of Columbia that it should pay half the expenses. But, Mr. Chairman, the Government does not own as many parks as the residents desire, for the Commissioners of the District of Columbia asked this Congress to include in this bill an appropriation of \$370,000 for the purpose of buying a new park of 82 acres. It is therefore apparent the taxpayers of the United States were imposed upon in 1878, for the Government did not own half of the taxable property of the District, but only owned, exclusive of sidewalks and streets, 1,523 acres out of the 6,110 acres within the corporate limits of the city of Washington.

Let me repeat to emphasize. In 1878, when the act was passed, there was 6.110 acres being cared for, 3.606 of it in streets already laid out and mostly paved, and the Government owned 1.523 acres of the 6,110, the Government land being mostly in parks. Now, the people of the United States are bearing half the burden of caring for 38,406 acres, of which amount 15,228 acres are in streets, many of them yet to be developed, and the Government only owns, including all parks within the 10 miles square, 5.212 acres. Excluding the parks, the Government does not own 100 acres that are used exclusively for Government use. It is manifestly unjust to longer require the taxpayers of the United States to pay half the ex-

penses of the District of Columbia.

On account of requiring the people of the United States to pay half of the expenses of Washington the property owners of the District of Columbia are the most favored property owners, so far as taxation is concerned, in the whole wide world. The local tax rate is one dollar and a half per hundred on real estate assessed at a two-thirds valuation, which means that the tax on real estate is only \$1 per hundred on its market value, even if the property is assessed at two-thirds of its value, as the law requires, which is not the case, and millions of personal property absolutely is exempt from all taxation.

If you will examine the report of the Committee on the District of Columbia, Sixty-second Congress, second session, on 'Assessment and taxation of real estate in the District of Columbia," you will find that the property of many of the rich and influential residents is taxed at about one-third of its value, which makes the tax rate for them 50 cents per hundred. Intangible personal property, such as money, notes, bonds, mortgages, and also luxuries, like diamonds and jewelry, is exempt from all taxation. Tangible personal property, like merchandise, horses, mules, furniture, household and kitchen German Government pays no tax on a large part of property

ware, is taxed at the rate of \$1.50 per hundred on its market value. Thus, Mr. Chairman, it will be seen that in the heart of the Nation, while some rich man's palatial home is taxed at about one-third of its value and his notes, bonds, money, and jewelry are exempt from taxation, the furniture, household and kitchen ware of the poor unfortunate man who owns no real estate, but must rent a home for himself and loved ones, is taxed at \$1.50 per hundred on its full valuation.

This, Mr. Chairman, ought not to be, and if there is to be any discrimination, while I favor equal and exact justice to all. I prefer the discrimination in favor of the poor unfortunate citizen rather than his strong, rich, and influential neighbor. I earnestly favor repealing the law exempting intangible personal property from taxation, for the rich should bear their

equitable share of the burdens of government.

Mr. Chairman, this low rate of taxation is only possible because of the gift of the people's money from the Treasury of the United States. There is not another city in the United States whose tax rate is as low as the tax rate of the city of Washington. You take the capital cities of all the States in the Union and you will find that the various States con-tribute nothing to the maintenance of the municipal government of its capital city. I apprehend in about every State of the Union personal property, such as money, bonds, mortgages, notes, diamonds, jewelry, and so forth, bears its equal bur-den of taxation with real estate, but such is not the case in Washington, and as a result the idle rich are beginning to move to Washington to escape taxation, for there is no inheritance tax here, and the only tax paid is on real estate and tangible personal property at the very low rate before

Our republican form of government is dual in character, with certain sovereign functions vested in the respective States and certain powers lodged in the Federal Government. The sovereign States composing the Union pay no tax on their property located in their capital cities, and our Federal Government pays no tax on property owned by it in any of the

I have read in some of the Washington papers that Congress contains "pork-barrel statesmen" because Members of Congress desire the Government to erect buildings in their States. The people of the different States are proud to have the National Government erect buildings within their midst for the conduct of the Government's business, but before the Government will erect any building in any State the State must cede its sovereign jurisdiction over the territory to the United States and the Federal Government pays not one cent of taxation to the State, city, or county by reason of its ownership of the property.

In the capital of my State the Federal Government owns a public building that cost a million dollars, and there is also located in the city of Atlanta one of the two great penitentiaries costing several millions of dollars. The people of Georgia are glad for the Government to own property within our State, but the United States does not pay one cent of taxation either to the State of Georgia or the city of Atlanta by virtue of its ownership of such valuable property therein. The same rule applies to Government property owned in every other State, city, or town within the United States. The Government pays no tax thereon, and why should an exception be made as to

property owned in Washington?

Let us now see how the foreign Governments of the world deal with their capital cities so far as the ownership of prop-

erty is concerned.

The Russian Government does not pay taxes on property un-less the property is rented to individuals and yields a revenue. Portugal pays nothing on its property nor contributes anything to the municipality. Brazil pays no tax on its property. Chile pays no tax on its property. Netherlands pays no tax on its property. Japan pays no tax on property owned by it. Spain property used for governmental purposes is not taxed by the municipality. Buenos Aires pays no tax on property used for governmental purposes. France pays no tax on property owned in Paris which produces no revenue, but the French Government contributes to the city of Paris to remunerate them for services rendered in sweeping the streets and draining to the sewers and for like services rendered. Our mother country-England-pays no tax on property owned in the city of London, but the English Government, as a matter of gratuity, makes a contribution to its various municipalities by reason of owning property therein exempt from taxation, but the amount of the contribution is fixed by the English Parliament. The Italian owned by it. The German Government engages in business in competition with private persons, and on such property taxes are assessed. The correctness of this statement may be verified by reference to Senate Document No. 163, Sixty-third Congress, first session, which contains a report of the various ambassadors and ministers of the United States accredited to the forenamed foreign countries of the world. While a few of the foreign Governments do pay taxes to the municipality of its capital city, it likewise pays the same tax to every other municipality within its realm on property owned therein, but, Mr. Speaker, the United States pays not one cent of tax to any State or city within the United States by reason of its ownership of property therein, and why should it discriminate in favor of the city of

Mr. Chairman, the Government of the United States has been more than generous to the property owners of the District of Columbia. As I have before stated, from the location of the sent of Government here in 1802 up to 1878 Congress, from the people's Treasury, has donated to the city of Washington many millions of dollars, the exact amount I am unable to state, but since the act of June 11, 1878, there has been regularly appropriated out of the Treasury of the United States many millions of dollars for the municipal government of Washington. The books of the Treasurer of the United States will show that the total amount that has been donated by the United States to the city of Washington since 1878 exceeds the enormous sum of

\$100,000,000.

I believe it is time the people's interest should be looked after and this gratuity discontinued. Of course, those who have been reaping the benefit from this favoritism will bitterly oppose its discontinuance. My good friend, Mr. Johnson, some years ago drew a word picture of a boy which I think so accurately describes the relations existing between the Government of the United States and the District of Columbia that I shall take

the liberty of quoting it:

the liberty of quoting it:

I met a boy on the highway not long ago. Before I saw him I met a woman in the road. She came running down the road in haste, looking back, first over one shoulder and then over the other, as if danger followed. She did not ask any protection from me, however. She seemed in no apparent danger. I asked her no questions, and she fied along. When I turned a curve in the road I met a great big, fat, cliubby boy, 16 or 17 years old, with curls hanging down his back, the perspiration rolling down his face; and up the road he came running. When I met him, he stopped me and said, "Mister, did you meet a woman up the road just shead of me?" I said, "I did." He said, "Was she dressed in a black suit of clothes, with a black bonnet and a big black plume in her hat." I said, "Yes; that is the woman I met, and she was running." He said, "Well, I want to catch her. Will you let me have your horse and buggy that I may catch her?" I said, "I do not know about that. First, tell me what you want with her." He then said, "That is my mamma, and she is trying to wean me, and I swear I do not intend to let her do it."

Mr. Chairman, this described the feeling of the property.

Mr. Chairman, this described the feeling of the property owners of the District of Columbia toward the Government. They do not want to be weaned from the Federal Treasury; but, in my judgment, they have been nourished too long by the Treasury, and they should be cut adrift and allowed to pay their own bills and manage their own affairs. Surely no one will contend that the District still wears its swaddling clothes and that it is unable to stand alone. But some of my colleagues may feel they are not interested in this matter, as their constituents have not complained to them as to the existing law.

Mr. Chairman, but few of the people of the United States know of the injustice being done them, but I believe it to be the duty of the representatives of the people to look after the interest of the people who honor them and not wait to be instructed to act. It is the duty of a Representative to seek out pernicious laws and try to remedy the existing evil. I say to you my colleagues that if your constituents become aware of the existing conditions and you do not support my amendment to repeal the act of June 11, 1878, some of you may be left at home at the next election. To bring the matter home to you, permit me to state a concrete case, illustrating it by referring to my own State. Suppose the members of the legislature from my county should go to the capital city, Atlanta, and there vote to pay half the operating expenses of the government of the city of Atlanta for paying its streets, constructing sewers, paying the salaries of its omerats, poncental, the salaries of its city goving its hospitals, schools, and all other expenses of its city goving its hospitals, schools, and all other expenses of its city goving its hospitals. ing the salaries of its officials, policemen, firemen, and supportthat fact became known, does any sane man believe they would be reelected to the legislature? No; a thousand times no. would be left at home, and I say to you my colleagues if your constituents know that you are voting to pay half the expenses of the municipal government of the District of Columbia out of their Treasury, in my humble judgment they will surely call you to account.

Mr. Chairman, we all know that all the money that goes in the Treasury of the United States is collected from the people by way of taxation. As I have before stated, the amount contributed from the General Treasury of the United States to the maintenance of the affairs of the District of Columbia amounts to about \$6,000,000. The people of the State of Georgia, the calculation being based on the number of people in the United States and the money taken from the Treasury which belongs to the people of the United States, donates yearly to the favored few of the Capital City about \$175,000.

Since the act of 1878 the city of Washington has rapidly grown, and to-day many woodland tracts many miles remote from the city of Washington have been by real estate speculators laid out into beautiful residence sections. Paved streets, lights, sewers, and all other modern conveniences have been brought thereto at the public expense. Millions of dollars have been spent in laying out streets and paving them, and half the cost paid out of the funds of the United States. In all other cities the abutting property owners pay at least a part of the cost of paving streets, but not so in the District of Columbia. Abutting property owners pay nothing for paving streets, but the entire cost is paid out of the general funds, which means

the United States Treasury pays half.

Gentlemen, can you imagine any reason why property owners in the District of Columbia should be relieved of paying part of the cost of the paving of streets in front of their property, which greatly enhances its value, while property owners in all other cities must pay for such improvements? It is practiced here solely because the United States pays half the expense. There is to-day within the District of Columbia beautiful residence sections, miles from the heart of the city, with streets paved, water and sewer mains laid, city lights, and houses few and far apart, but the lots are for ready sale when the fortu-

nate real estate speculator can get his price.

Fortunes have been made here by capitalists, purchasing sub-urban woodland tracts, who possessed sufficient influence to get streets laid out and paved and other conveniences extended to their property without paying one cent for said improvements. Last week an honored Member of this House advised me that a real estate agent, endeavoring to sell him some of this beautifully leveloped suburban property, urged as an inducement for him to buy that the property is assessed so low for taxation that he could afford to hold it and would reap a handsome profit. Unfortunately, Mr. Chairman, this statement is true, for the House committee on tax assessments reports that this developed suburban property is assessed for taxation at about 20 per cent of its value. Do you believe this would be possible were it not for the United States paying half the bill? Is this just to the rest of the people of the United States who pay for such improvements to their own property? The United States owns public buildings within every State in the United States, and it has been a subject of discussion on the floor of this House that the United States will pay no part of the cost of paving streets in front of its public buildings in the various States of the Union.

In the States private abutting owners of property are assessed to pay for paving the street, and in addition the general treasury of the city or other private property owners must pay the entire cost of paving the street in front of the Government property, for the Government will not pay it. Is it just that the Government should pay half the expense of paving all the streets of the District of Columbia when it will not pay any part of paving, even in front of its own property, in your State or mine?

Let us consider for a few moments some of the local institutions which your and my constituents are forced to contribute to yearly. Let us consider the schools. The public schools of Washington expend nearly \$4,000,000 per year, one-half of it being donated by the people of the United States, who receive no benefit therefrom and who are also taxed to support

schools in their own towns, villages, neighborhoods, and cities.

The citizens of Washington pay nothing toward the support of the schools in your State or in mine. The Washington schools are open to all, white, black, dagoes, citizens of the United States and foreigners, and has no age limit. From the Public Treasury is furnished free to all pupils books, pencils, stationery, and all school supplies; magnificent schoolhouses are erected; large playgrounds bought and equipped with things to amuse the children, and your constituents and mine paying their pro rata part of one-half the cost,

While I have had no personal experience with the schools of Washington, from what I have heard and read of them I think they are conducted along the right lines, and that no city in the world has a finer public-school system than has the Capital They not only teach books, but they are conducted along vocational lines, and boys are not only taught to read and write, but they are taught carpentry work, and are given elementary instructions in electrical engineering, civil engineering, and both mechanical and architectural drafting. The girls are taught art, dressmaking, millinery, cooking, and domestic science. Both boys and girls are given a thorough business course in bookkeeping, banking, shorthand, and typewriting. When pupils graduate from the public schools of the city of Washington, they are thoroughly equipped to make useful citizens, and can earn a livelihood. This, Mr. Chairman, is, in my judgment, the wisest kind of an education, for many boys and girls graduate from the higher colleges and are incapable of earning a living.

I do not call attention to the vocational feature of the public schools to criticize, but, on the contrary, to praise them. I am in favor of vocational education, and I hope this Congress will pass a bill extending financial aid to all the States and Territories of the United States to promote vocational education, and when the other citizens of the United States are aided from the Federal Treasury to maintain a system of vocational education I think the citizens of Washington are entitled to the same consideration, and I will vote to give them their equitable part of the amount appropriated, but until all the citizens of the United States receive like treatment I am opposed to the Federal Treasury granting a special gratuity to the schools of Washington. The citizens of Washington have every right to be proud of their school system, and they should be willing as good citizens to be taxed to maintain and support them as the taxpayers of other cities support their schools. In Georgia, the State taxes her citizens \$2,500,000 for the maintenance of the public schools, and the citizens of every town and city pay an additional tax for the support of the local schools, and we buy in addition the books and school supplies our children use. As a Georgian, I am willing to be taxed to improve the Georgia schools; to pay our faithful and efficient teachers more; to provide free to the pupils books and school supplies and for longer school terms, for the future of the Nation depends upon the intelligence and education of our people, but I shall oppose any law which taxes my constituents and yours to help defray the expenses of the public schools of Washington. They should, as does every other city in the United States, support their own public schools.

Under existing law the people of the United States are required to pay half the expense of developing rural property which is so remote from the city of Washington that the Government of the United States has eight rural mail routes to deliver to the few people residing in the District around about Washington their daily mail. Mr. Chairman, I think the citizens of the District are entitled to the rural-route service just as the other citizens of the United States are entitled to the same privilege; but while we in the States have been asking the Government to aid in the construction of building good roads, many thousands of dollars have been spent from the Federal Treasury to grade, pave, and lay out magnificent roads through the country regions of the District of Columbia. While the ruralroute carrier in your State and mine travels his weary way over rocky, sandy, hilly, and muddy roads, his more fortunate brother in the District of Columbia travels over a graded and paved road, some of them illuminated with electric lights, half the expense thereof having been paid by the taxpayers of the United States. You may approve of this, but I never will. I favor the Government aiding the States in building good roads, and when the Government aids the States I will cheerfully vote to likewise aid the District of Columbia, but not until then, for I believe in equal and exact justice to all the citizens of the United States, whether they be residents of the District of Columbia or of the several States of the Union,

The city of Washington has magnificent hospitals, libraries, homes for the aged and infirm, tuberculosis hospitals, hospitals for the insane, homes for children, and many other noble institutions, and I rejoice that they are here. They are the direct result of the teaching of our Lord and Saviour, and I wish each of them Godspeed in their noble work. Every State and city in the United States have like noble institutions and pay all the expense of maintaining them. The citizens of Washington should likewise bear the burden of supporting their own charitable institutions, and not require, Mr. Chairman, your constituents and mine to pay half their bills. What difference, how-What difference, however, does it make to the citizens of Washington if your constituents and mine labor and toil from early morning to late at night in cotton, corn, and wheat fields, in factory, mine, and sweat-shop, on railroads, in stores, offices, and at every other vocation of life, so long as a part of the fruits of their labor is donated to them to lighten the burdens of taxation they should rightly bear. But, gentlemen of the House of Representatives, you should care, and if you do, you will join me in my efforts

to stop the injustice of it by voting for my amendment to repeal the act of 1878.

The people of the District of Columbia are pleased to refer to the partnership existing between them and the United States. My idea of a partnership, Mr. Chairman, is for each of the partners to treat the other with the utmost fairness, but such has not been the case with the partnership between the people of the United States and the District of Columbia.

Through the diligence and efforts of the able and fearless gentleman from Kentucky [Mr. Johnson], the House of Representatives on December 8, 1913, passed a bill requiring the District of Columbia to pay back to the United States \$1,003,000 they had secured from the Treasury of the United States in 1877 without authority of law. The last Congress passed a law requiring them to refund to the Treasury of the United States \$700,000 that the District had overcharged the United States for caring for the insane of the District of Columbia.

Since 1878, in my judgment, I believe the District of Columbia has required the United States to pay over \$8,000,000 as interest and principal on its bonded indebtedness, which under the partnership the District should have paid. In my judgment, while the United States was guarantor for the payment of the interest and principal of the District's bonds, it never obligated itself to pay any part of it. This question arose on the 4th of February, 1913, when the District bill was up before the last Congress, and my late lamented colleague, Mr. Roddenbery, as Chairman of the Committee of the Whole, ruled that the Government was not responsible for the interest on these bonds, but was only guarantor. An appeal was taken from his decision, and the House sustained him by a vote of 97 to 33, which means that in the judgment of the House the contention that I now make is

true and correct.

Mr. Chairman, as one of the representatives of one of the partners—the people of the United States—in my judgment, where a partnership is conducted on such principles, the interest of my clients—the taxpayers of the United States—demands a speedy dissolution of such a partnership.

With these facts and figures before you, gentlemen of the House of Representatives, I do not see how you can knowingly vote to continue to tax your people to lighten the burden of taxation of the property owners within the District of Columbia.

Addressing my Democratic colleagues on the floor of the House, the platform of our party adopted in Baltimore demands economy in the administration of public affairs. The Secretary of the Treasury has just transmitted to Congress an estimate of the appropriations asked for by the various heads of the Government to conduct its business for the next fiscal year, and it totals the inconceivable amount of \$1,108,681,772. Gentlemen, we must practice economy, for it is unjust and unfair to place such a burden upon the taxpayers of the country.

I believe it our duty to carry out our platform and we should commence on this, the first of the great appropriation bills coming before the House, to keep our pledges to the people. We can save the taxpayers on this bill alone about \$6,000,000 a year by repealing the act of June 11, 1878. We can do this, as I have shown, without imposing any hardship or undue burden of taxation upon the property owners of the Capital City by simply taking away from them a special privilege they now enjoy.

Gentlemen, let me remind you we now have a direct tax, and when the internal-revenue collectors go to your constituents and mine to collect the income tax those citizens will fully realize they are paying the sums appropriated by Congress, and they will demand of us economy in public affairs.

will demand of us economy in public affairs.

Mr. Chairman, I know that the negative do-nothing policy is most conducive to the personal ease and comfort of public officials and that when anyone attacks the great special interests of the country, whether they be the protected manufacturer, the gigantic trusts, powerful railroad corporations or municipal corporations, or rich land speculators he brings down upon his head ridicule, criticism, and abuse. The special interests always use every means that wealth can bring to its command to destroy a man they can not use and control, and "Pity 'tis, 'tis great wealth has always been able to bring to its support some of the great daily newspapers of the land, the political bosses, hired lobbyists, and politicians who are out of jobs. I knew if I attempted to interfere with the special privilege that is being enjoyed by the rich, powerful, and influential property owners, consisting of both individuals and corporations, in the District of Columbia at the expense of my people, I would become the target of their attacks, but I owed a duty to my people and I determined to perform it to the best of my ability, no matter what the result might be to me personally. Just as I

expected, the Washington papers have turned loose their batteries on me, and I quote from an editorial appearing in the Washington Herald of November 29, 1913:

[Editorial from the Washington Herald, Nov. 29, 1913.] THE CRISPIAN PLATFORM.

Unless there had been more notable and interesting political campaigns in Georgia than that by which the former parliamentary clerk of the House, Mr. Charles R. Chisp, became a Member of the House of Representatives, the people of the United States would incline to the belief that public issues are rather more rare than Republicans in the Commonwealth which has produced such giants as Ben Hill, Alexander H. Stephens, Little Joe Brown, and Ty Cobb.

The heavy planks of Mr. Chisp's platform, according to the reports of his successful appeal to the voters of the third Georgia district, were made of "reforms" he wished to see instituted in the District of Columbia. While the residents of Washington have been piteously appealing for a more general interest throughout the country in the country's Capital, Mr. Chisp has proved the one man who promised "if chosen by the free and intelligent members of my party," as the candidate's assertion is usually phrased, to aid in changing things in the 10-mile square.

sertion is usually phrased, to aid in changing things in the 10-mile square.

It's the "half and half" system, by which the municipal expenses of the District are paid, that Mr. Crisp would change. This is taken from his platform:

"I am opposed to this injustice of taxing the people of Georgia and other States to maintain the government of Washington, and, if I am elected, shall endeavor to repeal this unjust law and let the citizens of Washington pay their own expenses and manage their own municipal affairs, as do the citizens of all other cities and towns in the United States. Georgia contributes yearly for the cause about \$150,000."

Well, \$150,000 is a whole potful of money—down in Georgia. It amounts to more than a nickel a head for every man, woman, and child in the Empire State of the South. The \$15,000 Mr. Crisp draws for his term of two years in Congress is only 10 per cent of the \$150,000 he will save the people of Georgia.

Whatever the people of the District suffer as a result of Mr. Crisp candeavors to change a system which has proved advantageous to the development of the National Capital and not hitherto appreciably onerous to the people of the United States, it will be a solnee to reflect that Mr. Crisp is saving every man, woman, and child, from the barefoot boy on the farm to the well-booted, well-heeled bondholder of the Gateway of the South, more than a nickel, not quite a dime.

From boyhood days I have always heard a homely proverb,

From boyhood days I have always heard a homely proverb, more expressive than eloquent, that the "hit dog yelped," and the longer I live the more convinced I am of its truth.

Mr. Chairman, if I can save every man, woman, and child in the Empire State of the South 10 cents per head per year-it has gone on since 1878-by repealing this special privilege, I will be doing them a great service; but I conceive it to be the duty of a Congressman to legislate not only for his own district, but for the people of the entire United States. We have about 100,000,000 people within the United States, and if I am successful in repealing the act of June 11, 1878, according to the Her-aid I will be saving the people of the United States about \$10,000,000 yearly, "a consummation devoutly to be wished," and I will have performed a public service that I shall ever be pleased to remember.

Mr. Chairman, unfortunately there is not just one special interest being favored from the Public Treasury, but there are many of them, and if through my humble efforts I can cooperate in saving 5 to 10 cents on each of the special privileges now enjoyed by the favored few my people and the people of the United States will be relieved from many of the burdens of taxation now resting upon them, and I will have wrought a good work, and I know my people will approve my efforts.

If there is one class of persons that it would delight me to serve more than another, even if it is only to save them 5 cents, it is the barefoot boy on the farm. Many of them go barefooted, not from choice, but from cruel necessity, for it is a struggle with them to pay the many tax burdens they bear, and nothing will please me more than to lighten their heavy load.

Mr. Chairman, I have nothing but the kindliest feeling for the law-abiding American citizens who reside in the Capital City. I am willing to do more for them than they seem to be willing to do for themselves-to grant them local self-government. Taxation without representation is abhorrent to every liberty-loving person, and it was this that caused the young American Colonies in 1776 to rise in their righteous indignation against taxation without representation and throw off the British yoke. be that receiving large bounties from the Treasury of the people of the United States has destroyed the independence of the American citizen residing in our Capital?

American citizen residing in our Capital?

What is the past history of the city of Washington? The Government of the United States took possession of the District of Columbia in 1800, and on May 2, 1802, an act of Congress was passed incorporating the city of Washington. It had a mayor and common council. It managed the affairs of the city as like officials do in all the other cities of the United States. The officials were elected by its white male inhabitants. From then until 1871 the people of the District of Columbia had local self-They managed their own internal affairs, levied government. such taxes as they saw fit, and the officials of the United States exercised no more authority over the internal affairs of the District of Columbia than they did over other cities anywhere within the United States. (See U. S. 132, Met. R. R. Co. v. D. C., 5.)

On the 8th day of June, 1867, Congress passed a law permitting negroes to become qualified voters within the District of Columbia, and, in my judgment, that was the beginning of the end of local self-government, for in 1874 a Territorial form of government was provided for the District of Columbia. Such, In the main, Mr. Chairman, continues the law until to-day. The Congress of the United States performs the functions of a mayor and council for the city of Washington. Under the rules of the House, two days in each month are devoted to performing the duties of a city council for Washington, and yearly there are many days of the time of the House occupied in passing the annual appropriation bill for the District of Columbia.

Mr. Chairman, in my judgment this should not be, for the people's Representatives should occupy their time and attention in legislating not only for the citizens of the District of Columbia but for the citizens of every other State within the United States Congress should not be converted into a mayor and council for one of the many cities of the United States. Some people and the great newspapers in the District complain that Congress will not allow them sufficient appropriations to make the municipal improvements needed. I favor giving the people of the District of Columbia a local form of self-government, letting them legislate for themselves instead of Congress performing this function. I say to them, if the act of June 11, 1878, is repealed, I am willing to vote for a law conferring upon them the right of local self-government; favor giving them representation in Congress; and will vote for qualifications to the elective franchise so as to exclude the ignorant negro from participating in the election.

Mr. Chairman, I would not have the Government of the United States become a burden to the property owners of the District of Columbia, neither do I favor the property owners of the District of Columbia being a burden to the taxpayers of the United States. As a national Representative, I favor the Government of the United States building all buildings necessary for the conduct of its public business in the Capital City, and I believe in building beautiful ones in keeping with other civic improvements. I favor the Government maintaining its parks and developing them so as to make them as attractive as possible, and I will support legislation that requires the Government to keep its property in perfect condition, so as to do its part toward making the Nation's Capital the most beautiful one in the world. I would have the Federal Government pay for paving the streets and sidewalks in front of its property here and everywhere else. If the Government receives services from the District in the way of water, lights, sewerage, and removal of garbage from its property, I would have the Federal Gov-ernment pay to the corporations of the District a sufficient amount to thoroughly reimburse it for the service rendered.

To be more than fair, if the Government of the United States owns property within the District of Columbia which is not used exclusively for governmental purposes, but is used for private purposes and yields revenue to the United States, I would have the Government pay taxes on such revenue-producing property, just as private property is taxed within the District of Co-

Mr. Chairman, all I want is equal and exact justice in the way of expenditure of the public money between the people of the United States and the people of the District of Columbia. The Government has donated millions and millions of dollars to the city of Washington, which it has not done to the other cities of the United States, and I think the interest of the taxpayers demand that this gratuity should now cease, and I shall offer an amendment prohibiting it in future, and I hope Congress will pass it and thus correct an injustice to the American people which has existed since 1878. [Applause.] Mr. PAGE of North Carolina. Mr. Chair

Mr. Chairman, I yield 20 minutes to the gentleman from Mississippi [Mr. Sisson].

Mr. SISSON. Mr. Chairman, this subcommittee has worked diligently upon this bill, and I want to say that every member of the committee has given his entire time, his attention, and his very best business judgment to the make-up of this bill. I want especially to call attention to the very able service rendered to the House and to the country by the able chairman of this subcommittee [Mr. Page]. He has been painstaking and diligent in his management of this bill. The House and the country are fortunate in having a man of such talent at the head of a committee such as this. I want to state another thing for the benefit of the House, and that is this: When this bill was made up, every single item in the bill was considered upon its merits and we made no sort of calculation as to

whether or not it would be more or less than the last appropria-Every member of the subcommittee felt that in considering these items we should consider them as business men and consider them as we consider our own affairs and give to the District of Columbia every penny to which we thought the District was entitled. Not only that, but in reference to street improvements the subcommittee visited every street, with one or two exceptions, that the commissioners asked to be improved, and this long list of streets, most of which were included in the estimates to be improved, was visited by your subcommittee.

In many cases we found that they desired to tear up splendid pavements, and in other cases they desired to tear up streets which were in good and almost perfect condition in order that they might put down another character of pavement. all those cases the subcommittee, without any consultation with each other, made their notations after a personal visit to these streets on the margin of the paper, and no member of the subcommittee knew what the other's marginal notations were until they came to consider the improvement of the streets and alleys in committee. There was a remarkable unanimity of opinion by your subcommittee as to the improvements of the streets and alleys, and I do not believe we differed more than in four or five instances as to the streets which ought to be improved.

Now, there has been a great deal of criticism of this subcommittee and of the Committee on Appropriations, as a whole, by the Washington press for "paring and cutting and skinning the District," as they say. These gentlemen who criticize this appropriation bill ought to realize it carries a greater amount of money than was appropriated in any bill that has ever passed this House, and, with one exception, greater than any bill which ever became a law. We appropriate here \$84,000 more than the bill carried after it had been increased in the Senate last year. It was my hope that when this bill left the House that the committee, in its wisdom, with the indorsement of the House, might send a bill less in amount to the other end of the Capitol than that carried last year; but your committee, without any idea of endeavoring to cut down solely for the purpose of saying that we cut the last year's appropriation bill, after the bill was made up and the Clerk footed it up, found we had spent \$84,000 more than we spent last year. And yet the press of Washington say that we have been paring and depriving the District of that to which it is entitled.

I do not intend to go specifically into details, because the chairman of this subcommittee will do that, but I want to call your attention to some expenditures on the streets in order to show you that we have been more than liberal. In Georgetown the schedule last year was \$6,500 for street improvement; this year it is \$6,000. That is one reduction of \$500. In the northwest section, except V Street from Tenth Street and Florida Avenue to K Street, and from Washington Circle to Twenty-first Street, \$16,500 was carried last year and \$8,200 this year. Now, there is a marked reduction from last year's appropriation, but any of you who will visit the various sections of this city will find that the northwest has absorbed a greater portion in amount in the past-that is, has absorbed in her street improvements vastly more than any other section.

Now, when we take those sections which have been contending for years that they were neglected, you will find that the southwest of the city last year got \$6,300, while your committee this year gives them \$21,000, an increase of \$14,700. That is a section where the poor, where the employees of the District, live and have built their little homes and have been neglected so long that your committee were unanimous in the opinion that these streets and alleys had been neglected, and they gave in almost every instance what was demanded in those sections. As to the southeast section, except I Street from Eleventh Street to Thirteenth Street, last year the appropriation bill carried \$19,000. This year your committee offers to give them For the northeast section, except K Street from Seventh Street to Tenth Street, the bill this year carries an increase

For another class of improvements that are mentioned specifically in the bill, and especially for those streets which your subcommittee visited, this year the bill carries \$85,500, while last year the bill carried \$194,250. Now, these were streets which your committee personally visited, and were the specific items asked for, but when you take the aggregate of amounts asked for in the bill you will find that the committee has been extremely liberal in street matters. So I might go through the balance of the bill, as the chairman of the committee will do, and show you that the committee has been as liberal, and in many instances more liberal, than has been the case heretofore.

But I want this committee to understand this condition which Heretofore it was required of the District of Columbia that they pay a certain amount of their indebtedness.

This year that indebtedness is wiped out. What is the result? Of the revenues collected in the past from the District of Columbia a certain amount has been used upon municipal expenses, and the surplus of the revenue has been used to liquidate the indebtedness. Now that they have that indebtedness liquidated they are endeavoring to get the United States Government to lay a dollar down by the side of every dollar raised by the District of Columbia and increase municipal expenses over \$3,000,000 in one year. Why? Because under the present rate of taxation they get that amount of money; but because they have been paying a portion of that burden and old indebtedness, now they propose to take out of the Federal Treasury just that amount of money more, whether they need it or not. And your subcommittee declined to enter into all of these extravagances

Let me call your attention to another peculiar condition here in the District. You will hear the newspapers and the people interested in the District of Columbia arguing that 50 per cent of the property in the District of Columbia, the real estate, is owned by the United States Government. That is not true. Less than 30 per cent of the area is owned, including the streets and alleys, by the United States Government.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield? Mr. SISSON. I do. Mr. CALLAWAY. What percentage of the land does the

Mr. CALLAWAY. What percentage of the land does the Government own outside of the streets and avenues?

Mr. SISSON. I can not tell you exactly. Mr. CALLAWAY. That would be the real basis.

It is a difficult matter to determine that. If Mr. SISSON. the gentleman will look at the hearings, he will find that I asked quite a good many questions in order to ascertain that amount of land exactly, but it will take practically a survey to

Mr. JOHNSON of Kentucky. Mr. Chairman, if the gentleman will pardon me right there-

Mr. SISSON. Certainly-

Mr. JOHNSON of Kentucky. I can say that it can be safely asserted that the Federal Government uses exclusively for Federal purposes in the District of Columbia less than 1 per cent of the total real estate.

That is, actually uses. But your commission-Mr. SISSON. ers, and particularly the engineer commissioner, were unable to tell the subcommittee just exactly what proportion of land outside of the streets was owned by the Federal Government,

But I want to tell you this, that while they contend for themselves that the Government owns half or more than half of the land they are contending that the Government shall take over, in addition, all these little points for parks off the ends of the streets, and they have been endeavoring to get the United States Government to take over several additional parks, amounting to several hundred acres, and deduct that land from the amount owned by the people of the District of Columbia.

They blow hot and then they blow cold. They tell you that the United States Government ought to bear half the expense, because the Government owns so much property here. they get themselves into a worse condition, if the argument is true, by endeavoring to lay that much extra territory on the Federal Government and get the Federal Government to take

But, gentlemen, let me analyze the situation for you for a By way of parenthesis I indorse the speech made by the distinguished gentleman from Georgia [Mr. Crisp], but I doubt extremely whether all the facts he stated as to the city taxes are absolutely correct. I think he will find that the State, county, and municipal taxes of a majority of the cities of the size of Washington will average 2 per cent upon the property values. I think they will be found to average at least that. But here is the condition in Washington: They levy a tax to raise about half of the amount they wish to expend, depending upon the Federal Government to expend the other half out of the Federal Treasury, and they have an exceedingly low rate of taxation. And even with that low rate I think half their property has escaped taxation. I do not believe that the figures given you by the gentleman from Georgia [Mr. Carsp], of \$50,000,000, will cover the solvent credits of the city of Washington, much less other kinds of property—intangible property

But the true measure of taxation ought to be this, and that is what is in the minds of your committee: A true appraisement should be made to determine a reasonable assessment of the property in the District of Columbia, and then we should determine what is a reasonable tax rate upon that assessment. And then we should collect that money, and if it is not a sufficient amount of money to pay for the improvements which Congress in its wisdom thinks ought to be carried on in the Capital

City, then let the United States Government supplement that by

such additional sums as it sees fit and proper.

Suppose, for argument's sake, you assess both personal and real property in the District of Columbia at 2 per cent, because, including the State, county, and municipal taxes throughout the United States, the taxation in the cities elsewhere will average more than that. Therefore if what other cities voluntarily tax themselves and what other States voluntarily tax themselves and what other counties voluntarily tax themselves may be accepted as a reasonable basis we may fix a rate, if you please, less than that average and levy it upon the property of the District of Columbia.

If it does not raise enough revenue to run the city government as it ought to be conducted, then we ought not, because we have the power, levy additional taxation against the District of Columbia. We ought to deal fairly by the District. But I appeal to this House that we should also deal fairly with the

constituents we represent. [Applause.]

Let the people of the United States understand that as Members of Congress we will do the people of the District of Columbia no injury, and let the people of the United States also understand that we will do them no injury, and that we will deal with the people's property in the District of Columbia as the people deal with their own property at home. And then, if Congress will expend more money than has been expended proportionately in other cities of like character and size, let the Congress supplement the District revenues with an income from the Treasury if it sees proper. If it wants to beautify the city, let Congress determine what the beautification will be. The people of the District of Columbia then would be placed on an equal footing, so far as taxation is concerned, with the people who live outside of the District. But I am unwilling that because people happen to live in this favored city, that because the residents get the benefits that come from the location of the Federal Government here, they shall get an additional benefit by having half of their legitimate local taxes paid by the people who live in the districts that you and I represent.

I am unwilling that that condition shall prevail, because it is doing the people of the United States an injustice, while the people living in the District of Columbia and owning property here are not bearing their pro rata share of the expenses of the Government. I believe that the proposition which your committee, after carefully considering this matter, have presented in this bill ought to be carried out. If 1½ per cent, 1½ per cent, or 2 per cent is a fair taxation upon the property of the District of Columbia, let the property owners of the District pay it. Then they will be paying what they ought to pay toward governmental expenses. And when the Federal Government decides that that is not a sufficient sum of money, then the Federal Government may supplement it by any amount which they

It is said that this is an attack upon the half-and-half plan. Yes; the half-and-half plan is not sacred to me. If the half-and-half plan was necessary during the time the city was languishing in debt, before the hills had been graded down, before the hollows had been filled up, before the streets had been laid

out, that is no reason for saying that it is necessary now.

And let us say, for the benefit of the people of the District of Columbia, that in laying out these streets and alleys the Federal Government had control of it, and laid out many streets and alleys wider than they would have been laid out if they had been laid out by the District of Columbia. The people of the District of Columbia have this argument in their favor; but I have not taken into consideration the benefits to the property of the District by virtue of the location of the Capital here. When the people of the District of Columbia are paying an amount of taxes that is equal to that paid by the people of other cities, I think they are enjoying an immense advantage over other cities in the location of the Federal Government here. Every man who does a little grocery business, every man who does a dry-goods business, every man who does a law business, every man who practices medicine, must get his livelihood out of the taxes which are collected in your districts and

Another thing, great commercial cities are afflicted with panics and business depressions. Men are turned out of employment, factories are closed, and business depression causes great loss of property in every city of the United States except the District of Columbia because here there is a great lost of the United States are lost o the District of Columbia, because here there is a gradual increase of salaries, and a gradual increase of the number of employees, and when other cities are languishing, the amount of money paid out on the pay rolls of the Federal Government is the same in hard times that it is in good times.

Mr. JOHNSON of Kentucky. It is \$5,000,000 a month.
Mr. SISSON. I am informed that it is \$5,000,000 a month, and that will be turned over many times in business. I believe Judge Crisp figures that a great city like St. Louis, or a great State like Missouri, could afford to duplicate all of these Federal buildings in order to get the benefit of the business which would come from the location of the capital there. But the people of the District of Columbia, interested in real estate, interested as property owners, are unwilling to be treated like the people of other cities are treated. I am willing to treat them just as the cities in my State are treated, and for one I would resist any encroachment upon their rights. I believe it ought to be the duty of every honest Representative here to look into this bill carefully, and to guard carefully the interests of the District of Columbia, because the people of this District have no representation on the floor of this House.

There is a plan for representation on the floor of the House. When they have representation here I am willing that they shall have it, but when they do have it I want the property of the Federal Government segregated from the property of the District. Let the Federal Government take over its own property. Let the Federal Government maintain and support it, and let the representatives of the District of Columbia come on the floor of this House and represent here the interests of the District. Give them the proper franchise laws and let them pay their own expenses, and let us withdraw from the partnership. [Applause.]

How much more time have I, Mr. Chairman?

The CHAIRMAN. The time of the gentleman has expired. Mr. SISSON. I had one other suggestion that I wanted to make, but I will not consume any more time.

Mr. PAGE of North Carolina. Mr. Chairman, I will ask the gentleman from Minnesota [Mr. Davis] to consume some of his time.

Mr. DAVIS. I yield 30 minutes to the gentleman from Illinois [Mr. HINEBAUGH].

Mr. HINEBAUGH. Mr. Chairman and gentlemen, my colleague from Illinois [Mr. MANN], in referring the other day to the question of the open conference scheme of the Progressive Party, said he had no doubt that the members of the Progressive Party could hold an open conference in one row of the seats of this House without disturbing its deliberations, and that if the time ever came, which he doubted, when we would have any more than enough to fill one row of seats, it would probably be necessary for us to follow the Republican plan and hold a secret caucus instead of an open conference.

I want simply to say to my colleague from Illinois that the Progressives are now making plans to fill up several seats in the next Congress of the United States, and that we have great hopes of being able to accomplish that result; and that if we do, we shall still continue to hold the open conference instead of the secret caucus, and that we will not hold it in the House while its business deliberations are in progress. He also stated on the floor of the House this morning that there was a panic right now created by you Democrats, as much of a panic as would be necessary to change the majority in this Congress to a Republican majority in the next Congress. I agree with the gentleman that there is a panic in the country right now, but it is a panic very largely of the Republican leaders, due to the fact that the rank and file of what is left of the Republican Party is hastening so rapidly into the ranks of the Progressive Party.

I desire, Mr. Chairman, at this time to read as a part of my remarks, in my time, a resolution that was passed in one of our open conferences this morning. It reads as follows:

our open conferences this morning. It reads as follows:

Resolved, That the Progressives of the House of Representatives view with interest the deathbed repentance of the Republican leaders for the sins of the late Republican national convention and their present hypocritical offer of reform in the representation at future conventions; but we call attention to the fact that reform of the national convention does not touch the fundamental differences between the Progressive and the Republican Parties, and that in all probability presidential candidates hereafter will be nominated, not by conventions, but by direct vote of the people.

We accept with profound gratitude President Wilson's indorsement of the Progressive principle of direct presidential primaries and we pledge him our support in resisting the alliance between reactionary Democrats and reactionary Republicans to delay and defeat the bill for presidential primaries introduced by a Progressive Congressman at the beginning of the extraordinary session of Congress.

THE NATIONAL PRESIDENTIAL PRIMARY.

Mr. Chairman, on the 7th day of last April—the first day of the extra session—I introduced a bill providing for a nationwide presidential primary, and on June 13 I again introduced another bill of the same character but differing very substantially from the first bill in its general provisions.

The first bill is H. R. 1693 and the second bill H. R. 6059. Both bills were referred to the Committee on Election of President, Vice President, and Representatives in Congress. Both were intended to carry out, in so far as possible, the provisions of the national platform of the Progressive Party, which declared in unequivocal terms for direct primaries for the nominations of State and National officers, for nation-wide preferential primaries for candidates for the Presidency

Mr. YOUNG of Texas. Will the gentleman yield?

Mr. HINEBAUGH. For a question.

Mr. YOUNG of Texas. The second bill was more progressive

than the first one, was it not?

Mr. HINEBAUGH. It might be so considered in the opinion of the gentleman, but we hope that the Democratic majority in this Congress will at least take the best provisions from both bills and enact them into law.

Mr. CALLAWAY. Will the gentleman yield? Mr. HINEBAUGH. I have only 30 minutes, and I want to

get through.

Mr. CALLAWAY. I want to ask, with reference to the bill the gentleman introduced for a general primary, does the gentleman think there ought to be a general flat primary governing the whole country; and if he does, I want to ask him if he has considered the advisability of the restricted suffrage in different States? Some States have, in order to have a clean ballot, to some extent a restricted suffrage. Suppose you had a ballot restricting the suffrage to only those who can read, which I think would be beneficial, or a restriction that would keep out the general irresponsible riffraff that drift about, that would curtail their vote and therefore their strength in a flat primary. Now, a general primary would encourage the State to let in ballots without any restriction whatever, whereas each State that maintains its individuality can do what it thinks is best to have a clean ballot.

Mr. HINEBAUGH. I think if the gentleman will permit me to proceed I will partially, at least, answer his question as I

House bill 1693 provides for a preferential primary for the candidates for the office of President of the United States and for delegates and alternates of the several political parties to their respective national conventions on the second Tuesday of March, April, or May, 1916, and every fourth year thereafter. It is provided that representation in the national convention of any political party shall consist of one delegate and one alternate for each 15,000 votes cast for each political party in the several congressional districts in each State, and that each political party shall have at least one delegate and one alternate for each congressional district in each State. The bill provides that no State shall be entitled to representation in any of the national conventions until it shall have substantially complied with the provisions of the act.

Any State desiring to take advantage of the provisions of the act is required to provide by law for a presidential preference primary, and for the election of delegates and alternates to the respective national conventions. The laws of the several States providing for such primary election must provide for the expression of the first and second choice of the voters' preference for candidates for President of the United States. Provision is also to be made for the punishment of offenses against the primary law, which shall be as severe as that provided by the statutes of each State for similar offenses against the general

election laws of each State.

Section 7 provides that the national organization of a political party shall consist of one committeeman from each State, to be selected by the members of that political party in their State, in such manner as each State shall by law direct.

It is further provided in section 8 that the proper official of the State shall certify, under the seal of the State, to the Secretary of the Interior, the names and addresses of the delegates and alternates to each of the national political conventions to which delegates and alternates have been elected from each State. Such certificate shall give the result of the primary elections, as to the choice of the voters of each party for its candidates for President of the United States, and a tificate shall be issued for each political party taking part in the State primary elections.

The Secretary of the Interior is required to canvass the result of the primary elections and to give to the candidates for President his certificate as to the choice of the voters of any political party in any State, as many votes as each State is entitled to delegates in the national conventions of each party. After canvassing all the votes of all the States holding such primary elections the candidate for President who has received a majority of all the preferential votes in his party shall be the candidate of such political party for President of the United States,

and a proclamation to that effect shall be issued by the Secretary of the Interior. It is provided that if the canvass of the votes shows that no person has received a majority of all the votes of his party, then, in that case, the national conventions of each party shall select the candidate for President.

The result of the canvass made by the Secretary of the Interior must be certified to each of the national conventions as far as it applies to the political party represented by such conventions. If from such certificate it appears that no candidate has received a majority of all the votes cast by each political party for the office of President, then the conventions shall proceed to nominate from the list of candidates so certified by the Secretary of the Interior as candidates for President for each political party. The conventions shall also nominate the candidates for Vice President of the United States and shall adopt a platform.

The national committee of each party, in the month of March of each year in which a President is to be elected, is required to determine upon and announce the city in which the several national conventions shall meet, and if they refuse or neglect

to do so then the Secretary of the Interior shall name the city.

The bill introduced June 13—H. R. 6059—creates a board of national election commissioners, to be composed of five persons, to be appointed by the President by and with the advice of the Senate, and places in the hands of the national election commission all the functions which under H. R. 1693 would be left to the various States.

Mr. Speaker, I do not flatter myself with the vain hope that either one of these bills will be passed by this House, but in the light of recent events I do indulge the expectation that a presidential primary law, embodying at least some of the principal provisions in these bills, will be enacted before the ex-

piration of this Congress.

Now, in answer to the gentleman from Texas, I will say that in reading the bills you will find that the first bill I introduced— H. R. 1693-leaves to the various States the details as to how they shall conduct their primaries within their States, and leaves the State legislatures the power to put in such provision not in conflict with the general provision that they may deem wise.

Mr. CALLAWAY. This was the question that occurred to me. The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Texas?

Mr. HINEBAUGH. I yield.

Mr. CALLAWAY. The number of delegates allowed is based on the number of votes cast at the preceding election. That would discourage the restrictive ballot, whereas I think every thinking man would admit that a restrictive ballot that eliminates the element that is purchasable and subject to influence is for the best interests of a representative government. It occurs to me that the primary plan ought to be so framed that each State would have its representation based on the population instead of on the votes cast at the preceding election, because if you base it on the votes cast at the preceding election it would encourage indiscriminate ballots.

Mr. HINEBAUGH. I am willing to agree with the gentleman in that respect in so far as to say that my own personal judgment is that the bill I introduced on the 7th day of April does provide that the States individually may provide by law as to the detailed manner in which the State primary for presidential candidates shall be conducted, and I think is the best of the two.

If such a bill should be enacted into law, it would, of course, supersede the State presidential primary, which now exists in some States, and provide for a uniform primary in all essential particulars throughout the Union. It will remove much of the power of the State bosses and will render impossible the disgraceful features of national conventions in the past. It will place directly in the hands of the people the power to take a more direct and larger part in the affairs of the Nation than ever before, and, Mr. Speaker, why should not the people have this power over their own affairs? Men who oppose the presidential primary do not believe in the rule of the people. contend that ours is not a pure democracy, and that the people can not be trusted to conduct the affairs of the Government, and should therefore not be empowered to express their choice directly for a President of the United States. I have no quarrel with these gentlemen. I realize that many of them are entirely sincere in their views. They belong to the old school of thought; they linger longingly over the memories of the "good old days" of the conventions and the caucus when a few self-constituted leaders, styling themselves the party, could assemble in some back room and decide who should represent the people in all the offices of the city, county, State, and Nation.

It was in those days that the power of one man to say who should be governor of his State existed. Out of that old system grew your Tammany Halls, not only in New York, but in every State of importance in the Nation. It was then the spoils system took root and flourished, and, indeed, so powerful became the machine and the bosses, even in rural communities, that they made moral cowards of us all. The professional man, business man, and laboring man were afraid to offend these mighty chieftains. No man could be supervisor, assessor, or tax collector without the approval of the boss. All municipal contracts, road and bridge building were in the hollow of his hand. The corner storekeeper did not dare to say his soul was his own on any subject of public concern. He might lose the trade of the lieutenants of the boss. The tremendous, subtle, and corrupting influences of the boss permeated and enmeshed every avenue of life and stifled all honest dictates of conscience until you could scarcely find a man in any community who dared to stand up and say the things he knew in his heart were true for fear of personal consequences. Why, Mr. Speaker, in those "good old days" they drove men out of public life who dared to have opinions of their own and to act upon them. It was the golden reign of the political oligarchy The chairman of the township committee was a captain, the chairman of the county committee was a colonel, the chairman of the State committee was a general, and the chairman of the national committee was a king. The rest of us, who belonged to the rank and file, were expected to take orders and obey them in silence with facility and dispatch. The boss who named the mayor formed a company of his own to take over and execute all the city contracts and to get them without too much competition in bidding, and he soon waxed fat. As his purse grew in size and weight he purchased a controlling interest in the leading newspapers of the city, never allowing his own name to appear.

The boss who named the governor was given the far-reaching and tremendous power of the patronage of the entire State, and no appropriation of the funds of the State involving the execution of a contract for the performance of any services was too insignificant to escape his watchful eyes and eager hand. His lieutenants were legion, for the reason that every man interested directly or indirectly in the affairs of the State could be reached through the hidden power of his endless chain. It is not surprising that the sponsors and beneficiaries of this antiquated and corrupt system should oppose its uprooting and

endeavor, if possible, to prevent its destruction.

Mr. MOORE. Mr. Chairman, will the gentleman permit an interruption?

Mr. HINEBAUGH. I am afraid I will not have time to get through.

Mr. MOORE. I want to ask the gentleman whether the condition that he just complained of as pertaining to one of the older parties would not pertain to a religious organization or to labor organizations or to a new political organization in the course of time?

Mr. HINEBAUGH. Unless the system is changed, yes; be-

cause human nature is the same in all parties.

Mr. MOORE. Does not this revulsion of the people against the order of things come in cycles?

Mr. HINEBAUGH. I think a close student of history would answer that question probably by saying that once in every 40 or 50 years it occurs, and that that as a rule is the lifetime of any party

Mr. MOORE. Is it not true of organizations of labor, say, that sometimes they follow a leadership which becomes absolute, concerning which in the course of time the rank and file demand a change; and do not new political organizations arise in the same way; and do not new leaderships come and go?

Mr. HINEBAUGH. Undoubtedly that is so.

Mr. MOORE. Then the gentleman does believe that human nature is substantially the same, notwithstanding the passage of

Mr. HINEBAUGH. I have just said that human nature is the same, and that we must change the system if we would have a change in results.

Mr. MOORE. Is it not likely that in a new political party, where one man is the center of attraction for a time, comes a moment when he passes out, when divisions and schisms on the part of the disciples of such a man lead to friction and the ultimate destruction of the party?

Mr. HINEBAUGH. Of course I can not answer that; that is reaching into the future. But even if that were true, it is no reason why we should not at the proper time, whenever that cycle to which the gentleman refers occurs, do the best we can

to change the present conditions.

The Australian ballot law adopted by some of the States removed the collar from the necks of the laboring men in those States.

The State-wide primary wherever adopted has given the people generally a voice in the selection of candidates for city, county, and State offices.

All these reforms were bitterly opposed by the engineers of the old machine. They said it would destroy party organization and havoc and ruin generally would engulf the earth.

What they really meant was that their occupation of slate making would be destroyed, and for several years they pursued a course of tactics in the various State legislatures calculated to hoodwink the people by pretending to favor primary legislation and at the same time making it ineffective

In my own State the master mechanics of the old machine succeeded in having jokers placed in three primary laws passed by the legislature, knowing in advance that the supreme court of the State would be compelled to declare the laws unconstitutional. But the people of Illinois in no uncertain manner demanded a State-wide primary law. A healthy fear of public sentiment seized the bosses, and they finally passed a primary law that stood the test of the constitution, and then a remarkable thing happened.

The Republican voters of Illinois, contrary to the desire of the bosses, selected Albert J. Hopkins to succeed himself in the United States Senate.

The bosses, however, furious at this invasion of their prerogatives, decided to ignore the expressed will of the people and sent William Lorimer to the United States Senate.

The history of the Lorimer case and the subsequent action of the Senate are still fresh in our memories. Suffice it now to say that out of that effort to thwart the will of the people came an amendment to our Federal Constitution providing for the direct election of United States Senators.

There are men to-day in and out of Congress who tell us this is not a pure democracy, and a selection of a President of the United States by means of a presidential primary law was never intended by the fathers, and is therefore unconstitutional. But I say to you now, gentlemen of this House, that since the day the Republican bosses thwarted the will of the people at Chicago an insistent, determined, overpowering demand for a nation-wide presidential primary law has permeated the entire Nation, and the man who gets in the way of a righteous public need will be relegated to the rear and forgotten.

I contend, Mr. Chairman, that we must either change our form of government and create a limited monarchy or we must accept our present Constitution in spirit as well as in letter and the Government must be conducted upon the theory that the people should rule and that a majority of our people will always stand for those things which are for the general welfare of all the people.

The Democratic majority is very large in the present House. although they represent less than 42 per cent of the popular vote which was cast in the last presidential election. The platform of the Democratic Party does not pledge the party to the enactment of a presidential primary law. In view of these circumstances it must have been especially gratifying to all the real progressive Members of this Congress when the President of the United States, on the 2d day of December last, declared in his annual message for a nation-wide presidential primary law. The President upon that occasion said:

I turn to a subject which I hope can be handled promptly and without serious controversy of any kind; I mean the method of selecting nominees for the Presidency of the United States. I feel confident that I do not misrepresent the wishes or the expectations of the country when I urge the prompt enactment of legislation which will provide for primary elections throughout the country at which the voters of the several parties may choose their nominees for the Presidency without the intervention of nominating conventions. I venture to suggest that this legislation should provide for the retention of party conventions, but only for the purpose of declaring and accepting the verdict of the primaries and formulating the platforms of the parties.

I am delighted that President Wilson has given in this declaration emphatic approval to the fundamental provisions of my With such a powerful ally the chances for legislation providing for presidential primaries should be excellent. the President's tenacity of purpose in this direction is at all comparable with his determination to insist upon tariff and currency legislation in accordance with the platform pledges of his party, the presidential primary law, for which the Progressives have been praying, will not be an idle dream.

It has been somewhat amusing and instructive to witness the backward somersaults of the so-called reorganization Republicans since the President of the United States has placed himself squarely on record on this subject. Almost without exception the Progressive Republicans, both in and out of Congress, who have been advocating a national convention for the purpose of reorganizing the defunct Republican Party, are opposed to the President's plan for a presidential primary law, and are now loudly proclaiming that this is not a pure democracy, but

merely a representative Republic.

The solemn truth is that the President's unexpected attitude on this important subject has knocked their plans into a cocked hat. If these gentlemen will now use their splendid endeavorswhich would be wasted on a reorganizing convention-to effect the enactment of a presidential primary law, the abuses which they hope to correct by that convention will be forever eliminated and we will have no more Chicago tragedies.

Mr. MONTAGUE. Mr. Chairman, would it interrupt the

gentleman to ask him a question?

Mr. HINEBAUGH. I have concluded, and I will be very glad to yield to the gentleman for a question.

Mr. MONTAGUE. Does the gentleman think our present form of government a pure democracy?

Mr. HINEBAUGH. I will say in answer to that question that I think it is sufficiently a pure democracy to stand the enactment of a nation-wide presidential primary law in which every citizen entitled to vote should be permitted to express his choice for candidate for President of the United State.

Mr. MONTAGUE. Mr. Chairman, I am very much interested in the gentleman's speech. I am very largely in sympathy with a good deal that he says, but would the gentleman please indicate to the House his idea of what a pure democracy is?

Mr. HINEBAUGH. I do not care to go into an academic dis-

cussion of what is a pure democracy.

Mr. MONTAGUE. Is it an academic discussion? Can not

the gentleman put his hands on what are the powers exercised by our people under our Constitution and thus determine whether or not the people exercise the powers of a pure democracy

Mr. HINEBAUGH. Mr. Chairman, I will say that I have completed my remarks on the subject, and if the gentleman has contained about his person .omewhere a speech upon the question of a pure democracy, I would be very glad to hear it.

Mr. MONTAGUE. I have none at all, but I inferred from

the gentleman's speech that he believed our Government was a

pure democracy.

Mr. HINEBAUGH. I did not say that I believed our Government was a pure democracy.

Mr. MONTAGUE. Then I misunderstood the gentleman.

Mr. HINEBAUGH. I stated that the gentlemen who have

lately been professing that the evils of the time must be cured by a reorganization convention have stated that this is not a pure democracy, and because of the fact that they say it is not a pure democracy the plan of the President of the United States for a nation-wide preferential primary will not work.

Mr. MONTAGUE. I am not here to take issue with the gentleman upon that. I simply want his idea on the original question propounded as to whether or not he thinks that under the present Constitution the United States is a pure democracy?

Mr. HINEBAUGH. The gentleman will note, if he will take the trouble to read my remarks, that I nowhere stated my belief

as to whether or not this was a pure democracy.

Mr. MONTAGUE. I simply ask the gentleman the question. The gentleman will realize, however important it may be to scan the Congressional Record, that it would quite take one's whole time to do that, if he does nothing else, and we must get the understanding of distinguished gentlemen who address House from time to time by interrogations, a method which I have been perhaps unfortunate to adopt.

Mr. HINEBAUGH. The gentleman asked me the direct ques tion of whether or not I believed ours is a pure democracy, and it is only fair and courteous that I should answer to the best of

my belief.
Mr. MONTAGUE. I appreciate that.

Mr. HINEBAUGH. I will say to the gentleman I do not believe that ours is a pure democracy in the sense we usually understand that term, but I do believe that it is sufficiently a pure democracy so that we may have a nation-wide presidential primary law under our Constitution.

Mr. MONTAGUE. What the word "sufficiently" means is a

mestion. It is a very general term.

Mr. HINEBAUGH. It is, indeed.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. PAGE of North Carolina. Will the gentleman from Minnesota [Mr. Davis] now consume some of his time?

Mr. DAVIS. I will, with pleasure. I yield 25 minutes to the

gentleman from Iowa [Mr. Prouty].

Mr. PROUTY. Mr. Chairman, there are some amendments that will be proposed to this bill emanating with the District of Columbia, and as I will perhaps not have a chance to discuss them under the five-minute rule as I would like to or as the importance of the principle which underlies them demands, I am going to ask the indulgence of this committee while I speak the city.

for a few moments in a general way upon the propositions involved. I am going to speak of the relations of the Federal Government to the District of Columbia-

Mr. JOHNSON of Kentucky. Mr. Chairman, I make the point

of order that there is no quorum present.

The CHAIRMAN. The gentleman from Kentucky makes the point of order that there is no quorum present. The Chair will count. [After counting.] Fifty-three Members are present, not a quorum, and the Clerk will call the roll.

The Clerk called the roll, and the following Members failed

to answer to their names:

Kindel Ashbrook Bailey Barchfeld Barkley Bartholdt Korbly Kreider Lafferty Eagle Eagle Edwards Elder Estopinal Fairchild . Gallagher Langham Lee, Ga. L'Engle Bartlett Garlagner Gardner Gerry Glass Godwin, N. C. Goldfogle Graham, Pa. Lesher Lever Broussard Brown, W. Va. Levy Lewis, Md. Browning Buchanan, III. Buchanan, Tex. Loft McAndrews McGuire, Okla. Gregg Gudger Burdanan, Tex Burgess Burke, Pa, Butler Calder Campbell Candler, Miss. Cantor Cantrill Carew Maher Manahan Guernsey Hamill Hamilton, N. Y. Flamlin Martin Merritt Miller Hamlin Hardwick Hawley Hayes Helgesen Helm Hobson Howard Howell Hexworth Mondell Moss, Ind. Murray, Mass. Neely, W. Va. Carew Chandler, N. Y. Neely, Nelson Norton O'Brien Oglesby O'Leary Clancy onry Cooper Cramton O'Shaunessy Palmer Patten, N. Y. Patton, Pa. Hoxworth Hughes, W. Va. Curley Dale Donovan Jones Kalin Dooling Keating Kent Pepper Peters, Me. Dunn

Porter Post Ragsdale Rainey Reilly, Conn. Richardson Piorden Riordan Roberts, Nev. Rucker Rucker Rupley Sabath Saunders Seldomridge Sells Sherwood Shreve Sims Smith, Tex. Sparkman Stephens, Miss. Stephens, Tex. Stringer Taggart Talcott, N. Y. Townsend Vare Vaughan Weaver Wilson, N. Y. Witherspoon Woodruff Young, N. Dak,

The committee rose; and the Speaker having resumed the chair, Mr. Hull, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill H. R. 10523, found itself without a quorum; thereupon the roll was called, and 300 Members answered to their names, and by direction of the committee he reported the names of the absentees to be entered on the Journal

The SPEAKER. The Chairman of the Committee of the Whole House on the state of the Union reports that that committee having under consideration the bill H. R. 10523, found itself without a quorum, whereupon under the rule he had the roll called, and 300 Members, a quorum, answered to their names, and the names of the absentees will be printed in the The committee will resume its sitting. RECORD.

The CHAIRMAN. The gentleman from Iowa [Mr. PROUTY]

is recognized for 25 minutes.

Mr. PROUTY. Mr. Chairman, as I was remarking before the question of no quorum was raised, there are three measures that have been reported by the Committee on the District of Columbia, which at the proper time will be made or attempted to be made a part of this bill. I have been asked to take charge of, at least, one of those, and realizing the fact that there would be no time under the five-minute rule to properly discuss the question that lies at the bottom of these measures, I have taken a little time from general debate.

The newspapers the other day, in reporting upon the action of the District Committee, stated that the committee was hostile to the District of Columbia, and stated that they were attempting to violate the half-and-half rule; and I wish to say a few words in defense of the action of the committee and in

explanation of the course that they are taking.

I wish to start out with this broad statement that there is no greater wrong that a nation can inflict upon her subjects than to exercise her sovereign taxing power to take from one individual or one community money or property and give it to another unless prompted by charity, necessity, or a high-controlling equity. With this announcement I wish to discuss for a few equity. minutes the relation between the District of Columbia and the United States.

I do not need to inform this House that under the system that has been in force partially since 1804 and fully since 1808 the Federal Government has paid one-half of all the expenses of the city of Washington or the District of Columbia. It has paid for one-half of the education of the people of this District. It has paid for one-half of the expenses of policing this District. It has paid its one-half of the expenses for paying and sewering It has paid its one-half of the one-half of cost of the side-walks that was chargeable to the District of Columbia. Now, applying the broad proposition that I stated in the opening of my remarks, I wish to honestly inquire whether that is fair? I know the newspapers of this town say that every time we try to do anything in regard to this subject we are trying to wrong the District. I want to say for myself and for the members of the Committee on the District of Columbia that I do not believe there is a single one of us who wants to do a thing against the District of Columbia or the city of Washington except that which will square itself with the rules of absolute right and justice.

The people of the United States contribute about \$7,000,000 a year for the support of the local government and its machinery in the District of Columbia. The exact amount contributed last year was \$6,175,095. Dividing that among the several States in proportion to population—and that is about the only basis you can find—I have prepared a statement showing the amount that each State approximately contributes to the expenses of the District of Columbia. Of course, everyone will have to admit that you can not get at it to a cent, because the taxes of the Government are assessed by an indirect method; but perhaps the nearest we can get is to figure it upon the basis of per capita. And I have taken the trouble—and a good deal of trouble—to distribute that fund. I am going to ask that this be made a part of my speech:

States and Territories.	Schools.	Streets, sewers, water mains, improve- ments, and lighting.	Police and fire depart- ment.	Miscella- neous.	Total.

والمنافض وال		V a Call Control	NAME OF TAXABLE PARTY.	THE RESERVE OF THE PARTY OF THE	

I want to call attention to a few things. I take my own State first. That State contributes to the District of Columbia \$38,666 for its schools. The people and already burdened with the very efficient although expensive school system of our State. And yet in effect the Legislature of the State of Iowa, through Congress, appropriates \$38,666 out of their revenues to help educate the people of the District of Columbia. Iowa appropriates or contributes \$20,291 for the purpose of taking care of the streets of the city of Washington, notwithstanding the fact that every city in my State feels that it is burdened now with the expenses of taking care of all improvements in front of their own property and on their own streets,

Mr. CARY. Right there may I interject a question? Is it not a fact that the city of Des Moines also pays for all improvements around Government buildings, as do all other cities in the State?

Mr. PROUTY. Oh, yes. I may also say that while in this city the Federal Government pays for the curbing and sidewalks in front of its property, in my State the Federal Government has three buildings and it will not pay a cent of taxation, nor will it contribute a dollar to either pavement or sewerage

or any expenses incident to special improvements.

We pay from Iowa \$20,411 for helping support the police of the city of Washington. We have been asking again and again in our city that we have a few more policemen to protect our own people and our own property, and if we had this \$20,000 that we send down here to Washington, I assure you it would furnish us ample protection in the city of Des Moines and other cities of my State. This, with miscellaneous matters which I have detailed in this statement, brings the total up to \$149,112. I have here a list of all the States, and I am going to put it in the Record, so that all of you gentlemen will be able to see just what amounts are coming from your several States for the support and sustenance of the District of Columbia, and ask you and the citizens here if this is right and fair.

Now, the very first argument that is brought in support of this proposition is that the city of Washington is a national city. Now, that is a misconception. The District of Columbia under the Constitution was made subject to the jurisdiction of the United States. In other words, it was designed that it should be 10 miles square, located somewhere, and this was the place. That 10 miles square should be taken and all the jurisdictions of the States removed, and it should be put absolutely under the Federal Government; but the Federal Government has no different or higher control over the territory of the District of Columbia than the State of Iowa has over the territory within its borders. The State of Iowa can pass laws for the incorporation and government of cities. So can the Federal Government pass laws for the control of cities and municipalities in this jurisdiction.

While now we have only one municipality, when this territory first came under the control of the Federal Government there were three cities in the District of Columbia. I make that as the foundation point, because every man who has ever talked to me has done it upon the idea that for some reason or other because the Federal Government retained control over the territory it in some way became responsible for its debts.

Iowa has absolute control over the territory in the city of Des Moines, and yet the people of the city of Des Moines would never think of making demand upon the State legislature for a contribution for either its police, its schools, or its other expenses.

I said in my opening sentence that there might be questions of philanthropy or charity or high controlling equity that would make it proper that there should be imposed such a burden. I realize, gentlemen, that it is the duty of the strong to help take care of the weak. It is a principle that I recognize in legislation. But there is nothing in the situation of the city of Washington that makes this consideration applicable. I have taken the pains to go over the reports of the United States census, and I want to say this to you—it may startle some of you; it did me—that the people in the city of Washington per capita are the richest people of any people in any city of its size in the United States. And yet every one of these cities, or the citizens thereof, are compelled under the laws in force on the statute books to contribute a part and bear the burdens of these people who are abler from a purely financial standpoint than the people out of whose pockets it comes to bear that expense.

Mr. BURKE of South Dakota. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. PROUTY. Yes.

Mr. BURKE of South Dakota. Before the gentleman gets too far away from Des Moines, I want to ask him whether or not his city pays all the expenses incident to the special assessments for the improvement of streets, sidewalks, and so forth, about the State Capitol of Iowa, or whether the State is called upon to pay some part or all of that expense?

upon to pay some part or all of that expense?

Mr. PROUTY. Well, I do not intend to enter into an extended discussion, and as that question has been up in my State it would take more time than I care to waste to discuss it; but so far as it is pertinent, I want to say that the people of the State of Iowa have raised the question that they ought not to pay for those special assessments for improvements around their public buildings. I have not seen the latest results of that

discussion, but it is my impression that the State pays for

one-half of the present improvements.

But that is not the subject that I am discussing now. did not the gentleman ask me this question: "Because of the beauty and pride of your capital city, why do not the people of Des Moines ask the people of the State of Iowa to contribute to their schools and other local expenses?"

The next question that would naturally bring itself to the attention of every candid man who was investigating this question is this: Would it put an unreasonable burden upon the District of Columbia or upon its people to require it to pay its own municipal expenses? In other words, does the presence of the Federal Capital here, with its buildings and its people, impose an unreasonable burden upon the people of the District of Columbia that calls in high equity for a contribution from the Federal Government?

Now, I have taken quite a little pains to examine the situation as to all the cities in the United States of the size of Washington, some below and even some above, and I am going to ask leave to put into the RECORD a statement, which I hold in my hand, of the rates of taxes according to the assessed value of a number of cities; but I wish to call attention to some

As you all know, in the District of Columbia it is impossible to levy a tax of more than 1.5 mills. As a matter of fact, there is only an assessment of 1 mill. In the city of Des Moines we collect on the assessed value 8.48 mills; in the city of Springfield, Mass., 4.96 mills; Albany, N. Y., 1.98; Boston, 1.74; Salt Lake City, 4.06; Minneapolis, 2.89.

Mr. LOBECK. Mr. Chairman, will the gentleman yield? Mr. PROUTY. In just a minute. In Chicago there is an assessment of 4.61 mills; in Denver, 3.5 mills; Duluth, Minn., 3.81 mills; Erie, Pa., 2.5 mills; Hartford, Conn., 2.15; Los Angeles, Cal., 2.79; Spokane, Wash., 4.96; Quincy, Ill., 4.54; Peoria, Ill., 4.67 mills. The general average of all the cities that I have examined, taking in the list I have indicated, is 2.14 mills. In other words, bring this question down to a cold question of fact and of right, and you will find that these people that now pay twice the taxes on the valuation of their ple that now pay twice the taxes on the valuation of their property that are paid in the District of Columbia are compelled to contribute out of their own money to support the District of Columbia and its citizens.

Now, I yield to the gentleman from Nebraska.

Mr. LOBECK. Is that levy on the full cash valuation? Is

there much difference in the amount there?

Mr. PROUTY. No; it is on the assessed valuation.

Mr. LOBECK. In some cities they assess on one-third, and in some on one-fifth, and in some on the full valuation.

Mr. PROUTY. I could give you the figures on the other basis, but I took this because I thought it was the fairest.

Mr. LOBECK. I presume that the 2.1 mills on the full value would be an average, outside of your city and county taxes, in this country.

Mr. PROUTY. The following figures show the tax rate on assessed valuation in the cities named and other cities:

Tax rate on assessed valuation in Washington as compared with similar cities in the States.

Average, 2.14.

While I am upon this subject, have you ever thought that, for instance, in the city of Des Moines we have to pay taxes not only for the support of the municipality, but we have to pay taxes for the support of the county, for the county poor, if you please. We have to pay taxes to support the entire State government, with all its great institutions, including its electrosynary institutions. But in the District of Columbia its citizens are only called upon to pay the taxes for the running of the affairs of the District of Columbia or the city of Washington, and they only pay half of that expense.

Before the end of this session I am going to introduce a bill, and ask to have the House pass it, that will properly and equitably distribute this burden.

Mr. TRIBBLE. I would like to ask the gentleman a question.
Mr. PROUTY. I yield to the gentleman from Georgia.
Mr. TRIBBLE. Do we not pay for the professional schools

Mr. PROUTY. I do not know just what the gentleman has in mind.

Mr. TRIBBLE. Does not the Government pay the expenses of Howard University, for instance, where they teach law and medicine, where they prepare students to practice law and give them a law diploma, and where they give them a diploma in medicine? Is it not a fact that the District of Columbia does not pay a dollar of that, but that the Government pays it?

Mr. PROUTY. The gentleman is correct upon at least two of those items. I have not informed myself concerning the

Mr. TRIBBLE. Do you know of any other city in the Union that has a law school or a medical school where there are no fees charged? While the States have these universities, is it not true that they charge a fee? If you want to become a lawyer you have to pay a special fee for tuition, and so forth, or if you want to become a doctor you have to pay an annual fee in the medical school. Here no fees at all are charged.

Mr. PROUTY. All of those statements are correct, but I did not intend to go into that subject, except to get at the fundamental principle, to get at the question of right.

I will admit that when this law was passed in 1874, primarily there was some equity, there was some reason sympathy for the District. The city of Washington was then struggling as a young capital, trying to put on the style that we all felt she ought to put on, and she became seriously involved. I do not criticize the men who, in the generosity in-their hearts, came forward and undertook to contribute from the Federal Treasury to help the District of Columbia out of her difficulties. But that was a different proposition from what we now have. That was 39 years ago.

In the meantime the city of Washington has come to be one of the 13 largest cities in the United States, a great, strong,

powerful organization, much larger than any city in my State, larger than any three cities in my State. So, though she may have needed help at that time, that necessity does not exist now.

Again, in talking with these fellows-and I suppose you have had them on your back the same as I have-they say the fact that there is so much Federal property here is a reason why the Federal Treasury should be called upon for assistance.

As was so ably said in a speech that we heard here to-day.

there is not a city in the United States but would be willing and glad to exempt every dollar of the property of the Federal Government from taxation if it would simply locate the Capital in their particular city. The presence of the Federal Government, with all its buildings and property, in the District of Columbia does not place a burden upon the District, but constitutes an asset for the civilian portion of the city of Washington. About \$40,000,000 a year are poured from the Federal Treasury eventually into civilian hands. This city lives and thrives and prospers out of the pay roll of the Federal Gov-ernment, just as many cities thrive and prosper out of the pay rolls of the factories and private enterprises. Instead of imposing a penalty on the Federal Government for having its institutions here, every city in the United States would gladly pay a reward.

How much time have I remaining, Mr. Chairman? The CHAIRMAN. The gentleman has one minute remaining.

Mr. DAVIS. I will give the gentleman five minutes more.

Mr. PROUTY. I find I will not be able to discuss the bill that, at the proper time, will be introduced as an amendment; but there is one thing I have felt more keenly than anything else since I have been on the District of Columbia Committee, and that is the constant friction that exists between Congress and the people of the District of Columbia.

I can not refrain from saying a word concerning the condition in this city that gives rise to the constant friction between its citizens and Congress. It is no secret that the people of this town look with suspicion and disrespect on Congress. A lady high in social circles in this city said in my presence recently:

All Washington is against Congress. I do not suppose they ought to be, but they are. I have lived here all my life, and I never hear any Washingtonian say a good word for Congress.

This condition grows out of the abnormal relation between Congress and the municipality of Washington. This people feel that they are governed by a foreign and to them alien people. They feel that they have no rights or privileges except such as

they can wring from an unwilling Congress. This naturally makes them spiteful and resentful. On the other hand, they feel that anything they can get out of Congress is a pure gain. The fact that the General Government pays one-half of all the expenses and improvements of this city makes the Public Treasury their common goal. Any man in this town that can lobby through appropriations of large amounts from the Federal Treasury for local improvements is the hero and idol of the [Applause.] It gives him the same prestige and éclat that a Member of Congress receives when he returns home with a large appropriation for his district. [Laughter and applause.] All the men, women, and children in this District belong to the booster club and spend their efforts on Congress to get appropriations, as that is their only source of growth or improvement. Every Member of Congress that yields to this influence and helps them in their plans is their friend. Every man who stands in the way is a public enemy. Every man who will assist Washington in getting an additional appropriation is a patriot, a statesman, and the personification of national pride. He is flattered, cajoled, and petted by the social set. He is praised, puffed, and heralded by the press. But if any Member of Congress undertakes to hold the even hand of justice between the interests of this popula and the interests. interests of this people and the interests of his own people he is made to feel the resentment and ostracism of the social forces and is attacked by the local press with such endearing epithets as "pinhead," "tight wad," "reuben," or "hill billy."

I am neither criticizing the feelings of the people of Washington nor censuring their methods. They are such as naturally grow out of the abnormal relation of this Government to this So long as Congress, composed of men gathered from all over the United States, undertakes to run this local city without knowledge of its needs or without real sympathy for some of its purposes, so long will there be friction and resentment between the ruling forces of this city and Congress. So long as Congress undertakes to perform the functions of alderman it will be treated as a ward alderman. It will be subject to all the contempt and disrespect that usually pertain to aldermen of large cities, without, I trust, securing the emolument that is commonly considered as furnishing a balm for this humiliating [Laughter and applause.] But so long as Congress undertakes to act as alderman it must expect to be subject to all the criticisms and irritations of the position and must expect to bring down upon its head the wrath of every man, woman, and child that does not get the street lamps, public parks, and other improvements that will add to the comfort, pleasure, or profit of every local community. So long as there are Members of Congress on this floor who will dare to oppose any of their schemes of graft and plunder, so long will there be friction. So long as there are Members of Congress who will dare to stand on this floor and block the gateway to the Federal Treasury, so long will Members of Congress be attacked in public and in private; so long will they be made to feel the crushing, irritating, dominating force of local sentiment; and this condition will never be removed until there is a complete divorcement of the purely local administration and expenses of the city of Washington and the Federal Treasury. If you will remove the cause, you will correct the condition. In my opinion, Congress, for its own preservation and self-respect, must give to the people local self-government; must take itself out of the purely local and domestic affairs of the people; must make them self-controlling and self-dependent. It must so adjust matters that this people must look to themselves for good government and not to the Congress of the United States. It must be so adjusted that this people, if they have good government, can take all the credit upon themselves, and if a bad government can only blame themselves.

I know that when any suggestion of this kind is made here by any Member of Congress the old settlers throw up their hands in horror and point with awful warning to the time when they had local self-government and the city was run by Boss Shepherd and local ringsters. But these people should know that civilization has improved in the last 35 years, that higher ideals have prevailed, and that many other cities that 35 years ago were suffering from boss rule have driven out the bosses and clarified their political atmosphere.

I can not believe that the people of Washington are not capable of self-government. I certainly believe they are as capable of self-government as the Filipinos. [Laughter.] If the United States, by its gentle care and training, has qualified the Filipinos in 15 years to become self-governing and self-supporting, it is a bad commentary on the people of Washington if, after 35 years of fostering care by the Federal Government, they are not now either capable or able for self-government. [Applause.] At any rate, Congress owes it to itself to let them try. If this people bated then is exactly the conduct which the same Bourbon

is so corrupt, so prone to graft, so given to local strife and faction that these things must be, I prefer, gentlemen, that they graft and fight among themselves and not constantly draw Conress into it.

Mr. PAGE of North Carolina. Mr. Chairman, will the gentle-

man from Minnesota use some more of his time?

Mr. DAVIS. I prefer that the gentleman from North Carolina should consume some of his time now.

Mr. PAGE of North Carolina. The gentleman that I intended to yield to is not on the floor.

Mr. DAVIS. Then, Mr. Chairman, I yield 30 minutes to the gentleman from Massachusetts [Mr. Gillett].

Mr. GILLETT. Mr. Chairman, nine months of this administration have passed. Its policies and methods have now been disclosed. There are some prominent distinctive features. One is the dominant force and despotism of the President. So far his will has been law in the legislative as well as the executive branches, and he might be called a great party leader or an autocratic boss, according as the speaker was friendly or hostile. Another feature which might perhaps be expected and logically deduced from such absolute leadership and disciplined obedience has been a display of partisauship and a greed for spoils unexampled in recent history. For many years partisanship has been more manifest and party discipline more strict in the House than in the Senate. In the latter body the power of the indi-vidual Senator has been so jealously guarded, the equality of the able and the commonplace Senator in controlling such legislation as affected him personally has been so assidnously cultivated, and the traditional "courtesy of the Senate" so elaborated, that party discipline has been blocked by the many obstacles which have been erected to protect the individual influence of Senators. But even in this House, where party discipline had been considered well developed before, where for years the Democratic Party has denounced the power of a Republican machine and has deplored the lack of individual influence and responsibility and the crushing omnipotence of the Speaker and the party management, where revolution against the rules had been organized and successfully effected by a coalition between the Democrats and those Republicans who claimed that there should be more individual freedom and more exemption from party and machine domination-even in this House, where the Democratic Party has for years proclaimed itself the champion of individual independence, there has resulted from the Democratic control a rough overriding not only of the minority party but of the minority of the majority party by means of secret party caucuses, which has established a party discipline and a party tyranny and an overthrow of individual influence and responsibility unknown for a generation.

I believe in party government and party responsibility, but I do not believe the people want all legislation originated and amended and completed in the secret caucus of one party. tendency of late years has been against strict party domination, and Democrats in this House have been most vociferous and inflamed in condemning it, but with power they seem to have acquired new principles and now themselves are practicing and elaborating and extending what they have so long been denouncing in us. It is, however, not new for the Democratic Party. They have played the same rôle before and before have been punished for it.

Let me read from a debate in 1879. One of the most brilliant and sagacious statesmen of the last generation, one of these names in our political history which, in the words of Mackintosh, "would add authority to truth and furnish some excuse even to error," James A. Garfield, said:

even to error," James A. Garfield, said:

I have been 16 years a Member of the House of Representatives, and in all that period I have never once known \* \* \* the members of the Republican Party to bind themselves in a caucus to support any bill before Congress. I have seen it tried once or twice, but I have always seen dozens of Republicans spring to their feet and say:

"We are free men, and we will vote according to the interest of our constituents and the dictates of our conscience, and no caucus shall bind us." But the moment the Democratic Party got back into power again, that moment they organized the caucus—the secret caucus, the oath-bound caucus—for in the recent extra session they actually took oaths not to divulge what occurred in caucus and to be bound by whatever the caucus decreed. And I have known man after man who had before sworn by all the gods at once that he would not be bound to vote for a certain measure walk out of the caucus like a sheep led to the slaughter and vote for the bill that he had cursed. They brought forward bills at the extra session so full of manifest errors that when we pointed them out they would admit in private that there were errors which ought to be corrected, but they would say, "We have agreed to vote for it, and without amendment, and we will." We pointed out wretchedly bad grammar in bills, and they would not even correct this grammar, because the caucus had adopted it. Now, therefore, gentlemen, the Congress of the United States is ruled by a caucus. It has ceased to be a deliberative body. It is ruled by secret caucus.

Democracy is repeating to-day, and I believe that the same conditions will produce the same results and that the voters of the country will repudiate and defeat those tactics now as they did before. The words of Daniel Webster are just as pertinent today as they were 90 years ago:

It is time to put an end to caucuses.

This year the party has not only framed in caucus the tariff bill and the currency bill in all their minutest details and bound themselves to support them without regard to individual convictions or the interests of their constituents, but they have also determined in caucus what other legislation should be permitted—and none could be introduced without caucus approval. And not only has this caucus rule prevailed in the House, but even in the Senate, where it has been unknown, where the pride of the individual Senator has established that famous and demoralizing "courtesy of the Senate"; even there this new steam-roller system of legislation has been successfully introduced and Democratic Senators have bound themselves in secret caucus to abandon their individual opinions and obey the majority. The Senate used to taunt us with our rigid rules and our previous question and boast that theirs was the only body of true deliberation and free and effective debate, but they must abandon their claim, for debate in the open Senate on administration bills is now a farce; there, too, judgment has been made up in advance, minds are not free to be influenced by argument, speeches are made for the Record and not to affect the result-for that has already been decreed in a secret party caucus.

And if current rumor and opinion is correct both in caucus and out of caucus the Democrats have recognized the controlling voice of their leader in the White House and the Legislature has obediently registered his will. There has been no such example of party discipline and party subserviency for a generation at least, and the individual influence and responsibility and equality for which Democrats in this House have been pathetically pleading for 10 years has absolutely vanished

under their own system of legislation.

And as a natural corollary to this spirit of partisanship the old spoils system has revived and the cause of civil-service reform has already suffered more severely during this administration than in any similar period since it was first introduced. Civil-service reformers had every reason to anticipate satisfactory progress under the new administration. During the past 12 years a striking change had come over the attitude of Congress toward the subject, reflecting, of course, a change in public opinion. When I came to Congress 20 years ago this body was openly and boastfully hostile. Civil-service reformers were sneered at as theorists, dreamers, college professors, unpractical, and nearly every year some attack was made and vote taken to allow the majority to advertise their antagonism. The main function of the Civil Service Committee in those days when I first was a member of it was to act as a buffer against the majority and as a tomb for hostile legislation. But gradually a great change has come over public sentiment and as a natural sequence over Congress. The despised cause has become popular, its benefits have been recognized, and now for many years the open assaults upon it have ceased and those at heart opposed to it have only dared to try to weaken it by indirect attacks and amendments and insinuations, without denouncing, as formerly, the whole system. And during these 12 years the scope of the service has been vastly enlarged until there is very little left outside of its classification. And so with public opinion decisively on our side, making it easier and safer than ever before for the Executive to uphold and extend it, with a President entering office who had been an avowed civil-service reformer, an officer of one of the leagues, and by his education, his environment, and his record pledged to promote the cause, it seemed as if there was no danger that any serious attack upon it could succeed. But at the South public opinion on the subject had lagged far behind the rest of the country, while the politicians there were no less greedy than others and were not restrained by any exacting and threatening public opinion. There was consolidated the strength of the Democratic Party just coming into power after 16 hungry years in the wilderness, and it was a question whether they would recognize and appreciate and acquiesce in the changes which had come over civil service since they were last in power, and if they did not whether the President would yield to that wing of his party or would stand by his convictions and his record and the dominant sentiment of the North, or would yield to partisan and selfish pressure.

The test soon came. At the beginning of the session an outcry was at once raised in this House against the order of President Taft extending the order of President Roosevelt and

well understand the dismay on that side of the House at seeing this time-honored relic of the old spoils system snatched away from them just as their mouths were watering for its reception, and it was not surprising that a movement was inaugurated here to set aside such a depressing order. But the ingenuity of the administration was equal to the emergency and made legislation superfluous. The enraged Congressmen who had been so violent against this extension of the civil service listened with satisfied and mirthful complacency to the manifesto of the President that the civil-service principle which had so outraged them was to be still further extended, and that as a further measure of reform all existing fourth-class postmasters were to submit to competitive examinations. The pent-up wrath was at once dissipated, and the whole Democratic side experienced a miraculous conversion to this extremest extension of civil service. What they expect under it I presume they will re-I understand that the program is for the Civil Service Commission to certify to the Postmaster General the three highest eligibles for each post office, and then he will ask the Congressman of the district which of the three would make the most efficient officer. Political considerations are, of course, to be barred; but I can imagine just how many Republican postmasters will be indorsed or appointed in Democratic districts and how inefficient all enemies of the Congressmen will prove to be. Throughout the South they might just as well have printed in the circular of qualifications "no Republican need apply.

Mr. ADAIR. Will the gentleman yield?

Mr. GILLETT. Certainly.

Mr. ADAIR. I would like to ask if the policy or practice that the gentleman refers to was not the policy of the Republican Party during the last 14 years, where three names were certified for a rural carrier and the Post Office Department submitted those three names to the Republican Member of that district? Has not the gentleman had such names submitted to him frequently?

Mr. GILLETT. In answer to the gentleman I will say that I never had a single name submitted to me.

Mr. ADAIR. How does it happen that more than 95 per cent of the rural carriers in the United States are Republicans and have been during Republican administrations?

Mr. GILLETT. I might answer the gentleman by telling an incident which happened here, where one Congressman complained to another that he did not get any of his friends into the civil service, while the other often succeeded. His friend responded, "Why, if there was a man in your district that could pass the examination, you would not be in Congress." [Laughter.]

I think I ought to state, however, my opinion, based on a long acquaintance in this House, that the Postmaster General-unless the executive atmosphere has greatly changed him since he left us-is a thorough believer in both the theory and practice of civil-service reform, and will administer the new law as fairly and efficiently as his duty to his chief and his party will allow, but it will be impossible for him to personally acquaint himself with details in the thousands of post offices affected, and he will have to trust to local and partisan advice.

Suspiciously contemporaneous with this new activity imposed upon the Civil Service Commission as to fourth-class postmasters came the reorganization of that commission by the President. In the 20 years that I have been here appointments to that commission have been singularly free from any charge of partisanship. I remember hearing during the Cleveland ad-ministration that President Cleveland contemplated removing Theodore Roosevelt from the commission, but his advisers re monstrated that he was harmless, and he finally yielded, with the remark, "I think you are mistaken, gentlemen. He is the ablest politician of them all." But he disregarded his instinct, yielded to his Cabinet, and the man his advisers made light of lived to defeat both the Democratic and the Republican Parties. Since then I know of no time up to the present administration when selections to that commission did not seem to be made for merit and not for partisan purposes.

The law provides that the commission shall consist of three persons, not more than two of whom shall be adherents of the same political party. As the main purpose of the commission was to eliminate partisanship from appointments, care was taken that the commission itself should not be partisan. spirit was so recognized and obeyed in the administrations of Presidents Roosevelt and Taft that two of the three commissioners. including the president of the board, were Democrats, although the administrations that appointed them and retained them and had full power of removal were Republican. Ever since Theodore Roosevelt resigned from the commission, in 1895, the placing all fourth-class postmasters under civil service. I can president of the board has been a Democrat, and during these administrations no changes ocurred in the board except by the

voluntary resignation of a commissioner.

But, although two of the three commissioners were Democrats, in its eagerness for patronage this administration at once peremptorily removed two of them, one Republican and one Democrat. Fortunately the third was a Democrat and had shown such eminent ability, popularity, and fitness that his promotion to the chairmanship could not decently be denied. It is not often that an administration can dispose for a useful partisan purpose of an office that must be filled by a member of the opposite party, but the Republican commissioner, whom I had always found an exceptionally able and efficient official, was removed and his place filled by a citizen of the State of Washington recommended by a Republican Senator, and that Senator's vote has steadily favored every important administration measure

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. GILLETT. I will.

Mr. HUMPHREY of Washington. I would like to correct the statement of the gentleman. The Senator that recommended the appointment did not class himself as a Republican.

Mr. GILLETT. He was in the minority; he was hostile to the administration, and I had the idea that he still called himself a Republican.

Mr. HUMPHREY of Washington. He calls himself a Pro-

gressive.

Mr. GILLETT. Very well. But that does not change the

logic of the criticism.

The place of the Democrat who was removed was given to the secretary of a Senator from South Carolina, whose training one would not expect to fit him preeminently for this nonpartisan position.

Mr. KEATING. Will the gentleman yield?
Mr. GILLETT. I will.
Mr. KEATING. The gentleman refers to the logic of the criticism. Do I understand the gentleman to mean that Senator POINDEXTER bartered his vote on the tariff bill in return for a place on the Civil Service Commission?

Mr. GILLETT. I do not know anything about that.
Mr. KEATING. Then what is the logic of the criticism?
Mr. GILLETT. The logic is that the President gave this position to a member of an opposite political party, and that afterwards that member has steadily voted with him. Whether he gave it to him because he knew that he was friendly or whether he was friendly because he gave it to him, or whether it was a mere coincidence, I do not know.

Mr. KEATING. Does the gentleman desire to leave the impression upon the House that that transaction took place?

Mr. GILLETT. What transaction? Mr. KEATING. That Senator Poin

That Senator Poindexter bartered his vote. Mr. GILLETT. I explained that; I say that I do not know whether he was known to be friendly and given the office or whether he was friendly because he was given the office. What I do not believe is that if he had been hostile to the administration his friend would ever have got the position.

Mr. KEATING. Does not the law provide that one commis-

sioner shall represent the opposite political party?

Mr. GILLETT. One of the commissioners must represent a

minority party; certainly.

Encouraged apparently by the administration attitude, the Democrats in Congress sought new opportunities for patronage. In the fariff bill the Senate inserted a provision that collectors of the income tax should be exempt from civil-service provisions. It was already in the power of the President to exempt them if he thought there was occasion for it, but Congress did not propose to take the chances of his action, for he still had the reputation of being a civil-service reformer. This amendment can not have escaped his attention. If current rumor is correct, he was not backward in making suggestions as the bill progressed-and his suggestions were seldom in vain-but he evidently offered no objection to this amendment, and it passed When it came back to the House Ways and Means Committee the Democrats there, doubtless overjoyed at finding the President so amenable to the arguments of the spoilsmen, and so willing to see his power curtailed and his right to classify income-tax collectors taken away, ventured to go a step further and provided that these income-tax collectors might be employed in other work of the internal-revenue office, thus making it possible to gradually fill that whole immense bureau with patronage appointees and drive out the classified employees already there. Still, no objection came from the White House, and in that form the bill was enacted by both Houses and approved by the President. While this matter was being considered in the Senate and before the even more vicious House

amendment was added, the National Civil Service Reform League sent a long letter to each Member of Congress on the subject-and, I presume, to the President-in which they said:

This proposed legislation is an attempt to secure patronage at the expense of the merit system and is contrary to the civil-service planks in the platforms of the three great parties. We therefore ask your assistance in preventing any such spoils raid.

I believe the President, before his entrance into politics, had been a supporter and officer of this league, but this did not prevent his joining in this "spoils raid," and he has never since expressed publicly any disapproval.

Grown bolder by such Executive encouragement, the Senate seized the next possible opportunity and amended the deficiency bill by providing that deputy marshals and deputy collectors of internal revenue and their subordinates should be removed from the classified service. The legislation in the tariff bill about income-tax collectors was a vicious departure from the civilservice system, but this was far worse. That applied only to new offices just coming into existence, and which, therefore, had no previous civil-service status, although under existing regulations they would have been automatically classified except for this legislation. But this exemption of deputy collectors and mershals was a distinct step backward and reversed a practice of many years. Deputy marshals were first covered into the of many years. Deputy marshals were first covered into the classified service by President Cleveland in 1896, were excepted by President McKinley in 1899, and were again classified by President Taft in 1909. Deputy collectors were classified by President Roosevelt in 1906. So that both offices have been in the classified service seven years, during which Congress has seen Lo reason to interfere.

But now at the outset of an administration eager for spoils the satisfactory experience of seven years has been ignored, the party platform abandoned, and for the first time since the adoption of the civil-service law in 1883 the legislative and executive branches have combined to remove from the classified service large classes of offices which had been included there for years. I can see no reason or excuse for such action except a selfish partisan desire for the old-fashioned, discredited patronage.

Mr. GORDON. Will the gentleman yield?

Mr. GILLETT. Certainly.

Mr. GORDON. What reason or excuse can be given for President McKinley doing this same thing by Executive order, exactly what was done by the amendment to the urgent deficiency bill?

Mr. GILLETT. Well, conditions, parties, and politics change. They were put in the civil service and kept there until this administration came in and changed them. The truth is that in the last 20 years public opinion has so advanced that action which to-day would be criticized severely would then have excited no comment.

Twenty or thirty years ago everybody acted on the old patronage system, and no one was criticized for it. To-day when a man sins he sins against the light, and therefore to-day for the President to exempt officers who had been classified for seven years is much more open to criticism than for Mr. McKinley to

have done it 15 years ago.

Mr. GORDON. The President did not do it. We did it.

Mr. GILLETT. The President approved it. You did it and

the President approved it.

Mr. GORDON. Mr. Roosevelt would have put the order over them just as soon as he had the offices filled with Republicans.

Mr. GILLETT. Oh, that is the old argument. Mr. GORDON. Is not that true?

Mr. MURRAY of Oklahoma. That is true in Oklahoma.

Mr. GILLETT. That has always been done by every Presi-

Mr. LAZARO. How can the gentleman give President Taft any credit for having placed 40,000 postmasters under the civil service without examination, and that just as he was going out of office?

Mr. GILLETT. He was extending the civil service the way it has always been extended by every President, Republican or

Mr. LAZARO. Where is the merit in it-without examination?

Mr. GILLETT. That is the way every extension has always been made.

Mr. KAHN. Mr. Chairman, will the gentleman yield?

Mr. GILLETT. Certainly.

Mr. KAHN. The men who were in office had had the experience, and was not that the reason why the ægis of the civil service was thrown over them?

Mr. GILLETT. That has been the only practical way to

Mr. KAHN. When Mr. Cleveland went out of office as President did he not extend the civil service over a great many of the

employees of the Government?

Mr. GILLETT. That is what I stated. The Presidents, both Democratic and Republican, have done it always in that way. The vote in the House on the amendment exempting those officers from the civil-service law was very close. Despite the enormous Democratic majority, so many Democrats voted against the amendment that it was only carried by a majority of four. Can anyone doubt that a word or whisper of disapproval from the President, who has not seemed in other cases at all averse to such suggestions, would have changed the majority? It was a singularly sectional vote. In the northern States, where Democrats have to fight for their election, where there is a large independent vote, and where men no longer dare to openly advocate the old spoils system, a majority of the Democrats voted against the amendment, but in the South every Democrat voted for it. Every Republican vote was against it, but enough northern Democrats joined with the solid South to carry the amendemnt. I fully expected the President to veto the bill. I believed that he had been sincere in his civil service professions. It was not a pressing bill.

Mr. DONOVAN. Mr. Chairman, will the gentleman yield for

a question?

Mr. GILLETT.

Mr. GILLETT. Certainly.
Mr. DONOVAN. I understood the gentleman to say that every southern Democrat voted for it. Of course he means every southern Democrat who was a Member of Congress voted for it?

Mr. GILLETT. Of course. Mr. DONOVAN. The gentleman ought to modify that and

say everyone who was present, possibly. [Laughter.]

Mr. GILLETT. Of course I mean everyone who was present. I do not think anyone would misunderstand me. There was no special urgency for its passage. A veto would only have caused a short delay until the obnoxious clause which could never have procured a two-thirds vote was stricken out. President Roosevelt vetoed a great census bill because of a departure from civil-service principles much less flagrant, though he thereby caused the bill to go over to another Congress and another administration. If the President had wished to defeat this patronage legislation, the way by a veto was clear and sure. But he signed the bill, and then gave out this extraordinary

I am convinced, after a careful examination of the facts, that the offices of deputy collector and deputy marshal were never intended to be included under the ordinary provisions of the civil-service law. The control of the whole method and spirit of the administration of the provision in this bill which concerns the appointment of these officers is no less entirely in my hands now than it was before the bill became law; my warm advocacy and support both of the principle and of the bona fide practice of civil-service reform is known to the whole country, and there is no danger that the spoils principle will creep in with my approval or connivance.

Certainly his advocacy and his conduct here part company. In this extra session his party in two different bills have inserted clauses intentionally violating the principle and practice of civil-service reform-one of them the most reactionary step ever taken. A word of disapproval from him would easily have eliminated them during their progress through Congress. A veto of the most vicious one would have caused no other inconvenience. He waits until it becomes law—until the mischief is done—and then chooses the moment of giving his approval to this permanent breach in the civil-service law to assure us of his devotion to the principle he has just maimed and crippled.

As to the clerical positions affected by the provision he offers

no justification, but says he is convinced that the other offices were never intended to be included under the civil-service law. That is the familiar argument that every spoilsman has advanced in every debate on the subject. I presume it is true that the originators of this law did not foresee how far it could and would be extended. I presume they never intended, for instance, that the fourth-class postmasters, whose classification President Wilson recently approved, should be included. The application of the law has broadened steadily ever since its passage, and doubtless many classes are now included which its framers never dreamed of. But by friends of the principle that possibility of growth and development has been considered one of the best features of the law. It has been only the foes of the principle who have constantly complained that the scope had become vastly larger than was intended. But that argument has gone down in defeat again and again before the steady expansion by presidential order, and it is strange now to hear a President who is a friend of the principle criticizing what each one of his predecessors in office has approved and adopting the threadbare argument of its inveterate enemies.

The President also states that the control of appointments is no less in his hands than before, and that his reputation as a

civil-service reformer is a guaranty that the spoils principle will not creep in. There are several obvious answers to this argu-

Quite regardless of his own good intentions he seems to forget that this provision affects not only him, but future Presidents, who may not have his warm devotion to the cause, but who would carry out the partisan purpose for which this provision was framed and make the offices mere patronage appointments. His approval made it a permanent law, and it can only be repealed by an act of Congress. That will be most difficult to obtain. The majority of Congress, I think, are always secretly in favor of exceptions to civil-service rules, because thereby they gain patronage. Only of late has public opinion turned so strongly to the other side that they are afraid to openly betray their wishes. But while public opinion now bars unfriendly legislation, it is not sufficiently intense or concentrated to secure legislation, and I think it will be many a year before this law will be repealed. It has the distinction of being the only law which has been passed since the first civil-service law was enacted in 1883 which takes a positive step backward and throws again into patronage offices which a President had classified, and it seems almost sarcasm for a President in signing such a law to profess his warm support of the civil-service principle.

He says the administration of the law is still in his hands. Perhaps literally that is so, but it can not be so practically. He may genuinely wish to keep partisanship out of appointments and may so instruct his subordinates, but he can not know the motives which actuate collectors in Texas or Oregon, and so long as they profess to make changes for efficiency's sake the replacement of Republicans by Democrats and the use of offices as rewards for party service can go merrily on. He might, of course, do what he has not done and what good government called upon him to do as proof of his sincerity, order the places to be filled by competitive examination, but he could hardly do that with any prefense of consistency, for the question would at once be asked him, "If you thought that was the proper method, why did you sign the bill which did away with it?

I happened to read recently in a Washington paper a good illustration of the way appointments are made for efficiency when not restrained by the civil-service law. This was in the great manufacturing establishment, the Government Printing Office, which President Wilson turned over to that New Jersey labor leader, Cornelius Ford;

Public Printer Ford last night said that he deplored the suggestion that politics was being played. He reiterated, however, his statement of last June that in the matter of changes to raise the Printing Office to a higher standard of efficiency, Democrats would be given the preference.

Of course, this soon degenerates into mere patronage, and is a

clear violation of the civil-service law.

Such evasion of his purposes the President may sincerely deplore, but he can only prevent it by enforcement of the civilservice law, whose partial repeal he has approved. It is this very projection of partisanship into appointments that the civil-service law originally aimed to prevent. It does not of itself achieve efficiency. A competitive examination is not necessarily the best test of efficiency. But in 1883 it was found that the use of offices as reward for party activity had utterly demoralized the service, that some remedy was necessary, and the present system was devised as a method to eliminate partisanship from appointments and thus give efficiency free scope, Competitive examinations do not always get the best men, but they shut out partisan appointments, which experience proved in the long run got the worst men. This provise in the deficiency bill which the President approved reestablished for the offices which it covered the old system, it took away from President Wilson and succeeding Presidents the power to classify them, and left them at the disposal of the appointing power, and was intended to make of them partisan, spoils appointments. It is impossible for me to conceive how approval of such a proviso is consistent with real friendship for the civil-service principle. It reminds me of the old field marshal, who, in being ordered to a distant war, went to take leave of his king, and the well-disposed monarch said to him in farewell, "Go and fight my battles, and I will protect you from your enemies at home." And the grim warrior responded, "I can protect myself against my enemies. Pray, sire, defend me against my friends." prayer civil-service reformers have had reason to echo.

This Congress, in its first session, from April to December, has passed only three important contested bills. The first was the sundry civil bill, the second the tariff bill, the third the deficiency appropriation bill. Each one of them has at the end "Approved, Woodrow Wilson." The sundry civil bill contains the clause forbidding the use in prosecution of labor unions of certain funds appropriated for the prosecution of offenses against the Sherman law. On that account it was vetoed by President Taft as vicious class legislation, but President Wilson

signed it, issuing afterwards a statement of his disapproval of

the principle contained in that clause.

The second bill, the tariff bill, contained the clause exempting all income-tax collectors from the civil service rules. The President allowed that to go through both Houses and signed it without any expression of disapproval. The third bill, the deficiency bill, excepted employees under marshals and collectors from the civil service, and the President signed it, issuing again an explanatory statement. Thus in two out of three of the bills he felt constrained to explain his action in signing them, and in the case of the third, it seems to me, there was equal occasion for an apology. Apparently he hopes to satisfy both sides—one by signing the bills and giving them what they want, the other side by expressing sympathy and minimizing the effect of the legislation. He is a wonderful master of language, but I do not believe his defensive statements will offset his offensive action, or that he can so easily placate those who feel that he has acquiesced in serious infractions of the principles in which he believes, "letting I dare not wait upon I would." If to successfully lead and master a Democratic Congress requires the barter of patronage for votes and the betrayal of the civil service system, I think many will question whether it is worth the price. [Applause on the Republican side.]

#### MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. Kitchin having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Tulley, one of its cierks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 3454. An act authorizing the Secretary of Commerce to lease to the city of Port Angeles, Wash., certain property.

The message also announced that the President of the United States had, on December 15, 1913, approved and signed bill of the following title:

S. 488. An act to authorize the sale and issuance of patent for certain land to H. W. O'Melveny.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

The committee resumed its session.

Mr. PAGE of North Carolina. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. FITZGEBALD].

Mr. FITZGERALD. Mr. Chairman, I do not wish to permit the somewhat extraordinary speech of the gentleman from Massachusetts [Mr. GILLETT] to pass unnoticed at this time. time later, when opportunity is had to analyze carefully what the gentleman has said, I am quite certain there will be such a reply made as will satisfactorily meet all of his criticisms of the President's conduct during the recent session of Congress. The gentleman's statement is somewhat anomalous. He started by saying that this was the most remarkable presidential despotism the country has ever seen, that the Congress showed the most complete subserviency to the President the country has ever known, and yet he suggested that when the opportunity was before the President to control or to dominate the Congress, because the Congress was proposing to act in a manner not in harmony with the professions of the gentleman from Massachusetts [Mr. Gillett], that the President signally failed in his duty when he failed to dominate Congress.

Mr. Chairman, I have served in this House when there was a real despot in the White House. I remember how gentlemen upon that side of the House were accustomed to delay the making up of their minds as to what their attitude should be, not only upon the very important questions of policy pending before the Congress but even upon the most minute details of legislation, until the word had gone forth from the White House as to what was the presidential attitude on the particular matter. It was only then that gentlemen upon the other side proclaimed with alacrity their views and announced their position, always in harmony with the position of the occupant of the White

House.

Some 35,000 fourth-class postmasters were covered into the classified service by President Taft by Executive order just before he left the White House. Mr. Chairman, I have great sympathy for my colleagues from the Southern States because of the conditions that exist there. No man familiar with them can avoid feeling that the conduct of Republican administrations during many years, which outraged the almost universal sentiment of innumerable communities by the character of appointments to public office, justified a keen resentment upon the part of the people residing in those communities. I perhaps do not share many of the sentiments and beliefs of men from the southern part of the Union, but I have no doubt that if I or if the gentleman from Massachusetts [Mr. GILLETT] lived under the conditions that exist in many places we could not avoid experiencing the same resentment because of many of the actions

of Republican administrations. It is not necessary to detail the conditions; they are well known. It is intolerable that men should be placed in office who arouse the just resentment of an entire community, and thus prevent any real division politically of the people living in one section of the country upon economic questions.

After the order to which I have referred was made, after all the Republicans who had appointed to office during the last 16 years had been covered into the classified service, this administration made provision for an impartial examination of those who had been so covered into the classified service to demonstrate the capacity of such persons to fill the positions. The gentleman from Massachusetts [Mr. GILLETT] has properly highly commended the Postmaster General for his professions and for his actions as a sincere believer in the civil service. It can not be doubted that he honestly desires to promote the best interests of the classified service. It may have happened, however, that in some places, that some men have been appointed to office, upon the recommendation of some Republican Members of Congress, who do not possess the qualifications necessary to enable them properly to discharge the duties of the office. No advocate of the civil service or the merit system can consistently object to a regulation which merely provides for a method of determining the competency of persons to fill the positions in the classified service which they obtained through Executive order. The country will not think it amiss that a Democratic administration whenever there is a choice shall choose Democrats rather than Republicans. It expected Republican administrations to do so, and it was not disappointed in their action. All we desire, Mr. Chairman, is that the law be honestly enforced and in the exercise of proper discretion that party men give preference to party men of their own political faith, all other things being equal.

Reference has been made to the fact that 95 per cent of the

Reference has been made to the fact that 95 per cent of the rural carriers appointed under Republican administrations are Republicans. I recall when the appropriations for the rural delivery service were only \$3,000,000 a year. They now aggregate in the neighborhood of \$40,000,000 a year. During the past 14 or 15 years in the extension of this service a Republican administration succeeded in placing Republicans in that service to the practical exclusion of all others. They have been of much importance in advocacy of Republican policies and in the building up of a Republican machine. It is not so long since Senator La Follette in the other branch of the Congress called attention to the fact that under the system devised by a Republican administration by which our Consular and Diplomatic Service was supposed to have been taken out of the spoils system and placed upon that high plane where merit alone was recognized in appointments and promotions that by a peculiar coincidence about 95 per cent of the appointees happened also to be Republicans. No mere accidental happening of events, Mr. Chairman, could bring about such results in two services. It required that careful exercise of that nice discrimination for which Republicans have been always noted when selecting men to fill public offices, and they rarely failed to find a Republican fitted, or at least satisfactory, for all public offices within their gift.

offices within their gift.

The Congress in the tariff bill provided for the appointment, regardless of the requirements of the civil-service law, of certain employees necessary for the administration of the income-tax law. If there be any positions in the entire governmental service of a highly confidential character, it is the positions occupied by the men who are to perform the duties imposed by that law. There were some differences of opinion as to whether it would be better to take the employees required through the regular civil-service examination or to place full responsibility upon the appointing powers for the qualifications and character of the

men to perform those duties.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. PAGE of North Carolina. I yield the gentleman five minutes additional.

Mr. FITZGERALD. Mr. Chairman, I am convinced that when this law is in operation and the country appreciates fully the important character of the duties to be discharged by these employees that it will be insisted that the appointing officers be held to a strict accountability for the character and accomplishments of the men selected, and that whatever is done to make that responsibility such that it can not be evaded and will make possible the selection of men of the highest character and attainments for those places will have the hearty indorsement of the country.

Mr. Chairman, this provision was included in a bill to revise the tariff in the interest of the masses and to eliminate the offensive and abusive and unjust and discriminatory features of the tariff law against which the country has been complaining for years. The Republican Party had promised to eliminate them and had failed to do so. The Democratic Party has performed that task in a manner that has met the approval of the country. Even if this were an unwise provision, which few contend who are fully conversant with the facts, no one could reasonably expect the President of the United States to halt the enactment of a great bill of the character of the Underwood tariff bill merely because there was included in it a provision which made possible the selection, without regard to the civil-service requirements, of employees to fill these highly important positions.

The provision of the deficiency law regarding the exemption of deputy collectors and deputy marshals from competitive ex-

amination is as follows:

Hereafter any deputy collector of internal revenue or deputy marshal who may be required by law or by authority or direction of the collector of internal revenue or the United States marshal to execute a bond to the collector of internal revenue or United States marshal to secure faithful performance of official duty may be appointed by the said collector or marshal, who may require such bond without regard to civil-service requirements.

Collectors of internal revenue and United States marshals are required to give bond for the faithful performance of their duty. They are held personally responsible for the acts of their deputies, and the liability is an extensive one and likely to be very burdensome to those occupying the offices. This provision does what sensible and reasonable men would do in business. If men were employed in important and confidential positions requiring bonds to secure the faithful performance of duty, as well as for the acts of subordinates, such subordinates would be

selected without interference.

On the 8th of September, Mr. Chairman, I placed in the RECORD a letter in reference to collectors of internal revenue which was highly interesting. In 1896 a resident of my district entered a competitive examination for the position of deputy collector in Brooklyn. He passed with the general average of 93 per cent and was appointed in January, 1897. He served continuously until December, 1899, when he was dismissed by the Republican collector. No charges whatever were preferred against him, but he was dismissed solely for political reasons. The Republican organization in Suffolk County, a portion of Long Island, demanded recognition and appointment in that office. This gentleman was requested to resign in order to make room for the representative of the Republican organization, and upon his refusal to resign he was removed and a Republican appointed in his place. Some time thereafter a Republican President benignly issued an Executive order which protected him and men appointed in the same manner in the place of those who in competitive examination had attained percentages of 93 per cent and better.

The CHAIRMAN. The time of the gentleman from New

York has again expired.

Mr. PAGE of North Carolina. Mr. Chairman, I yield the gen-

tleman one minute more.

Mr. FITZGERALD. I believe that it can be safely said, Mr. Chairman, that the country has unbounded confidence in the present Chief Executive of the United States-Woodrow Wilson. No mere captious criticism of his actions will affect his popularity or the esteem in which he is held by the country. The country is convinced that he is doing what he promised he would do-be the leader in the movement to bring the reforms demanded by the people and essential for their happiness and prosperity. He is leading along paths of legislation that are resulting in permanent benefit to the Nation. So far under his leadership there has been placed upon the statute books a tariff bill that will redound to the credit of the Democratic Party and endure to the benefit of the people of the country. Within a short time legislation will be enacted which will revise our currency system and eliminate the dangers of the present inadequate one and will restore confidence to the commercial and financial interests, which have been suffering because Republican incompetency has left unremedied the glaring defects of the existing system. The Democratic Party, under the leadership of President Wilson, will continue during this year and for many more years so to conduct itself that Republicans and all the other of its enemies and opponents will be disheartened to the end of their days because of the patriotic, wise, and statesmanlike manner in which the destinies of the Government

will be guided. [Applause on the Democratic side.]
Mr. PAGE of North Carolina. Mr. Chairman, I yield 30
minutes to the gentleman from Kentucky [Mr. Johnson]. [Ap-

plause.]

Mr. JOHNSON of Kentucky. Mr. Chairman, it had been my purpose until a very few moments ago not to have anything to say upon the occasion of the presentation of this bill to the

House for its consideration. However, when I heard other gentlemen discuss District questions I felt a little restless because I was not taking part, and I can not resist the temptation to at last come in.

Five or six years ago, when the District bill was brought in for consideration, in my feeble way I ventured to offer some criticism upon the present financial plan which obtains to the District of Columbia. Then and until two years ago I stood absolutely alone in those efforts. Two years ago the District appropriation bill was before this House for consideration for about three weeks. I predict that this bill will pass this House in as many days. In fact, this is the first District appropriation bill that I have known to be brought to the House where an effort has been made in preparing it to follow the law of authorizations. There are some departures from the law of authorizations in this, but they are few, and they are so closely connected with financial affairs—the bill dealing directly with financial affairs—that they may be overlooked.

The most vicious legislation that can be found on the statute books anywhere in this country can be found upon appropriation bills, particularly those which pass on the 3d day of March. I believe that this House and the country can be congratulated—and I wish to congratulate the committee that brought it in—that they have not seen fit to depart from the functions of an appropriation committee. I do not know that I would have had anything whatever to say to-day except for the remarks made by the gentleman from Georgia [Mr. Crisp] and the gentleman

from Iowa [Mr. Prouty].

They have brought to this House for the first time a real discussion as to the correctness, or the justification, of the half-and-half principle, as applied to the District of Columbia. I apprehend, however, that they, in endeavoring to show the people in the States the advantages which may be derived by them by an abandonment of this principle, have overlooked one of the serious consequences to the Nation which may follow it. I have in my mind a collection of editorials taken from the Washington Evening Star in discussing the half-and-half plan.

In discussing the half-and-half plan, the editor of that paper

The imagination may conceive that the soul of the Union is enshrined in this exclusive territory, and if ever its peculiar existence should be extinguished the event will be the forerunner of the dissolution of the Union.

Great God, gentlemen, beware of what you do. To fail to pay half of the taxes of the people of the District of Columbia may dissolve this great Union of States.

I wish to ask my friend from Georgia [Mr. Crisp] and my friend from Iowa [Mr. Prouty] if they think it prudent to tempt the people here to have half their taxes paid for them or else bring about a dissolution of the Union?

The Star undertakes to be chief champion of this particular favoritism that is given to the people of the District. Let me read you from the same editorial of the Star, in which that distinguished editor says:

If deprivation of suffrage is the only condition upon which citizens of the District are partially relieved from their heavy burdens, they evidently prefer to remain political slaves rather than become bankrupt freemen.

Great God! What a sentiment to proclaim in the capital of a nation of freemen!

Did anybody ever hear such a sentiment expressed in this "land of the free and home of the brave"? Just think of it! Here is the spokesman for 350,000 people who ought to be free, having as their champion one who bows at the shrine of Mammon only, who takes occasion to rise up in their midst and say that he represents them, and that he can speak for them and say they would rather be "political slaves than bankrupt freemen."

That is the spirit that pervades this community. But the man who holds the right of suffrage above everything else that is earthly, following in the footsteps of our ancestors who built this great Republic upon the foundation of suffrage, is not akin to this distinguished editor who says that he would rather have gold than have the highest right granted to an American citizen.

They now condescend, some of them, to say that the people of the District may have suffrage, provided it is limited to a Delegate in Congress. When the people of the District of Columbia ask for the right of suffrage and you give it to the to no greater extent than to allow them a delegate upon this floor, you have given a stone to people who are crying for bread.

I have announced before, and repeat it now, that these people ought to be set free. They should have the right to levy their own taxes and to spend their own money just as they see fit to spend it. But they have delegates already—the four newspapers here—whose principal duty it is to abuse the man who undertakes to represent anybody else in the United States except the untaxed rich who live here. [Applause.]

They say they do not want suffrage-and I have here with me an editorial from the Evening Star, saying that they do not want suffrage. Why do not they want it? I will tell you.

It is because a mere handful of them, from the time that the commission form of government came into existence, have been the only electors. They have elected every set of Commissioners for the District of Columbia, except the present one. The dis-tinguished occupant of the White House has said that for once, at least, the people in the District of Columbia shall have representation in the Municipal Building. [Applause.] They have already demonstrated the fact that they have been wisely chosen. Through the provisions of this bill they have recom-mended that the poorer sections of the District of Columbia may have streets like those which have heretofore been given to the rich.

But recently I saw in one of the papers of Washington the statement that the northwest paid such a large proportion of the taxes of the District of Columbia that the people of that section should have better streets than the poorer sections. Do you mean by that to say to me that a man who lives in a quarter-of-a-million-dollar house should have a better street than the man who lives in a \$100,000 house, or that the man who lives in a \$100,000 house should have a better street than the man who lives in a \$1,000 house?

I say that this is a disposition which has prevailed here hitherto; and now, for the first time, comes an appropriation bill, upon the recommendation of a set of commissioners who themselves, free from the contaminating influences of the rich, say to these poor people, "You shall have just as many rights in the District of Columbia as the rich." [Applause.]

I say that less than a dozen men since 1878 have elected every commissioner of the District of Columbia until now; and I, for one, am in favor of putting the ballot into the hands of every man in the District of Columbia, so that he, as well as these few rich men, may have a voice in choosing those who are to administer the affairs of the District.

We have two civilian commissioners, whom I know person-I have the greatest confidence that before they have been in office another year they will come to this House and recommend reductions along certain lines that will make unnecessary the giving of either the people's money from the District or the people's money from the States to such an extravagant extent as it is now necessary to give it.

The engineer commissioner I scarcely know. I never saw him but once. I have never heard anything to his detriment. All that I have heard of him is praise. I have no purpose to criticize him, but I feel free to criticize the manner of his selection.

When we had in the White House, before the 4th day of last March, a man who was willing to give the money of all the people to the few here, on the 28th day of February, four days before he went out of office, he transferred the then engineer commissioner from the District of Columbia to Panama and took from Panama the present engineer commissioner and ordered him here, thereby undertaking to forestall the present occupant of the White House from making that designation.

Not only was that done just four days before the outgoing of President Taft and the incoming of President Wilson, but, in order that the new appointee might be certain to get the office before President Wilson came into office, he took the oath of office in Panama, although he did not arrive here until two days after President Wilson had taken the oath of office. It was an evident attempt upon the part of somebody to forestall President Wilson in 331 per cent of the Board of Commissioners of the District of Columbia.

This is but another evidence that President Taft was surrounded by men who knew what they wanted, and if they had this change in mind at that particular time, and set about bringing this about as they did, then they must have gotten at least one of the men they wanted. I trust that he will disappoint any sinister motives which prompted this action.

As I said upon taking the floor, it was not my purpose to make any remarks at all to-day, and therefore what I say will not be in as connected a form as I would have liked to have it. Reference has been made here, and it has been made in the reports of the various departments of the District of Columbia which are filed with Congress, that the avenues here are so wide that the Federal Government should help to keep them The other day I was reading one of these reports in which I found that argument made.

I sat down and wrote a letter to the official whose report I

was then reading, and asked him to tell me what avenues there were in the District of Columbia that were 160 feet wide, the they get it.

point that he was endeavoring to make. His answer was that Pennsylvania Avenue was 160 feet wide, and that four or five squares of Louisiana Avenue were 160 feet wide. There he was compelled to stop. The large width of these streets is on paper. It is not in paving. Where is the rest of the width of these streets? I will tell you. It is in the front yards of the people of the District of Columbia. Show me a residence anywhere in the District of Columbia, at least in the thickly settled part of it, and I will show you, not once but every time in a hundred, that the house is partly upon the streets which they say the United States owns.

The Supreme Court of the United States has said that the United States holds nothing but sovereignty in these streets, and that it holds that for the common use of the people. Yet you have this deceiving argument thrust at you every day, and I am sure that the new Members of this House do not know that 99 out of every 100 houses in the District of Columbia are built in part upon these streets.

Mr. MURRAY of Oklahoma. Will the gentleman yield? Mr. JOHNSON of Kentucky. I do.

Mr. MURRAY of Oklahoma. I want merely to make the observation here that, with the exception of Pennsylvania Avenue, the streets in the cities of the Western States are, on the whole, as wide as they are in Washington City, and the people in those cities pave them at their own expense.

Mr. JOHNSON of Kentucky. I saw in one of the local papers the other day the suggestion that toll ought to be charged to the people along Pennsylvania Avenue and F Street, at least. wish to remind the author of that statement that during the last Congress a bill was introduced at the request of the commissioners to do that very thing; and it ought to be done, and I will tell you why. Take the business houses along your principal thoroughfares, and many of them have basements running out under the pavement to the curb; they use that valuable space and do not pay the District of Columbia a farthing for it. I am not sure but that that bill ought to be brought to this Congress and made a law.

Only a short while ago the presidents of some of the big financial institutions in the District of Columbia came before the District Committee, and there, under oath, stated that their valuable vaults along Fifteenth Street were built out under the sidewalk. They charge an extravagant vault rental for property that they themselves say is owned by the United States. should they not pay a small rental for it? Why should they not pay at least interest on what the ground is worth?

Now, while we are talking about these financial institutions, let me say they are the very people who, having influence at the time that this act of 1878 was passed, sold all the rest of the people of the District of Columbia into bondage.

And they are the only people in the District of Columbia to-day who ask to be retained in bondage, and they ask it because they say that they love a dollar better than they love freedom. Patrick Henry did not tell us that. He has a descendant on the floor of this House and I am sure that he will not subscribe to the statement that he would rather worship Mammon than to be free with all the rest of the Nation.

They go back to 1878 in speaking of the "organic act" and call it a "compact." A compact between whom? A compact between a few people who had the President's ear, and who lobbied bills through Congress. Before long I expect to show you how Members of Congress in that early day, through officers in this House, lobbied a most infamous bill through Congress, which now stands as a law in the District of Columbia.

The time is coming, and I believe the time is at hand, when the other end of this Capitol will not stand as an obstacle against just legislation and throttle the views expressed through these representatives of the American people. They now must go before the American people themselves and ask to be returned to their seats, and every mother's son of them at this

minute has his ear to the ground. [Laughter.]
But a few days ago I saw in the papers of the District that this House might pass what it pleased, but there was hope that the Senate would allow this plundering game to go on. Who has been in control, in absolute, despotic control here? I say the big financiers. They came to this body in 1892, by act of July 1 of that year, and in behalf of their interests got through Congress, and then got the President to sign it, an act imposing a tax of \$1 a hundred upon their real estate holdings, while the renters from them must pay \$1.50 a hundred on the small effects they have in the tenement.

The people have not control here. I say, for God's sake, liberate the people and let them become masters of the situation themselves. They deserve liberty and you should see that

Are these few men really masters here? But a few months ago I heard one of the most powerful of them, under oath, state that he appointed the commission that acquired Rock Creek Park; but, upon suggestion being offered, modified his assertion by saying that he went to the President and had that commission appointed. That commission is more than 20 years old. Four out of five of them are dead, I believe. That commission can yet be revived by the President, and it can yet be put to work and complete the work that that commission, appointed by one of the big financiers of this town, left undone.

To-day, after the lapse of 20 years, the benefits that that law required those commissioners to levy upon adjacent property has not, to this moment, been levied. Is that for the common good? I say that when less than a dozen men hold in their hands the electorate of the District of Columbia by the influence they may have with the President, and select the commissioners, and the commissioners select every man under them, then they have what they want; and the great masses of the people, nearly 350,000 of them, are deprived of the right of suffrage for the benefit of those few.

I repeat what I have said upon former occasions: Let these people here govern themselves; and, as the gentleman from Iowa, Judge Prouty, has well said, they are just as capable of self-government as the Filipinos are.

The editor of the Star, in an editorial which I have here, has said that if the people of the District of Columbia are given suffrage the negroes from the farms and plantations in Maryland and Virginia will flock in here and control the elec-They will not control those who seek real freedom. They will overrule only the men who love the dollar better than they love freedom.

Where does the negro rule in an Anglo-Saxon country? to the Southern States, where in many places he outnumbers the Anglo-Saxon; but even there he does not rule.

Although he is one-third of the population of the District of Columbia, if those people are men-and I know they are-the white man, the Anglo-Saxon, will control and govern the Nation's Capital, the capital of a nation of white men. That is a puerile argument. Mr. Chairman, they have more negroes in office in the District of Columbia now than they will have after these people have the suffrage and elect their own officers. Some of the best offices in the Government in the District of Columbia are to-day held by negroes. You have on your police force, I understand, about 45 negro policemen. Go to the Southern States, where the negro is in overwhelming majority, and there you will not find a negro policeman. You can go into some of the offices in the city of Washington and you can not see a white face. Yet these people who worship only at the shrine of Mammon say, "If you give us suffrage, the negro will dominate the Nation's Capital."

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. DAVIS. Mr. Chairman, I yield 25 minutes to the gentle-

man from Washington [Mr. HUMPHREY].
Mr. HUMPHREY of Washington. Mr. Chairman, I wish to make a few remarks concerning the great Democratic prosperity that now blesses the land after 60 days under the new tariff law. We were told in the Democratic platform, and it was reiterated by every Democratic speaker throughout the country and repeated here upon the floor of the House during the time the tariff bill was under discussion, that the Democratic Party would not enact any legislation that would injure any legitimate The President reiterated that assurance time and time again. The people throughout the country had faith in that promise. That fact had much to do with maintaining the prosperous industrial conditions. The people believed up until almost the very hour the new tariff bill went upon the statute books that this promise, so solemnly given, would be kept. their hope gave way to bitter disappointment.

A little more than a year ago, when I was making my campaign for reelection, I found that the lumber and shingle industry of my State was in the most prosperous condition it had ever been. There were more men employed in those mills than They were receiving higher wages than ever be-There was a greater demand for labor than ever before. There was more capital invested in that industry than ever The output was greater than ever before. I told the men who were working in those mills night after night that if the Democratic Party went into power and carried out the promises of its platform they would be thrown out of employment or have their wages reduced.

When the tariff bill came up for discussion on the floor of this House, I stood in front of that desk, and I pointed out to the Democratic majority that the timber in the State of Wash-

than the timber in British Columbia. I pointed out the fact that it cost more to manufacture a thousand shingles in the State of Washington than it did in British Columbia.

I pointed out the further fact that the men working in the shingle mills of Washington were American citizens; that they were white men; that they received American wages. pointed out that over in British Columbia the mills employed Chinese, Japanese, and Hindoos, mostly Chinese. I pointed out that it was impossible for the men in Washington to compete with the Chinamen in British Columbia. I made the prediction then that if the tariff was taken off shingles those shingle mills would close. I made the statement that it was either a reduction of wages or the closing of the mills. But that statement was received upon the Democratic side of the House with smiles of incredulity and of intellectual superiority. What are the facts? The present tariff law up until the 1st day of December had been upon the statute books 57 days. I hold in my hand a list of 194 shingle mills in the State of Washington that have closed-more than 60 per cent of all the mills in the State and 50 per cent of all the mills in the United States-that were closed on the 1st day of December last. The men that were employed in these mills are thrown out of employment and are to-day looking for work.

I hold in my hand a list of 33 of the great lumber mills of the State of Washington that have closed since this freetrade Wilson tariff law, passed by a Democratic Congress—or, to speak more accurately, that was passed by a Democratic President—went upon the statute books. Those 33 mills represent a daily output of 3,100,000 feet. They employ 8,500 men. These men are out of work to-day and looking for employment. I ask unanimous consent that I may print in the Record this list of closed mills in the State of Washington, in order that the majority may gaze upon the glory of their handiwork and rejoice in its results. I will insert them at the close of my speech as Exhibits A and B.

The CHAIRMAN (Mr. LLOYD). The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. WILLIS. Mr. Chairman, will the gentleman yield for a question?

Mr. HUMPHREY of Washington. Certainly.

Mr. WILLIS. I am very much interested in the gentleman's depiction of the situation in the West, a situation that is fast spreading over the country.

want to ask whether there is any truth in this statement. I have a clipping from the Washington Times of the issue of December 14, which says:

ES WOULD USE MILITIA BLANKETS—PETITIONS FROM SEATTLE MER-CHANTS ASK CONGRESSMEN FOR COMFORT FOR UNEMPLOYED. HOBOES WOULD USE MILITIA BLANKETS-

SEATTLE, December 14.

A glant mass meeting is being held to-day to discuss the problem of the unemployed, which Jeff Davis, "king of the hoboes," puts at 2,500. Through Davis's efforts the Providence Hospital, valued at \$1,000,000, has been built. A committee of prominent merchants sent telegrams to Congressman HUMPHREY, of Seattle, urging that 5,000 blankets from the National Guard of Washington State be turned over to the use of the needy men.

the needy men.

The city has appropriated \$12,500 to provide temporary work on street improvement for the unemployed.

Is that true as to the unemployed in that great city at this time? What does the gentleman say; is that the fact?

Mr. HUMPHREY of Washington. I have just read to the gentleman a list of over 60 per cent of the shingle mills that have closed and of the lumber mills, employing 8,500 men, that have closed, and it is perfectly natural that those men should go to the city. They are to-day out of employment, they are out of money, and without food and without shelter, and they have gone into the cities.

Mr. WILLIS. It seems possible, then, we may have armies of unemployed even under the "new freedom." The gentle-man will notice that this article further states that these gentle-The gentlemen seeking work have wired Congressmen to secure a loan of tents from the National Guard in order that they may have shelter. Does the gentleman know anything about the truth of

Mr. HUMPHREY of Washington. I want to say to the gentleman from Ohio, that I was talking to a man a few days ago who has just recently visited the major portion of the cities of the Union, and he told me that he found Seattle the most prosperous city in the Union; that they were doing more business there than any other city that he visited, and that is in accordance with my observation when I was there a short time ago.

But notwithstanding that great prosperity in the city itself it is true we have to-day somewhere in the neighborhood of 5,000 men out of employment who come out of these mills that ington out of which the shingles were manufactured cost more | have been closed because the white men in those mills could not work in competition with and would not work for the same wages the Chinaman works for over in British Columbia; and I am glad they did refuse, and I hope the time will never come, notwithstanding the fact that the Democratic Party placed shingles on the free list, that an American citizen will ever work for the wages that a Chinaman is willing to accept.

Mr. FESS. Will the gentleman yield?
Mr. HUMPHREY of Washington. Certainly.
Mr. FESS. I read in the New York Sun of yesterday that "the president of the United Charities of Chicago reports that thousands of unskilled workmen have been discharged," together with quite a list of similar instances in other portions of the

country. Has the gentleman any record of that?

Mr. HUMPHREY of Washington. I have no record of that. I only know about the conditions in regard to these lumber and

shingle mills.

Mr. MOORE. Will the gentleman yield?

Mr. FITZGERALD. Has anybody else another of these news-

Mr. HUMPHREY of Washington. Just a moment, to reply to the gentleman, and then I will yield further. I was saying that the conditions in the West are the same that the conditions are throughout this country. It is true that when you enacted that law and placed shingles upon the free list that a second flood or a State-wide earthquake or conflagration could not have brought much quicker or more complete destruction to the lumber and shingle industries of my State. It is true that these men today are out of employment, and they are cold and hungry and are going into the cities. It is a fact for the first time since the last Democratic administration that we again have the soup house and the bread line.

Mr. BROCKSON. Will the gentleman yield? Mr. HUMPHREY of Washington. I can not yield now. It is also the fact, Mr. Chairman, for the first time since the last Democratic administration that the wage earner has become a tramp and the mill worker a beggar. It is true, Mr. Chairman, that to-day thousands of these men, hungry and out of work, are being supported by the grudging hand of charity. It is true, Mr. Chairman, that we again have the picture thrust upon us of thousands of men and women hungry, out of work,

time, but not now. And we are again, Mr. Chairman, by the lesson of experience to learn, the same way we have always learned under a Democratic administration, that we can not give our work and wages to foreign labor without bringing poverty and want upon our own. And we are to again have it demonstrated that the learned free-trade theories of the scholar and the dreamer, when put into effect, mean industrial death. Again it has been demonstrated that the Democratic Party is wholly incompetent to conduct the affairs of this Nation. Again we are to learn at fearful cost that a Democratic administration means an empty Treasury, industrial depression, and poverty and idleness and rags. I think that answers the question of the gentleman from New York [Mr. FITZGERALD]. That condition is general. Once more the highways and by-ways of this country are filled with men seeking employment.

Mr. FITZGERALD. Does the gentleman say that because shingles have been put upon the free list poverty and hunger and disaster are stalking through the land?

Mr. HAYES. I can answer that question.

Mr. FITZGERALD. One at a time.
Mr. HUMPHREY of Washington. What was the question of the gentleman from New York?

Mr. FITZGERALD. Does the gentleman state that because shingles have been put upon the free list that hunger, poverty, and disaster are now stalking throughout the land?

Mr. HUMPHREY of Washington. Well, placing shingles upon the free list put about 10,000 or 15,000 men in that condition. The other day your legislation in regard to steel caused 25,000 men up in Pittsburgh to be placed in that condition.

Mr. FITZGERALD. Where is the steel coming from? Is

there any record of any import coming in?
Mr. HUMPHREY of Washington. I do not know. Go and make that argument to the men who are hungry. Go to the men in my State that are unemployed and tell them that they can buy shingles cheaper from British Columbia than they can

Mr. FITZGERALD. There are no more coming here than there were. There is no demand for them, and, of course, there

would not be any manufactured.

Mr. HUMPHREY of Washington. I object to any further interruption.

Mr. FITZGERALD. The gentleman ought not to ask a question and be afraid to have the truth told.

Mr. HUMPHREY of Washington. If you will read the papers of yesterday you will see that throughout the whole country building has decreased over 30 per cent. No longer are people buying shingles. They are too poor.

Mr. FITZGERALD. Will people stop building houses be-

cause the tariff is reduced?

Mr. HUMPHREY of Washington. They stop building houses because the Democratic Party has reduced the tariff. They always do. Out in my country Democratic legislation has put people out of work.

Mr. HAYES. Does the gentleman know that in Youngstown, in the Mahoning Valley, one institution discharged 3,000 men?

Why this sudden stoppage in demand? Mr. FITZGERALD. Why is it?

Mr. HAYES. Because everybody knows that labor abroad is

going to be employed.

Mr. FITZGERALD. The gentleman says they are going to be

employed, and not that they are employed.

Mr. HUMPHREY of Washington. Mr. Chairman, I still have the floor. Of course, it is a mere coincidence that every time the Democratic Party comes into power the mills begin to close, the fires of our furnaces die, and that men are thrown into idleness. True, it has not happened for 20 years, but it comes back just at this time. Oh, it is a mere coincidence. Providence is responsible for it, I suppose, since the Democratic Party got into power.

Mr. PETERSON. Will the gentleman yield to me for just

a question?

Mr. HUMPHREY of Washington. Not now. other thing to which I want to call attention. The Democratic Party, through the President, through the leader of the House, and through the Secretary of Commerce, and the Secretary of Labor, and through other men here on the floor of the House have promised that if any mills closed, if any industry shut down or reduced wages, they would see to it that these mill owners were investigated and the facts given to the country. The gentleman from Alabama [Mr. Underwood], standing on side of the House, and making a speech at the time the tariff bill was under consideration, warned the country that if any industry closed it would be investigated. And Secretary Redfield has repeatedly made that statement, if the press correctly quotes him, and Secretary of Labor Wilson, in his speech in San Francisco, a few days ago, is quoted as saying that if any industry closed down or reduced wages, and gives as a reason that it is tariff legislation, he would see to it that it was investigated and the facts made known. I intend here and now to call that Democratic bluff. I have to-day written a letter to the Secretary of Commerce, and sent a copy of it to the Secretary of Labor. in which I have given a list and the location of the closed mills in my State. I ask Mr. Redfield now to go forth and investigate these 149 shingle mills and 33 lumber mills and see why they closed. They say it is due to the tariff. Let us know the truth.

If it be true that these industries have closed down their mills and thrown their men out of employment and lost their own money simply to embarrass this administration, let us know the fact, and let them be hanged on "a gallows as high as Haman's," as the President promised. [Applause on the Re-

publican side.]

If, on the other hand, it be true that the tariff has unjustly affected these industries, then let the Democratic Party make good the statement that was made by the gentleman from Alabama [Mr. Underwood] when he stood upon the floor during the debate upon the tariff bill and declared that if after investigation it was found that any industry was injuriously affected by the tariff law, the Democratic Party would correct it.
That is why I am bringing this matter before the House to-

day. I want to ascertain whether or not the Democratic Party is in earnest; whether they will do what they promised—investigate these mills. And if it be true that they have closed without reason, then let that fact be known. If the tariff law caused it, let that be known, and then let the Democratic Party have the courage and the patriotism to keep its promise and change the law.

Now, Mr. Chairman, in order to test the sincerity and the good faith of these distinguished Democrats who have been making these boasts and these statements and these promises, and in order to ascertain whether or not they are talking for po-litical purposes only, I to-day sent this letter to the Secretary of Commerce. I want to read it. It is as follows:

WASHINGTON, D. C., December 15, 1913.

Hon. WILLIAM C. REDFIELD, Secretary of Commerce, Washington, D. C.

DEAR MR. SECRETARY: During the recent presidential campaign and during the discussion in Congress of the Underwood tariff bill those

representing this administration emphasized and reiterated that the Democratic Party would not pass any law that would injure any legitimate industry. If the press reports of your public utterances since you have been Secretary of Commerce are correct, you have frequently reiterated this promise, and have expressed a determination in case any legitimate industry closed, or reduced wages, or discharged employees, under pretense that legislation was the cause, that you would investigate such industry and give the public the truth in regard to the matter.

vestigate such industry and give the public the truth in regard to the matter.

Mr. UNDERWOOD, the distinguished leader of the majority in the House of Representatives, speaking on the floor of that body May 8, 1913, said:

"More than that, Mr. Speaker, we have established a Bureau of Foreign and Domestic Commerce that goes far beyond anything that these gentlemen desire to obtain in their tariff board, and it is well for the country to know it. It not only has the power to investigate the question of cost either here or abroad, the amount of imports and exports, and American consumption, but when a great manufacturing institution is ready to threaten its laborers with a reduction of wages because they say there has been adverse action and legislation in Congress, or to reflect on the action of the Government of the United States, that bureau has the power to walk into their offices and ascertain whether there is real reason for their cutting the rates of wages of their labor or whether it is merely a selfish attempt to put money into their own pockets."

This statement was applauded and approved by the majority, and many other Democratic Members took occasion to express themselves to the same effect.

It also appears that in these proposed investigations you are to have the earnest cooperation of the Department of Labor, for Secretary Wilson, in a recent speech delivered in San Francisco, is quoted as saving:

have the earnest cooperation of the Department of Labor, for Secretary Wilson, in a recent speech delivered in San Francisco, is quoted as saying:

"If the manufacturers reduce wages and assign as a reason the tariff law just enacted, they will be brought before the bar of public opinion by the Department of Commerce, and my department will assist. We shall immediately, through our bureau of statistics, gather information to determine whether their statements are true."

If we can believe the newspapers, you have also in this undertaking the approval of the President, as he is reported to have said on May 16, 1913:

"That he is in entire accord with Mr. Underwood and Mr. Redfield regarding the announced policy to expose manufacturers who reduce wages on the pretext of losses due to lower customs duties."

It would further appear that the President, if not, in fact, the author, is at least a sincere supporter of this plan, as he is quoted as saying when speaking to the Southern Society at a banquet held at the Waldorf Astoria on December 18, 1912:

"There are natural panies, and sometimes panies because certain gentlemen want to create the impression that the wrong thing is going to be done. I have heard that certain men can create such panies. In my ignorance of Wall Street I do not know about this. But I know the machinery is in existence for the creation of such panies. But I am not afraid of them. I do not believe that there is any man living who dares to use that machinery to create such a panie, and if anyone attempts it I promise you that I will build the gibbet for him high as Haman's. But that is only figuratively speaking. What I will do will be to direct the attention of the people to him, and I think they will manage to cut him to the quick. With their eyes open the people arm out going to let any man do such a thing."

So it fully appears that you have the means, the authority, and the desire to make these investigations, and that in so doing you will have the complete by the sum of the administrati

promised, to investigate the reason for the closing of these mills.

Mr. Underwood, speaking on the ficor of the House on May 15, 1013, said:

"When the Department of Commerce reports, after a careful, disinterested, and honest investigation, that an injustice has been done, either to an industry of this country or to the labor employed in that industry, you may rest assured that this side of the House will rectify any wrong which has been done."

The people of the State of Washington and the entire country wish you to immediately ascertain the facts so that Congress may know, and if an injustice has been done to this great industry, if you consider it a legitimate one, that the Democratic Party may correct this injustice as Mr. Underwood promised. Let the country know whether these mill owners have closed their mills, lost their money, and driven their men into idleness for the purpose of embarrassing the administration. Let us know whether they are fit to adorn a structure of the character so vividly and so amiably described by the President in his speech to the Southern Society.

Mr. Underwood in the same speech, above referred to, speaking on the same subject, said:

"Oh, there are some propositions that we recognize are not to be classed as legitimate industries. \* \* But we are entitled to know the facts, and we are going to know them. It is no threat."

I ask you to make good that statement of Mr. Underwood's that has been reenforced by statements from the President, from Secretary Wilson, from yourself, and from many other leading Democrats.

It is true that when the tariff bill was under consideration it was pointed out to the Democratic majority that timber for the manufacture of shingles in British Columbia was cheaper than in this country; that the American mill owner employed American citizens and paid them American wages; and that they could not compete with the oriental labor employed in British Columbia. These statements were received with couriesy and rejected without consideration. True, it may

inject the truth into a scholarly and perfectly good free-trade theory that fully satisfies those who are directing the destiny of the Democratic Party? If laws enacted on such theory fail to work to the advantage of the people, the fault lies not in the law but in the stupidity of those who do not understand how to adjust themselves thereto in order to reap its blessings.

who do not understand how to adjust themselves thereto in order to reap its blessings.

The people engaged in the lumber and shingle industry have experienced the competition with the rest of the world that the President desired. They have had both their wits and their appetites sharpened. The closing of these mills has forced thousands of men into iddeness. The whole country is anxious to know the cause. Again the shadow of the soup house falls across the weary path of the unemployed.

As days and months must elapse before you can complete your investigation and relief be given, even if you find that these men are entitled to such relief, instead of being executed by public opinion, I suggest that in the meantime you send to these thousands of men out of work and without money a scholarly and grammatically perfect essay on the "new freedom," or a learned lyric on "efficiency." During the starvation period through which these men must pass, these classic contributions will no doubt prove a satisfactory substitute for bread.

The Democratic Party has repeatedly promised the people that if the mills and factories closed following the enactment of the new tariff law that your department would investigate and give to the country the real reasons for such action. The mills and factories have closed and thousands of men are out of employment. It is charged by those who have closed these mills and factories that the present tariff law is largely reasonable therefor. I have placed before you exact and specific information of this character. Will you redeem the promises that the Democratic Party has made?

W. E. Humphrey,

mation of this character.

Eximity Ass made?

3, 137, 500 Total feet. Mr. PAGE of North Carolina. I yield 15 minutes to the gen-

tleman from Indiana [Mr. Adair].
The CHAIRMAN. The gentleman from Indiana [Mr. Adair]

is recognized for 15 minutes.

Mr. ADAIR. Mr. Chairman, I rise to avail myself of the lati-

tude given under general debate to discuss House joint resolution No. 5, reported by the Committee on Education, and providing for the appointment of a commission to consider the need and report a plan for vocational education.

Mr. Chairman, there is no subject before this House in which I am interested to a greater extent than that of education. I am interested to a greater extent than that of education. I have listened with a great deal of interest and pleasure, and I may say with much profit, to the very able discussion of the questions involved in this resolution. I was especially interested in the remarkable speech made by the gentleman from Oklahoma [Mr. Murray] on the subject of education. I regard it as one of the most comprehensive and illuminating speeches on the subject of education ever made upon this floor. I was especially interested, too, in the very earnest appeal made by my good friend from Ohio [Mr. Frss] in his advocacy of this

Mr. Chairman, I appreciate the necessity of vocational education, and no one on this floor will go further than I will in voting reasonable appropriations to carry on the work of education along all lines. I gave my earnest and hearty support one year ago to the Lever bill, providing for the extension of the work done by our agricultural colleges. For many years I have realized the necessity of legislation that would tend to make farm life more pleasant and more profitable. During recent years the tendency has been away from the farm. When the boys growing up in the country reach maturity, they leave

the farm and go to the city and find work in our mills, factories,

Mr. GOLDFOGLE. Will the gentleman yield?

Mr. ADAIR. Just for a question.
Mr. GOLDFOGLE. I was going to ask the gentleman whether he could give us some information briefly as to the number of farms which have been abandoned, and the sections of the country in which these farms are located. I know it is a fact that there are a large number of abandoned farms throughout the country

Mr. ADAIR. I should be very glad to go into that phase of the question if I had the time, but having only 15 minutes remaining I desire to use the time in presenting some other phases of this subject. I am sure a large number of farms throughout the country have been abandoned, as suggested by the gentleman from New York.

Now, Mr. Chairman, one of the great problems we will be called upon to solve in the future is how to produce enough on our farms to feed our immense population. The population of this country is increasing at the rate of 2.000,000 each year, and of this 2.000,000 a million and a half are immigrants coming here from all parts of the world, and those of you who are informed on the subject of immigration know that but very few, if any, of this immigrant population will go upon the farm

and till the soil. Yet this vast number of people must be fed.

Mr. GOLDFOGLE. Will the gentleman yield?

Mr. ADAIR. I decline to yield further. I should be glad to, but my time is too limited. I say, therefore, that one of the great questions we will be called upon to solve in the future is how to produce enough on the farms to feed the people.

Mr. Chairman, some plan must be devised that will keep our boys on the farm and induce some now in the cities to go on the farm and help produce the products necessary to feed the people of the world. As I have already stated, I am in favor of vocational education, and am willing to appropriate money to that end, but I am not in favor of wasting the people's money on useless and unnecessary commissions. I have always been opposed to the appointment of commissions except in rare cases where they were actually needed. As was pointed out yesterday by the gentleman from Ohio [Mr. Sherwood], a large number of commissions have been appointed in the past, costing the people millions of dollars, and in most instances their recommendations have not been followed. During the past 14 years 28 commissions have been appointed, and I am informed the total cost of these commissions has amounted to the enormous sum of \$7.000,000. For many years it was the prac-tice of our Republican friends when their party was in power to take care of defeated Republican members by creating some commission on which they could be placed and their salaries continued. Some excuse was trumped up for creating a com-mission in order that certain Republicans might be kept on the pay roll. This was practiced until it was a stench in the nostrils of those of us who believed in the honest and economical administration of public affairs.

Now, Mr. Chairman, my party is in power, and I am going to oppose the continuance of this vicious system with the same earnestness I opposed it when our opposition was in control, While I do not pretend to have earned the title of "watchdog" of the Treasury, yet those of you who have been here during the past eight years know I have persistently fought every proposition of waste and extravagance and of useless expenditure of the people's money, and I want to repeat here and now that no proposition bearing the earmarks of graft or extravagance shall pass this House if I can prevent it.

Mr. Chairman, my opposition to this resolution is not based alone on the fact that it is an unnecessary expenditure of the peo-ple's money, but because it is already in the hands of men who are well equipped and qualified to deal with this question. The Ways and Means Committee used excellent judgment in forming the Committee on Education. It was careful to select men who were exceptionally well qualified by education and training to intelligently pass upon all problems going before that committee. Let us analyze the membership of that committee for a moment and see whether they are not able to handle this question without the aid of a commission. I find as chairman of that committee my good friend from Georgia [Mr. HUGHES], the Chesterfield of the House, who is always active, earnest, and diligent in doing his duty to his constituents and to his country. I find, in referring to the Congressional Directory, that the gentleman from Georgia is one of the Members of this House who has been interested for years in the subject of education. I find he is a graduate of a college himself, is now trustee of the Georgia Normal Industrial College, also a trustee in the University of

Georgia and the Georgia State Agricultural College. I would like to ask the gentleman from Ohio [Mr. Fess] would you say that Mr. Hughes, with all his experience and knowledge of educational work, is not qualified to pass on a proposition of this

Mr. HUGHES of Georgia. Mr. Chairman, I want to say that the gentleman is mistaken; I am not a trustee of the Georgia

Normal and Industrial College.

Mr. ADAIR. Well, I get my information from the Directory. Mr. FESS. Will the gentleman yield? Mr. ADAIR. I can not yield; I have only a short time re-

maining. Mr. DAVIS. I will give the gentleman an additional five minutes, if he wishes.

Mr. ADAIR. Then I will yield to the gentleman from Ohio. Mr. FESS. Mr. Chairman, I want to say that I agree entirely with all that the gentleman from Indiana has said in regard to the personal qualifications and capabilities of the chairman of the Committee on Education. I share it fully; but the chairman is not engaged now in educational work; he is very busy upon the floor, has many other things that are coming before the committee, and his associates are in the same condition. Under this resolution men who have spent all their lives can be chosen to do the work better than we can,

Mr. ADAIR. I doubt if nine men could be found better qualified to pass upon this question than the Committee on Education. I find also upon that committee Judge Rucker, of Missouri, with 16 long years of legislative experience in the House, an eminent lawyer, a splendid gentleman, well equipped

and qualified to pass on any educational proposition.

I also find J. Thompson Baker, of New Jersey, educated in Bucknell University, from which he received a degree of A. B., bachelor of arts, an able lawyer.

It has been said by some one that we ought to have somebody on this commission who has double LL.'s and double LL. D.'s attached to his name. I find on that committee you have the very man, eminently well qualified to pass upon this question. His name is John W. Abergrombie, of Alabama, and he has double LL.'s and double LL. D.'s and D. C. L.'s to throw He was graduated from Oxford College in 1886 and from the University of Alabama in 1888, LL. B., and in 1904 with an LL. D. He received the degree of LL. D. from the University of South Carolina in 1905, and D. C. L. from the University of the South, at Sewanee, in 1907. He has been principal of high schools and colleges in the South from 1888 He was State superintendent of education in Alabama from 1898 to 1902. He was honored with the presidency of the University of Alabama from 1902 to 1911. He was a member of the Alabama textbook commission and chairman of the Alabama commission for selection of Rhodes scholars in 1903 to 1911. He was the organizer and president of the Alabama Association of Colleges from 1908 to 1912. He was a member of the board of directors of the National Educational Association from 1900 to 1904 and from 1909 to 1911. He was president of the Southern Educational Association from 1906 to 1907. He was a member of the National Association of State Universities from 1903 to 1911. He was also president of the Southern Educational Council from 1912 to 1914, and also a member of the National Council of Education from 1908 to 1912.

Mr. Chairman, who would say that the gentleman from Alabama is not fitted by education, training, and experience to deal with this question? If this resolution should be passed, where could the President find a man with more LL's and D. C. L's

than the gentleman from Alabama?

I also find there are many other graduates of prominent colleges on this committee, but I shall not take up the time of the House by mentioning all of them; but here is the gentleman from Massachusetts, Mr. THACHER, who graduated from Adams Academy, in Quincy, in 1878, and graduated from Harvard College in 1882. And, then, here is my friend Mr. BURKE of Pennsylvania, who graduated from the University of Michigan in 1892 with the degree of LL. B. Here is the gentleman from Iowa, Mr. Towner, a lecturer on constitutional law in the State University of Iowa; and also EDMUND PLATT, of New York, graduated from Harvard University in 1888, the author of a history of Poughkeepsie and historical papers and lectures; and last, but not least, by any means, comes my good friend from Ohio, Mr. Fess, who graduated at the Ohio University at Ada in 1889. He was chosen to the chair of American history and later studied law, taking the degree of LL. D. I find he was made vice president of the university and became manager of the college of law. In 1902 he was called by President Harper to the University of Chicago, where he remained until 1906, when he accepted the presidency of Antioch College, which he

now holds. He is the author of the following publications: An Outline Study of Physiology; Outlines of United States History, History of American Political Theory, and Civics of

Mr. WILLIS. And they are all mighty good ones. Mr. ADAIR. Yes; they certainly are.

I also find he was a member of the Ohio constitutional convention, of which body he was vice president. He was honored with the chairmanship of the committee on education and was author of the amendment creating the department of State superintendent of public instruction. Why, my good friend from Ohio [Mr. Fess] has been known in educational circles ever since I can remember. His reputation as an educator is not confined to his community, neither is it confined to the great State from whence he comes, but has gone beyond the State of Ohio, and over in my own State of Indiana the name of Simeon D. Fess is known by all teachers and instructors. With such an array of talent as this, Mr. Chairman, upon the Committee on Education, wisely placed there by the Ways and Means Committee of the House, is there any man within the sound of my voice who can give a sound reason why the people's money should be wasted on this commission?

The CHAIRMAN. The time of the gentleman from Indiana

has expired.

Mr. ADAIR. I will now ask the gentleman from Minnesota for the time he promised me.

Mr. DAVIS. I first want to ask the gentleman a question.

Mr. ADAIR. Certainly.

Mr. DAVIS. The gentleman from New York asked the gentleman from Indiana if he could produce a list of deserted and abandoned farms, and the gentleman stated that he could not at the present time. I wish to suggest that, if statistics amount to anything, this ought to be an answer. Less than 50 years ago 70-odd per cent of the inhabitants of the United States dwelt upon farms and were producers, while to-day only about 31 per cent of the entire population is rural.

Mr. ADAIR. I thank the gentleman for the suggestion. I know it is true that a much less percentage of the people live

on farms than did a number of years ago.

Mr. DAVIS. And hence to a certain extent the farm has been

forsaken for the city.

Mr. ADAIR. Yes. When the boys grow up on the farms, they go to the city to find a place in the mills, in the shops, or in the factories, and I agree that we ought to do something that will make farming so pleasant and profitable, life upon the farm so happy, and make agriculturists so well contented, that they will want to remain on the farms.

Mr. Chairman, I am opposed to this resolution, because I believe it is a needless and useless expenditure of the people's money. It is not a fair plea to make to say that this committee is so busily engaged with other work that it is necessary for us to go outside and appoint somebody else to do the work our constituents expect us to do. I have so much confidence and so much faith in the ability of the gentleman from Ohio [Mr. FESS] and the gentleman from Alabama [Mr. ABERCROMBIE]. two of the great intellects of the country, whose education was not neglected, that I am willing to follow them on this proposition, and I would rather follow them than to follow any commission appointed by the President.

I look upon the question of education as a business proposition as well as an educational proposition, and fortunately we have on that committee men like Mr. HUGHES of Georgia, who is a practical business man and farmer, and who has also given much time and attention to education, and is able to pass upon

these questions without wasting the people's money.

Mr. Chairman, the passage of this resolution will set a bad precedent. There are matters of equal importance before each and every committee of the House, and if each committee would ask for a commission to determine what it should do, we would have a Government of commissions and our people would be taxed to the limit to pay the enormous expense. Since the Democratic Party came into power graft, waste, and extrava-gance have been practically weeded out of all the departments of government, and the people have been saved millions of dollars. Let us go on practicing the strictest economy in governmental affairs and see to it that not one dollar raised by taxing the people is wasted.

Mr. Chairman, immediately after the holiday vacation we will take up for consideration and passage the appropriation bills making appropriations for the fiscal year ending June 30, 1915, and I want to serve notice now that no appropriation bearing the earmarks of waste or extravagance will pass this House if I can prevent it. In conclusion I want to say that I favor all legislation along educational lines and am willing to vote money for that purpose, but I am not willing to waste the people's money on unnecessary commissions. [Applause.]
Mr. PAGE of North Carolina. Mr. Chairman, I move that the

committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HULL, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 10523, the District of Columbia appropriation bill, and had come to no resolution thereon.

#### LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted to Mr. Howard, for five days, on account of illness in his family.

### IMMIGRATION.

Mr. BURNETT. Mr. Speaker, this morning I asked to be permitted to correct a report upon a bill, but objection was made. I have concluded to file the report (H. Rept. 149), because one or two minority reports have been inserted, and I shall file the report and bill again, and the gentleman from New York, Judge GOLDFOGLE, desires to file a minority report.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. The gentleman now states that he proposes to file a report anew. I suggest, before he can do that, the bill having already been reported to the House, he will have to ask unanimous consent to withdraw the bill already reported.

Mr. BURNETT. That is correct, The SPEAKER. The Chair will put the question in that way. Mr. GOLDFOGLE. Mr. Speaker. I submit the minority views of the gentleman from Illinois [Mr. SABATH] and myself, and while I am doing that I desire to say that when yesterday the gentleman from Alabama [Mr. BURNETT], the chairman of the Committee on Immigration, submitted a report, which he now desires to correct, it was stated by the gentleman from Connecticut [Mr. Donovan] that the Member from New York-in all probability having myself in mind-was absent. I want to state that I was then actually in the performance of committee duty under the leave granted by the House. The Committee on Elections was then meeting, and therefore I was not present when my friend from Alabama offered the report.

I file herewith the minority views. Mr. DONOVAN. Mr. Speaker-

For what purpose does the gentleman from The SPEAKER.

Mr. DONOVAN. I objected to the gentleman from Alabama presenting the report in the gentleman's absence. That was my

The SPEAKER. The Chair knows, but the thing the gentleman from New York complains of is that the gentleman from Connecticut put him in the attitude, unwittingly no doubt, of calling attention to the fact that he was not here.

Mr. DONOVAN. That is true.

Mr. GOLDFOGLE. When really I was in the performance of a committee duty, presiding over my Elections Committee.

Mr. DONOVAN. The thing I objected to was the gentleman

from Alabama bringing it in in the gentleman's absence. I was

trying to save the gentleman.

Mr. GOLDFOGLE. I thank the gentleman.

The SPEAKER. The gentleman is out of order. The gentleman from Alabama [Mr. Burnert] asks unanimous consent to withdraw the report and the bill that he filed yesterday, and to file it now as he wishes it.

Mr. MANN. He does not need to ask authority to file it now. The SPEAKER. Well, he asks to withdraw the other. Is there objection?

Mr. DONOVAN. I am going to object.

Mr. MANN. Oh, do not object. Mr. DONOVAN. Well, these parliamentary sharps around here are all the time raising parliamentary points of order, and they ought to proceed in regular order, and I object.

Mr. BURNETT. Mr. Speaker, I hope the gentleman will not object. It is merely a correction of one word in the report and in the bill.

Mr. DONOVAN. I withdraw the objection, Mr. Speaker.
Mr. BURNETT. I thank the gentleman.
The SPEAKER. Is there objection? [After a pause.]

[After a pause.] The Chair hears none, and it is so ordered.

Mr. GOLDFOGLE. Mr. Speaker, I now submit the minority

The SPEAKER. The gentleman from New York submits the

minority views—
Mr. GOLDFOGLE. For Mr. Sabath and myself.

The SPEAKER. Which goes to the House Calendar.

Mr. GOLDFOGLE. Mr. Speaker, there is another gentleman on our committee, perhaps two more, who may desire to submit minority views, and I ask that they may have the right to do so.

The SPEAKER. For how long?

Mr. GOLDFOGLE. One gentleman is engaged, I know, in the performance of committee duties, and I suggest he have two more days.

The SPEAKER. Who is it?
Mr. BURNETT. Mr. MANAHAN. I think all who desire to dissent have filed their views.

The SPEAKER. He has two days more under the order

made yesterday.

Mr. MANN. The order made yesterday was vacated by with-

drawing the report.

The SPEAKER. The gentleman from New York [Mr. Golden. FOGLE] asks that the gentlemen of the minority who desire to file minority views shall have two days in which to do so. Is there objection? [After a pause.] The Chair hears none. These reports go through the basket.

### ADJOURNMENT.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 35 minutes p. m.) the House adjourned to meet to-morrow, Wednesday, December 17, 1913, at 12 o'clock noon.

### EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, final report of a special board of engineer officers on raising and removing the wreck of the U.S. battleship Maine from the harbor of Habana, Cuba (H. Doc. No. 480); ordered to be printed, with illustrations

2. A letter from the Secretary of the Treasury, transmitting a copy of a communication from the Secretary of State, submitting an estimate of appropriation, in the sum of \$5,000, for the expenses of the representatives of the United States at the International Maritime Conference for Safety of Life at Sea, now in session at London, in addition to the appropriation of \$10,000 made in the joint resolution approved June 28, 1912, entitled, "Joint resolution proposing an international maritime conference" (H. Doc. No. 479); to the Committee on Foreign Affairs and ordered to be printed.

### REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows

Mr. TAYLOR of Colorado, from the Committee on the Public Lands, to which was referred the bill (H. R. 5993) authorizing the city of Montrose, Colo., to purchase certain public lands for public-park purposes, reported the same with amendment, ac-companied by a report (No. 143), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BROWN of New York, from the Committee on the Public Lands, to which was referred the bill (S. 541) granting to the Emigration Canon Railroad Co., a corporation of the State of Utah, permission, in so far as the United States is concerned, to occupy, for a right of way for its railroad track, a certain piece of land now included in the Mount Olivet Cemetery, Salt Lake County, Utah, reported the same with amendment, accompanied by a report (No. 148); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BURNETT, from the Committee on Immigration and Naturalization, to which was referred the bill (H. R. 6060) to regulate the immigration of aliens to and the residence of aliens in the United States, reported the same with amendment, accompanied by a report (No. 149); which said bill and report were referred to the House Calendar.

### REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. GRAHAM of Illinois, from the Committee on the Public Lands, to which was referred the bill (H. R. 2733) authorizing J. A. Matheny, of Colony, Wyo., to make homestead entry, reported the same with amendment, accompanied by a report (No. 142), which said bill and report were referred to the Private Calendar.

# PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials

were introduced and severally referred as follows:

By Mr. CONNOLLY of Iowa: A bill (H. R. 10723) to provide for the erection of a public building at Eagle Grove, Iowa; to the Committee on Public Buildings and Grounds.

By Mr. CULLOP: A bill (H. R. 10724) to create the bureau of labor safety in the Department of Labor; to the Committee on Labor

By Mr. MAHAN: A bill (H. R. 10725) authorizing the Secretary of the Navy to appoint a board of officers to survey the site owned by the Government at New London, Conn., with a view of establishing an armor-plate manufactory thereon; to the Committee on Naval Affairs

By Mr. KETTNER: A bill (H. R. 10726) to authorize the acquisition of a site and the erection of a Federal building at Rishop, Cal.; to the Committee on Public Buildings and

Also, a bill (H. R. 10727) providing for a building for post office and other purposes at San Bernardino, Cal.; to the Committee on Public Buildings and Grounds.

By Mr. TALBOTT of Maryland: A bill (H. R. 10728) to provide for an examination and survey of the Baltimore Harbor and entrances thereto; to the Committee on Rivers and Harbors.

By Mr. KETTNER: A bill (H. R. 10729) making appropria-

tions for the printing and publishing of maps and reports relating to the kelp beds on the Pacific coast; to the Committee on Agriculture,

By Mr. LINDBERGH: A bill (H. R. 10730) restoring to the public domain certain land heretofore reserved for reservoir purposes at headwaters of the Mississippi River and tributaries; to the Committee on the Public Lands.

Also, a bill (H. R. 10731) restoring to the public domain certain lands heretofore reserved for reservoir purposes at the Leadwaters of the Mississippi River and tributaries; to the Committee on the Public Lands.

By Mr. ANSBERRY: A bill (H. R. 10732) to authorize the payment of certain pensions monthly; to the Committee on Invalid Pensions.

By Mr. HOWELL: A bill (H. R. 10733) to consolidate certain lands within the Cache National Forest, Utah; to the Committee on the Public Lands.

By Mr. QUIN: A bill (H. R. 10784) making an appropriation for the repair, completion of reverment, and other necessary work on Natchez Harbor at the city of Natchez, Adams County, Miss.: to the Committee on Rivers and Harbors.

By Mr. LEWIS of Maryland: A bill (H. R. 10735) to create a bureau of labor safety in the Department of Labor; to the Committee on Labor.

By Mr. BORLAND: A bill (H. R. 10736) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judic'ary," approved March 3, 1911; to the Committee on the Judiciary

By Mr. OLDFIELD: A bill (H. R. 10737) to give effect to the provisions protecting copyright and designs of the act entitled 'An act providing for the free importation of articles intended for fore'gn buildings and exhibits at the Panama-Pacific International Exposition and for the protection of foreign exhibitors." approved September 18, 1913; to the Committee on

By Mr. GEORGE: A bill (H. R. 10738) to provide for annual and full-value assessments, a more efficient assessing department, and for other purposes relating to assessment and taxation in the District of Columbia; to the Committee on the District of Columbia.

By Mr. JOHNSON of Kentucky: A bill (H. R. 10739) relative to appropriations for the District of Columbia; to the Committee on the District of Columbia.

By Mr. JACOWAY: A bill (H. R. 10740) appropriating \$250,000 for the construction of dredge boats for dredging on the Arkansas River; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 10741) for the erection of a public building at Conway, Ark.; to the Committee on Public Buildings and

Also, a bill (H. R. 10742) for the purchase of a site and the erection of a public building at Little Rock, Ark.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10743) for the purchase of a site and the erection thereon of a public building at Morrillton, Ark.; to the Committee on Public Buildings and Grounds.

By Mr. TAYLOR of Alabama: Resolution (H. Res. 349) to print 2,000 additional copies of the Soil Survey of Mobile County, Ala., for use in the House document room; to the Committee on Printing.

By Mr. BURNETT: Resolution (H. Res. 350) for the consid-

eration of H. R. 6060; to the Committee on Rules. By Mr. TOWNSEND: Joint resolution (H. J. Res. 173) to amend the joint resolution of May 25, 1908, providing for remission of a portion of the Chinese indemnity; to the Committee on Foreign Affairs.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BALTZ: A bill (H. R. 10744) granting a pension to Phoebe Cosgriff; to the Committee on Invalid Pensions.

By Mr. BARCHFELD: A bill (H. R. 10745) granting a pen-

sion to Henry Spahn; to the Committee on Pensions.

Also, a bill (H. R. 10746) granting an increase of pension to John Gion; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10747) granting an increase of pension to Ambrose C. Niven; to the Committee on Pensions.

Also, a bill (H. R. 10748) to correct the military record of Felix Boyle; to the Committee on Military Affairs.

By Mr. CAMPBELL: A bill (H. R. 10749) granting a pension to Fred M. Miller; to the Committee on Invalid Pensions.

By Mr. CANTRILL: A bill (H. R. 10750) granting a pension to Herman Hoover; to the Committee on Pensions.

Also, a bill (H. R. 10751) granting a pension to Joseph Gambell; to the Committee on Pensions.

By Mr. CLARK of Missouri: A bill (H. R. 10752) granting an increase of pension to Joseph H. Reynolds; to the Committee on Invalid Pensions

By Mr. DIFENDERFER: A bill (H. R. 10753) granting an increase of pension to Joseph Scattergood; to the Committee on Invalid Pensions.

By Mr. EAGAN: A bill (H. R. 10754) granting an increase of pension to Augustin Buhl; to the Committee on Pensions.

Also, a bill (H. R. 10755) granting an increase of pension to

Andrew Sutton; to the Committee on Invalid Pensions.

By Mr. ESCH: A bill (H. R. 10756) granting a pension to Charles P. Dyrud; to the Committee on Pensions.

By Mr. FARR: A bill (H. R. 10757) granting a pension to Edward Sweeney; to the Committee on Pensions.

Also, a bill (H. R. 10758) granting an increase of pension to Orestes B. Wright; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10759) for the retirement of John J. Ross, second lieutenant, Philippine Scouts; to the Committee on Military Affairs.

By Mr. FIELDS: A bill (H. R. 10760) granting an increase of pension to Mary M. Wright; to the Committee on Invalid

Also, a bill (H. R. 10761) granting an increase of pension to James G. A. Middleton; to the Committee on Invalid Pensions.

By Mr. GARD: A bill (H. R. 10762) granting a pension to Frederick G. Oldt; to the Committee on Pensions.

By Mr. GARRETT of Tennessee: A bill (H. R. 10763) for the relief of Dr. L. W. Culbreath; to the Committee on Claims.

By Mr. HAMILTON of Michigan: A bill (H. R. 10764) granting an increase of pension to William Burns; to the Committee on Invalid Pensions.

By Mr. HAUGEN: A bill (H. R. 10765) granting a patent to George N. Van Leuven for the northeast quarter of section 18, township 17 north, range 19 east, Black Hills meridian, South Dakota; to the Committee on the Public Lands.

By Mr. HAY: A bill (H. R. 10766) for the relief of Frederick

Hughson; to the Committee on War Claims.

By Mr. HELVERING: A bill (H. R. 10767) for the relief of John D. Baldwin; to the Committee on Claims.

Also, a bill (H. R. 10768) granting an increase of pension to Samuel Hays; to the Committee on Invalid Pensions.

By Mr. HUGHES of Georgia: A bill (H. R. 10769) granting an increase of pension to John J. Davidson, alias John Dinneen; to the Committee on Invalid Pensions.

By Mr. HOWELL: A bill (H. R. 10770) granting an increase of pension to Elizabeth H. Hyde; to the Committee on Invalid

By Mr. IGOE: A bill (H. R. 10771) for the relief of Martha A. Murphy; to the Committee on War Claims.

Also, a bill (H. R. 10772) granting an increase of pension to Susan Stewart; to the Committee on Invalid Pensions

By Mr. JACOWAY: A bill (H. R 10773) granting a pension to Kate Chance; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10774) granting a pension to Frank Doering; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10775) granting a pension to William A. Pollard; to the Committee on Pensions.

Also, a bill (H. R 10776) granting a pension to George W. Campbell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10777) granting a pension to Mrs. A. M. Hughes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10778) granting an increase of pension to Edward S. Banister; to the Committee on Pensions.

Also, a bill (H. R. 10779) granting an increase of pension to Mary A. Williams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10780) granting an increase of pension to Eliza J. Adams; to the Committee on Invalid Pensions,

Aiso, a bill (H. R 10781) granting an increase of pension to George W. Burton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10782) for the relief of John Davis; to the

Committee on Naval Affairs.
Also, a bill (H. R. 10783) for the relief of Patrick O'Kane; to the Committee on War Claims.

Also, a bill (H. R. 10784) for the relief of Edgar Shinn; to the Committee on Claims.

Also, a bill (H. R. 10785) for the relief of Leander Mason and others, heirs of Thomas M. Mason, deceased; to the Committee on War Claims.

Also, a bill (H. R. 10786) for the relief of the heirs of Jacob Pennington: to the Committee on War Claims.

Also, a bill (H. R. 10787) for the relief of the heirs of Peter Goodman; to the Committee on War Claims.

Also, a bill (H. R. 10788) for the relief of the heirs of Augusta W. Diehl, deceased; to the Committee on War Claims.

Also, a bill (H. R. 10789) for the relief of the legal representatives of Wiley J. Davis, deceased; to the Committee on War

By Mr. KIESS of Pennsylvania; A bill (H. R. 10700) granting a pension to Sophronia M. Bowker; to the Committee on Invalid Pensions.

By Mr. KINKEAD of New Jersey: A bill (H. R. 10701) for the relief of Thomas Johnson; to the Committee on Military Affairs.

Also, a bill (H. R. 10792) for the relief of Patrick Howe; to the Committee on Military Affairs. By Mr. LINTHICUM: A bill (H. R. 10793) granting an in-

crease of pension to Junius Thomas Turner; to the Committee on Invalid Pensions.

Also, a biil (H. R. 10794) granting a pension to May J. Wode;

to the Committee on Invalid Pensions.

By Mr. MITCHELL: A bill (H. R. 10795) granting an increase of pension to Albert A. Hunt; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10796) granting a pension to Harry E. Brooks; to the Committee on Pensions.

Also, a bill (H. R. 10797) granting a pension to Edward F. Lemoine; to the Committee on Pensions,

Also, a bill (H. R. 10708) granting an increase of pension to Jeremiah McCarthy; to the Committee on Invalid Pensions. Also, a bill (H. R. 10709) to correct the military record of

Arthur J. Bradley, allas Arthur J. Brady; to the Committee on Military Affairs.

Also, a bill (H. R. 10800) to remove charges against record of John J. McKenzie; to the Committee on Military Affairs.

Also, a bill (H. R. 10801) to remove the charge of desertion

against Thomas Casey, alias Thomas Clancy; to the Committee

on Military Affairs.

By Mr. MORRISON: A bill (H. R. 10802) granting an increase of pension to George V. Shallenberger; to the Committee on Pensions

Also, a bill (H. R. 10803) granting an increase of pension to Allen S. Thatcher; to the Committee on Invalid Pensions.

By Mr. MURRAY of Massachusetts: A bill (H. R. 10804) granting a pension to George G. Spurr, jr.; to the Committee on Pensions

By Mr. NEELEY of Kansas: A bill (H. R. 10805) authorizing the issuance of a patent to the northwest quarter section 27, township 17 south, range 40 west, Dodge City (Kans.) land district, to George H. Lowrey; to the Committee on the Public Lands.

By Mr. PARK: A bill (H. R. 10806) for the relief of William B. Adams, executor of the estate of Anan Willis, deceased; to

B. Adams, executor of the estate of Anal Willis, decease, the Committee on War Claims.

By Mr. REED; A bill (H. R. 10807) granting an increase of pension to James M. Caswell; to the Committee on Invalid Pensions.

By Mr. RIORDAN: A bill (H. R. 10808) granting a pension to Michael Grace; to the Committee on Invalid Pensions.

By Mr. SMITH of New York: A bill (H. R. 10809) granting a pension to Philip Bernhard; to the Committee on Pensions.

Also, a bill (H. R. 10810) for the relief of John Rohe; to the Committee on Military Affairs.

By Mr. J. M. C. SMITH: A bill (H. R. 10811) for the relief of Cyrus Dean; to the Committee on Military Affairs.

By Mr. TALCOTT of New York: A bill (H. R. 10812) granting an increase of pension to Emma McDermott; to the Committee on Invalid Pensions.

By Mr. TAYLOR of New York: A bill (H. R. 10813) for the relief of the dependent widow of Patrick Curran, civilian employee of the Government, who was killed while in the discharge of his duties at the United States naval magazine at Iona Island, N. Y.; to the Committee on Claims,

By Mr. THOMSON of Illinois: A bill (H. R. 10814) granting a pension to Hannah Elizabeth Boblett; to the Committee on

Invalid Pensions.

Also, a bill (H. R. 10815) granting a pension to Elvira M. Anderson; to the Committee on Invalid Pensions,
Also, a bill (H. R. 10816) granting a pension to Kathryn M.

Denoyer; to the Committee on Pensions.

Also, a bill (H. R. 10817) granting a pension to Clayton Huff; to the Committee on Pensions.

By Mr. WILLIS: A bill (H. R. 10818) granting an increase of pension to Helen G. Davis; to the Committee on Invalid

Pensions. By Mr. WOODS: A bill (H. R. 10819) granting an increase of pension to Theodore Walker; to the Committee on Pensions.

Also, a bill (H. R. 10820) for the relief of John M. Stewart, alias Jeremiah Marshall; to the Committee on Military Affairs.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the Federation of Jewish Farmers of America, favoring adequate rural credit facilities; to the Committee on Banking and Currency

Also (by request), petition of Rev. Theo. Szule, of the Catholic University of Washington, D. C., protesting against the passage of the Burnett immigration bill; to the Committee on Immigration and Naturalization.

Also (by request), petition of the Polish Women's Civic Club Wonda, of Chicago, Ill., protesting against the literacy test in the restriction of immigration; to the Committee on Immigration and Naturalization.

By Mr. ANTHONY: Petition of citizens of Topeka, Kans., favoring legislation to prohibit misbranding of articles made of fabric, leather, or rubber; to the Committee on Interstate and Foreign Commerce

By Mr. ASHBROOK: Memorial of the Glass Bottle Blowers' Association, Branch No. 1, Coshocton, Ohio, favoring the passage of House bill 1873; to the Committee on the Judiciary.

By Mr. BARCHFELD: Papers to accompany bill (H. 10746) granting an increase of pension to John Glon; to the Committee on Invalid Pensions.
